Amazon EMR: Amazon EMR Release Guide

Copyright © 2026 Amazon Web Services, Inc. and/or its affiliates. All rights reserved.

Amazon's trademarks and trade dress may not be used in connection with any product or service that is not Amazon's, in any manner that is likely to cause confusion among customers, or in any manner that disparages or discredits Amazon. All other trademarks not owned by Amazon are the property of their respective owners, who may or may not be affiliated with, connected to, or sponsored by Amazon.

This documentation is a draft for private preview for regions in the AWS European Sovereign Cloud. Documentation content will continue to evolve. Published: January 13, 2026.

Table of Contents

About Amazon EMR Releases 1
Standard support 2
Understanding Amazon EMR releases 2
Release versioning 3
Support policy 4
Considerations 7
Apache Spark Upgrade Agent 9
Introduction 9
Architecture Overview 9
Setup for Upgrade Agent 11
Using the Upgrade Agent 16
Features and Capabilities 19
Troubleshooting and Q&A 21
Spark Upgrade Agent Workflow In Details 23
Enable Data Quality Validation 24
Prompt Examples for the Spark Upgrade Agent 25
Creating target EMR Cluster/EMR-S application from existing ones 26
IAM Role Setup 28
VPC Endpoints Configuration 32
Using Spark Upgrade Tools 34
Cross-region processing for the Apache Spark Upgrade Agent 36
CloudTrail Logging 37
Service Improvements 41
Amazon EMR 7.x release versions 42
Application versions in Amazon EMR 7.x releases 43
emr-7.12.0 43
emr-7.11.0 68
emr-7.10.0 93
emr-7.9.0 161
emr-7.8.0 231

Release 4.5.0 4230
Release 4.4.0 4231

Release 4.3.0 4233
Release 4.2.0 4234
Configure applications 4236
Configure applications when you create a cluster 4238
Supply a configuration in the console when you create a cluster 4239
Supply a configuration using the AWS CLI when you create a cluster 4239
Supply a configuration using the Java SDK when you create a cluster 4240
Reconfigure an instance group in a running cluster 4240
Considerations when you reconfigure an instance group 4241
Reconfigure an instance group in the console 4244
Reconfigure an instance group using the CLI 4245
Reconfigure an instance group using the Java SDK 4250
Troubleshoot 4251
Store sensitive configuration data in AWS Secrets Manager 4254
Create a secret 4254
Grant Amazon EMR access to retrieve the secret 4254
Use the secret in a configuration classification 4255
Update the secret value 4256
Configure applications to use a specific Java Virtual Machine 4256
Considerations 4256
Override the JVM 4258
Service ports 4262
Application users 4263
Checking dependencies using the artifact repository 4265
EMR File System (EMRFS) 4268
Consistent view 4270
Enable consistent view 4274
Understanding how EMRFS consistent view tracks objects in Amazon S3 4275
Retry logic 4276
EMRFS consistent view metadata 4278
Configure consistency notifications for CloudWatch and Amazon SQS 4281
Configure consistent view 4283
EMRFS CLI Command Reference 4287
Authorizing access to EMRFS data in Amazon S3 4298
Creating a custom credentials provider for EMRFS data in Amazon S3 4298
Managing the default AWS Security Token Service endpoint 4300

Specifying Amazon S3 encryption using EMRFS properties ... 4301
Using AWS KMS keys for EMRFS encryption ... 4302
Amazon S3 server-side encryption ... 4303
Amazon S3 client-side encryption ... 4305
S3A file system ... 4313
S3A MagicV2 Committer ... 4313
Enable the MagicV2 Committer ... 4313
Considerations ... 4314
Migration Guide: EMRFS to S3A Filesystem ... 4314
Migration of Existing EMRFS Configurations to S3A Configurations ... 4315
Amazon S3 client-side encryption with S3A ... 4325
Setup CSE-KMS ... 4325
Setup CSE-CUSTOM ... 4326
Properties for Amazon S3 client-side encryption with S3A ... 4327
Amazon CloudWatch agent ... 4330
Create a cluster ... 4332
Required permissions ... 4332
Required endpoint ... 4333
Create the cluster ... 4333
Default metrics ... 4334
Configuration ... 4337
Amazon EMR 7.1.0 ... 4337
Amazon EMR 7.0.0 ... 4370
Considerations ... 4376
History ... 4376
Delta Lake ... 4383
Introduction ... 4383
Using Delta Lake clusters ... 4384
Delta Lake with Flink ... 4384
Delta Lake with Trino ... 4389
Delta Lake with Spark ... 4390
Delta Lake with Spark and Glue ... 4396
Considerations ... 4397
History ... 4398
Flink ... 4400
Creating a cluster with Flink ... 4403

Configure Flink ... 4404
Hive and Glue ... 4404
Config file ... 4406
Multiple primary nodes ... 4407
Memory process size ... 4408
Log output file size ... 4409
Java 11 ... 4410
Flink jobs ... 4415
Start a Flink YARN application as a step on a long-running cluster ... 4415
Submit work to an existing Flink application on a long-running cluster ... 4416
Submit a transient Flink job ... 4418
Flink Scala shell ... 4420
Flink UI ... 4421
Flink autoscaler ... 4422
Overview ... 4422
Considerations ... 4422
Enable autoscaler ... 4423
Configurations ... 4424
Optimize restart times ... 4429
Task-local recovery ... 4430
Incremental checkpoints ... 4431
Fine-grained recovery ... 4432
Combined restart ... 4433
Flink with Zeppelin ... 4433
Introduction ... 4433
Prerequisites ... 4434
Configure Zeppelin-Flink on an EMR cluster ... 4434
Run Flink jobs with Zeppelin-Flink on an EMR cluster ... 4436
Flink release history ... 4441
Flink release notes by version ... 4487
Ganglia ... 4491
Create a cluster with Ganglia ... 4493
View Ganglia metrics ... 4494
Hadoop and Spark metrics in Ganglia ... 4495
Ganglia release history ... 4496
Hadoop ... 4557

Configure Hadoop ... 4559
Task configuration ... 4559
Hadoop daemon configuration settings ... 4994
HDFS configuration ... 5320
Transparent encryption in HDFS on Amazon EMR ... 5321
Configuring HDFS transparent encryption ... 5322
Considerations for HDFS transparent encryption ... 5324
Hadoop key management server ... 5324
HDFS transparent encryption on EMR clusters with multiple master nodes ... 5328
Create or run a Hadoop application ... 5330
Build binaries using Amazon EMR ... 5330
Process data with streaming ... 5333
Process data with a custom JAR ... 5338
Read restored objects ... 5341
Examples ... 5342
Considerations ... 5343
Turn on non-uniform memory access awareness for YARN containers ... 5343
YARN container bin packing ... 5345
Enable the feature ... 5346
Considerations ... 4314
Hadoop version history ... 5346
Hadoop release notes by version ... 5413
HBase ... 5427
Creating a cluster with HBase ... 5431
Creating a cluster with HBase using the console ... 5431
Creating a cluster with HBase using the AWS CLI ... 5431
HBase on Amazon S3 (Amazon S3 storage mode) ... 5432
Enabling HBase on Amazon S3 ... 5434
Using a read-replica cluster ... 5435
Persistent HFile tracking ... 5437
Store File Tracking ... 5439
Operational considerations ... 5440
Write-ahead logs (WAL) for Amazon EMR ... 5444
WAL workspaces ... 5445
Required permissions ... 5446
Enabling WAL ... 5447

Restoring from WAL ... 5449
Security configurations ... 5450
Using AWS PrivateLink ... 5451
WAL pricing and metrics ... 5453
Tagging WAL workspaces ... 5454
EMR WAL cross-cluster replication ... 5455
Considerations and availability ... 5457
EMRWAL CLI reference ... 5459
Using the HBase shell ... 5462
Create a table ... 5463
Put a value ... 5463
Get a value ... 5463
Delete a table ... 5463
Access HBase tables with Hive ... 5464
Using HBase snapshots ... 5465
Create a snapshot using a table ... 5466
Delete a snapshot ... 5466
View snapshot info ... 5466
Export a snapshot to Amazon S3 ... 5467
Import snapshot from Amazon S3 ... 5467
Restore a table from snapshots within the HBase shell ... 5468
Configure HBase ... 5469
Changes to memory allocation in YARN ... 5470
HBase port numbers ... 5471
HBase site settings to optimize ... 5471
Performance considerations ... 5473
View the HBase user interface ... 5475
View HBase log files ... 5477
Monitor HBase with Ganglia ... 5478
Monitoring EMR HBase with Amazon CloudWatch ... 5480
Set up metrics ... 5481
Using the Metrics Destination ... 5484
Migrating from previous HBase versions ... 5485
Migrating to Amazon EMR version 7.4.0 or later ... 5485
HBase release history ... 5486
7.9.0 release notes ... 5572

HCatalog 5573
Creating a cluster with HCatalog 5574
Using HCatalog 5575
Disable direct write when using HCatalog HStorer 5575
Create a table using the HCat CLI and use that data in Pig 5576
Accessing the table using Spark SQL 5577
Example: Create an HCatalog table and write to it using Pig 5579
HCatalog release history 5580
Hive 5653
Differences and considerations for Hive on Amazon EMR 5656
Differences between Apache Hive on Amazon EMR and Apache Hive 5656
Differences in Hive between Amazon EMR release version 4.x and 5.x 5657
Additional features of Hive on Amazon EMR 5658
Configure an external metastore for Hive 5663
Using the AWS Glue Data Catalog as the metastore for Hive 5664
Using an external MySQL database or Amazon Aurora 5670
Use the Hive JDBC driver 5673
Improve Hive performance 5675
Enabling Hive EMRFS S3 optimized committer 5675
Using S3 Select 5677
MSCK Optimization 5679
Use Hive LLAP 5680
Enable LLAP 5680
Start LLAP on your cluster 5682
Check LLAP status 5682
Start or stop LLAP 5683
Resize LLAP daemon count 5683
Encryption in Hive 5683
Parquet modular encryption in Hive 5683
In-transit encryption in HS2 5687
Hive release history 5688
Hive release notes by version 5772
Hudi 5857
How Hudi works 5859
Understanding dataset storage types: Copy on write vs. merge on read 5859
Registering a Hudi dataset with your metastore 5860

Considerations and limitations ... 5861
Create a cluster with Hudi installed ... 5863
Work with a Hudi dataset ... 5863
Initialize a Spark session for Hudi ... 5867
Write to a Hudi dataset ... 5867
Upsert data ... 5872
Delete a record ... 5874
Read from a Hudi dataset ... 5875
Use the Hudi CLI ... 5877
Using Amazon EMR 7.9.0 and higher releases ... 5878
Hudi release history ... 5879
Hue ... 5883
Hue versions ... 5883
Supported and unsupported features of Hue on Amazon EMR ... 5885
Considerations ... 5886
Performance with large Hue metadata tables ... 5886
Incompatibility between Hue versions ... 5888
Connecting to the Hue web user interface ... 5888
Using Hue with a remote database in Amazon RDS ... 5889
Troubleshooting ... 5891
Advanced configurations for Hue ... 5891
Configure Hue for LDAP users ... 5892
Hue release history ... 5895
Iceberg ... 5962
How Iceberg works ... 5963
Use an Iceberg cluster ... 5965
Use an Iceberg cluster with Spark ... 5965
Use an Iceberg cluster with Trino ... 5974
Use an Iceberg cluster with Flink ... 5976
Use an Iceberg cluster with Hive ... 5981
Iceberg release history ... 5986
Iceberg release notes by version ... 5987
Jupyter Notebook ... 5990
EMR Studio ... 5990
EMR Notebook ... 5990
JupyterHub ... 5990

Create a cluster with JupyterHub ... 5995
Considerations when using JupyterHub on Amazon EMR ... 5997
Configuring JupyterHub ... 5997
Configuring persistence for notebooks in Amazon S3 ... 5999
Connecting to the master node and Notebook servers ... 6000
JupyterHub configuration and administration ... 6000
Adding Jupyter Notebook users and administrators ... 6002
Installing additional kernels and libraries ... 6013
JupyterHub release history ... 6018
Livy ... 6059
Enabling HTTPS ... 6061
Livy release history ... 6062
MXNet ... 6112
MXNet release history ... 6114
Oozie ... 6143
Using Oozie with a remote database in Amazon RDS ... 6146
Configure Java version for Oozie ... 6148
Oozie release history ... 6149
Oozie release notes by version ... 6211
Phoenix ... 6216
Creating a cluster with Phoenix ... 6219
Customizing Phoenix configurations ... 6220
Phoenix clients ... 6221
Phoenix release history ... 6224
Pig ... 6310
Submit Pig work ... 6312
Submit Pig work using the Amazon EMR console ... 6313
Submit Pig work using the AWS CLI ... 6314
Call user-defined functions from Pig ... 6315
Call JAR files from Pig ... 6315
Call Python/Jython scripts from Pig ... 6316
Pig release history ... 6317
Presto ... 6388
Using Presto with the AWS Glue Data Catalog ... 6390
Specifying AWS Glue Data Catalog as the metastore ... 6391
IAM permissions ... 5667

Considerations when using AWS Glue Data Catalog ... 6395
Using S3 Select Pushdown ... 6396
Is S3 Select Pushdown right for my application? ... 6396
Considerations and limitations ... 6397
Enabling S3 Select Pushdown with PrestoDB or Trino ... 6397

About Amazon EMR Releases

An Amazon EMR release is a set of open-source applications from the big-data ecosystem. Each release comprises different big-data applications, components, and features that you select to have Amazon EMR install and configure when you create a cluster. Applications are packaged using a system based on Apache BigTop, which is an open-source project associated with the Hadoop ecosystem. This guide provides information for applications included in Amazon EMR releases.

For more information about getting started and working with Amazon EMR, see the Amazon EMR Management Guide.

When you launch a cluster, you can choose from multiple releases of Amazon EMR. This allows you to test and use application versions that fit your compatibility requirements. You specify the release number with the *release label*. Release labels are in the form `emr-x.x.x`. For example, `emr-7.12.0`.

Beginning with Amazon EMR 5.18.0, you can use the Amazon EMR artifact repository to build your job code against the exact versions of libraries and dependencies that are available with specific Amazon EMR releases. For more information, see Checking dependencies using the Amazon EMR artifact repository.

To get updates when a new Amazon EMR release is available, subscribe to the RSS feed for Amazon EMR release notes.

Latest release details, including application versions, release notes, components, and configuration classifications of Amazon EMR 7.x, 6.x, and 5.x series:

- Amazon EMR Release 7.12.0
- Amazon EMR Release 6.15.0
- Amazon EMR Release 5.36.2

> **Note**
>
> New Amazon EMR releases are made available in different Regions over a period of several days, beginning with the first Region on the initial release date. The latest release version may not be available in your Region during this period.

Release notes for the latest Amazon EMR releases and a history of all releases:

- What's new?
- Amazon EMR archive of release notes

A comprehensive history of application versions in each Amazon EMR release:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

Details for each Amazon EMR release and differences between release series, where applicable:

- Amazon EMR 7.x release versions
- Amazon EMR 6.x release versions
- Amazon EMR 5.x release versions
- Amazon EMR 4.x release versions
- Amazon EMR 2.x and 3.x AMI versions

Amazon EMR standard support

Understanding Amazon EMR releases

The *Amazon EMR release* is the vehicle that delivers the necessary software to run your open-source applications on EC2, EKS, or Serverless platforms. An Amazon EMR release is composed of three pieces: the *Runtime Environment*, *Core Engines*, and *Extras*.

- **Runtime environment** – The runtime environment includes the operating system that's included as part of the Amazon Machine Image (AMI) or other container image when you launch your cluster or container (for example, Amazon Linux 2023). It also includes the language runtimes such as the Amazon Corretto JDK, along with other related tools that the image installs.
- **Core engines** – These include the core open-source software such as Apache Hive, and open table formats such as Apache Iceberg.

- **Extras** – These include convenience libraries and Python packages such as `mariadb-connector-java` and open-source software such as Apache Pig.

The Amazon EMR release version that you select bundles all these components into a new version of Amazon Linux (AL) based Amazon Machine Images (AMI) or container images. Amazon EMR maintains the same AL version for all nodes of a cluster, EKS container, or serverless application. Amazon EMR aims to get the latest *Runtime Environment* within 90 days of their release by Amazon Linux, and new open-source versions of *Core Engines* within 90 days from the upstream release. *Extras* are released as needed. You can find the list of the software in release notes for each Amazon EMR release.

Release versioning

To help you understand the scope of changes in each release, Amazon EMR uses semantic versioning. Semantic versioning follows a format of `<major>.<minor>.<patch>`. As an example, let's consider the 7.0.0 release.

The first digit denotes the major version release, or **Major Release**. Major Releases typically bring substantial changes, improvements, and new features to Runtime Environment or Core Engine that are not backward compatible. For example, the 7.x Major Release uses Amazon Linux 2023 with Amazon Corretto 17 JDK as default. As a result, the release contains several breaking changes compared to 6.x Major Release, which ships on Amazon Linux 2 and with Amazon Corretto 8 JDK as default.

The second digit denotes the minor version release, or **Minor Release**. Minor Releases are non-backward compatible releases that contain incremental changes, improvements, and features to Core Engines and Extras, and new functionality. For example, 6.15 uses Apache Spark 3.4.1, compared to 6.11.1, which ships with Apache Spark 3.3.2.

The third digit denotes a patch version release, or **Patch Release**. Patch Releases are intended to be backward compatible releases that contain fixes and patch updates to *Core Engine* and *Extras*, but no new functionality or OSS version upgrades. For example, 6.11.1 and 6.11.0 both contain the same Apache Spark 3.3.2 OSS version. As of 6.6.x, the latest Patch Release offers the latest *Runtime Environment* patch available. *Runtime Environment* does not affect the Patch Release of Amazon EMR. For example, 6.11.1 launched with AL version 2.0.20240109.0 from December 19, 2023 to January 10, 2024, but with AL version 2.0.20240124.0 from January 11, 2024. Some Amazon EMR on EKS releases allow you to add tags or suffixes to the sematic versions to provide you with alternate functionalities. For example, the `emr-6.15.0-latest` release of Amazon EMR

on EKS launches an Amazon Corretto 8 JDK enabled release version, whereas the `emr-6.15.0-java17-latest` release of Amazon EMR on EKS allows you to launch an Amazon Corretto 17 JDK enabled release version.

Support policy

Introduction

Amazon EMR aims to issue new Minor Releases at a minimum of once every 90 days, and to provide support for Minor Releases for a period of 24 months starting from the release date. This support covers *Runtime Environment* and *Core Engines* with their associated dependencies, and doesn't cover *Extras* or their associated dependencies. *Runtime Environment* also includes proprietary platform components and APIs that are needed to start, stop, and operate the clusters and applications. This consistent release schedule ensures a predictable cycle, making it more convenient for you to plan, test, and transition to a version that provides support and security.

What to expect with Standard Support

Standard Support provides fixes on technical support tickets for issues that you encounter for *Runtime Environment* and *Core Engines* components under recommended configurations. All fixes are subject to availability. The recommended configuration is the use of Amazon EMR without any modification, additions, or changes to the binaries and configurations present in an Amazon EMR release, except those found in the Amazon EMR Documentation. Amazon EMR deploys fixes to the latest patch, minor, or major version of the Amazon EMR release within 90 days of us verifying the fix. Amazon EMR automatically applies fixes when you launch a new EMR on EC2 cluster, launch a new Amazon EMR on EKS container, or trigger a new EMR Serverless job. Extra components are provided as a convenience and Amazon EMR does **not** provide fixes related to *Extras*.

Components

Standard Support covers *Runtime Environment* and *Core Engines* components – for example, operating system, language runtimes, and core open-source software like Apache Hive and Apache Iceberg. You can find the full list of supported components for each release in *About Amazon EMR Releases* and Amazon Linux FAQs.

The following list describes the support that we provide for different component types under Standard Support:

- **Runtime Environment components**: *Runtime Environment* components will receive fixes on technical support tickets. Fixes are categorized as (a) critical bugs, (b) critical data corruption

issues, and (c) critical security issues. When eligible, Amazon EMR will backport fixes for *Runtime Environment* to older versions. For operational compatibility with the open-source Core Engine components, certain *Runtime Environment* components must remain at specific versions to prevent breaking customer applications. For these components, Amazon EMR is dependent on upstream open-source for availability of fixes. When fixes are available in open source, we will provide the latest stable version within 90 days of them being verified by Amazon EMR.

- **Core Engines components**: *Core Engines* provides the latest versions for many open-source projects, each having hundreds of transitive dependency libraries. While the open-source communities managing these projects attempt to address issues and known Common Vulnerabilities and Exposures (CVE) on a frequent basis, the latest versions might still contain known bugs and CVEs. Amazon EMR is dependent on upstream open-source for availability of fixes and will provide the latest stable version as part of the *Core Engine* components within 90 days of them being verified by Amazon EMR. In certain cases, Amazon EMR might provide a fix for a CVE in one of the *Core Engine* components that needs to be addressed ahead of upstream open source. Amazon EMR also provides you with technical support and fixes on features that are added on top of open source under recommended configurations. We don't backport fixes for *Core Engine* components to older Patch or Minor versions.
- **Extras components**: Amazon EMR does **not** support *Extras* components. Extra components are open-source projects provided as convenience and Amazon EMR does not provide fixes for issues encountered with them. Any support requests or fixes can be addressed through the open-source community supporting these components.

Standard Support lifecycle

The following describes the milestones in the Standard Support lifecycle:

- **Standard Support**: Amazon EMR releases are eligible for Standard Support 24 months from the date of release. You can create technical support tickets and expect updates for issues that you encounter with these releases.
- **End of Support**: After Standard Support ends, Amazon EMR releases enter End of Support (EoS) stage for 12 months. EoS releases are not eligible for technical support and you won't be able to create any tickets for clusters, containers, or jobs running on these releases. EoS releases won't receive any fixes, patches or updates. EoS releases will be removed from the console, but will continue to be available through the API and AWS CLI. You can always continue to run workloads on EoS releases. We strongly recommend that you migrate to the latest Amazon EMR release

so that you continue to receive security patches, remain eligible for technical support, and can create support tickets when needed.

- **End of Life**: After the End of Support (EoS) term, releases are considered End of Life (EoL). Although you can continue to run EoL clusters, Amazon EMR reserves the right to remove EoL releases from the API and SDK on a case-by-case basis due to security and operational concerns. We strongly recommend that you migrate to the latest Amazon EMR, release because EoL versions can be removed from the API and SDK in exceptional cases.

Bridge Support

Amazon EMR announced this new support policy on July 25, 2024. Under this policy, versions of Amazon EMR released on or before July 24th, 2022 are now designated as End of Support. However, to provide you with additional time to plan and migrate to newer versions, Amazon EMR will offer Bridge Support, equivalent to Standard Support, for these older versions that released within the two-year period before this announcement.

After July 25, 2024, you can refer to the current status and support timelines in the release notes.

The following table shows the support status for all existing Amazon EMR releases at time of announcement of the policy, July 25, 2024:

Releases and supported periods

Amazon EMR release version	Initial release date	Standard support end date	End of support start date	End of life start date
7.2.0	July 25, 2024	July 24, 2026	July 25, 2026	July 25, 2027
7.1.0	April 23, 2024	Bridge support until April 30, 2026	May 1, 2026	May 1, 2027
7.0.0	December 19, 2023	Bridge support until April 30, 2026	May 1, 2026	May 1, 2027

Amazon EMR release version	Initial release date	Standard support end date	End of support start date	End of life start date
5.36.x and 6.6.x – 6.15.x	May 9, 2022 to November 13, 2023	Bridge support until April 30, 2026	May 1, 2026	May 1, 2027
• 6.x series: 6.5.0 and lower • 5.x series: 5.35.0 and lower • 4.x, 3.x, and 2.x series	January 1, 2013 to March 30, 2022	Bridge support until April 30, 2026	May 1, 2026	May 1, 2027

Note

Dates for bridge support have been extended to April 30, 2026, for all releases.

You can use Apache Spark Upgrade Agent to upgrade your Apache Spark existing applications on EMR on EC2 and EMR Serverless from older EMR versions to latest EMR version. To learn more, see What is Apache Spark Upgrade Agent for Amazon EMR.

Considerations

Standard Support is available for all Amazon EMR deployment models (EMR on EC2, Amazon EMR on EKS, and EMR Serverless), in all Regions where Amazon EMR is available, at no additional cost. Clusters running with recommended configurations are automatically eligible for support as described in the policy, so you don't need to take any additional actions to activate support.

- Standard Support only supports components required for Amazon EMR clusters. Amazon EMR can't guarantee security patching and fix availability in the case when *Core Engine* open-source components reach EoL upstream, or when security updates are no longer available for dependencies. While you can opt-in to install *Extras*, Amazon EMR won't support them or their

dependencies. For example, you can install third-party applications in your custom AMI to harden the security of your cluster, install additional components or copy objects using bootstrap action scripts, or SSH into your cluster and upgrade the default package versions. Amazon EMR does not support these components. Standard Support doesn't cover customer provided bootstrap actions, packages, libraries, your custom code and bring-your-own custom applications that you can configure Amazon EMR to install for your convenience.

- Your existing clusters won't be impacted, regardless of which Amazon EMR release they're running. You can continue to run existing clusters without disruption. You can also continue to launch new clusters and run jobs on any of the existing releases and new releases. All existing releases and new releases at time of the policy becoming effective are covered by Standard Support for 24 months from initial date of release of the Amazon EMR release version. Amazon EMR will provide you with bridge support during the initial announcement of the policy. To receive uninterrupted support, we advise testing your applications and promptly upgrading to the most recent Amazon EMR release.
- Amazon EMR won't change Standard Support components on existing releases or clusters. However, Amazon EMR reserves the right to honor the upstream End of Life on a case-by-case basis, and remove such components in the new releases, or move the existing release to End of Support (EoS), or End of Life (EoL) status in exceptional cases. We'll notify you of any removal through available channels.
- When a new Region is launched, Amazon EMR will only support Amazon EMR release versions under Standard Support, released in six months prior to the date of of when new Region becomes generally available.
- Amazon EMR won't automatically update your existing clusters to latest versions. However, you can choose to update new clusters to the latest patch versions if desired.
- The cost of your unsupported Amazon EMR usage will count toward your AWS bill. Even if you are using Amazon EMR in an unsupported way, the costs associated with that usage are still part of your overall AWS consumption and will be included in the calculation of your support fees.

For more information, contact AWS Developer Support.

What is Apache Spark Upgrade Agent for Amazon EMR

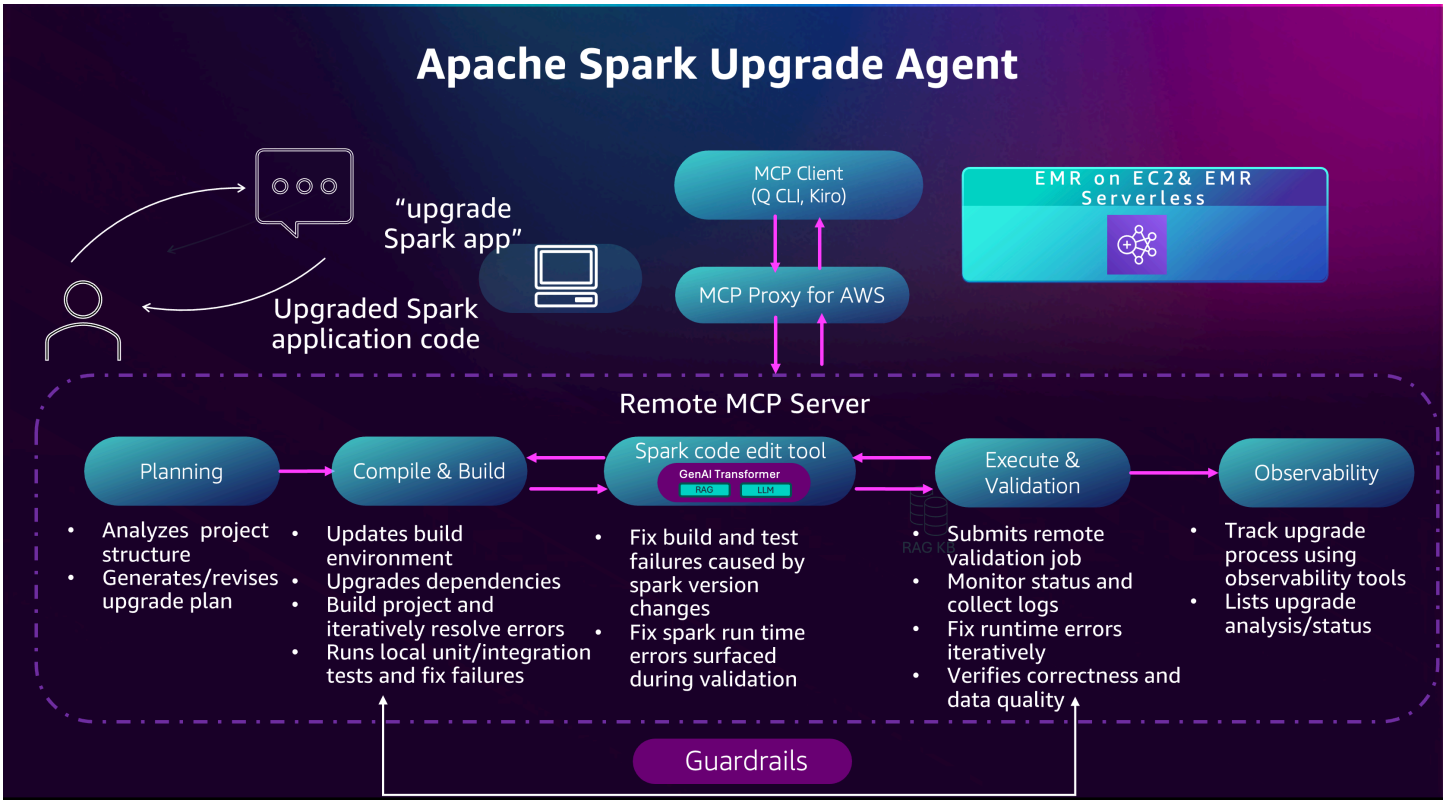
Introduction

The Apache Spark Upgrade Agent for Amazon EMR is a conversational AI capability that accelerates Apache Spark version upgrades for your EMR applications. Traditional Spark upgrades require months of engineering effort to analyze API changes, resolve dependency conflicts, and validate functional correctness. The agent simplifies the upgrade process through natural language prompts, automated code transformation, and data quality validation.

You can use the agent to upgrade PySpark and Scala applications running on Amazon EMR on EC2 and Amazon EMR Serverless. The agent analyzes your code, identifies required changes, and performs automated transformations while maintaining your approval control over all modifications.

Architecture Overview

The upgrade agent has three main components: any MCP-compatible AI Assistant in your development environment for interaction, the MCP Proxy for AWS that handles secure communication between your client and the MCP server, and the Amazon SageMaker Unified Studio Managed MCP Server (in preview) that provides specialized Spark upgrade tools for Amazon EMR. This diagram illustrates how you interact with the Amazon SageMaker Unified Studio Managed MCP Server through your AI Assistant.



The AI assistant will orchestrate the upgrade using specialized tools provided by the MCP server following these steps:

1. **Planning**: The agent analyzes your project structure and generates or revises an upgrade plan that guides the end-to-end Spark upgrade process.
2. **Compile and Build**: The agent updates the build environment and dependencies, compiles the project, and iteratively fixes build and test failures.
3. **Spark code edit tools**: The agent applies targeted code updates to resolve Spark version incompatibilities, fixing both build-time and runtime errors.
4. **Execute & Validation**: The agent submits remote validation jobs to EMR, monitors execution and logs, and iteratively fixes runtime and data-quality issues.
5. **Observability**: The agent tracks upgrade progress using EMR observability tools and allows users to view upgrade analyses and status at any time.

Please refer to Using Spark Upgrade Tools for a list of major tools for each steps.

Setup for Upgrade Agent

> **Note**
>
> The Apache Spark Upgrade Agent uses cross-region inference to process natural language requests and generate responses. For more details please refer to this page on Cross-region processing for the Apache Spark Upgrade Agent. The Amazon SageMaker Unified Studio MCP server is in preview and is subject to change.

Prerequisites

Before we begin our setup process for integration with Kiro CLI, make sure you have the following installed on your workstation:

- Install AWS CLI
- Install Python 3.10+
- Install the uv package manager for MCP Proxy for AWS
- Install Kiro CLI

- AWS local credentials configured (via AWS CLI, environment variables, or IAM roles) - for local operations such uploading upgraded job artifacts for EMR validation job execution.

Setup Resources

You can use an CloudFormation template to setup the resource for the MCP server. These templates are samples that you should modify to meet your requirements. The template creates the following resources for the upgrade process:

- IAM role which has permissions to call MCP Server and required permissions for upgrade process for the underlying EMR platform.
- Amazon S3 staging bucket used to upload upgrade artifacts and optional KMS key for Amazon S3 encryption.

Choose one of the **Launch Stack** buttons in the following table. This launches the stack on the CloudFormation console in the respective region.

Region	Launch
US East (N. Virginia)	
US East (Ohio)	
US West (Oregon)	
Europe (Ireland)	
Asia Pacific (Tokyo)	
Asia Pacific (Singapore)	
Asia Pacific (Sydney)	

Region	Launch
Canada (Central)	Launch Stack
South America (São Paulo)	Launch Stack
Europe (Frankfurt)	Launch Stack
Europe (Stockholm)	Launch Stack
Europe (London)	Launch Stack
Europe (Paris)	Launch Stack
Asia Pacific (Seoul)	Launch Stack
Asia Pacific (Mumbai)	Launch Stack

Proceed to the **Specify stack details** page, enter the **Stack name**. Enter additional information under **Parameters**. Provide the following information and proceed to create the stack.

- **SparkUpgradeIAMRoleName** - Name of the IAM role to use for Spark upgrade process
- **EnableEMREC2** - Enable EMR-EC2 upgrade permissions (default: true)
- **EnableEMRServerless** - Enable EMR-Serverless upgrade permissions (default: true)
- **StagingBucketPath** - Amazon S3 path for staging artifacts (e.g., s3://my-bucket/spark-upgrade or my-bucket/spark-upgrade). Leave empty to auto-generate a new bucket
- **UseS3Encryption** - Enable KMS encryption for Amazon S3 staging bucket (default: false, set to true to use KMS encryption instead of default S3 encryption)
- **S3KmsKeyArn** - (Optional) ARN of existing KMS key for Amazon S3 bucket encryption. Only used if UseS3Encryption is true and you have an existing bucket with a KMS key
- **CloudWatchKmsKeyArn** - (Optional) ARN of existing KMS key for CloudWatch Logs encryption (EMR Serverless only, leave empty for default encryption)

- **EMRServerlessS3LogPath** - (Optional) S3 path where EMR-Serverless application logs are stored (e.g., s3://my-bucket/emr-serverless-logs or my-bucket/emr-serverless-logs). When provided, grants the IAM role read access to these logs for analysis. Only used when EnableEMRServerless is true
- **ExecutionRoleToGrantS3Access** - (Optional) IAM Role Name or ARN of existing EMR-EC2/EMR-Serverless execution role to grant Amazon S3 staging bucket access. Only applies when a new staging bucket is created. Useful for granting EMR job execution roles access to the staging bucket. Supports both simple role names and ARNs with paths.

You may also download and review the CloudFormation template, specify the options above and launch the template by yourself with CloudFormation CLI commands, see below for an example:

```
# deploy the stack with CloudFormation CLI commands
aws cloudformation deploy \
  --template-file spark-upgrade-mcp-setup.yaml \
  --stack-name spark-mcp-setup \
  --region <your mcp server launch region> \
  --capabilities CAPABILITY_NAMED_IAM \
  --parameter-overrides \
    ExecutionRoleToGrantS3Access=<your EMR or EMR Serverless job execution role>

# retrieve the 1-line instruction to set the local environment variables, which will be
 used for the following MCP server configuration
aws cloudformation describe-stacks \
  --stack-name spark-mcp-setup \
  --region <your mcp server launch region> \
  --query "Stacks[0].Outputs[?OutputKey=='ExportCommand'].OutputValue" \
  --output text
```

Open the Outputs tab (or retrieve from the CloudFormation describe-stacks CLI command above) and copy the 1-line instruction `ExportCommand`, then execute it in your local environment. Example 1-line instruction:

```
export SMUS_MCP_REGION=<your mcp server launch region> && export
 IAM_ROLE=arn:aws:iam::111122223333:role/spark-upgrade-role-xxxxxx && export
 STAGING_BUCKET_PATH=<your staging bucket path>
```

Then run the following command locally to setup the IAM profile and MCP server configuration

```
# Step 1: Configure AWS CLI Profile
aws configure set profile.spark-upgrade-profile.role_arn ${IAM_ROLE}
aws configure set profile.spark-upgrade-profile.source_profile <AWS CLI Profile to
 assume the IAM role - ex: default>
aws configure set profile.spark-upgrade-profile.region ${SMUS_MCP_REGION}

# Step 2: if you are using Kiro CLI, use the following command to add the MCP
 configuration
kiro-cli-chat mcp add \
    --name "spark-upgrade" \
    --command "uvx" \
    --args "[\"mcp-proxy-for-aws@latest\",\"https://sagemaker-unified-studio-
mcp.${SMUS_MCP_REGION}.api.aws/spark-upgrade/mcp\", \"--service\", \"sagemaker-
unified-studio-mcp\", \"--profile\", \"spark-upgrade-profile\", \"--region\",
 \"${SMUS_MCP_REGION}\", \"--read-timeout\", \"180\"]" \
    --timeout 180000\
    --scope global
```

This should update ~/.kiro/settings/mcp.json to include the MCP server configuration as below.

```
{
  "mcpServers": {
    "spark-upgrade": {
      "type": "stdio",
      "command": "uvx",
      "args": [
        "mcp-proxy-for-aws@latest",
        "https://sagemaker-unified-studio-mcp.us-east-1.api.aws/spark-upgrade/mcp",
        "--service",
        "sagemaker-unified-studio-mcp",
        "--profile",
        "spark-upgrade-profile",
        "--region",
        "us-east-1",
        "--read-timeout",
        "180"
      ],
      "timeout": 180000,
      "disabled": false
    }
  }
```

```
}
```

See Using the Upgrade Agent for the configuration guidance for different MCP clients like Kiro, Cline and GitHub CoPilot.

Using the Upgrade Agent

Supported Deployment Modes

Apache Spark Upgrade Agent for Amazon EMR support the following two deployment mode for the end-to-end Spark application upgrade experience including build file upgrade, script/dependency upgrade, local test and validation with target EMR cluster or EMR Serverless application, and data quality validation.

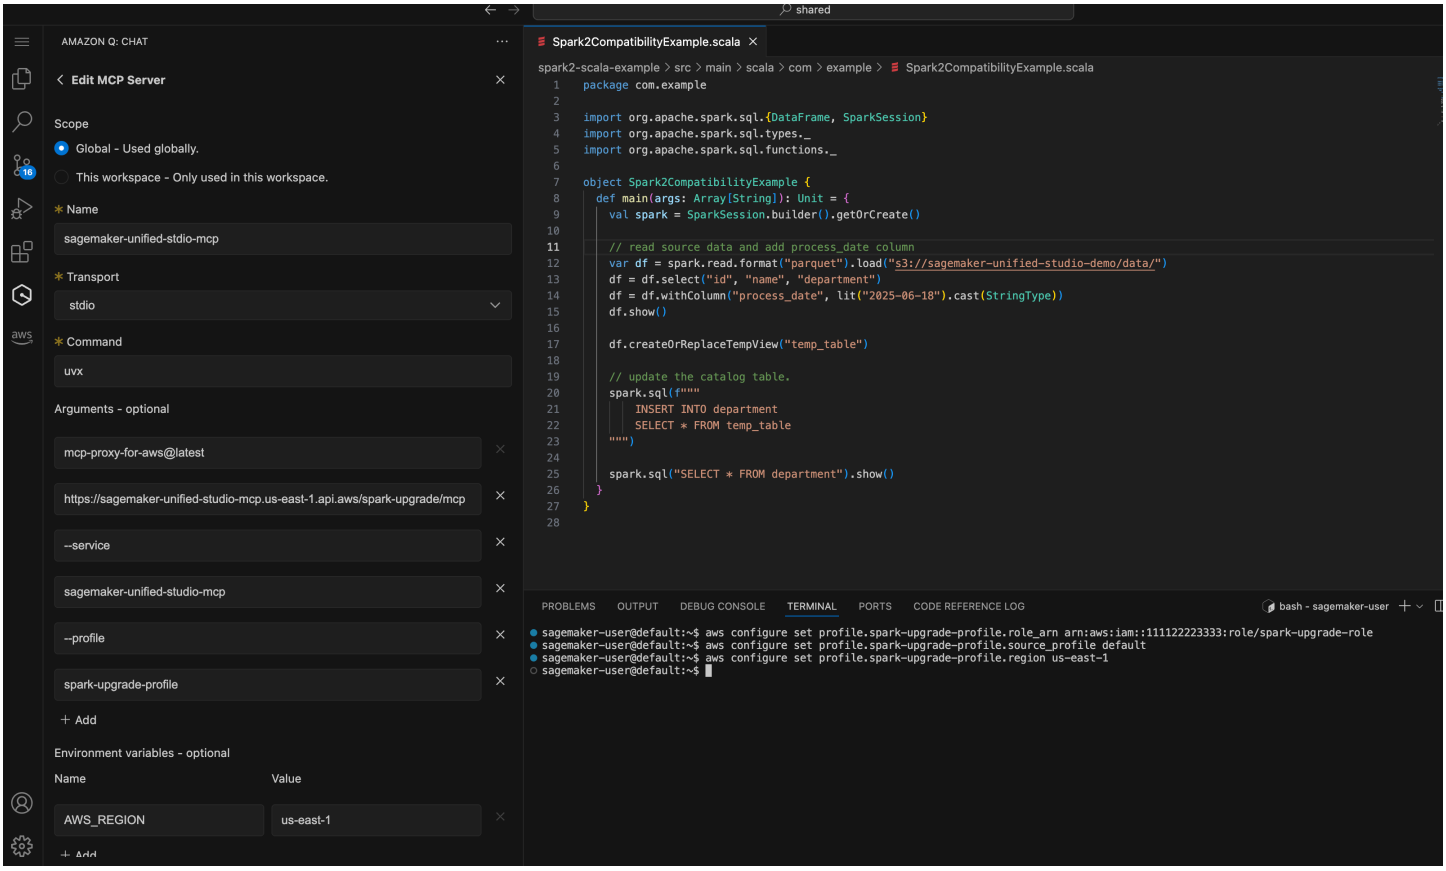
- EMR on EC2
- EMR Serverless

Please refer to Features and Capabilities to understand the detailed features, capacities and limitations.

Supported Interfaces

Integration With Amazon SageMaker Unified Studio VS Code Editor Spaces

On Amazon SageMaker Unified Studio VS Code Editor Spaces, you can configure the IAM profile and MCP config as described in the Setup for Upgrade Agent by simply following the screenshot below:



A demonstration of the EMR on EC2 upgrade experience with SMUS VS code editor. It starts with a simple prompt to ask to the Agent start the Spark Upgrade process.

```
Upgrade my Spark application <local-project-path> from EMR version 6.0.0 to 7.12.0.
Use EMR-EC2 Cluster <cluster-id> to run the validation and s3 paths
s3://<please fill in your staging bucket path> to store updated application artifacts.

Use spark-upgrade-profile for AWS CLI operations.
```

Integration With Kiro CLI (QCLI)

Start Kiro CLI or your AI Assistant and verify the loaded tools for the upgrade agent.

```
...
spark-upgrade (MCP):
- check_and_update_build_environment     * not trusted
- check_and_update_python_environment    * not trusted
- check_job_status                       * not trusted
- compile_and_build_project              * not trusted
...
```

A demonstration of the EMR Serverless upgrade experience with Kiro CLI. You can simply start the Upgrade process with the following prompt:

```
Upgrade my Spark application <local-project-path> from EMR version 6.0.0 to 7.12.0.
Use EMR-Serverless Applicaion <application-id> and execution role <your EMR Serverless
 job execution role> to run the validation and s3 paths
s3://<please fill in your staging bucket path> to store updated application artifacts.
```

Integration with Other IDEs

The configuration can also be used in other IDEs to connect to the Managed MCP server:

- **Integration With Cline** - To use the MCP Server with Cline, modify the `cline_mcp_settings.json` and add the configuration above. Consult Cline's documentation for more information on how to manage MCP configuration.
- **Integration With Claude Code** To use the MCP Server with Claude Code, modify the configuration file to include the MCP configuration. The file path varies depending on your operating system. Refer to https://code.claude.com/docs/en/mcp for detailed setup.
- **Integration With GitHub Copilot** - To use the MCP server with GitHub Copilot, follow the instruction in https://docs.github.com/en/copilot/how-tos/provide-context/use-mcp/extend-copilot-chat-with-mcp to modify the corresponding configuration file and follow the instructions per each IDE to activate the setup.

Setup EMR Cluster or EMR Serverless Application for the Target Version

Create the EMR cluster or EMR Serverless application with the expected Spark version that you plan to use for the upgraded application. The target EMR Cluster or EMR-S Application will be used to submit the validation job runs after the Spark application artifacts are upgraded to verify successful upgrade or fix additional errors encountered during the validation. If you already have a target EMR cluster or EMR Serverless application, you can refer to the existing one and skip this step. Use non-production developer accounts and select sample mock datasets that represent your production data but are smaller in size for validation with Spark Upgrades. Please refer to this page for the guidance to create a target EMR cluster or EMR Serverless application from existing ones: Creating target EMR Cluster/EMR-S application from existing ones.

Features and Capabilities

Supported Technologies

- **Languages**: Python and Scala applications
- **Build Systems**: Maven and SBT for Scala projects; requirements.txt, Pipfile, and Setuptools for Python projects
- **Target Platforms**: Amazon EMR and EMR Serverless
- **Supported Versions**: We support Apache Spark upgrades from version 2.4 to 3.5. The corresponding deployment mode mappings are as follows
  - **For EMR-EC2**
    - **Source Version:** EMR 5.20.0 and later
    - **Target Version:** EMR 7.12.0 and earlier, should be newer than EMR 5.20.0
  - **For EMR Serverless**
    - **Source Version:** EMR Serverless 6.6.0 and later
    - **Target Version:** EMR Serverless 7.12.0 and earlier

What We Upgrade

The upgrade agent provide comprehensive Spark application upgrades:

- **Build Configuration**: Automatically updates dependency management files (pom.xml, requirements.txt, etc.)
- **Source Code**: Fixes API compatibility issues and deprecated method usage
- **Test Code**: Ensures unit and integration tests work with the target Spark version
- **Dependencies**: Upgrades packaged dependencies to versions compatible with target EMR version
- **Validation**: Compiles and validates applications on target EMR clusters
- **Data Quality Analysis**: Detects schema differences, value-level statistical drifts (min/max/mean), and aggregate row-count mismatches, with detailed impact reporting.

Available Regions

The Spark Upgrade Agent is available in the following regions:

- **Asia Pacific**: Tokyo (ap-northeast-1), Seoul (ap-northeast-2), Singapore (ap-southeast-1), Sydney (ap-southeast-2), and Mumbai (ap-south-1)
- **North America**: Canada (ca-central-1)
- **Europe**: Stockholm (eu-north-1), Ireland (eu-west-1), London (eu-west-2), Paris (eu-west-3), and Frankfurt (eu-central-1)
- **South America**: São Paulo (sa-east-1)
- **United States**: North Virginia (us-east-1), Ohio (us-east-2), and Oregon (us-west-2)

Scope of Upgrades and User Requirements

- **Cluster Management**: Spark Upgrade Agent focuses on application code upgrades. Target EMR clusters for new versions must be created and managed by users.
- **Bootstrap Actions**: Spark Upgrade Agent does not upgrade custom bootstrap scripts outside of Spark application code. They need to be upgraded by the user.
- **Upgrade for Build and Tests**: The upgrade agent will perform build and run your unit and integration tests on your development environment locally to validate that applications compile successfully with the target Spark version. If you have restrictions (security policies, resource limitations, network restrictions, or corporate guidelines) for Spark application code for local execution, consider using Amazon SageMaker Unified Studio VSCode IDE Spaces or EC2 to run the upgrade agent. The upgrade agent uses your target EMR-EC2 cluster or EMR-S applications to validate and upgrade end-to-end.
- **Error-Driven Approach**: The upgrade agent uses an error-driven methodology, making one fix at a time based on compilation or runtime errors rather than multiple fixes at once. This iterative approach ensures each issue is properly addressed before proceeding to the next.
- **Private Dependencies**: Dependencies installed from private artifact repositories cannot be automatically upgraded as part of this process. They must be upgraded by the user.
- **Regional resources**: Spark upgrade agent is regional and uses the underlying EMR resources in that region for the upgrade process. Cross-region upgrades are not supported.

Troubleshooting and Q&A

Troubleshooting

The error message from the upgrade process is available in different ways for different MCP clients. In this page, we list some general guidance for common issues you may see using Apache Spark Upgrade Agent for Amazon EMR.

Topics

- Error: SMUS Managed MCP server failed to load
- Observation : Slow Tool Loading
- Error: Tool Invocation Failed with Throttling Error
- Error: Tool Responds With User Error
- Error: Tool Responds With Internal Error

Error: SMUS Managed MCP server failed to load

- Verify your MCP configuration are properly configured.
- **Validate JSON syntax**:
  - Ensure your JSON is valid with no syntax errors
  - Check for missing commas, quotes, or brackets
- Verify your local AWS credentials and verify the policy for the MCP IAM role are properly configured.
- Run /mcp to verify MCP server availability for `Kiro-CLI` case

Observation : Slow Tool Loading

- Tools may take a few seconds to be loaded on first attempt of launching the server.
- If tools don't appear, try restarting the chat,
- Run `/tools` command to verify tool availability.
- Run `/mcp` if the server is launched without error.

Error: Tool Invocation Failed with Throttling Error

If you hit your service limit, please wait for a few seconds to issue a tool invocation if you see the throttling exception.

Error: Tool Responds With User Error

- AccessDeniedException - check the error message and fix the permission issue.
- InvalidInputException - check the error message and correct the tool input parameters.
- ResourceNotFoundException - check the error message and fix the input parameter for resource reference.

Error: Tool Responds With Internal Error

- If you see `The service is handling high-volume requests` please retry the tool invocation in a few seconds.
- If you see `INTERNAL SERVICE EXCEPTION` please document the analysis id, tool name, any error message available from the mcp log or tool response and optional sanitized conversation history and reach out to the AWS support.

Q&A

1. Should I enable "trust" setting for the tools by default?

Do not turn on "trust" setting by default for all tool calls initially and operate on git-versioned build environment. Review each tool execution to understand what changes are being made, for example review the upgrade plan before providing consent. Never trust the Kiro or your Agent's `fs_write` tool - this tool modifies your project files and you should always review changes before they are saved/committed. In general, examine all proposed file changes before allowing them to be written. Use git to version changes and create checkpoints throughout the upgrade process. Build confidence gradually - If you are repeatedly using the system for multiple upgrades and have gained confidence in the tools, you can selectively trust certain tools.

2. What are the common example prompts to leverage the upgrade tools?

Please refer to Prompt Examples for the Spark Upgrade Agent for the prompt examples about leveraging upgrade tools.

Spark Upgrade Agent Workflow In Details

To initiate the upgrade process, you will need the Spark application code cloned to your developer environment (locally or EC2 or Amazon SageMaker Unified Studio IDE Spaces), preferably with Git version control initialized. Additionally, an EMR cluster running the target Spark version must be provisioned and accessible. Finally, a designated Amazon S3 bucket path should be configured to store deployment artifacts and upgrade summary throughout the upgrade process.

Once these requirements are established, you can submit a prompt like the following to kick off the upgrade workflow:

```
Upgrade my Spark application <local-project-path> from EMR version 6.0.0 to 7.12.0.
Use EMR-EC2 Cluster <cluster-id> to run the validation and s3 paths
s3://<please fill in your staging bucket path> to store updated application artifacts.
```

At this point, the agent will orchestrate the upgrade using specialized tools (for more details). The workflow follows these steps:

1. **Generate Plan**: The agent will analyze your project structure and generate an upgrade plan. Review the plan and provide your consent to proceed.
2. **Plan Review and Customization**: When prompted to review the plan, you have several options:
   a. **Proceed as-is**: Accept the plan and continue with execution
   b. **Provide feedback**: Customize the plan by:
      i. Removing unnecessary steps - Example: Remove any integration test execution. Only compile/build locally, then proceed to EMR validation.
      ii. Adding additional steps - Example: Add a step to run test file `tests/test_jobs/test_etl_job_x.py` before EMR validation.
      iii. Modifying the upgrade approach - Example: Enforce Python 3.10 and Java 17 during the build and validation steps.
3. The agent will regenerate the plan based on your feedback and ask for consent again. This process continues until you approve the final plan
4. **Compile and Build**: The agent will make iterative changes to fix build errors until the application compiles and builds successfully.
5. **Run unit and Integration Tests**: If the project has tests, the agent will run the tests after a successful build. If any tests fail, the agent will modify the source code iteratively until the tests pass before proceeding to EMR validation.

6. **Runtime Fixes and Validation**: The agent will validate the application on the target EMR cluster and iteratively fix any runtime errors until validation is successful. Upon completion, you'll see a summary of all changes made for compatibility.
7. **Summary for the upgrade**: Once the upgrade is complete, the agent will provide a summary of all code and configuration changes, dependency version updates, and any detected data quality mismatches for your review.

Enable Data Quality Validation

You can enable data quality checks by providing both source and target cluster IDs in your prompt. The system runs your existing application on the source cluster to collect baseline metadata for comparison.

Note: Only Spark write operations can be tracked for data quality.

```
Upgrade my pyspark application <local-path>/pyspark-example-24/ from EMR version 6.0.0
 to 7.12.0. Use EMR-EC2 Cluster <source-cluster-id> for source version run
and <target-cluster-id> for target version run. Use s3 path s3://<please fill in your
 staging bucket path> to store updated application artifacts
and s3://<please fill in your staging bucket path>/metadata for storing metadata.
 Enable data quality checks.
```

Data Quality Workflow Differences

The workflow follows the same steps as the standard upgrade process with these additional steps in the order above:

- **[After Step 3: Plan Review and Customization]**
  - **Build with Current Configuration**: Build the application with current configuration for source cluster submission.
  - **Validate on Source EMR Cluster**: Run original application on source Spark version and collect output metadata for baseline comparison.
- **[After Step 7: Summary for the upgrade] Data Quality Summary**: Data quality comparison report between versions and analysis.

Data quality mismatch capability currently includes:

- **Schema Checks**: Detects changes in column structure: missing or newly added columns, data type differences, and nullability changes.
- **Value Checks** *(numeric and string columns only)*
  - Compares min, max, and mean (mean only for numeric columns).
  - For strings, min and max are based on lexicographical order.
- **Aggregated Statistical Checks**: Compares total row counts between source and target outputs.

Data Quality Validation: Scope and Limitations

Data Quality Validation supports EMR-EC2 step using spark-submit command with Spark version >= 3.0 and the EMR cluster cannot have StepConcurrencyLevel > 1. The Data Quality Validation evaluates statistics at the Spark query plan's data sink nodes (Data source/Transforms's metadata are not captured) and covers common Spark write operations including file writes, database inserts, table creation, and various data source outputs.

Prompt Examples for the Spark Upgrade Agent

We list a few different prompt examples that can be used in the upgrade process.

1. Provide existing EMR Step information for the agent for upgrading a Spark application

```
Upgrade my Spark application <local-project-path> from EMR version 6.0.0 to 7.12.0.
Use EMR-EC2 Cluster <cluster-id> to run the validation and s3 paths
s3://<please fill in your staging bucket path> to store updated application artifacts.
 The Spark
application is already executed in the source EMR-EC2 Cluster <cluster-id> with
step id <step-id>.
```

2. List analysis (used for Upgrades) and check the status of a specific analysis

```
Can you list all the spark upgrade analysis.
```

```
Describe the analysis with analysis id <analysis id>.
```

3. Modify an upgrade plan after it's generated

```
Help me to update the generated upgrade plan to skip the local test step.
```

4. Override the default configuration for a upgrade validation job execution

```
For submitting my EMR Severless validaiton job. I would like to use S3 logging instead

of CW logging, and use this S3 path <S3 path prefix>.
```

Creating target EMR Cluster/EMR-S application from existing ones

If you already have an EMR-EC2 cluster running the source Spark version, you can clone it to create a new cluster with the same configuration but an updated EMR release version to run the validation steps during the Upgrade process.

Steps:

1. Sign in to the AWS Management Console and open the Amazon EMR console.
2. In the left navigation pane, choose Clusters under EMR on EC2.
3. From the cluster list:
   - Use search or filters if needed to find your cluster.
   - Select the check box next to the cluster you want to clone.
   - The Clone option will appear at the top of the list. Choose Clone.
   - If the cluster has steps configured, choose Include steps and then Continue to clone the steps along with the other cluster settings.
4. Review the settings for the new cluster that have been copied from the original cluster.
5. Update the Amazon EMR release version to the target version.
6. As a best practice for cost efficiency, consider enabling autoscaling when configuring the cluster to automatically adjust capacity based on workload demands.
7. When you're satisfied with the configuration, select Create cluster to launch the new cluster.
8. Wait for the cluster to reach the Running status and note the cluster ID. Provide this ID to the agent when prompted to validate the updated application.
9. If you prefer to create a new cluster from scratch, please refer to the EMR documentation: https://docs.aws.amazon.com/emr/latest/ManagementGuide/emr-gs.html .

Cloning an EMR Serverless application to the target Release Version

There is no direct way to clone an EMR Serverless application to a new one with a different EMR release version. Instead, you can use the EMR Serverless SDK/CLI or the console to create a new application and reuse the configuration from an existing one.

Here are some helper CLI commands to get started:

```
aws emr-serverless get-application --application-id XXX > old-config.json
cat old-config.json | jq '{
  name: (.application.name + "<suffix to differentiate name from old application>"),
  releaseLabel: "<target EMR release version>",
  type: .application.type,
  initialCapacity: .application.initialCapacity,
  maximumCapacity: .application.maximumCapacity,
  autoStartConfiguration: .application.autoStartConfiguration,
  autoStopConfiguration: .application.autoStopConfiguration,
  tags: .application.tags,
  architecture: .application.architecture,
  runtimeConfiguration: .application.runtimeConfiguration,
  monitoringConfiguration: .application.monitoringConfiguration
}' > new-config.json
aws emr-serverless create-application --cli-input-json file://new-config.json
```

Note: Ensure that the job execution role for the new application allows EMR Serverless to assume the role. Review the role's trust policy. If you are reusing the same job execution role from the old application, update the trust policy to include the new application as shown below:

```
#Replace the old application id and new application id in the policy
{
    "Version": "2012-10-17",
    "Statement": [
        {
            "Sid": "ServerlessTrustPolicy",
            "Effect": "Allow",
            "Principal": {
                "Service": "emr-serverless.amazonaws.com"
            },
            "Action": "sts:AssumeRole",
            "Condition": {
                "StringLike": {
                    "aws:SourceArn": [
```

```
                        "arn:aws:emr-serverless:us-east-1:<account>:/applications/<old
 application id>",
                        "arn:aws:emr-serverless:us-east-1:<account>:/applications/<new
 application id>"
                    ]
                }
            }
        }
    ]
}
```

IAM Role Setup

The CloudFormation stack in Setup Instructions automates the IAM role setup for you. If you want to manually execute it, please follow the instructions below:

IAM Role Setup for MCP server

To access the SMUS Managed MCP server, an IAM role is required with the following inline policy:

```
{
    "Version": "2012-10-17",
    "Statement": [
        {
            "Sid": "AllowUseSagemakerUnifiedStudioMcpServer",
            "Effect": "Allow",
            "Action": [
                "sagemaker-unified-studio-mcp:InvokeMcp",
                "sagemaker-unified-studio-mcp:CallReadOnlyTool",
                "sagemaker-unified-studio-mcp:CallPrivilegedTool"
            ],
            "Resource": [
                "*"
            ]
        }
    ]
}
```

In the next steps, we will create a profile for this role. Whichever account assumes this role to obtain the credentials should be added to the assume role policy.

```
{
```

```
  "Version": "2012-10-17",
  "Statement": [
    {
      "Sid": "AllowAccountToAssumeRole",
      "Effect": "Allow",
      "Principal": { "AWS": "arn:aws:iam::<accountId>:root" },
      "Action": "sts:AssumeRole"
    }
  ]
}
```

Additional Permissions by Deployment Mode (EMR-EC2/EMR-S)

EMR-EC2 Applications

Replace Amazon S3 staging bucket in the policy with the Amazon S3 bucket where you want the upgraded artifacts to be stored

```
{
  "Version": "2012-10-17",
  "Statement": [
    {
      "Effect": "Allow",
      "Action": [
        "elasticmapreduce:DescribeCluster",
        "elasticmapreduce:DescribeStep",
        "elasticmapreduce:ListSteps",
        "elasticmapreduce:ListClusters",
        "elasticmapreduce:DescribeJobFlows",
        "elasticmapreduce:AddJobFlowSteps",
        "elasticmapreduce:CreatePersistentAppUI",
        "elasticmapreduce:DescribePersistentAppUI",
        "elasticmapreduce:GetPersistentAppUIPresignedURL"
      ],
      "Resource": "*"
    },
    {
      "Effect": "Allow",
      "Action": [
        "s3:GetBucket*",
        "s3:GetObject*",
        "s3:List*",
        "s3:Put*"
```

```
      ],
      "Resource": [
        "arn:aws:s3:::<s3-staging-bucket>",
        "arn:aws:s3:::<s3-staging-bucket>/*"
      ]
    }
  ]
}
```

KMS permissions - Staging Bucket

If the staging bucket is encrypted with a CMK, add the following policy. The service will automatically use the CMK configured on the bucket when uploading data.

```
{
  "Effect": "Allow",
  "Action": [
    "kms:GenerateDataKey",
    "kms:Encrypt"
  ],
  "Resource": "arn:aws:kms:<region>:<account-id>:key/<cmk-key-id>"
}
```

EMR Serverless Applications

Replace Amazon S3 staging bucket in the policy with the Amazon S3 bucket where you want the upgraded artifacts to be stored

```
{
  "Version": "2012-10-17",
  "Statement": [
    {
      "Effect": "Allow",
      "Action": [
        "emr-serverless:StartJobRun",
        "emr-serverless:GetJobRun",
        "emr-serverless:GetApplication",
        "emr-serverless:ListApplications",
        "emr-serverless:GetDashboardForJobRun"
      ],
      "Resource": "*"
    },
    {
```

```
      "Effect": "Allow",
      "Action": "iam:PassRole",
      "Resource": "*",
      "Condition": {
        "StringLike": {
          "iam:PassedToService": "emr-serverless.amazonaws.com"
        }
      }
    },
    {
      "Effect": "Allow",
      "Action": [
        "logs:GetLogEvents",
        "logs:DescribeLogStreams"
      ],
      "Resource": "arn:aws:logs:*:*:log-group:*"
    },
    {
      "Effect": "Allow",
      "Action": [
        "s3:GetBucket*",
        "s3:GetObject*",
        "s3:List*",
        "s3:Put*"
      ],
      "Resource": [
        "arn:aws:s3:::<s3-staging-bucket>",
        "arn:aws:s3:::<s3-staging-bucket>/*"
      ]
    }
  ]
}
```

KMS permissions - Staging Bucket

If the staging bucket is encrypted with a CMK, add the following policy. The service will automatically use the CMK configured on the bucket when uploading data

```
{
  "Effect": "Allow",
  "Action": [
    "kms:GenerateDataKey",
    "kms:Encrypt"
```

```
  ],
  "Resource": "arn:aws:kms:<region>:<account-id>:key/<cmk-key-id>"
}
```

KMS permissions - CloudWatch Logs

If the CloudWatch Logs are encrypted with a CMK, add the following policy so the service can read the EMR-Serverless application logs.

```
{
"Effect": "Allow",
"Action": [
    "kms:Decrypt",
    "kms:DescribeKey"
],
"Resource": "arn:aws:kms:<region>:<account-id>:key/<cw-logs-cmk-id>"
}
```

Configuring Interface VPC Endpoints for Amazon SageMaker Unified Studio MCP

You can establish a private connection between your VPC and Amazon SageMaker Unified Studio MCP service by creating an *interface VPC endpoint*. Interface endpoints are powered by Amazon VPC, which enables you to privately access the MCP server in your VPC without an internet gateway, NAT device, VPN connection, or connection. Instances in your VPC don't need public IP addresses to communicate with the MCP service and traffic between your VPC and MCP service does not leave the Amazon network.

Each interface endpoint is represented by one or more Elastic Network Interfaces in your VPC subnets. For more information, see Interface VPC endpoints in the *Amazon VPC User Guide*.

Step 1: Creating an interface VPC endpoint for Amazon SageMaker Unified Studio MCP

You can create a VPC endpoint for the Amazon SageMaker Unified Studio MCP service using either the Amazon VPC console or the AWS CLI. For more information, see Creating an interface endpoint in the *Amazon VPC User Guide*.

Create a VPC endpoint for Amazon SageMaker Unified Studio MCP using the following service name:

- com.amazonaws.*<aws-region>*.sagemaker-unified-studio-mcp

If you enable private DNS for the endpoint, you can make API requests to Amazon SageMaker Unified Studio MCP using its default DNS name for the Region, for example, `sagemaker-unified-studio-mcp.us-east-1.api.aws`

For more information, see Accessing a service through an interface endpoint in the *Amazon VPC User Guide*.

Step 2: Creating a VPC endpoint Policy for Amazon SageMaker Unified Studio MCP

You can attach an endpoint policy to your VPC endpoint that controls access to Amazon SageMaker Unified Studio MCP. The policy specifies the following information:

- The principal that can perform actions.
- The actions that can be performed.
- The resources on which actions can be performed.

For more information, see Controlling access to services with VPC endpoints in the *Amazon VPC User Guide*.

Example: VPC endpoint policy to allow MCP access to a specific IAM role

The following is an example of an endpoint policy for Amazon SageMaker Unified Studio MCP access. When attached to an endpoint, this policy grants access to the listed Amazon SageMaker Unified Studio MCP actions for a specific IAM role principal on all resources.

```
{
  "Version": "2012-10-17",
  "Statement": [
    {
      "Effect": "Allow",
      "Principal": {
        "AWS": "arn:aws:iam::ACCOUNT-ID:role/YourRoleName"
      },
      "Action": [
        "sagemaker-unified-studio-mcp:InvokeMcp",
        "sagemaker-unified-studio-mcp:CallReadOnlyTool",
        "sagemaker-unified-studio-mcp:CallPrivilegedTool"
```

```
      ],
      "Resource": "*"
    }
  ]
}
```

Step 3: Testing your VPC

The `curl` command validates end-to-end network connectivity from your VPC network (EC2) to the VPC endpoint by making an HTTP/HTTPS request. A curl response receiving a Message back from the MCP server confirms that the complete network path is functional.

Method 1: With Private DNS Enabled (Recommended)

```
curl https://sagemaker-unified-studio-mcp.us-east-1.api.aws/spark-upgrade/mcp
```

Method 2: Without Private DNS Enabled

```
curl -k https://vpce-0069xxxx-ejwh6xxx.sagemaker-unified-studio-mcp.us-
east-1.vpce.amazonaws.com/spark-upgrade/mcp
```

> **Note**
>
> The `-k` flag bypasses SSL certificate verification due to hostname mismatch between the VPC endpoint DNS name and the certificate's Common Name (CN).

In both cases, the curl command returns a response: `{"Message":"...."}`. Returning with a Message verifies the successful network path connectivity to the VPC endpoint of the MCP service.

Step 4: Start using the MCP VPC endpoint

Once you have verified the connection, you can follow the steps to configure the MCP in Setup for Upgrade Agent. Simply use the private VPC endpoint in your MCP configuration.

Using Spark Upgrade Tools

Available Upgrade Tools

The MCP service provides several tools to assist with Spark upgrades. The major tools are the following:

	Tool name	Tool Category	Description
1	**generate_spark_upgrade_plan**	Planner	Generate a EMR-EC2/EMR-S upgrade plan
2	**reuse_existing_spark_upgrade_plan**	Planner	Reuse existing local upgrade plan
3	**update_build_configuration**	Build	Upgrade build configuration files
4	**check_and_update_build_environment**	Build	Check/update Java environment for Spark upgrade
5	**compile_and_build_project**	Build	Provide guidance for compiling/building project
6	**run_validation_job**	Test	Submit Spark app to EMR-EC2/EMR-S
7	**check_job_status**	Test	Check status of EMR-EC2 step or EMR-S job run
8	**check_and_update_python_environment**	Spark code edit	Check/update Python env for Spark upgrade
9	**fix_upgrade_failure**	Spark code edit	Analyze a failure and suggest fixes
10	**get_data_quality_summary**	Observablity	Retrieve the data quality summary after the application is upgraded
11	**describe_upgrade_analysis**	Observablity	describe the given analysis
12	**list_upgrade_analyses**	Observablity	list all analyses created by current account

For a full list of all the upgrade tools provided by the SMUS Managed MCP server, you may list all tools from the server.

Cross-region processing for the Apache Spark Upgrade Agent

The Apache Spark Upgrade Agent uses cross-region inference to process natural language requests and generate responses. With cross-region inference, the agent will automatically route your inference request to optimize performance, maximizing available compute resources and model availability, and providing the best customer experience. The type of cross-region inference used depends on the region where you run the Apache Spark Upgrade Agent. In most Regions the agent will select the optimal region within your geography to process your inference requests. However, in some Regions an inference request made by the Agent will be securely routed to all available compute resources across all global commercial AWS Regions.

Cross-Region Inference

The Apache Spark Upgrade agent is powered by and uses cross-region inference to distribute traffic across different AWS Regions to enhance large language model (LLM) inference performance and reliability.

Although cross-region inference does not change where your Spark application or your upgrade experience is hosted or your data is stored, your input prompts and output results may be transmitted to different Regions for inference processing. All data will be transmitted encrypted across Amazon's secure network.

There is no additional cost for using cross-region inference.

Supported regions for cross-region inference

Regions Using Geographic cross-region inference

For most Regions, cross-region inference requests are kept within AWS Regions that are part of the same geography where you run the Apache Spark Upgrade Agent. For example, a request made from the agent in the US East (N. Virginia) Region is routed only to AWS Regions within the United States geography. The following table describes what Regions your requests may be routed to depending on the geography where the request originated:

	Supported geography	Inference regions
1	United States	US East (N. Virginia) (us-east-1), US West (Oregon) (us-west-2), US East (Ohio) (us-east-2), US West (N. California) (us-west-2)

	Supported geography	Inference regions
2	Europe	Europe (Frankfurt) (eu-central-1), Europe (Ireland) (eu-west-1), Europe (Paris) (eu-west-3), Europe (Stockholm) (eu-north-1), Europe (London) (eu-west-2)
3	Asia Pacific	Asia Pacific (Tokyo) (ap-northeast-1), Asia Pacific (Seoul) (ap-northeast-2), Asia Pacific (Mumbai) (ap-south-1)

Regions Using Global Cross-Region Inference

> **Important**
>
> The following AWS Regions use global cross-region inference. When you use the Apache Spark Upgrade Agent in these Regions, your requests may be transmitted globally to other AWS Regions for inference processing to optimize performance and availability:

- South America (Sao Paulo) (sa-east-1)
- Asia Pacific (Singapore) (ap-southeast-1)
- Asia Pacific (Sydney) (ap-southeast-2)
- Canada (Central) (ca-central-1)

Logging Amazon SageMaker Unified Studio MCP calls using AWS CloudTrail

Amazon SageMaker Unified Studio MCP Server is integrated with AWS CloudTrail, a service that provides a record of actions taken by a user, role, or an AWS service in Amazon SageMaker Unified Studio MCP Server. CloudTrail captures all API calls for Amazon SageMaker Unified Studio MCP Server as events. The calls captured include calls to Amazon SageMaker Unified Studio MCP Server and code calls to other AWS operations during the tool executions from the SageMaker Unified Studio MCP Server. If you create a trail, you can enable continuous delivery of CloudTrail events to an Amazon S3 bucket, including events for Amazon SageMaker Unified Studio MCP Server. If you don't configure a trail, you can still view the most recent events in the CloudTrail console in **Event history**. Using the information collected by CloudTrail, you can determine the request that was

made to Amazon SageMaker Unified Studio MCP Server, the IP address from which the request was made, who made the request, when it was made, and additional details.

To learn more about CloudTrail, see the AWS CloudTrail User Guide.

Amazon SageMaker Unified Studio MCP Server information in CloudTrail

CloudTrail is enabled on your AWS account when you create the account. When activity occurs in Amazon SageMaker Unified Studio MCP Server, that activity is recorded in a CloudTrail event along with other AWS service events in **Event history**. You can view, search, and download recent events in your AWS account. For more information, see Viewing events with CloudTrail Event history.

For an ongoing record of events in your AWS account, including events for SageMaker Unified Studio MCP Server, create a trail. A trail enables CloudTrail to deliver log files to an Amazon S3 bucket. By default, when you create a trail in the console, the trail applies to all AWS Regions. The trail logs events from all Regions in the AWS partition and delivers the log files to the Amazon S3 bucket that you specify. Additionally, you can configure other AWS services to further analyze and act upon the event data collected in CloudTrail logs. For more information, see the following:

- Overview for creating a trail
- CloudTrail supported services and integrations
- Configuring Amazon SNS notifications for CloudTrail
- Receiving CloudTrail log files from multiple regions and Receiving CloudTrail log files from multiple accounts

All SageMaker Unified Studio MCP Server tool invocations and API calls to AWS services during the tool executions are logged by CloudTrail. For example, calls to the different tools and AWS service calls made from the tools generate entries in the CloudTrail log files.

Every event or log entry contains information about who generated the request. The identity information helps you determine the following:

- Whether the request was made with root or IAM user credentials.
- Whether the request was made with temporary security credentials for a role or federated user.
- Whether the request was made by another AWS service.

For more information, see the CloudTrail userIdentity element.

Understanding Amazon SageMaker Unified Studio MCP Server log file entries

A trail is a configuration that enables delivery of events as log files to an Amazon S3 bucket that you specify. CloudTrail log files contain one or more log entries. An event represents a single request from any source and includes information about the requested action, the date and time of the action, request parameters, and so on. CloudTrail log files aren't an ordered stack trace of the public API calls, so they don't appear in any specific order.

The following example shows a CloudTrail log entry that demonstrates the `CallTool` action.

```
{
    "eventVersion": "1.09",
    "userIdentity": {
        ...
    },
    "eventTime": "...",
    "eventSource": "sagemaker-unified-studio-mcp.amazonaws.com",
    "eventName": "CallPrivilegedTool",
    "awsRegion": "us-east-1",
    "sourceIPAddress": "...",
    "userAgent": "...",
    "requestParameters": {
        "id": 1,
        "method": "tools/call",
        "params": {
            "name": "generate_spark_upgrade_plan",
            "arguments": "***",
            "_meta": {
                "progressToken": 1
            }
        },
        "jsonrpc": "2.0"
    },
    "responseElements": {
        "result": {
            "content": "***",
            "structuredContent": "***",
            "isError": false
        },
        "id": 1,
        "jsonrpc": "2.0"
    },
    "requestID": "12345678-1234-1234-1234-123456789012",
```

```
    "eventID": "87654321-4321-4321-4321-210987654321",
    "readOnly": false,
    "eventType": "AwsMcpEvent",
    "managementEvent": true,
    "recipientAccountId": "123456789012",
    "eventCategory": "Management"
}
```

The following example shows a CloudTrail log entry that demonstrates the `AddJobFlowSteps` action from Amazon SageMaker Unified Studio MCP during an upgrade tool invocation.

```
{
    "eventVersion": "1.11",
    "userIdentity": {
        "type": "AssumedRole",
        "principalId": "...",
        "arn": "...",
        "accountId": "123456789012",
        "accessKeyId": "...",
        "sessionContext": {
            ...
        },
        "invokedBy": "sagemaker-unified-studio-mcp.amazonaws.com"
    },
    "eventTime": "...",
    "eventSource": "elasticmapreduce.amazonaws.com",
    "eventName": "AddJobFlowSteps",
    "awsRegion": "us-east-1",
    "sourceIPAddress": "sagemaker-unified-studio-mcp.amazonaws.com",
    "userAgent": "sagemaker-unified-studio-mcp.amazonaws.com",
    "requestParameters": {
        "jobFlowId": "j-2PY4KXXXXXX63",
        "steps": [
            ...
        ]
    },
    "responseElements": {
        "stepIds": [
            ...
        ]
    },
    "requestID": "12345678-1234-1234-1234-123456789013",
    "eventID": "87654321-4321-4321-4321-210987654322",
```

```
    "readOnly": false,
    "eventType": "AwsApiCall",
    "managementEvent": true,
    "recipientAccountId": "123456789012",
    "sharedEventID": "12345678-1234-1234-1234-123456789012",
    "vpcEndpointId": "sagemaker-unified-studio-mcp.amazonaws.com",
    "vpcEndpointAccountId": "sagemaker-unified-studio-mcp.amazonaws.com",
    "eventCategory": "Management"
}
```

Service improvements for Apache Spark Agents

The Apache Spark agent for Amazon EMR may use content, for example, to help the Agent provide better responses to common questions, fix operational issues, or for debugging.

Content that AWS may use for service improvement

- Your natural language prompts and generated responses from the Apache Spark agents for Amazon EMR, and Amazon SageMaker Notebooks

Content that AWS does not use for service improvement

- Code that you write yourself for the Spark applications
- SageMaker Notebook context and metadata
- Data from your Data Catalog or other data sources

Only Amazon employees will have access to the data. Your trust, privacy, and the security of your Customer Content are our highest priority and ensure that our use complies with our commitments to you. For more information, see Data Privacy FAQ.

How to opt out

To opt out of data collection for the Apache Spark Agents configure an AI services opt-out policy in for Amazon SageMaker Unified Studio MCP Service. For more information, see AI services opt-out policies in the *AWS Organizations User Guide*.

When you configure an AI services opt-out policy, it has the following effects:

- AWS will delete the data that it collected and stored for service improvement prior to your opt out (if any).
- After you opt out, AWS will no longer collect or store this data.
- AWS will no longer use your content for service improvement.

Amazon EMR 7.x release versions

This section contains application versions, release notes, component versions, and configuration classifications available in each Amazon EMR 7.x release version.

When you launch a cluster, you can choose from multiple releases of Amazon EMR. This allows you to test and use application versions that fit your compatibility requirements. You specify the release number with the *release label*. Release labels are in the form `emr-x.x.x`. For example, `emr-7.12.0`.

New Amazon EMR releases are made available in different Regions over a period of several days, beginning with the first Region on the initial release date. The latest release version may not be available in your Region during this period.

For a comprehensive table of application versions in every Amazon EMR 7.x release, see Application versions in Amazon EMR 7.x releases.

Topics

- Application versions in Amazon EMR 7.x releases
- Amazon EMR release 7.12.0
- Amazon EMR release 7.11.0
- Amazon EMR release 7.10.0
- Amazon EMR release 7.9.0
- Amazon EMR release 7.8.0
- Amazon EMR release 7.7.0
- Amazon EMR release 7.6.0
- Amazon EMR release 7.5.0
- Amazon EMR release 7.4.0
- Amazon EMR release 7.3.0
- Amazon EMR release 7.2.0

- Amazon EMR release 7.1.0
- Amazon EMR release 7.0.0

Application versions in Amazon EMR 7.x releases

For a comprehensive table that lists the application versions available in each Amazon EMR 7.x release, open Application versions in Amazon EMR 7.x releases in your browser.

Amazon EMR release 7.12.0

7.12.0 supported lifecycle

The following table describes the supported lifecycle dates for Amazon EMR release 7.12.0.

Support phase	Date
Initial release date	November 21, 2025
Standard support until	November 21, 2027
End of support	November 22, 2027
End of life	November 21, 2028

7.12.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, Oozie, Phoenix, Pig, Presto, Spark, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases

- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.12.0 release notes

The following release notes include information for Amazon EMR release 7.12.0.

- **New features**
  - **Serverless storage for EMR Serverless** – Amazon EMR serverless introduces serverless storage, with EMR release 7.12 and later, that eliminates local disk provisioning for Apache Spark workloads. EMR Serverless automatically handles intermediate data operation such as shuffle with no storage charges. Serverless storage decouples storage from compute, allowing Spark to release workers immediately when idle rather than keeping them active to preserve temporary data. To learn more, see aws.amazon.com/serverless-storage-for-emr-serverless.
  - **Application upgrades** – Amazon EMR 7.12.0 application upgrades include Delta 3.3.2-amzn-1, Flink 1.20.0-amzn-6, HBase 2.6.2-amzn-3, HCatalog 3.1.3-amzn-21, Hadoop 3.4.1-amzn-4, Hive 3.1.3-amzn-21, Hudi 1.0.2-amzn-1, Iceberg 1.10.0-amzn-0, Presto 0.287-amzn-6, Spark 3.5.6-amzn-1, Tez 0.10.2-amzn-19, Trino 476-amzn-1, and ZooKeeper 3.9.3-amzn-4.
  - **Iceberg Materialized Views** - Starting Amazon EMR 7.12.0, Amazon EMR Spark supports creation and management of Iceberg Materialized Views (MV)
  - **Hudi Full Table Access** - Starting Amazon EMR 7.12.0, Amazon EMR now supports Full Table Access (FTA) control for Apache Hudi in Apache Spark based on your policies defined in Lake Formation. This feature enables read and write operations from your Amazon EMR Spark jobs on Lake Formation registered tables when the job role has full table access.
  - **Iceberg version upgrade** - Amazon EMR 7.12.0 supports Apache Iceberg version 1.10
  - **Spark native FGAC support using Lake Formation** - You can perform DDL/DML operations (like CREATE, ALTER, DELETE, DROP) with fine grained access control for Apache Hive, Apache Iceberg and Delta Lake tables registered in Lake Formation.
  - **Audit context for Spark jobs** - Starting Amazon EMR 7.12.0, audit context for Amazon EMR Spark jobs with Lake Formation enabled clusters will be available for AWS Glue and Lake Formation API calls in CloudTrail logs.
  - Amazon EMR 7.12.0 improves the GetClusterSessionCredentials session credential authentication process, significantly reducing latency for Livy Interactive Sessions and on-cluster UI access on IAM Identity Center-enabled clusters compared to previous Amazon EMR releases.

- Starting Amazon EMR 7.12.0, Amazon EMR HBase on S3 has added a read-replica prewarm feature to simplify Amazon EMR version upgrades. This feature can be used to upgrade existing HBase clusters to and from Amazon EMR version 7.12+

- **Known issues and limitations**
  - **Athena SQL compatibility**
    - Athena SQL cannot read Iceberg table type V3 created by Amazon EMR Spark due to the following error: GENERIC_INTERNAL_ERROR: Cannot read unsupported version 3.
    - Writing data using Amazon EMR Spark into iceberg tables created using Athena fails due to the following error: Property 'write.object-storage.path' has been deprecated and will be removed in 2.0, use 'write.data.path' instead.
  - **Iceberg Materialized Views (MV)** - Amazon EMR 7.12.0 has limited support for view SQL clause for creation of materialized views, query rewrite and incremental refresh. More details can be found in the Iceberg Materialized Views feature documentation page
  - **Hudi FTA writes** require using HoodieCredentialedHadoopStorage for credential vending during job execution. Set the following configuration when running Hudi jobs:
    - `hoodie.storage.class=org.apache.spark.sql.hudi.storage.HoodieCredentialedHa`
  - Hudi FTA write support works only with the default Hudi configurations. Custom or non-default Hudi settings may not be fully supported and could result in unexpected behavior. Clustering for Hudi Merge-On-Read (MOR) tables is also not supported under FTA write mode.
- **Changes, enhancements, and resolved issues**
  - Starting EMR 7.12.0, EMR supports KMS Key ARN for service-hosted spark logs through persistent spark history server. Previous EMR versions only supported KeyID.
  - Starting EMR 7.12.0, EMR has addressed an issue with Hue that prevented use of an SSL certificate when hosting Hue on EMR Clusters.

7.12.0 default Java versions

Amazon EMR release 7.12.0 ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.12.0.

7.12.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.3.2-amzn-1	Delta lake is an open table format for huge analytic datasets
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.7.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.21.0	Extra convenience libraries for the Hadoop ecosystem.

Component	Version	Description
emr-kinesis	3.25.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.18.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.42.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.21.0	EMR S3Select Connector
emr-wal-cli	1.3.6	Cli used for emrwal list/dele tion.
emrfs	2.73.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.20.0-amzn-6	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.20.0-amzn-6	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.4.1-amzn-4	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.4.1-amzn-4	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.4.1-amzn-4	HDFS command-line client and library

Component	Version	Description
hadoop-hdfs-namenode	3.4.1-amzn-4	HDFS service for tracking file names and block locations.
hadoop-hdfs-zkfc	3.4.1-amzn-4	ZKFC service for tracking namenodes for HA mode.
hadoop-hdfs-journalnode	3.4.1-amzn-4	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.4.1-amzn-4	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.4.1-amzn-4	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.4.1-amzn-4	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.4.1-amzn-4	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.4.1-amzn-4	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.4.1-amzn-4	Service for retrieving current and historical information for YARN applications.

Component	Version	Description
hbase-hmaster	2.6.2-amzn-3	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.6.2-amzn-3	Service for serving one or more HBase regions.
hbase-client	2.6.2-amzn-3	HBase command-line client.
hbase-rest-server	2.6.2-amzn-3	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.6.2-amzn-3	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.6.2-amzn-3	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-21	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-21	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-21	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-21	Hive command line client.
hive-hbase	3.1.3-amzn-21	Hive-hbase client.

Component	Version	Description
hive-metastore-server	3.1.3-amzn-21	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-21	Service for accepting Hive queries as web requests.
hudi	1.0.2-amzn-1	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	1.0.2-amzn-1	Bundle library for running Presto with Hudi.
hudi-trino	1.0.2-amzn-1	Bundle library for running Trino with Hudi.
hudi-spark	1.0.2-amzn-1	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.10.0-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark

Component	Version	Description
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	12.5.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.2.1	The phoenix libraries for server and client
phoenix-connectors	6.0.0	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.287-amzn-6	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.287-amzn-6	Service for executing pieces of a query.

Component	Version	Description
presto-client	0.287-amzn-6	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	476-amzn-1	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	476-amzn-1	Service for executing pieces of a query.
trino-client	476-amzn-1	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.6-amzn-1	Spark command-line clients.
spark-history-server	3.5.6-amzn-1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.6-amzn-1	In-memory execution engine for YARN.

Component	Version	Description
spark-yarn-slave	3.5.6-amzn-1	Apache Spark libraries needed by YARN slaves.
spark-rapids	25.08.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
tensorflow	2.19.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-19	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-19	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.11.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.9.3-amzn-4	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.9.3-amzn-4	ZooKeeper command line client.

7.12.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.12.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j2	Change values in HBase's hbase-log4j2.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.

Classifications	Description	Reconfiguration Actions
phoenix-log4j2	Change values in Phoenix's log4j2.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.

Classifications	Description	Reconfiguration Actions
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
cloudwatch-logs	Configure CloudWatch Logs integration for EMR cluster nodes.	Not available.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatchAgent service.

7.12.0 change log

Change log for 7.12.0 release and release notes

Date	Event	Description
2025-11-21	Docs publication	Amazon EMR 7.12.0 release notes first published

Amazon EMR release 7.11.0

7.11.0 supported lifecycle

The following table describes the supported lifecycle dates for Amazon EMR release 7.11.0.

Support phase	Date	
Initial release date	November 03, 2025	
Standard support until	November 03, 2027	
End of support	November 04, 2027	
End of life	November 03, 2028	

7.11.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, Oozie, Phoenix, Pig, Presto, Spark, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases

- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.11.0 release notes

The following release notes include information for Amazon EMR release 7.11.0.

- **New features**
  - **Application upgrades** – Amazon EMR 7.11.0 application upgrades include Delta 3.3.2-amzn-0, Flink 1.20.0-amzn-5, HBase 2.6.2-amzn-2, HCatalog 3.1.3-amzn-20, Hadoop 3.4.1-amzn-3, Hive 3.1.3-amzn-20, Hudi 1.0.2-amzn-0, Iceberg 1.9.1-amzn-0, Presto 0.287-amzn-5, Spark 3.5.6-amzn-0, TensorFlow 2.19.0, Tez 0.10.2-amzn-18, Trino 475-amzn-0, and ZooKeeper 3.9.3-amzn-3.
  - Amazon EMR on EC2 now supports IAM Identity Center User Background Sessions
    - **User Background Sessions**: Enables long-running Spark workloads to continue running even after users log off from SageMaker Unified Studio, supporting sessions up to 90 days
    - **Flexible Background Session Configuration**: Two-level configuration (IAM Identity Center instance and Amazon EMR-EC2 cluster) with customizable background session duration from 15 minutes to 90 days (default: 7 days)
    - **Trusted Identity Propagation**: Maintains secure identity context throughout the background session lifecycle using Amazon EMR's trusted identity propagation feature
    - **SageMaker Unified Studio Integration**: Background sessions initiated through Livy interactive sessions in SageMaker Unified Studio
  - **Long-running sessions with corporate identities** - Amazon SageMaker Unified Studio now supports long-running sessions with corporate identities through IAM Identity Center's Trusted Identity Propagation (TIP). Users can launch interactive notebooks and data processing sessions on Amazon EMR and AWS Glue that persist using corporate credentials, even when logged off or sessions expire. Sessions run for up to 90 days (default 7 days) while maintaining identity permissions and consistent security controls.

7.11.0 default Java versions

Amazon EMR release 7.11.0 ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.11.0.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	**17**, 11, 8
HBase	**17**, 11, 8
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**17**, 11, 8
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8
Tez	**17**, 11, 8
Trino	**21**, 17
Zeppelin	17, **11**, 8
Pig	**17**, 11, 8
Zookeeper	**17**, 11, 8

7.11.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.3.2-amzn-0	Delta lake is an open table format for huge analytic datasets
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.7.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.20.0	Extra convenience libraries for the Hadoop ecosystem.

Component	Version	Description
emr-kinesis	3.24.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.18.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.41.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.20.0	EMR S3Select Connector
emr-wal-cli	1.3.5	Cli used for emrwal list/dele tion.
emrfs	2.72.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.20.0-amzn-5	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.20.0-amzn-5	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.4.1-amzn-3	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.4.1-amzn-3	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.4.1-amzn-3	HDFS command-line client and library

Component	Version	Description
hadoop-hdfs-namenode	3.4.1-amzn-3	HDFS service for tracking file names and block locations.
hadoop-hdfs-zkfc	3.4.1-amzn-3	ZKFC service for tracking namenodes for HA mode.
hadoop-hdfs-journalnode	3.4.1-amzn-3	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.4.1-amzn-3	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.4.1-amzn-3	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.4.1-amzn-3	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.4.1-amzn-3	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.4.1-amzn-3	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.4.1-amzn-3	Service for retrieving current and historical information for YARN applications.

Component	Version	Description
hbase-hmaster	2.6.2-amzn-2	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.6.2-amzn-2	Service for serving one or more HBase regions.
hbase-client	2.6.2-amzn-2	HBase command-line client.
hbase-rest-server	2.6.2-amzn-2	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.6.2-amzn-2	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.6.2-amzn-2	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-20	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-20	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-20	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-20	Hive command line client.
hive-hbase	3.1.3-amzn-20	Hive-hbase client.

Component	Version	Description
hive-metastore-server	3.1.3-amzn-20	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-20	Service for accepting Hive queries as web requests.
hudi	1.0.2-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	1.0.2-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	1.0.2-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	1.0.2-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.9.1-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark

Component	Version	Description
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	12.5.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.2.1	The phoenix libraries for server and client
phoenix-connectors	6.0.0	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.287-amzn-5	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.287-amzn-5	Service for executing pieces of a query.

Component	Version	Description
presto-client	0.287-amzn-5	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	475-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	475-amzn-0	Service for executing pieces of a query.
trino-client	475-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.6-amzn-0	Spark command-line clients.
spark-history-server	3.5.6-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.6-amzn-0	In-memory execution engine for YARN.

Component	Version	Description
spark-yarn-slave	3.5.6-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	25.06.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
tensorflow	2.19.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-18	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-18	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.11.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.9.3-amzn-3	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.9.3-amzn-3	ZooKeeper command line client.

7.11.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.11.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j2	Change values in HBase's hbase-log4j2.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.

Classifications	Description	Reconfiguration Actions
phoenix-log4j2	Change values in Phoenix's log4j2.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.

Classifications	Description	Reconfiguration Actions
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
cloudwatch-logs	Configure CloudWatch Logs integration for EMR cluster nodes.	Not available.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatchAgent service.

7.11.0 change log

Change log for 7.11.0 release and release notes

Date	Event	Description
2025-11-12	Docs publication	Amazon EMR 7.11.0 release notes first published

Amazon EMR release 7.10.0

7.10.0 supported lifecycle

The following table describes the supported lifecycle dates for Amazon EMR release 7.10.0.

Support phase	Date
Initial release date	August 15, 2025
Standard support until	August 15, 2027
End of support	August 16, 2027
End of life	August 15, 2028

7.10.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, Oozie, Phoenix, Pig, Presto, Spark, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases

- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.10.0 common vulnerabilities and exposures

The following table lists all CVEs that don't impact EMR clusters that run on recommended configurations of Amazon EMR 7.10.0. Amazon EMR is dependent on upstream open-source for availability of fixes and will provide the latest stable version as part of the Core Engine components within 90 days of Amazon EMR verifying the fixes.

This table was updated on September 25, 2025.

7.10.0 release notes

The following release notes include information for Amazon EMR release 7.10.0.

New features

- **Application upgrades** – Amazon EMR 7.10.0 application upgrades include AWS SDK for Java 2.31.48/1.12.782, Delta 3.3.0-amzn-2, Hadoop 3.4.1-amzn-2, Hudi 0.15.0-amzn-7, Iceberg 1.8.1-amzn-0, Spark 3.5.5-amzn-1, and Zookeeper 3.9.3-amzn-2.
- **S3A filesystem** – Starting from the EMR 7.10.0 release, the S3A filesystem has replaced EMRFS as the default EMR S3 connector. For more information, see Migration Guide: EMRFS to S3A Filesystem.

Known issues

- **ACCEPTED State** – YARN Application stuck In ACCEPTED State due to open-source bug YARN-11834. Reach out to the AWS support team if you encounter this issue.
- **ConcurrentModificationException exception** – YARN restarting frequently with ConcurrentModificationException exception due to open-source bug YARN-11838. Reach out to the AWS support team if you encounter this issue.
- **YARN application logs** – YARN application logs not visible through Resource Manager UI. In order to fix the issue, follow these steps:
  1. Update the `yarn.log.server.url` configuration in yarn-site.xml to the following value:

     ```
     <property>
       <name>yarn.log.server.url</name>
       <value>https://<private-dns-master-node>:19890/jobhistory/logs</value>
     </property>
     ```

  2. Restart the hadoop resource manager service: `systemctl restart hadoop-resourcemanager.service`
- **Uploading step logs** – Some clusters may not be able to upload step logs to your S3 bucket due to a race condition. Reach out to the AWS support team if you encounter this issue.
- **HBase table creation in Hive with Glue catalog** – From EMR-7.3.0 to EMR-7.10.0, there is a bug due to Hive Iceberg integration, which causes HBase table creation in Hive to fail when Glue Data Catalog is used as the metastore. Please reach out to the AWS support team if you encounter this issue.

- **Tez UI** – From EMR-7.3 to EMR-7.10, there is a bug where accessing Tez UI through YARN Resource Manager Web UI fails when in-transit encryption is enabled. This occurs because YARN proxy attempts to use HTTP protocol while Tez UI requires HTTPS. Please modify the `tez.tez-ui.history-url.base` configuration in `tez-site` from `http` to `https` to resolve this issue.

- Release labels and supported regions.

7.10.0 default Java versions

Amazon EMR release 7.10 and higher ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.10.0. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	**17**, 11, 8
HBase	**17**, 11, 8
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11

Application	Java / Amazon Corretto version (default is bold)
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**17**, 11, 8
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8
Tez	**17**, 11, 8
Trino	**21**, 17
Zeppelin	17, **11**, 8
Pig	**17**, 11, 8
Zookeeper	**17**, 11, 8

7.10.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.3.0-amzn-2	Delta lake is an open table format for huge analytic datasets
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.7.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.19.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.23.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.18.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.40.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.19.0	EMR S3Select Connector
emr-wal-cli	1.3.4	Cli used for emrwal list/dele tion.

Component	Version	Description
emrfs	2.71.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.20.0-amzn-4	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.20.0-amzn-4	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.4.1-amzn-2	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.4.1-amzn-2	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.4.1-amzn-2	HDFS command-line client and library
hadoop-hdfs-namenode	3.4.1-amzn-2	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.4.1-amzn-2	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.4.1-amzn-2	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.4.1-amzn-2	Cryptographic key management server based on Hadoop's KeyProvider API.

Component	Version	Description
hadoop-mapred	3.4.1-amzn-2	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.4.1-amzn-2	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.4.1-amzn-2	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.4.1-amzn-2	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.6.2-amzn-1	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.6.2-amzn-1	Service for serving one or more HBase regions.
hbase-client	2.6.2-amzn-1	HBase command-line client.
hbase-rest-server	2.6.2-amzn-1	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.6.2-amzn-1	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.6.2-amzn-1	Repair tool for Apache HBase clusters.

Component	Version	Description
hcatalog-client	3.1.3-amzn-19	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-19	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-19	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-19	Hive command line client.
hive-hbase	3.1.3-amzn-19	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-19	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-19	Service for accepting Hive queries as web requests.
hudi	0.15.0-amzn-7	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.15.0-amzn-7	Bundle library for running Presto with Hudi.
hudi-trino	0.15.0-amzn-7	Bundle library for running Trino with Hudi.

Component	Version	Description
hudi-spark	0.15.0-amzn-7	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.8.1-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	12.5.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.2.1	The phoenix libraries for server and client
phoenix-connectors	6.0.0	Apache Phoenix-Connectors for Spark-3

Component	Version	Description
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.287-amzn-4	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.287-amzn-4	Service for executing pieces of a query.
presto-client	0.287-amzn-4	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	470-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	470-amzn-0	Service for executing pieces of a query.
trino-client	470-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.

Component	Version	Description
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.5-amzn-1	Spark command-line clients.
spark-history-server	3.5.5-amzn-1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.5-amzn-1	In-memory execution engine for YARN.
spark-yarn-slave	3.5.5-amzn-1	Apache Spark libraries needed by YARN slaves.
spark-rapids	3.5.5-amzn-1	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
tensorflow	2.18.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-17	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-17	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.11.1	Web-based notebook that enables interactive data analytics.

Component	Version	Description
zookeeper-server	3.9.3-amzn-2	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.9.3-amzn-2	ZooKeeper command line client.

7.10.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.10.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j2	Change values in HBase's hbase-log4j2.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.

Classifications	Description	Reconfiguration Actions
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.

Classifications	Description	Reconfiguration Actions
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j2	Change values in Phoenix's log4j2.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.

Classifications	Description	Reconfiguration Actions
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.

Classifications	Description	Reconfiguration Actions
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatc hAgent service.

7.10.0 change log

Change log for 7.10.0 release and release notes

Date	Event	Description
2025-08-15	Docs publication	Amazon EMR 7.10.0 release notes first published
2025-08-15	Deployment complete	Amazon EMR 7.10.0 fully deployed to all supported Regions
2025-08-15	Initial limited release	Amazon EMR 7.10.0 first deployed to initial commercia l Regions

Amazon EMR release 7.9.0

7.9.0 supported lifecycle

The following table describes the supported lifecycle dates for Amazon EMR release 7.9.0.

Support phase	Date
Initial release date	May 19, 2025
Standard support until	May 19, 2027
End of support	May 20, 2027

Support phase	Date	
End of life	May 19, 2028	

7.9.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, Oozie, Phoenix, Pig, Presto, Spark, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.9.0 common vulnerabilities and exposures

The following table lists all CVEs that don't impact EMR clusters that run on recommended configurations of Amazon EMR 7.9.0. Amazon EMR is dependent on upstream open-source for availability of fixes and will provide the latest stable version as part of the Core Engine components within 90 days of Amazon EMR verifying the fixes.

This table was updated on May 12, 2025.

CVE ID	Severity	CVE details URL
CVE-2015-1832	CRITICAL	https://nvd.nist.gov/vuln/detail/CVE-2015-1832
CVE-2016-5018	CRITICAL	https://nvd.nist.gov/vuln/detail/CVE-2016-5018

CVE ID	Severity	CVE details URL

7.9.0 release notes

The following release notes include information for Amazon EMR release 7.9.0.

New features

- **Application upgrades** – Amazon EMR 7.9.0 application upgrades include AWS SDK for Java 2.31.16/1.12.782, Delta 3.3.0-amzn-1, Hadoop 3.4.1, Hudi 0.15.0-amzn-6, Iceberg 1.7.1-amzn-2, Spark 3.5.5, and Zookeeper 3.9.3.
- **CM-CMK support for Persistent App UI** – This feature extends SSE encryption applied to logs managed in the EMR service bucket to honor Customer Managed Custom Master Key (CM-CMK). This feature enables customers to manage accessibility of logs after their clusters terminate.

Known issues

- When the logging option for EMR on EC2 is disabled, logs are not available after the cluster terminates and persistent application UIs will not contain any logs.
- **KMS encryption using the EMR-EC2 SecretAgent component** – There is an error that occurs when KMS encryption at rest is enabled for Lake Formation-enabled clusters in EMR versions 7.8 and 7.9. Lake Formation-enabled jobs will fail with a *NoSuchMethodError*. There are two workarounds available:
  - Temporarily disable KMS encryption at rest for affected clusters.
  - Contact AWS Support to request a Bootstrap Action artifact if KMS encryption must be maintained.

  > **Note**
  >
  > **Permanent fix** – In August 2025 an update to address the above issue was deployed to all regions. There is no need to disable KMS encryption at rest.

- **Uploading step logs** – Some clusters may not be able to upload step logs to your S3 bucket due to a race condition. Reach out to AWS support team if you encounter this issue.
- **HBase table creation in Hive with Glue catalog** – From EMR-7.3.0 to EMR-7.10.0, there is a bug due to Hive Iceberg integration, which causes HBase table creation in Hive to fail when Glue Data Catalog is used as the metastore. Please reach out to the AWS support team if you encounter this issue.

- **Tez UI** – From EMR-7.3 to EMR-7.10, there is a bug where accessing Tez UI through YARN Resource Manager Web UI fails when in-transit encryption is enabled. This occurs because YARN proxy attempts to use HTTP protocol while Tez UI requires HTTPS. Please modify the `tez.tez-ui.history-url.base` configuration in `tez-site` from `http` to `https` to resolve this issue.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to TRUE (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- *Oozie deprecation* – Because OSS Oozie has gone into attic mode, Apache Oozie will be removed from Amazon EMR release 8.x series. Oozie will still be included as part of 7.x series. We recommend that you use MWAA as an alternative to Oozie. Customers may refer to the utility oozie-to-airflow-emr on GitHub to migrate existing Oozie workflows to MWAA.
- *YARN container bin packing* – Starting with Amazon EMR version 7.9.0, container bin-packing policy is now available for the YARN capacity scheduler, which is built on top of YARN's multi-node placement policy.
- The *hudi-cli.sh* – The **hudi-cli.sh** script has been deprecated in EMR release 7.9.0 and higher. Amazon EMR release 7.9.0 and higher uses **hudi-cli-bundle.jar**.
- *EMR clusters on FIPS-enabled AL2023 AMI* – Starting from EMR 7.9, customers can launch EMR clusters on FIPS-enabled AL2023 AMI. This change updates EMR's digital signatures and hash algorithms to ensure all EMR packages adhere to recommended cryptographic policies for FIPS 140-3. Note: This does not cover the FIPS certification status of EMR or AL2023 - refer to AL2023 FIPS FAQ for latest information on FIPS 140-3 validation status.
- *Step latency* – This release resolves an issue where step latency increased when using in-transit encryption without explicitly selecting the Hadoop application for installation.

- *Cluster launch with EBS-encrypted volumes* – This release fixes an issue where a KMS call on EBS-encrypted volumes could cause an EMR cluster launch to fail.

7.9.0 default Java versions

Amazon EMR release 7.9 and higher ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.9.0. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	**17**, 11, 8
HBase	**17**, 11, 8
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11

Application	Java / Amazon Corretto version (default is bold)
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**17**, 11, 8
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8
Tez	**17**, 11, 8
Trino	**21**, 17
Zeppelin	17, **11**, 8
Pig	**17**, 11, 8
Zookeeper	**17**, 11, 8

7.9.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.3.0-amzn-1	Delta lake is an open table format for huge analytic datasets
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.7.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.18.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.22.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.18.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.39.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.18.0	EMR S3Select Connector
emr-wal-cli	1.3.4	Cli used for emrwal list/dele tion.

Component	Version	Description
emrfs	2.70.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.20.0-amzn-3	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.20.0-amzn-3	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.4.1-amzn-1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.4.1-amzn-1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.4.1-amzn-1	HDFS command-line client and library
hadoop-hdfs-namenode	3.4.1-amzn-1	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.4.1-amzn-1	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.4.1-amzn-1	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.4.1-amzn-1	Cryptographic key management server based on Hadoop's KeyProvider API.

Component	Version	Description
hadoop-mapred	3.4.1-amzn-1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.4.1-amzn-1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.4.1-amzn-1	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.4.1-amzn-1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.6.2-amzn-0	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.6.2-amzn-0	Service for serving one or more HBase regions.
hbase-client	2.6.2-amzn-0	HBase command-line client.
hbase-rest-server	2.6.2-amzn-0	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.6.2-amzn-0	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.6.2-amzn-0	Repair tool for Apache HBase clusters.

Component	Version	Description
hcatalog-client	3.1.3-amzn-18	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-18	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-18	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-18	Hive command line client.
hive-hbase	3.1.3-amzn-18	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-18	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-18	Service for accepting Hive queries as web requests.
hudi	0.15.0-amzn-6	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.15.0-amzn-6	Bundle library for running Presto with Hudi.
hudi-trino	0.15.0-amzn-6	Bundle library for running Trino with Hudi.

Component	Version	Description
hudi-spark	0.15.0-amzn-6	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.7.1-amzn-2	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	12.3.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.2.1	The phoenix libraries for server and client
phoenix-connectors	6.0.0	Apache Phoenix-Connectors for Spark-3

Component	Version	Description
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.287-amzn-3	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.287-amzn-3	Service for executing pieces of a query.
presto-client	0.287-amzn-3	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	467-amzn-2	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	467-amzn-2	Service for executing pieces of a query.
trino-client	467-amzn-2	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.

Component	Version	Description
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.5-amzn-0	Spark command-line clients.
spark-history-server	3.5.5-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.5-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.5.5-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	25.02.1-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
tensorflow	2.16.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-16	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-16	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.11.1	Web-based notebook that enables interactive data analytics.

Component	Version	Description
zookeeper-server	3.9.3-amzn-1	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.9.3-amzn-1	ZooKeeper command line client.

7.9.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.9.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-session.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli.properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts PhoenixQueryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j2	Change values in HBase's hbase-log4j2.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.

Classifications	Description	Reconfiguration Actions
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.

Classifications	Description	Reconfiguration Actions
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j2	Change values in Phoenix's log4j2.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.

Classifications	Description	Reconfiguration Actions
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.

Classifications	Description	Reconfiguration Actions
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatc hAgent service.

7.9.0 change log

Change log for 7.9.0 release and release notes

Date	Event	Description
2025-05-19	Docs publication	Amazon EMR 7.9.0 release notes first published
2025-05-19	Deployment complete	Amazon EMR 7.9.0 fully deployed to all supported Regions
2025-05-19	Initial limited release	Amazon EMR 7.9.0 first deployed to initial commercia l Regions

Amazon EMR release 7.8.0

7.8.0 supported lifecycle

The following table describes the supported lifecycle dates for Amazon EMR release 7.8.0.

Support phase	Date
Initial release date	March 7, 2025
Standard support until	March 6, 2027
End of support	March 7, 2027

Support phase	Date
End of life	March 7, 2028

7.8.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, Oozie, Phoenix, Pig, Presto, Spark, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.8.0 release components details

See the following table for more information about the *Extras* packages in Amazon EMR 7.7.0.

Application	Application Type	Package	Package Type	Package Version
AmazonCloudWatchAgent	Core	hadoop-hdfs-journalnode	Extras	3.4.1-amzn-0-1.amzn2023
AmazonCloudWatchAgent	Core	ranger-kms	Extras	2.0.0-1.amzn2023
AmazonCloudWatchAgent	Core	s3-dist-cp	Extras	2.38.0-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
AmazonCloudWatchAgent	Core	zookeeper	Extras	3.9.3-amzn-0-1.amzn2023
AmazonCloudWatchAgent	Core	zookeeper-server	Extras	3.9.3-amzn-0-1.amzn2023
Flink	Core	hadoop-client	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-hdfs	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hadoop-hdfs-datanode	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hadoop-hdfs-journalnode	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hadoop-hdfs-namenode	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hadoop-httpfs	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hadoop-kms	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hadoop-mapreduce	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hadoop-mapreduce-historyserver	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hadoop-yarn	Extras	3.4.1-amzn-0-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Flink	Core	hadoop-yarn-nodemanager	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hadoop-yarn-proxyserver	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hadoop-yarn-resourcemanager	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hadoop-yarn-timelineserver	Extras	3.4.1-amzn-0-1.amzn2023
Flink	Core	hudi	Extras	0.15.0-amzn-5-1.amzn2023
Flink	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Flink	Core	hadoop	Extras	3.4.1-amzn-0-1.amzn2023
HBase	Core	s3-dist-cp	Extras	2.38.0-1.amzn2023
HCatalog	Core	hadoop-yarn-proxyserver	Extras	3.4.1-amzn-0-1.amzn2023
HCatalog	Core	mariadb-connector-java	Extras	
Hive	Core	hadoop-httpfs	Extras	3.4.1-amzn-0-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Hive	Core	hadoop-yarn-proxyserver	Extras	3.4.1-amzn-0-1.amzn2023
Hive	Core	hive-hbase	Extras	3.1.3-amzn-17-1.amzn2023
Hive	Core	mariadb-connector-java	Extras	3.1.3-amzn-17-1
Hive	Core	s3-dist-cp	Extras	2.38.0-1.amzn2023
Phoenix	Core	s3-dist-cp	Extras	2.38.0-1.amzn2023
Spark	Core	spark-datanucleus	Extras	3.5.3.amzn.1-1.amzn2023
Tez	Core	hadoop-mapreduce	Extras	3.4.1-amzn-0-1.amzn2023
Tez	Core	hadoop-mapreduce-historyserver	Extras	3.4.1-amzn-0-1.amzn2023
Tez	Core	hadoop-yarn-proxyserver	Extras	3.4.1-amzn-0-1.amzn2023
Trino	Core	bigtop-utils	Extras	1.2.0-1.amzn2023
Trino	Core	hadoop-client	Extras	3.4.1.amzn.0-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop-hdfs	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hadoop-hdfs-datanode	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hadoop-hdfs-journalnode	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hadoop-hdfs-namenode	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hadoop-kms	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hadoop-mapreduce	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hadoop-mapreduce-historyserver	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hadoop-yarn	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hadoop-yarn-nodemanager	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hadoop-yarn-proxyserver	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hadoop-yarn-resourcemanager	Extras	3.4.1.amzn.0-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop-yarn-timelineserver	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hive	Extras	3.1.3.amzn.17-1.amzn2023
Trino	Core	hive-hcatalog-server	Extras	3.1.3.amzn.17-1.amzn2023
Trino	Core	mariadb-connector-java	Extras	2.7.2-1
Trino	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Trino	Core	zookeeper	Extras	3.9.3.amzn.0-1.amzn2023
Trino	Core	zookeeper-server	Extras	3.9.3.amzn.0-1.amzn2023
Trino	Core	bigtop-groovy	Extras	2.5.4-1.amzn2023
Trino	Core	bigtop-jsvc	Extras	1.2.4-1.amzn2023
Trino	Core	hadoop	Extras	3.4.1.amzn.0-1.amzn2023
Trino	Core	hadoop-lzo	Extras	0.4.19-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hive-hcatalog	Extras	3.1.3.amzn.17-1.amzn2023
Trino	Core	hive-jdbc	Extras	3.1.3.amzn.17-1.amzn2023
Zookeeper	Core	emrfs	Extras	3.9.3.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-client	Extras	3.9.3.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-hdfs	Extras	3.9.3.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-hdfs-datanode	Extras	3.9.3.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-hdfs-journalnode	Extras	3.9.3.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-hdfs-namenode	Extras	3.9.3.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-httpfs	Extras	3.9.3.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-kms	Extras	3.9.3.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-mapreduce	Extras	3.4.1.amzn.0-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Zookeeper	Core	hadoop-mapreduce-historyserver	Extras	3.4.1.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-yarn	Extras	3.4.1.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-yarn-nodemanager	Extras	3.4.1.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-yarn-proxyserver	Extras	3.4.1.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-yarn-resourcemanager	Extras	3.4.1.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-yarn-timelineserver	Extras	3.4.1.amzn.0-1.amzn2023
Zookeeper	Core	ranger-kms	Extras	2.0.0-1.amzn2023

7.8.0 common vulnerabilities and exposures

The following table lists all CVEs that don't impact EMR clusters that run on recommended configurations of Amazon EMR 7.8.0. Amazon EMR is dependent on upstream open-source for availability of fixes and will provide the latest stable version as part of the Core Engine components within 90 days of Amazon EMR verifying the fixes.

This table was updated on March 6, 2025.

7.8.0 release notes

The following release notes include information for Amazon EMR release 7.8.0.

New features

- **Application upgrades** – Amazon EMR 7.8.0 application upgrades include AWS SDK for Java 2.29.52/1.12.780, Delta 3.3.0-amzn-0, Hadoop 3.4.1, Hudi 0.15.0-amzn-5, Iceberg 1.7.1-amzn-1, Spark 3.5.4, and Zookeeper 3.9.3.

Known issues

- **KMS encryption using the EMR-EC2 SecretAgent component** – There is an error that occurs when KMS encryption at rest is enabled for Lake Formation-enabled clusters in EMR versions 7.8 and 7.9. Lake Formation-enabled jobs will fail with a *NoSuchMethodError*. There are two workarounds available:
  - Temporarily disable KMS encryption at rest for affected clusters.
  - Contact AWS Support to request a Bootstrap Action artifact if KMS encryption must be maintained.

> **Note**
>
> **Fix update** – In August 2025 an update to address the above issue was deployed to all regions. There is no need to disable KMS encryption at rest.

- **HBase table creation in Hive with Glue catalog** – From EMR-7.3.0 to EMR-7.10.0, there is a bug due to Hive Iceberg integration, which causes HBase table creation in Hive to fail when Glue Data Catalog is used as the metastore. Please reach out to the AWS support team if you encounter this issue.
- **Tez UI** – From EMR-7.3 to EMR-7.10, there is a bug where accessing Tez UI through YARN Resource Manager Web UI fails when in-transit encryption is enabled. This occurs because YARN proxy attempts to use HTTP protocol while Tez UI requires HTTPS. Please modify the `tez.tez-ui.history-url.base` configuration in `tez-site` from `http` to `https` to resolve this issue.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to TRUE (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.

7.8.0 default Java versions

Amazon EMR release 7.8 and higher ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.8.0. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	**17**, 11, 8
HBase	**17**, 11, 8
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11

Application	Java / Amazon Corretto version (default is bold)
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**17**, 11, 8
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8
Tez	**17**, 11, 8
Trino	**21**, 17
Zeppelin	17, **11**, 8
Pig	**17**, 11, 8
Zookeeper	**17**, 11, 8

7.8.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.3.0-amzn-0	Delta lake is an open table format for huge analytic datasets
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.6.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.17.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.21.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.18.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.38.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.17.0	EMR S3Select Connector
emr-wal-cli	1.3.3	Cli used for emrwal list/dele tion.

Component	Version	Description
emrfs	2.69.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.20.0-amzn-2	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.20.0-amzn-2	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.4.1-amzn-0	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.4.1-amzn-0	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.4.1-amzn-0	HDFS command-line client and library
hadoop-hdfs-namenode	3.4.1-amzn-0	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.4.1-amzn-0	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.4.1-amzn-0	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.4.1-amzn-0	Cryptographic key management server based on Hadoop's KeyProvider API.

Component	Version	Description
hadoop-mapred	3.4.1-amzn-0	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.4.1-amzn-0	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.4.1-amzn-0	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.4.1-amzn-0	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.6.1-amzn-2	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.6.1-amzn-2	Service for serving one or more HBase regions.
hbase-client	2.6.1-amzn-2	HBase command-line client.
hbase-rest-server	2.6.1-amzn-2	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.6.1-amzn-2	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.6.1-amzn-2	Repair tool for Apache HBase clusters.

Component	Version	Description
hcatalog-client	3.1.3-amzn-17	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-17	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-17	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-17	Hive command line client.
hive-hbase	3.1.3-amzn-17	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-17	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-17	Service for accepting Hive queries as web requests.
hudi	0.15.0-amzn-5	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.15.0-amzn-5	Bundle library for running Presto with Hudi.
hudi-trino	0.15.0-amzn-5	Bundle library for running Trino with Hudi.

Component	Version	Description
hudi-spark	0.15.0-amzn-5	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.7.1-amzn-1	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	12.3.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.2.1	The phoenix libraries for server and client
phoenix-connectors	6.0.0	Apache Phoenix-Connectors for Spark-3

Component	Version	Description
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.287-amzn-2	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.287-amzn-2	Service for executing pieces of a query.
presto-client	0.287-amzn-2	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	467-amzn-1	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	467-amzn-1	Service for executing pieces of a query.
trino-client	467-amzn-1	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.

Component	Version	Description
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.4-amzn-0	Spark command-line clients.
spark-history-server	3.5.4-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.4-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.5.4-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	24.12.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
tensorflow	2.16.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-15	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-15	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.11.1	Web-based notebook that enables interactive data analytics.

Component	Version	Description
zookeeper-server	3.9.3-amzn-0	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.9.3-amzn-0	ZooKeeper command line client.

7.8.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.8.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.

Classifications	Description	Reconfiguration Actions
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.

Classifications	Description	Reconfiguration Actions
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j2	Change values in Phoenix's log4j2.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.

Classifications	Description	Reconfiguration Actions
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.

Classifications	Description	Reconfiguration Actions
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatc hAgent service.

7.8.0 change log

Change log for 7.8.0 release and release notes

Date	Event	Description
2025-03-07	Docs publication	Amazon EMR 7.8.0 release notes first published
2025-03-06	Deployment complete	Amazon EMR 7.8.0 fully deployed to all supported Regions
2025-02-28	Initial limited release	Amazon EMR 7.8.0 first deployed to initial commercia l Regions

Amazon EMR release 7.7.0

7.7.0 supported lifecycle

The following table describes the supported lifecycle dates for Amazon EMR release 7.7.0.

Support phase	Date
Initial release date	February 6, 2025
Standard support until	February 5, 2027
End of support	February 6, 2027

Support phase	Date	
End of life	February 6, 2028	

7.7.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, Oozie, Phoenix, Pig, Presto, Spark, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.7.0 release components details

See the following table for more information about the *Extras* packages in Amazon EMR 7.7.0.

Application	Application Type	Package	Package Type	Package Version
AmazonCloudWatchAgent	Core	hadoop-hdfs-journalnode	Extras	3.4.0-amzn-3-1.amzn2023
AmazonCloudWatchAgent	Core	ranger-kms	Extras	2.0.0-1.amzn2023
AmazonCloudWatchAgent	Core	s3-dist-cp	Extras	2.37.0-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
AmazonCloudWatchAgent	Core	zookeeper	Extras	3.9.2.amzn.1-1.amzn2023
AmazonCloudWatchAgent	Core	zookeeper-server	Extras	3.9.2.amzn.1-1.amzn2023
Flink	Core	hadoop-client	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-hdfs	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-hdfs-datanode	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-hdfs-journalnode	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-hdfs-namenode	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-httpfs	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-kms	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-mapreduce	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-mapreduce-historyserver	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-yarn	Extras	3.4.0.amzn.3-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Flink	Core	hadoop-yarn-nodemanager	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-yarn-resourcemanager	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hadoop-yarn-timelineserver	Extras	3.4.0.amzn.3-1.amzn2023
Flink	Core	hudi	Extras	0.15.0.amzn.4-1.amzn2023
Flink	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Flink	Core	hadoop	Extras	3.4.0.amzn.3-1.amzn2023
HBase	Core	s3-dist-cp	Extras	2.37.0-1.amzn2023
HCatalog	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.3-1.amzn2023
HCatalog	Core	mariadb-connector-java	Extras	
Hive	Core	hadoop-httpfs	Extras	3.4.0.amzn.3-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Hive	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.3-1.amzn2023
Hive	Core	hive-hbase	Extras	3.1.3.amzn.16-1.amzn2023
Hive	Core	mariadb-connector-java	Extras	2.7.2-1
Hive	Core	s3-dist-cp	Extras	2.37.0-1.amzn2023
Phoenix	Core	s3-dist-cp	Extras	2.37.0-1.amzn2023
Spark	Core	spark-datanucleus	Extras	3.5.3.amzn.1-1.amzn2023
Tez	Core	hadoop-mapreduce	Extras	3.4.0.amzn.3-1.amzn2023
Tez	Core	hadoop-mapreduce-historyserver	Extras	3.4.0.amzn.3-1.amzn2023
Tez	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	bigtop-utils	Extras	1.2.0-1.amzn2023
Trino	Core	hadoop-client	Extras	3.4.0.amzn.3-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop-hdfs	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hadoop-hdfs-datanode	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hadoop-hdfs-journalnode	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hadoop-hdfs-namenode	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hadoop-kms	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hadoop-mapreduce	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hadoop-mapreduce-historyserver	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hadoop-yarn	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hadoop-yarn-nodemanager	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hadoop-yarn-resourcemanager	Extras	3.4.0.amzn.3-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop-yarn-timelineserver	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hive	Extras	3.1.3.amzn.16-1.amzn2023
Trino	Core	hive-hcatalog-server	Extras	3.1.3.amzn.16-1.amzn2023
Trino	Core	mariadb-connector-java	Extras	2.7.2-1
Trino	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Trino	Core	zookeeper	Extras	3.9.2.amzn.1-1.amzn2023
Trino	Core	zookeeper-server	Extras	3.9.2.amzn.1-1.amzn2023
Trino	Core	bigtop-groovy	Extras	2.5.4-1.amzn2023
Trino	Core	bigtop-jsvc	Extras	1.2.4-1.amzn2023
Trino	Core	hadoop	Extras	3.4.0.amzn.3-1.amzn2023
Trino	Core	hadoop-lzo	Extras	0.4.19-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hive-hcatalog	Extras	3.1.3.amzn.16-1.amzn2023
Trino	Core	hive-jdbc	Extras	3.1.3.amzn.16-1.amzn2023
Zookeeper	Core	emrfs	Extras	3.9.2.amzn.1-1.amzn2023
Zookeeper	Core	hadoop-client	Extras	3.9.2.amzn.1-1.amzn2023
Zookeeper	Core	hadoop-hdfs	Extras	3.9.2.amzn.1-1.amzn2023
Zookeeper	Core	hadoop-hdfs-datanode	Extras	3.9.2.amzn.1-1.amzn2023
Zookeeper	Core	hadoop-hdfs-journalnode	Extras	3.9.2.amzn.1-1.amzn2023
Zookeeper	Core	hadoop-hdfs-namenode	Extras	3.9.2.amzn.1-1.amzn2023
Zookeeper	Core	hadoop-httpfs	Extras	3.9.2.amzn.1-1.amzn2023
Zookeeper	Core	hadoop-kms	Extras	3.9.2.amzn.1-1.amzn2023
Zookeeper	Core	hadoop-mapreduce	Extras	3.4.0.amzn.3-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Zookeeper	Core	hadoop-mapreduce-historyserver	Extras	3.4.0.amzn.3-1.amzn2023
Zookeeper	Core	hadoop-yarn	Extras	3.4.0.amzn.3-1.amzn2023
Zookeeper	Core	hadoop-yarn-nodemanager	Extras	3.4.0.amzn.3-1.amzn2023
Zookeeper	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.3-1.amzn2023
Zookeeper	Core	hadoop-yarn-resourcemanager	Extras	3.4.0.amzn.3-1.amzn2023
Zookeeper	Core	hadoop-yarn-timelineserver	Extras	3.4.0.amzn.3-1.amzn2023
Zookeeper	Core	ranger-kms	Extras	2.0.0-1.amzn2023

7.7.0 common vulnerabilities and exposures

The following table lists all CVEs that don't impact EMR clusters that run on recommended configurations of Amazon EMR 7.7.0. Amazon EMR is dependent on upstream open-source for availability of fixes and will provide the latest stable version as part of the Core Engine components within 90 days of Amazon EMR verifying the fixes.

This table was updated on February 4, 2025.

7.7.0 release notes

The following release notes include information for Amazon EMR release 7.7.0.

New features

- **Application upgrades** – Amazon EMR 7.7.0 application upgrades include Delta 3.2.1-amzn-2, Hudi 0.15.0-amzn-4, Iceberg 1.7.1-amzn-0, and Trino 467.

Known issues

- **HBase table creation in Hive with Glue catalog** – From EMR-7.3.0 to EMR-7.10.0, there is a bug due to Hive Iceberg integration, which causes HBase table creation in Hive to fail when Glue Data

Catalog is used as the metastore. Please reach out to the AWS support team if you encounter this issue.

- **Tez UI** – From EMR-7.3 to EMR-7.10, there is a bug where accessing Tez UI through YARN Resource Manager Web UI fails when in-transit encryption is enabled. This occurs because YARN proxy attempts to use HTTP protocol while Tez UI requires HTTPS. Please modify the `tez.tez-ui.history-url.base` configuration in `tez-site` from `http` to `https` to resolve this issue.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to TRUE (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- The Iceberg version in use as of EMR 7.7.0 no longer supports Java 8. Additionally, Iceberg is excluded from the following Java 8 images: `emr-7.7.0-java8-latest` and `emr-7.7.0-spark-rapids-java8-latest`.
- Lake Formation for FGAC with Amazon EMR on EKS – With Amazon EMR release 7.7 and higher, you can leverage AWS Lake Formation to apply fine-grained access controls on Data Catalog tables that are backed by Amazon S3. This capability lets you configure table, row, column, and cell-level access controls for read queries within your Amazon Amazon EMR on EKS Spark Jobs. For more information, see Using Amazon Amazon EMR on EKS with AWS Lake Formation for fine-grained access control.

7.7.0 default Java versions

Amazon EMR release 7.7 and higher ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.7.0. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	**17**, 11, 8
HBase	**17**, 11, 8
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11

Application	Java / Amazon Corretto version (default is bold)
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**17**, 11, 8
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8
Tez	**17**, 11, 8
Trino	**21**, 17
Zeppelin	17, **11**, 8
Pig	**17**, 11, 8
Zookeeper	**17**, 11, 8

7.7.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.2.1-amzn-2	Delta lake is an open table format for huge analytic datasets
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.6.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.16.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.20.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.18.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.37.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.16.0	EMR S3Select Connector
emr-wal-cli	1.3.2	Cli used for emrwal list/dele tion.

Component	Version	Description
emrfs	2.68.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.20.0-amzn-1	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.20.0-amzn-1	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.4.0-amzn-3	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.4.0-amzn-3	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.4.0-amzn-3	HDFS command-line client and library
hadoop-hdfs-namenode	3.4.0-amzn-3	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.4.0-amzn-3	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.4.0-amzn-3	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.4.0-amzn-3	Cryptographic key management server based on Hadoop's KeyProvider API.

Component	Version	Description
hadoop-mapred	3.4.0-amzn-3	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.4.0-amzn-3	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.4.0-amzn-3	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.4.0-amzn-3	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.6.1-amzn-1	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.6.1-amzn-1	Service for serving one or more HBase regions.
hbase-client	2.6.1-amzn-1	HBase command-line client.
hbase-rest-server	2.6.1-amzn-1	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.6.1-amzn-1	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.6.1-amzn-1	Repair tool for Apache HBase clusters.

Component	Version	Description
hcatalog-client	3.1.3-amzn-16	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-16	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-16	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-16	Hive command line client.
hive-hbase	3.1.3-amzn-16	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-16	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-16	Service for accepting Hive queries as web requests.
hudi	0.15.0-amzn-4	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.15.0-amzn-4	Bundle library for running Presto with Hudi.
hudi-trino	0.15.0-amzn-4	Bundle library for running Trino with Hudi.

Component	Version	Description
hudi-spark	0.15.0-amzn-4	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.7.1-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	12.3.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.2.1	The phoenix libraries for server and client
phoenix-connectors	6.0.0	Apache Phoenix-Connectors for Spark-3

Component	Version	Description
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.287-amzn-1	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.287-amzn-1	Service for executing pieces of a query.
presto-client	0.287-amzn-1	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	467-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	467-amzn-0	Service for executing pieces of a query.
trino-client	467-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.

Component	Version	Description
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.3-amzn-1	Spark command-line clients.
spark-history-server	3.5.3-amzn-1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.3-amzn-1	In-memory execution engine for YARN.
spark-yarn-slave	3.5.3-amzn-1	Apache Spark libraries needed by YARN slaves.
spark-rapids	24.10.1-amzn-1	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
tensorflow	2.16.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-14	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-14	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.11.1	Web-based notebook that enables interactive data analytics.

Component	Version	Description
zookeeper-server	3.9.2-amzn-1	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.9.2-amzn-1	ZooKeeper command line client.

7.7.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.7.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Ranger KMS, HiveServe r2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.

Classifications	Description	Reconfiguration Actions
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.

Classifications	Description	Reconfiguration Actions
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j2	Change values in Phoenix's log4j2.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.

Classifications	Description	Reconfiguration Actions
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.

Classifications	Description	Reconfiguration Actions
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatc hAgent service.

7.7.0 change log

Change log for 7.7.0 release and release notes

Date	Event	Description
2025-02-07	Docs publication	Amazon EMR 7.7.0 release notes first published
2025-02-06	Deployment complete	Amazon EMR 7.7.0 fully deployed to all supported Regions
2025-01-30	Initial limited release	Amazon EMR 7.7.0 first deployed to initial commercia l Regions

Amazon EMR release 7.6.0

7.6.0 supported lifecycle

The following table describes the supported lifecycle dates for Amazon EMR release 7.6.0.

Support phase	Date
Initial release date	January 10, 2025
Standard support until	January 09, 2027
End of support	January 10, 2027

Support phase	Date
End of life	January 10, 2028

7.6.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, Oozie, Phoenix, Pig, Presto, Spark, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.6.0 release components details

See the following table for more information about the *Extras* packages in Amazon EMR 7.6.0.

Application	Application Type	Package	Package Type	Package Version
AmazonCloudWatchAgent	Core	hadoop-hdfs-journalnode	Extras	3.4.0.amzn.2-1.amzn2023
AmazonCloudWatchAgent	Core	ranger-kms	Extras	2.0.0-1.amzn2023
AmazonCloudWatchAgent	Core	s3-dist-cp	Extras	2.36.0-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
AmazonCloudWatchAgent	Core	zookeeper	Extras	3.9.2.amzn.0-1.amzn2023
AmazonCloudWatchAgent	Core	zookeeper-server	Extras	3.9.2.amzn.0-1.amzn2023
Flink	Core	hadoop-client	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-hdfs	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-hdfs-datanode	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-hdfs-journalnode	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-hdfs-namenode	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-httpfs	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-kms	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-mapreduce	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-mapreduce-historyserver	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-yarn	Extras	3.4.0.amzn.2-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Flink	Core	hadoop-yarn-nodemanager	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-yarn-resourcemanager	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hadoop-yarn-timelineserver	Extras	3.4.0.amzn.2-1.amzn2023
Flink	Core	hudi	Extras	0.15.0.amzn.3-1.amzn2023
Flink	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Flink	Core	hadoop	Extras	3.4.0.amzn.2-1.amzn2023
HBase	Core	s3-dist-cp	Extras	2.36.0-1.amzn2023
HCatalog	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.2-1.amzn2023
HCatalog	Core	mariadb-connector-java	Extras	
Hive	Core	hadoop-httpfs	Extras	3.4.0.amzn.2-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Hive	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.2-1.amzn2023
Hive	Core	hive-hbase	Extras	3.1.3.amzn.15-1.amzn2023
Hive	Core	mariadb-connector-java	Extras	2.7.2-1
Hive	Core	s3-dist-cp	Extras	2.36.0-1.amzn2023
Phoenix	Core	s3-dist-cp	Extras	2.36.0-1.amzn2023
Spark	Core	spark-datanucleus	Extras	3.5.1.amzn.0-1.amzn2023
Tez	Core	hadoop-mapreduce	Extras	3.4.0.amzn.2-1.amzn2023
Tez	Core	hadoop-mapreduce-historyserver	Extras	3.4.0.amzn.2-1.amzn2023
Tez	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	bigtop-utils	Extras	1.2.0-1.amzn2023
Trino	Core	hadoop-client	Extras	3.4.0.amzn.2-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop-hdfs	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hadoop-hdfs-datanode	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hadoop-hdfs-journalnode	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hadoop-hdfs-namenode	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hadoop-kms	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hadoop-mapreduce	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hadoop-mapreduce-historyserver	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hadoop-yarn	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hadoop-yarn-nodemanager	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hadoop-yarn-resourcemanager	Extras	3.4.0.amzn.2-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop-yarn-timelineserver	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hive	Extras	3.1.3.amzn.12-1.amzn2023
Trino	Core	hive-hcatalog-server	Extras	3.1.3.amzn.12-1.amzn2023
Trino	Core	mariadb-connector-java	Extras	2.7.2-1
Trino	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Trino	Core	zookeeper	Extras	3.9.2.amzn.0-1.amzn2023
Trino	Core	zookeeper-server	Extras	3.9.2.amzn.0-1.amzn2023
Trino	Core	bigtop-groovy	Extras	2.5.4-1.amzn2023
Trino	Core	bigtop-jsvc	Extras	1.2.4-1.amzn2023
Trino	Core	hadoop	Extras	3.4.0.amzn.2-1.amzn2023
Trino	Core	hadoop-lzo	Extras	0.4.19-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hive-hcatalog	Extras	3.1.3.amzn.15-1.amzn2023
Trino	Core	hive-jdbc	Extras	3.1.3.amzn.12-1.amzn2023
Zookeeper	Core	emrfs	Extras	3.9.2.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-client	Extras	3.9.2.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-hdfs	Extras	3.9.2.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-hdfs-datanode	Extras	3.9.2.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-hdfs-journalnode	Extras	3.9.2.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-hdfs-namenode	Extras	3.9.2.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-httpfs	Extras	3.9.2.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-kms	Extras	3.9.2.amzn.0-1.amzn2023
Zookeeper	Core	hadoop-mapreduce	Extras	3.4.0.amzn.2-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Zookeeper	Core	hadoop-mapreduce-historyserver	Extras	3.4.0.amzn.2-1.amzn2023
Zookeeper	Core	hadoop-yarn	Extras	3.4.0.amzn.2-1.amzn2023
Zookeeper	Core	hadoop-yarn-nodemanager	Extras	3.4.0.amzn.2-1.amzn2023
Zookeeper	Core	hadoop-yarn-proxyserver	Extras	3.4.0.amzn.2-1.amzn2023
Zookeeper	Core	hadoop-yarn-resourcemanager	Extras	3.4.0.amzn.2-1.amzn2023
Zookeeper	Core	hadoop-yarn-timelineserver	Extras	3.4.0.amzn.2-1.amzn2023
Zookeeper	Core	ranger-kms	Extras	2.0.0-1.amzn2023

7.6.0 common vulnerabilities and exposures

The following table lists all CVEs that don't impact EMR clusters that run on recommended configurations of Amazon EMR 7.6.0. Amazon EMR is dependent on upstream open-source for availability of fixes and will provide the latest stable version as part of the Core Engine components within 90 days of Amazon EMR verifying the fixes.

This table was updated on January 9, 2025.

7.6.0 release notes

The following release notes include information for Amazon EMR release 7.6.0.

New features

- **Application upgrades** – Amazon EMR 7.6.0 application upgrades include HBase 2.6.1, Flink 1.20.0, Spark 3.5.3, and Trino 457.

Known issues

- When managed scaling is enabled, the YARN ResourceManager (RM) experiences a critical deadlock issue, causing it to become unresponsive, when transitioning from the **DECOMMISSIONING** to **DECOMMISSIONED** state with simultaneous operations. This happens particularly in large-cluster environments. When it occurs, both node-state transitions and application-state transitions fail to process, effectively paralyzing the core functionality of the ResourceManager. As a workaround, restart the RM JVM using the following command on the primary node:

  ```
  sudo systemctl restart hadoop-yarn-resourcemanager
  ```

- When an EMR cluster is started with YARN schedulers other than the `CapacityScheduler` or `FairScheduler` (for example, the FIFO Scheduler), the `YARNMemoryAvailablePercentage` metric is not pushed to CloudWatch. This issue impacts down-scaling in managed-

scaling enabled clusters. It might also affect custom managed scaling if it depends on the `YARNMemoryAvailablePercentage` metric. As a workaround, use the `CapacityScheduler` or `FairScheduler`.

- **HBase table creation in Hive with Glue catalog** – From EMR-7.3.0 to EMR-7.10.0, there is a bug due to Hive Iceberg integration, which causes HBase table creation in Hive to fail when Glue Data Catalog is used as the metastore. Please reach out to the AWS support team if you encounter this issue.
- **Tez UI** – From EMR-7.3 to EMR-7.10, there is a bug where accessing Tez UI through YARN Resource Manager Web UI fails when in-transit encryption is enabled. This occurs because YARN proxy attempts to use HTTP protocol while Tez UI requires HTTPS. Please modify the `tez.tez-ui.history-url.base` configuration in `tez-site` from `http` to `https` to resolve this issue.

Changes, enhancements, and resolved issues

- Starting with EMR 7.6.0, the step cancellation process now ensures that all Hadoop YARN applications created by a step are terminated when that step is cancelled. This provides more reliable cleanup for applications like Spark jobs running in cluster mode.
- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to `TRUE` (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- CloudWatch agent is supported on Runtime Role Clusters for EMR 7.6 and above. For more information, see Amazon CloudWatch agent.
- Starting with Amazon Elastic Map Reduce (EMR) release version 7.6.0, the S3A filesystem connector now supports Amazon S3 client-side encryption.
- Starting with EMR 7.6.0, TLS is supported on HMaster and RegionServer endpoints. For more information, see the following table regarding TLS support with HBase: HBase.

7.6.0 default Java versions

Amazon EMR release 7.6 and higher ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.6.0. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	**17**, 11, 8
HBase	**17**, 11, 8
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11, 8
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**17**, 11, 8
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8

Application	Java / Amazon Corretto version (default is bold)
Tez	**17**, 11, 8
Trino	**21**, 17
Zeppelin	17, **11**, 8
Pig	**17**, 11, 8
Zookeeper	**17**, 11, 8

7.6.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.2.1-amzn-1	Delta lake is an open table format for huge analytic datasets

Component	Version	Description
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.6.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.15.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.19.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.18.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.36.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.15.0	EMR S3Select Connector
emr-wal-cli	1.3.1	Cli used for emrwal list/dele tion.
emrfs	2.67.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.20.0-amzn-0	Apache Flink command line client scripts and applications.

Component	Version	Description
flink-jobmanager-config	1.20.0-amzn-0	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.4.0-amzn-2	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.4.0-amzn-2	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.4.0-amzn-2	HDFS command-line client and library
hadoop-hdfs-namenode	3.4.0-amzn-2	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.4.0-amzn-2	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.4.0-amzn-2	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.4.0-amzn-2	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.4.0-amzn-2	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.4.0-amzn-2	YARN service for managing containers on an individual node.

Component	Version	Description
hadoop-yarn-resourcemanager	3.4.0-amzn-2	YARN service for allocating and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.4.0-amzn-2	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.6.1-amzn-0	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.6.1-amzn-0	Service for serving one or more HBase regions.
hbase-client	2.6.1-amzn-0	HBase command-line client.
hbase-rest-server	2.6.1-amzn-0	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.6.1-amzn-0	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.6.1-amzn-0	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-15	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-15	Service providing HCatalog, a table and storage management layer for distributed applications.

Component	Version	Description
hcatalog-webhcat-server	3.1.3-amzn-15	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-15	Hive command line client.
hive-hbase	3.1.3-amzn-15	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-15	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-15	Service for accepting Hive queries as web requests.
hudi	0.15.0-amzn-3	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.15.0-amzn-3	Bundle library for running Presto with Hudi.
hudi-trino	0.15.0-amzn-3	Bundle library for running Trino with Hudi.
hudi-spark	0.15.0-amzn-3	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.6.1-amzn-2	Apache Iceberg is an open table format for huge analytic datasets

Component	Version	Description
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	12.3.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.2.0	The phoenix libraries for server and client
phoenix-connectors	6.0.0	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API

Component	Version	Description
presto-coordinator	0.287-amzn-1	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.287-amzn-1	Service for executing pieces of a query.
presto-client	0.287-amzn-1	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	457-amzn-0	Service for accepting queries and managing query execution among trino-workers.
trino-worker	457-amzn-0	Service for executing pieces of a query.
trino-client	457-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.3-amzn-0	Spark command-line clients.

Component	Version	Description
spark-history-server	3.5.3-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.3-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.5.3-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	24.10.1-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
tensorflow	2.16.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-13	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-13	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.11.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.9.2-amzn-0	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.

Component	Version	Description
zookeeper-client	3.9.2-amzn-0	ZooKeeper command line client.

7.6.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.6.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad

Classifications	Description	Reconfiguration Actions
		ditionally restarts Hadoop KMS, Ranger KMS, HiveServe r2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.

Classifications	Description	Reconfiguration Actions
phoenix-log4j2	Change values in Phoenix's log4j2.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.

Classifications	Description	Reconfiguration Actions
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatchAgent service.

7.6.0 change log

Change log for 7.6.0 release and release notes

Date	Event	Description
2025-01-13	Docs publication	Amazon EMR 7.6.0 release notes first published
2025-01-10	Deployment complete	Amazon EMR 7.6.0 fully deployed to all supported Regions
2025-12-26	Initial release	Amazon EMR 7.6.0 first deployed to initial commercia l Regions

Amazon EMR release 7.5.0

7.5.0 supported lifecycle

The following table describes the supported lifecycle dates for Amazon EMR release 7.5.0.

Support phase	Date
Initial release date	November 21, 2024
Standard support until	November 20, 2026
End of support	November 21, 2026
End of life	November 21, 2027

7.5.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, Oozie, Phoenix, Pig, Presto, Spark, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.5.0 release components details

See the following table for more information about the *Extras* packages in Amazon EMR 7.5.0.

Application	Application Type	Package	Package Type	Package Version
AmazonCloudWatchAgent	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.5-1.amzn2023
AmazonCloudWatchAgent	Core	ranger-kms	Extras	2.0.0-1.amzn2023
AmazonCloudWatchAgent	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023
AmazonCloudWatchAgent	Core	zookeeper	Extras	3.9.1.amzn.1-1.amzn2023
AmazonCloudWatchAgent	Core	zookeeper-server	Extras	3.9.1.amzn.1-1.amzn2023
Flink	Core	hadoop-client	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-hdfs	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Flink	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-hdfs-namenode	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-httpfs	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-kms	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-mapreduce	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn-nodemanager	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn-resourcemanager	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Flink	Core	hadoop-yarn-timelineserver	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hudi	Extras	0.15.0.amzn.0-1.amzn2023
Flink	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Flink	Core	hadoop	Extras	3.3.6.amzn.5-1.amzn2023
HBase	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023
HCatalog	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
HCatalog	Core	mariadb-connector-java	Extras	
Hive	Core	hadoop-httpfs	Extras	3.3.6.amzn.5-1.amzn2023
Hive	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Hive	Core	hive-hbase	Extras	3.1.3.amzn.12-1.amzn2023
Hive	Core	mariadb-connector-java	Extras	2.7.2-1

Application	Application Type	Package	Package Type	Package Version
Hive	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023
Phoenix	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023
Spark	Core	spark-datanucleus	Extras	3.5.1.amzn.0-1.amzn2023
Tez	Core	hadoop-mapreduce	Extras	3.3.6.amzn.5-1.amzn2023
Tez	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.5-1.amzn2023
Tez	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	bigtop-utils	Extras	1.2.0-1.amzn2023
Trino	Core	hadoop-client	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs-namenode	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop-kms	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-mapreduce	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn-nodemanager	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn-resourcemanager	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn-timelineserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hive	Extras	3.1.3.amzn.12-1.amzn2023
Trino	Core	hive-hcatalog-server	Extras	3.1.3.amzn.12-1.amzn2023
Trino	Core	mariadb-connector-java	Extras	2.7.2-1

Application	Application Type	Package	Package Type	Package Version
Trino	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Trino	Core	zookeeper	Extras	3.9.1.amzn.1-1.amzn2023
Trino	Core	zookeeper-server	Extras	3.9.1.amzn.1-1.amzn2023
Trino	Core	bigtop-groovy	Extras	2.5.4-1.amzn2023
Trino	Core	bigtop-jsvc	Extras	1.2.4-1.amzn2023
Trino	Core	hadoop	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-lzo	Extras	0.4.19-1.amzn2023
Trino	Core	hive-hcatalog	Extras	3.1.3.amzn.12-1.amzn2023
Trino	Core	hive-jdbc	Extras	3.1.3.amzn.12-1.amzn2023
Zookeeper	Core	emrfs	Extras	2.64.0-1.amzn2023
Zookeeper	Core	hadoop-client	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Zookeeper	Core	hadoop-hdfs	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-hdfs-namenode	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-httpfs	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-kms	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-mapreduce	Extras	3.3.6.amzn.5-1.amzn2023

Zookeeper	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Zookeeper	Core	hadoop-yarn-resourcemanager	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-yarn-timelineserver	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	ranger-kms	Extras	2.0.0-1.amzn2023

7.5.0 common vulnerabilities and exposures

The following table lists all CVEs that don't impact EMR clusters that run on recommended configurations of Amazon EMR 7.5.0. Amazon EMR is dependent on upstream open-source for availability of fixes and will provide the latest stable version as part of the Core Engine components within 90 days of Amazon EMR verifying the fixes.

This table was updated on November 23, 2021.

7.5.0 release notes

The following release notes include information for Amazon EMR release 7.5.0.

New features

- **Application upgrades** – Amazon EMR 7.5.0 application upgrades include Delta 3.2.1-amzn-0, HBase 2.5.10, Hudi 0.15.0-amzn-2, and Iceberg 1.6.1-amzn-1.
- EMR write-ahead logs (WAL) support cross cluster replication. For more information, see EMR WAL cross-cluster replication.

Known issues

- Apache Sqoop has been removed from Amazon EMR Release 7.5 and later releases.
- When managed scaling is enabled, the YARN ResourceManager (RM) experiences a critical deadlock issue, causing it to become unresponsive, when transitioning from the **DECOMMISSIONING** to **DECOMMISSIONED** state with simultaneous operations. This happens particularly in large-cluster environments. When it occurs, both node-state transitions and application-state transitions fail to process, effectively paralyzing the core functionality of the ResourceManager. As a workaround, restart the RM JVM using the following command on the primary node:

```
sudo systemctl restart hadoop-yarn-resourcemanager
```

- When an EMR cluster is started with YARN schedulers other than the `CapacityScheduler` or `FairScheduler` (for example, the FIFO Scheduler), the `YARNMemoryAvailablePercentage` metric is not pushed to CloudWatch. This issue impacts down-scaling in managed-scaling enabled clusters. It might also affect custom managed scaling if it depends on the `YARNMemoryAvailablePercentage` metric. As a workaround, use the `CapacityScheduler` or `FairScheduler`.
- **HBase table creation in Hive with Glue catalog** – From EMR-7.3.0 to EMR-7.10.0, there is a bug due to Hive Iceberg integration, which causes HBase table creation in Hive to fail when Glue Data Catalog is used as the metastore. Please reach out to the AWS support team if you encounter this issue.
- **Tez UI** – From EMR-7.3 to EMR-7.10, there is a bug where accessing Tez UI through YARN Resource Manager Web UI fails when in-transit encryption is enabled. This occurs because YARN proxy attempts to use HTTP protocol while Tez UI requires HTTPS. Please modify the `tez.tez-ui.history-url.base` configuration in `tez-site` from `http` to `https` to resolve this issue.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to `TRUE` (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- Amazon EMR uses different builds of the TensorFlow library, depending on the instance types that you choose for your cluster. Amazon EMR also supports TensorFlow for clusters with **aarch64** instance types (Graviton instances) from EMR-7.5.0 and above.

  The following table lists builds by instance type for EMR-7.5.0:

EC2 instance types	TensorFlow build		
M5 and C5	Tensorflow 2.16.1 with Intel MKL optimization		
P2, P4D, P5, G4DN, G5, G6 and GR6	Tensorflow 2.16.1 with CUDA 12.3, cuDNN 8.9.7.29		
P3, P3DN, G3 and G3S	Tensorflow 2.16.1 with CUDA 12.3, cuDNN 8.9.7.29, NCCL 2.20.3-1 Nvidia NCCL is available only on P3 instances. **End User License Agreement (EULA)** – By using Nvidia components on Amazon EMR, you agree to the terms and conditions outlined in the product EULA.		
All others including Graviton (EMR-7.5.0+)	Tensorflow 2.16.1		

- An AWS Lake Formation with FGAC (Fine-Grained Access Control) enabled Amazon EMR cluster can now support up to 256 concurrent steps with the following hdfs-site.xml configuration:

```
[
  {
    "Classification": "hdfs-site",
    "Properties": {
      "dfs.datanode.handler.count": "40",
```

```
      "dfs.datanode.max.transfer.threads": "16384",
      "dfs.namenode.handler.count": "64",
      "dfs.replication": "1"
    }
  },
  {
    "Classification": "hdfs-env",
    "Configurations": [
      {
        "Classification": "export",
        "Properties": {
          "HADOOP_DATANODE_HEAPSIZE": "5120"
        }
      }
    ],
    "Properties": {}
  }
]
```

7.5.0 default Java versions

Amazon EMR release 7.5 and higher ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.5.0. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	**17**, 11, 8
HBase	**17**, 11, 8
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11, 8
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**17**, 11, 8
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8

Application	Java / Amazon Corretto version (default is bold)
Tez	**17**, 11, 8
Trino	**21**, 17
Zeppelin	17, **11**, 8
Pig	**8**
Zookeeper	**17**, 11, 8

7.5.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.2.1-amzn-0	Delta lake is an open table format for huge analytic datasets

Component	Version	Description
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.6.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.14.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.18.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.16.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.35.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.14.0	EMR S3Select Connector
emr-wal-cli	1.3.1	Cli used for emrwal list/dele tion.
emrfs	2.66.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.19.1-amzn-1	Apache Flink command line client scripts and applications.

Component	Version	Description
flink-jobmanager-config	1.19.1-amzn-1	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.4.0-amzn-1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.4.0-amzn-1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.4.0-amzn-1	HDFS command-line client and library
hadoop-hdfs-namenode	3.4.0-amzn-1	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.4.0-amzn-1	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.4.0-amzn-1	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.4.0-amzn-1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.4.0-amzn-1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.4.0-amzn-1	YARN service for managing containers on an individual node.

Component	Version	Description
hadoop-yarn-resourcemanager	3.4.0-amzn-1	YARN service for allocating and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.4.0-amzn-1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.5.10-amzn-0	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.5.10-amzn-0	Service for serving one or more HBase regions.
hbase-client	2.5.10-amzn-0	HBase command-line client.
hbase-rest-server	2.5.10-amzn-0	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.5.10-amzn-0	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.5.10-amzn-0	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-14	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-14	Service providing HCatalog, a table and storage management layer for distributed applications.

Component	Version	Description
hcatalog-webhcat-server	3.1.3-amzn-14	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-14	Hive command line client.
hive-hbase	3.1.3-amzn-14	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-14	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-14	Service for accepting Hive queries as web requests.
hudi	0.15.0-amzn-2	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.15.0-amzn-2	Bundle library for running Presto with Hudi.
hudi-trino	0.15.0-amzn-2	Bundle library for running Trino with Hudi.
hudi-spark	0.15.0-amzn-2	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.6.1-amzn-1	Apache Iceberg is an open table format for huge analytic datasets

Component	Version	Description
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	12.3.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.2.0	The phoenix libraries for server and client
phoenix-connectors	6.0.0	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API

Component	Version	Description
presto-coordinator	0.287-amzn-0	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.287-amzn-0	Service for executing pieces of a query.
presto-client	0.287-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	446-amzn-0	Service for accepting queries and managing query execution among trino-workers.
trino-worker	446-amzn-0	Service for executing pieces of a query.
trino-client	446-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.2-amzn-1	Spark command-line clients.

Component	Version	Description
spark-history-server	3.5.2-amzn-1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.2-amzn-1	In-memory execution engine for YARN.
spark-yarn-slave	3.5.2-amzn-1	Apache Spark libraries needed by YARN slaves.
spark-rapids	24.08.1-amzn-1	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
tensorflow	2.16.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-12	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-12	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.11.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.9.2-amzn-0	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.

Component	Version	Description
zookeeper-client	3.9.2-amzn-0	ZooKeeper command line client.

7.5.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.5.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad

Classifications	Description	Reconfiguration Actions
		ditionally restarts Hadoop KMS, Ranger KMS, HiveServe r2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.

Classifications	Description	Reconfiguration Actions
phoenix-log4j2	Change values in Phoenix's log4j2.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.

Classifications	Description	Reconfiguration Actions
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatchAgent service.

7.5.0 change log

Change log for 7.5.0 release and release notes

Date	Event	Description
2024-11-21	Docs publication	Amazon EMR 7.5.0 release notes first published
2024-11-21	Deployment complete	Amazon EMR 7.5.0 fully deployed to all supported Regions
2024-11-13	Initial release	Amazon EMR 7.5.0 first deployed to initial commercia l Regions

Amazon EMR release 7.4.0

7.4.0 supported lifecycle

The following table describes the supported lifecycle dates for Amazon EMR release 7.4.0.

Support phase	Date
Initial release date	November 13, 2024
Standard support until	November 12, 2026
End of support	November 13, 2026
End of life	November 13, 2027

7.4.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.4.0 release components details

See the following table for more information about the *Extras* packages in Amazon EMR 7.4.0.

Application	Application Type	Package	Package Type	Package Version
AmazonCloudWatchAgent	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.5-1.amzn2023
AmazonCloudWatchAgent	Core	ranger-kms	Extras	2.0.0-1.amzn2023
AmazonCloudWatchAgent	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023
AmazonCloudWatchAgent	Core	zookeeper	Extras	3.9.1.amzn.1-1.amzn2023
AmazonCloudWatchAgent	Core	zookeeper-server	Extras	3.9.1.amzn.1-1.amzn2023
Flink	Core	hadoop-client	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-hdfs	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Flink	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-hdfs-namenode	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-httpfs	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-kms	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-mapreduce	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn-nodemanager	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn-resourcemanager	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Flink	Core	hadoop-yarn-timelineserver	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hudi	Extras	0.15.0.amzn.0-1.amzn2023
Flink	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Flink	Core	hadoop	Extras	3.3.6.amzn.5-1.amzn2023
HBase	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023
HCatalog	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
HCatalog	Core	mariadb-connector-java	Extras	
Hive	Core	hadoop-httpfs	Extras	3.3.6.amzn.5-1.amzn2023
Hive	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Hive	Core	hive-hbase	Extras	3.1.3.amzn.12-1.amzn2023
Hive	Core	mariadb-connector-java	Extras	2.7.2-1

Application	Application Type	Package	Package Type	Package Version
Hive	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023
Phoenix	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023
Spark	Core	spark-datanucleus	Extras	3.5.1.amzn.0-1.amzn2023
Tez	Core	hadoop-mapreduce	Extras	3.3.6.amzn.5-1.amzn2023
Tez	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.5-1.amzn2023
Tez	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	bigtop-utils	Extras	1.2.0-1.amzn2023
Trino	Core	hadoop-client	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs-namenode	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop-kms	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-mapreduce	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn-nodemanager	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn-resourcemanager	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn-timelineserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hive	Extras	3.1.3.amzn.12-1.amzn2023
Trino	Core	hive-hcatalog-server	Extras	3.1.3.amzn.12-1.amzn2023
Trino	Core	mariadb-connector-java	Extras	2.7.2-1

Application	Application Type	Package	Package Type	Package Version
Trino	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Trino	Core	zookeeper	Extras	3.9.1.amzn.1-1.amzn2023
Trino	Core	zookeeper-server	Extras	3.9.1.amzn.1-1.amzn2023
Trino	Core	bigtop-groovy	Extras	2.5.4-1.amzn2023
Trino	Core	bigtop-jsvc	Extras	1.2.4-1.amzn2023
Trino	Core	hadoop	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-lzo	Extras	0.4.19-1.amzn2023
Trino	Core	hive-hcatalog	Extras	3.1.3.amzn.12-1.amzn2023
Trino	Core	hive-jdbc	Extras	3.1.3.amzn.12-1.amzn2023
Zookeeper	Core	emrfs	Extras	2.64.0-1.amzn2023
Zookeeper	Core	hadoop-client	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Zookeeper	Core	hadoop-hdfs	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-hdfs-namenode	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-httpfs	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-kms	Extras	3.3.6.amzn.5-1.amzn2023

Zookeeper	Core	ranger-kms	Extras	2.0.0-1.amzn2023

7.4.0 common vulnerabilities and exposures

The following table lists all CVEs that don't impact EMR clusters that run on recommended configurations of Amazon EMR 7.4.0. Amazon EMR is dependent on upstream open-source for availability of fixes and will provide the latest stable version as part of the Core Engine components within 90 days of Amazon EMR verifying the fixes.

This table was updated on November 14, 2024.

7.4.0 release notes

The following release notes include information for Amazon EMR release 7.4.0.

New features

- **Application upgrades** – Amazon EMR 7.4.0 application upgrades include AWS SDK for Java 2.28.8, Delta 3.2.0-amzn-1, Flink 1.19.1, Hadoop 3.4.0, HBase 2.5.5, Hudi 0.15.0-amzn-1, Iceberg 1.6.1-amzn-0, Phoenix 5.2.0, Presto 0.287, Spark 3.5.2, Trino 446, and Zookeeper 3.9.2.
- This release adds 7 open-source endpoints that support in-transit encryption over the network. This improvement includes open-source frameworks such as Hue, Livy, JupyterEnterpriseGateway, Zookeeper, and Ranger KMS. If you enabled in-transit encryption and want to connect to these endpoints, you might have to modify your code to support TLS communication. You can disable TLS for any of these endpoints as needed. For a full list of the supported endpoints, see Understanding in-transit encryption.

Known issues

- The `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-shuffle-data` property for the Yarn ResourceManager, which previously supported Hive shuffle handlers

since emr-6.11.0, now also applies graceful decommissioning to the files served by the Spark external shuffle service, when running Spark on Yarn in emr-7.4.0.

Note that The default behavior of the Spark external shuffle service, when running Spark on Yarn, is for the Yarn NodeManager to remove application shuffle files when the application is terminated. This might have an impact on the speed of node decommissioning and compute utilization. For long running applications, consider setting `spark.shuffle.service.removeShuffle` to `true` to remove shuffle files no longer in use, which enables faster decommissioning of nodes with no active shuffle data.

- Amazon S3 Select availability – Amazon S3 Select does not support cross-region queries for Presto and Trino. For more information about specific features available for Presto and Trino releases, see Presto and Trino.
- Apache Ranger is not supported by Amazon EMR Release 7.4.
- Apache Sqoop is not compatible with Apache Hadoop 3.4 because of a known issue SQOOP-3485. Amazon EMR Release 7.4 includes but does not support Apache Sqoop. Apache Sqoop will be removed from Amazon EMR Release 7.5 and higher releases.
- When managed scaling is enabled, the YARN ResourceManager (RM) experiences a critical deadlock issue, causing it to become unresponsive, when transitioning from the **DECOMMISSIONING** to **DECOMMISSIONED** state with simultaneous operations. This happens particularly in large-cluster environments. When it occurs, both node-state transitions and application-state transitions fail to process, effectively paralyzing the core functionality of the ResourceManager. As a workaround, restart the RM JVM using the following command on the primary node:

```
sudo systemctl restart hadoop-yarn-resourcemanager
```

- When an EMR cluster is started with YARN schedulers other than the `CapacityScheduler` or `FairScheduler` (for example, the FIFO Scheduler), the `YARNMemoryAvailablePercentage` metric is not pushed to CloudWatch. This issue impacts down-scaling in managed-scaling enabled clusters. It might also affect custom managed scaling if it depends on the `YARNMemoryAvailablePercentage` metric. As a workaround, use the `CapacityScheduler` or `FairScheduler`.
- **HBase table creation in Hive with Glue catalog** – From EMR-7.3.0 to EMR-7.10.0, there is a bug due to Hive Iceberg integration, which causes HBase table creation in Hive to fail when Glue Data Catalog is used as the metastore. Please reach out to the AWS support team if you encounter this issue.

- **Tez UI** – From EMR-7.3 to EMR-7.10, there is a bug where accessing Tez UI through YARN Resource Manager Web UI fails when in-transit encryption is enabled. This occurs because YARN proxy attempts to use HTTP protocol while Tez UI requires HTTPS. Please modify the `tez.tez-ui.history-url.base` configuration in `tez-site` from `http` to `https` to resolve this issue.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to `TRUE` (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- Amazon EMR uses different builds of the TensorFlow library depending on the instance types that you choose for your cluster. Amazon EMR also supports TensorFlow for clusters with aarch64 instance types (Graviton instances) from EMR-7.5.0 and above.
- **Optimizing S3 Request Scaling for Iceberg Workloads** – For customers that use Iceberg bundled with EMR 34 v7.4 releases, S3 has updated the default entropy scheme to a 20-character base-2 (e.g. 35 01010110100110110010) hash. This new base-2 entropy scheme reduces the character range and allows S3 to automatically scale request capacity more quickly to match the demands of the target Iceberg workload. It also reduces the amount of time that a workload observes 503 throttle responses.

7.4.0 default Java versions

Amazon EMR release 7.4 and higher ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.4.0. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	**17**, 11, 8
HBase	**17**, 11, 8
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11, 8
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**17**, 11, 8
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8

Application	Java / Amazon Corretto version (default is bold)
Sqoop	**8**
Tez	**17**, 11, 8
Trino	**21**, 17
Zeppelin	17, **11**, 8
Pig	**8**
Zookeeper	**8**

7.4.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.2.0-amzn-1	Delta lake is an open table format for huge analytic datasets

Component	Version	Description
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.6.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.13.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.17.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.17.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.34.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.13.0	EMR S3Select Connector
emr-wal-cli	1.3.1	Cli used for emrwal list/dele tion.
emrfs	2.65.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.19.1-amzn-0	Apache Flink command line client scripts and applications.

Component	Version	Description
flink-jobmanager-config	1.19.1-amzn-0	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.4.0-amzn-0	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.4.0-amzn-0	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.4.0-amzn-0	HDFS command-line client and library
hadoop-hdfs-namenode	3.4.0-amzn-0	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.4.0-amzn-0	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.4.0-amzn-0	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.4.0-amzn-0	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.4.0-amzn-0	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.4.0-amzn-0	YARN service for managing containers on an individual node.

Component	Version	Description
hadoop-yarn-resourcemanager	3.4.0-amzn-0	YARN service for allocating and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.4.0-amzn-0	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.5.5-amzn-0	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.5.5-amzn-0	Service for serving one or more HBase regions.
hbase-client	2.5.5-amzn-0	HBase command-line client.
hbase-rest-server	2.5.5-amzn-0	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.5.5-amzn-0	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.5.5-amzn-0	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-13	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-13	Service providing HCatalog, a table and storage management layer for distributed applications.

Component	Version	Description
hcatalog-webhcat-server	3.1.3-amzn-13	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-13	Hive command line client.
hive-hbase	3.1.3-amzn-13	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-13	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-13	Service for accepting Hive queries as web requests.
hudi	0.15.0-amzn-1	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.15.0-amzn-1	Bundle library for running Presto with Hudi.
hudi-trino	0.15.0-amzn-1	Bundle library for running Trino with Hudi.
hudi-spark	0.15.0-amzn-1	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.6.1-amzn-0	Apache Iceberg is an open table format for huge analytic datasets

Component	Version	Description
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	12.3.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.2.0	The phoenix libraries for server and client
phoenix-connectors	6.0.0	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API

Component	Version	Description
presto-coordinator	0.287-amzn-0	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.287-amzn-0	Service for executing pieces of a query.
presto-client	0.287-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	446-amzn-0	Service for accepting queries and managing query execution among trino-workers.
trino-worker	446-amzn-0	Service for executing pieces of a query.
trino-client	446-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.2-amzn-0	Spark command-line clients.

Component	Version	Description
spark-history-server	3.5.2-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.2-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.5.2-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	24.08.1-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.16.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-11	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-11	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.11.1	Web-based notebook that enables interactive data analytics.

Component	Version	Description
zookeeper-server	3.9.2-amzn-0	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.9.2-amzn-0	ZooKeeper command line client.

7.4.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.4.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-session.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli.properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts PhoenixQueryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.

Classifications	Description	Reconfiguration Actions
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.

Classifications	Description	Reconfiguration Actions
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j2	Change values in Phoenix's log4j2.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.

Classifications	Description	Reconfiguration Actions
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatc hAgent service.

7.4.0 change log

Change log for 7.4.0 release and release notes

Date	Event	Description
2024-11-18	Docs publication	Amazon EMR 7.4.0 release notes first published
2024-11-13	Deployment complete	Amazon EMR 7.4.0 fully deployed to all supported Regions
2024-10-31	Start of deployment	Amazon EMR 7.4.0 first deployed to initial commercia l Regions

Amazon EMR release 7.3.0

7.3.0 supported lifecycle

The following table describes the supported lifecycle dates for Amazon EMR release 7.3.0.

Support phase	Date
Initial release date	October 16, 2024
Standard support until	October 15, 2026
End of support	October 16, 2026
End of life	October 16, 2027

7.3.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.3.0 release components details

See the following table for more information about the *Extras* packages in Amazon EMR 7.3.0.

Application	Application Type	Package	Package Type	Package Version
AmazonCloudWatchAgent	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.5-1.amzn2023
AmazonCloudWatchAgent	Core	ranger-kms	Extras	2.0.0-1.amzn2023
AmazonCloudWatchAgent	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023
AmazonCloudWatchAgent	Core	zookeeper	Extras	3.9.1.amzn.1-1.amzn2023
AmazonCloudWatchAgent	Core	zookeeper-server	Extras	3.9.1.amzn.1-1.amzn2023
Flink	Core	hadoop-client	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-hdfs	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-hdfs-namenode	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-httpfs	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-kms	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Flink	Core	hadoop-mapreduce	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn-nodemanager	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn-resourcemanager	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hadoop-yarn-timelineserver	Extras	3.3.6.amzn.5-1.amzn2023
Flink	Core	hudi	Extras	0.15.0.amzn.0-1.amzn2023
Flink	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Flink	Core	hadoop	Extras	3.3.6.amzn.5-1.amzn2023
HBase	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
HCatalog	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
HCatalog	Core	mariadb-connector-java	Extras	
Hive	Core	hadoop-httpfs	Extras	3.3.6.amzn.5-1.amzn2023
Hive	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Hive	Core	hive-hbase	Extras	3.1.3.amzn.12-1.amzn2023
Hive	Core	mariadb-connector-java	Extras	2.7.2-1
Hive	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023
Phoenix	Core	s3-dist-cp	Extras	2.33.0-1.amzn2023
Spark	Core	spark-datanucleus	Extras	3.5.1.amzn.0-1.amzn2023
Tez	Core	hadoop-mapreduce	Extras	3.3.6.amzn.5-1.amzn2023
Tez	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Tez	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	bigtop-utils	Extras	1.2.0-1.amzn2023
Trino	Core	hadoop-client	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-hdfs-namenode	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-kms	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-mapreduce	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn-nodemanager	Extras	3.3.6.amzn.5-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn-resourcemanager	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-yarn-timelineserver	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hive	Extras	3.1.3.amzn.12-1.amzn2023
Trino	Core	hive-hcatalog-server	Extras	3.1.3.amzn.12-1.amzn2023
Trino	Core	mariadb-connector-java	Extras	2.7.2-1
Trino	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Trino	Core	zookeeper	Extras	3.9.1.amzn.1-1.amzn2023
Trino	Core	zookeeper-server	Extras	3.9.1.amzn.1-1.amzn2023
Trino	Core	bigtop-groovy	Extras	2.5.4-1.amzn2023
Trino	Core	bigtop-jsvc	Extras	1.2.4-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop	Extras	3.3.6.amzn.5-1.amzn2023
Trino	Core	hadoop-lzo	Extras	0.4.19-1.amzn2023
Trino	Core	hive-hcatalog	Extras	3.1.3.amzn.12-1.amzn2023
Trino	Core	hive-jdbc	Extras	3.1.3.amzn.12-1.amzn2023
Zookeeper	Core	emrfs	Extras	2.64.0-1.amzn2023
Zookeeper	Core	hadoop-client	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-hdfs	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.5-1.amzn2023

Zookeeper	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-yarn-resourcemanager	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	hadoop-yarn-timelineserver	Extras	3.3.6.amzn.5-1.amzn2023
Zookeeper	Core	ranger-kms	Extras	2.0.0-1.amzn2023

7.3.0 common vulnerabilities and exposures

The following table lists all CVEs that don't impact EMR clusters that run on recommended configurations of Amazon EMR 7.3.0. Amazon EMR is dependent on upstream open-source for availability of fixes and will provide the latest stable version as part of the Core Engine components within 90 days of Amazon EMR verifying the fixes.

This table was updated on October 3, 2024.

7.3.0 release notes

The following release notes include information for Amazon EMR release 7.3.0. Changes are relative to 7.3.0.

New features

- **Application upgrades** – Amazon EMR 7.3.0 application upgrades include Delta 3.2.0-amzn-0, Hudi 0.15.0-amzn-0, TensorFlow 2.16.1, Trino 442, and Zeppelin 0.11.1.
- This release adds 22 open-source endpoints that support in-transit encryption over the network. This improvement includes open-source frameworks such as Hadoop, Hive, Tez, HBase, Phoenix, and Flink. If you enabled in-transit encryption and want to connect to these endpoints, you might have to modify your code to support TLS communication. You can disable TLS for any of these endpoints as needed. For a full list of the supported endpoints, see Understanding in-transit encryption.
- With Amazon EMR 7.3.0, Apache Hive with Iceberg now supports the AWS Glue Data Catalog as a metastore, which gives you benefits such as a centralized repository to store metadata, automatically crawl data sources and extract metadata, and integration with other services for seamless workflows.

Known issues

- Python 3.11 isn't supported with EMR Studio.
- If you use in-transit encryption and Kerberos authentication, you won't be able to use Spark applications that depend on the Hive metastore. This issue is fixed in HIVE-16340 and will be fully resolved in SPARK-44114 when open-source Spark can upgrade to Hive 3. In the meantime, you can temporarily work around this issue by setting `hive.metastore.use.SSL` to `false`. For more information, see Configure applications.

- If you don't use Kerberos authentication, you must configure Spark to use SSL. To do so, set the following configurations when you provision your cluster.

```
[{
    "Classification": "spark-defaults",
    "Properties": {
        "spark.hadoop.hive.metastore.truststore.path": "/usr/share/aws/emr/
security/conf/keystore-thrift.jks",
        "spark.hadoop.hive.metastore.use.SSL": "true"
    }
}]
```

- If you use custom domains, some links in the Spark History Server UI in the AWS console might not work. Upload the following script to an S3 bucket, and then add a step to use the shell script.

```
#!/bin/bash

if grep -q ":8042" /etc/nginx/nginx.conf; then
    sudo sed -i '=s#\^(\\/nm\\/(?<nodeAddress>.*:8042)\\/(?<url>.*)\$)#^(\\/nm\\/
(?<nodeAddress>(\\.|-|[a-zA-Z0-9])*:8042)\\/(?<url>(node|conf|logs|stacks|jmx).*)\
$)#g' /etc/nginx/nginx.conf
else
    sudo sed -i 's#\^(\\/nm\\/(?<nodeAddress>.*:8044)\\/(?<url>.*)\$)#^(\\/nm\\/
(?<nodeAddress>(\\.|-|[a-zA-Z0-9])*:8044)\\/(?<url>(node|conf|logs|stacks|jmx).*)\
$)#g' /etc/nginx/nginx.conf
fi

sudo systemctl restart nginx
```

- **HBase table creation in Hive with Glue catalog** – From EMR-7.3.0 to EMR-7.10.0, there is a bug due to Hive Iceberg integration, which causes HBase table creation in Hive to fail when Glue Data Catalog is used as the metastore. Please reach out to the AWS support team if you encounter this issue.
- **Tez UI** – From EMR-7.3 to EMR-7.10, there is a bug where accessing Tez UI through YARN Resource Manager Web UI fails when in-transit encryption is enabled. This occurs because YARN proxy attempts to use HTTP protocol while Tez UI requires HTTPS. Please modify the `tez.tez-ui.history-url.base` configuration in `tez-site` from `http` to `https` to resolve this issue.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to TRUE (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- To support TLS hostname verification for YARN, this release changes the `yarn.resourcemanager.hostname` configuration from the primary instance IP address to the primary instance private DNS name.
- MXNet project has reached end of life and is now archived. the section called "emr-7.2.0" is the last release that includes MXNet.

- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

7.3.0 default Java versions

Amazon EMR release 7.3 and higher ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.3.0. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	**17**, 11, 8
HBase	**17**, 11, 8
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11, 8
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**17**, 11, 8
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8

Application	Java / Amazon Corretto version (default is bold)
Sqoop	**8**
Tez	**17**, 11, 8
Trino	**21**, 17
Zeppelin	**8**
Pig	**8**
Zookeeper	17, **11**, 8

7.3.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.2.0-amzn-0	Delta lake is an open table format for huge analytic datasets

Component	Version	Description
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.5.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.12.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.16.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.16.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.33.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.12.0	EMR S3Select Connector
emr-wal-cli	1.3.0	Cli used for emrwal list/dele tion.
emrfs	2.64.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.18.1-amzn-2	Apache Flink command line client scripts and applications.

Component	Version	Description
flink-jobmanager-config	1.18.1-amzn-2	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.3.6-amzn-5	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.6-amzn-5	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.6-amzn-5	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.6-amzn-5	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.3.6-amzn-5	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.3.6-amzn-5	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.6-amzn-5	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.6-amzn-5	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.6-amzn-5	YARN service for managing containers on an individual node.

Component	Version	Description
hadoop-yarn-resourcemanager	3.3.6-amzn-5	YARN service for allocating and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.6-amzn-5	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.17-amzn-7	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.17-amzn-7	Service for serving one or more HBase regions.
hbase-client	2.4.17-amzn-7	HBase command-line client.
hbase-rest-server	2.4.17-amzn-7	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.17-amzn-7	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.17-amzn-7	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-12	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-12	Service providing HCatalog, a table and storage management layer for distributed applications.

Component	Version	Description
hcatalog-webhcat-server	3.1.3-amzn-12	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-12	Hive command line client.
hive-hbase	3.1.3-amzn-12	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-12	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-12	Service for accepting Hive queries as web requests.
hudi	0.15.0-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.15.0-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.15.0-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.15.0-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.5.2-amzn-0	Apache Iceberg is an open table format for huge analytic datasets

Component	Version	Description
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	12.3.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.1.3	The phoenix libraries for server and client
phoenix-connectors	6.0.0	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API

Component	Version	Description
presto-coordinator	0.285-amzn-1	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.285-amzn-1	Service for executing pieces of a query.
presto-client	0.285-amzn-1	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	442-amzn-0	Service for accepting queries and managing query execution among trino-workers.
trino-worker	442-amzn-0	Service for executing pieces of a query.
trino-client	442-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.1-amzn-1	Spark command-line clients.

Component	Version	Description
spark-history-server	3.5.1-amzn-1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.1-amzn-1	In-memory execution engine for YARN.
spark-yarn-slave	3.5.1-amzn-1	Apache Spark libraries needed by YARN slaves.
spark-rapids	24.06.1-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.16.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-10	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-10	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.11.1	Web-based notebook that enables interactive data analytics.

Component	Version	Description
zookeeper-server	3.9.1-amzn-1	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.9.1-amzn-1	ZooKeeper command line client.

7.3.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.3.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Ranger KMS, HiveServe r2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.

Classifications	Description	Reconfiguration Actions
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.

Classifications	Description	Reconfiguration Actions
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.

Classifications	Description	Reconfiguration Actions
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatc hAgent service.

7.3.0 change log

Change log for 7.3.0 release and release notes

Date	Event	Description
2024-10-17	Docs publication	Amazon EMR 7.3.0 release notes first published
2024-10-16	Deployment complete	Amazon EMR 7.3.0 fully deployed to all supported Regions
2024-10-14	Initial release	Amazon EMR 7.3.0 first deployed to initial commercia l Regions

Amazon EMR release 7.2.0

7.2.0 supported lifecycle

The following table describes the supported lifecycle dates for Amazon EMR release 7.2.0.

Support phase	Date
Initial release date	July 25, 2024
Standard support until	July 24, 2026
End of support	July 25, 2026
End of life	July 25, 2027

7.2.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.2.0 release components details

See the following table for more information about the *Extras* packages in Amazon EMR 7.2.0.

Application	Application Type	Package	Package Type	Package Version
AmazonCloudWatchAgent	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.4-1.amzn2023
AmazonCloudWatchAgent	Core	ranger-kms	Extras	2.0.0-1.amzn2023
AmazonCloudWatchAgent	Core	s3-dist-cp	Extras	2.32.0-1.amzn2023
AmazonCloudWatchAgent	Core	zookeeper	Extras	3.9.1.amzn.1-1.amzn2023
AmazonCloudWatchAgent	Core	zookeeper-server	Extras	3.9.1.amzn.1-1.amzn2023
Flink	Core	hadoop-client	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-hdfs	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-hdfs-namenode	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-httpfs	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-kms	Extras	3.3.6.amzn.4-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Flink	Core	hadoop-mapreduce	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-yarn	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-yarn-nodemanager	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-yarn-resourcemanager	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hadoop-yarn-timelineserver	Extras	3.3.6.amzn.4-1.amzn2023
Flink	Core	hudi	Extras	0.14.1.amzn.1-1.amzn2023
Flink	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Flink	Core	hadoop	Extras	3.3.6.amzn.4-1.amzn2023
HBase	Core	s3-dist-cp	Extras	2.32.0-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
HCatalog	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.4-1.amzn2023
HCatalog	Core	mariadb-connector-java	Extras	2.7.2-1
Hive	Core	hadoop-httpfs	Extras	3.3.6.amzn.4-1.amzn2023
Hive	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.4-1.amzn2023
Hive	Core	hive-hbase	Extras	3.1.3.amzn.11-1.amzn2023
Hive	Core	mariadb-connector-java	Extras	2.7.2-1
Hive	Core	s3-dist-cp	Extras	2.32.0-1.amzn2023
Phoenix	Core	s3-dist-cp	Extras	2.32.0-1.amzn2023
Spark	Core	spark-datanucleus	Extras	3.5.1.amzn.0-1.amzn2023
Tez	Core	hadoop-mapreduce	Extras	3.3.6.amzn.4-1.amzn2023
Tez	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.4-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Tez	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	bigtop-utils	Extras	1.2.0-1.amzn2023
Trino	Core	hadoop-client	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-hdfs	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-hdfs-namenode	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-kms	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-mapreduce	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-yarn	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-yarn-nodemanager	Extras	3.3.6.amzn.4-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-yarn-resourcemanager	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-yarn-timelineserver	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hive	Extras	3.1.3.amzn.11-1.amzn2023
Trino	Core	hive-hcatalog-server	Extras	3.1.3.amzn.11-1.amzn2023
Trino	Core	mariadb-connector-java	Extras	2.7.2-1
Trino	Core	ranger-kms	Extras	2.0.0-1.amzn2023
Trino	Core	zookeeper	Extras	3.9.1.amzn.1-1.amzn2023
Trino	Core	zookeeper-server	Extras	3.9.1.amzn.1-1.amzn2023
Trino	Core	bigtop-groovy	Extras	2.5.4-1.amzn2023
Trino	Core	bigtop-jsvc	Extras	1.2.4-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Trino	Core	hadoop	Extras	3.3.6.amzn.4-1.amzn2023
Trino	Core	hadoop-lzo	Extras	0.4.19-1.amzn2023
Trino	Core	hive-hcatalog	Extras	3.1.3.amzn.11-1.amzn2023
Trino	Core	hive-jdbc	Extras	3.1.3.amzn.11-1.amzn2023
Zookeeper	Core	emrfs	Extras	2.63.0-1.amzn2023
Zookeeper	Core	hadoop-client	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-hdfs	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-hdfs-datanode	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-hdfs-journalnode	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-hdfs-namenode	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-httpfs	Extras	3.3.6.amzn.4-1.amzn2023

Application	Application Type	Package	Package Type	Package Version
Zookeeper	Core	hadoop-kms	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-mapreduce	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-mapreduce-historyserver	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-yarn	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-yarn-nodemanager	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-yarn-proxyserver	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-yarn-resourcemanager	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	hadoop-yarn-timelineserver	Extras	3.3.6.amzn.4-1.amzn2023
Zookeeper	Core	ranger-kms	Extras	2.0.0-1.amzn2023

7.2.0 common vulnerabilities and exposures

The following table lists all CVEs that don't impact EMR clusters that run on recommended configurations of Amazon EMR 7.2.0. Amazon EMR is dependent on upstream open-source for availability of fixes and will provide the latest stable version as part of the Core Engine components within 90 days of Amazon EMR verifying the fixes.

This table was updated on September 15, 2024.

7.2.0 release notes

The following release notes include information for Amazon EMR release 7.2.0. Changes are relative to 7.2.0.

New features

- **Application upgrades** – Amazon EMR 7.2.0 application upgrades include Iceberg 1.5.0-amzn-0 and Delta 3.1.0.
- Amazon EMR adds support so that you can use other applications such as HBase, Flink, and Hive with the Amazon S3 Express One Zone storage class.
- This release adds the capability to read restored objects, so you can read Glacier objects from an S3 location with the S3A protocol. This capability works with Spark, Flink, and Hive.
- Node labels with managed scaling - Use node labels with your instances based on market type or node type to improve automatic scaling from Amazon EMR. For more information, see Using managed scaling in Amazon EMR.

Known issues

- Python 3.11 isn't supported with EMR Studio.

Changes, enhancements, and resolved issues

- This release fixes an issue in an on-cluster instance-state script that monitors health of the instance which perviously consumed excessive CPU and memory resources when there are a large number of threads and/or open file handles on the node.
- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state.

The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to TRUE (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.

- This release fixes a deadlock issue that can occur during internal step cleanup operations. This operation manages the life cycle of steps as they complete on the EMR cluster. This issue affects critical Amazon EMR operations, such as step operation and scaling.
- This release resolves an issue where custom clusters with custom AMIs that have certain pre-existing log files can cause the Amazon EMR log management daemon to fail.
- Amazon EMR 7.2.0 upgrades the Amazon EMR daemon responsible for cluster management and monitoring activities from AWS SDK v1 to v2.

- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

7.2.0 default Java versions

Amazon EMR release 7.2 and higher ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.2.0. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	**17**, 11, 8
HBase	11, **8**
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11, 8
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**8**
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8

Application	Java / Amazon Corretto version (default is bold)
Sqoop	**8**
Tez	**17**, 11, 8
Trino	**21**, 17
Zeppelin	**8**
Pig	**8**
Zookeeper	**8**

7.2.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.1.0	Delta lake is an open table format for huge analytic datasets

Component	Version	Description
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.4.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.11.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.15.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.16.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.32.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.11.0	EMR S3Select Connector
emr-wal-cli	1.2.2	Cli used for emrwal list/dele tion.
emrfs	2.63.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.18.1-amzn-1	Apache Flink command line client scripts and applications.

Component	Version	Description
flink-jobmanager-config	1.18.1-amzn-1	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.3.6-amzn-4	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.6-amzn-4	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.6-amzn-4	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.6-amzn-4	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.3.6-amzn-4	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.3.6-amzn-4	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.6-amzn-4	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.6-amzn-4	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.6-amzn-4	YARN service for managing containers on an individual node.

Component	Version	Description
hadoop-yarn-resourcemanager	3.3.6-amzn-4	YARN service for allocating and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.6-amzn-4	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.17-amzn-6	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.17-amzn-6	Service for serving one or more HBase regions.
hbase-client	2.4.17-amzn-6	HBase command-line client.
hbase-rest-server	2.4.17-amzn-6	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.17-amzn-6	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.17-amzn-6	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-11	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-11	Service providing HCatalog, a table and storage management layer for distributed applications.

Component	Version	Description
hcatalog-webhcat-server	3.1.3-amzn-11	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-11	Hive command line client.
hive-hbase	3.1.3-amzn-11	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-11	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-11	Service for accepting Hive queries as web requests.
hudi	0.14.1-amzn-1	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.14.1-amzn-1	Bundle library for running Presto with Hudi.
hudi-trino	0.14.1-amzn-1	Bundle library for running Trino with Hudi.
hudi-spark	0.14.1-amzn-1	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.5.0-amzn-0	Apache Iceberg is an open table format for huge analytic datasets

Component	Version	Description
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.8.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.1.3	The phoenix libraries for server and client
phoenix-connectors	5.1.3	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API

Component	Version	Description
presto-coordinator	0.285-amzn-0	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.285-amzn-0	Service for executing pieces of a query.
presto-client	0.285-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	436-amzn-0	Service for accepting queries and managing query execution among trino-workers.
trino-worker	436-amzn-0	Service for executing pieces of a query.
trino-client	436-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.1-amzn-0	Spark command-line clients.

Component	Version	Description
spark-history-server	3.5.1-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.1-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.5.1-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	24.02.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.11.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-9	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-9	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.

Component	Version	Description
zookeeper-server	3.9.1-amzn-1	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.9.1-amzn-1	ZooKeeper command line client.

7.2.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.2.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.

Classifications	Description	Reconfiguration Actions
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.

Classifications	Description	Reconfiguration Actions
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.

Classifications	Description	Reconfiguration Actions
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatc hAgent service.

7.2.0 change log

Change log for 7.2.0 release and release notes

Date	Event	Description
2025-09-03	Docs revision	Amazon EMR 7.2.0 release note added
2024-07-25	Docs publication	Amazon EMR 7.2.0 release notes first published
2024-07-16	Initial release	Amazon EMR 7.2.0 first deployed to initial commercia l Regions

Amazon EMR release 7.1.0

7.1.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.1.0 release notes

The following release notes include information for Amazon EMR release 7.1.0. Changes are relative to 7.1.0.

New features

- **Application upgrades** – Amazon EMR 7.1.0 application upgrades include Livy 0.8.0, Trino 435, and ZooKeeper 3.9.1.
- **Unhealthy node replacement** – With Amazon EMR 7.1.0 and higher, unhealthy node replacement is enabled by default, so Amazon EMR will gracefully replace your unhealthy nodes. To avoid affecting your existing workflows on Amazon EMR releases 7.0.0 and lower, unhealthy node replacement is disabled if you enabled termination protection in your cluster.
- **CloudWatch Agent** – Configure the CloudWatch agent to use additional system metrics, add application metrics, and change metrics destination with the Amazon EMR configuration API.

Known issues

- The application JupyterEnterpriseGateway (JEG) does not support Python 3.11 in this release.
- An on-cluster instance-state script that monitors health of the instance can consume excessive CPU and memory resources when there are a large number of threads and/or open file handles on the node.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to TRUE (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- While Amazon EMR 7.1.0 supports Python 3.9 by default, Livy 0.8.0 and Spark in Amazon EMR 7.1.0 support Python 3.11.
- This release fixes the issue of needing to run each line one at a time when using PySpark with Python version 3.11.
- **Zeppelin upgrade** – Amazon EMR 7.1.0 includes an upgrade of Zeppelin to the AWS SDK for Java v2. This upgrade enables a Zeppelin S3 Notebook to accept a custom encryption materials provider. The AWS SDK for Java v2 removes the EncryptionMaterialsProvider interface. When you upgrade to Amazon EMR 7.1.0, you must implement the Keyring interface if you want to use custom encryption. For an example of how to implement the Keyring interface, see KmsKeyring.java.
- When upgrading to Amazon EMR release 7.1.0, change your custom key provider for local disk encryption to generate keys using the AES algorithm of AES/GCM/NoPadding. If you don't update the algorithm, cluster creation might fail with the error `Local disk encryption failed on master instance (i-123456789) due to internal error.` For more information about creating a custom key provider, see Creating a custom key provider.

- Amazon EMR 7.1.0 improves the resiliency of a node under low disk space conditions by improving log truncation logic for files with open file handles.
- This release enhances the encoding and decoding logic to minimize risk of data corruption and node failure with Amazon EMR daemons read and write files when restarting a node.

- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

7.1.0 default Java versions

Amazon EMR release 7.1 and higher ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.1.0. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	**17**, 11, 8
HBase	11, **8**
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11, 8
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**8**
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8

Application	Java / Amazon Corretto version (default is bold)
Sqoop	**8**
Tez	**17**, 11, 8
Trino	**17**
Zeppelin	**8**
Pig	**8**
Zookeeper	**8**

7.1.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.0.0	Delta lake is an open table format for huge analytic datasets

Component	Version	Description
emr-amazon-cloudwatch-agent	1.300032.2-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.3.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.10.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.14.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.31.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.10.0	EMR S3Select Connector
emr-wal-cli	1.2.2	Cli used for emrwal list/dele tion.
emrfs	2.62.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.18.1-amzn-0	Apache Flink command line client scripts and applications.

Component	Version	Description
flink-jobmanager-config	1.18.1-amzn-0	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.3.6-amzn-3	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.6-amzn-3	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.6-amzn-3	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.6-amzn-3	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.3.6-amzn-3	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.3.6-amzn-3	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.6-amzn-3	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.6-amzn-3	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.6-amzn-3	YARN service for managing containers on an individual node.

Component	Version	Description
hadoop-yarn-resourcemanager	3.3.6-amzn-3	YARN service for allocating and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.6-amzn-3	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.17-amzn-5	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.17-amzn-5	Service for serving one or more HBase regions.
hbase-client	2.4.17-amzn-5	HBase command-line client.
hbase-rest-server	2.4.17-amzn-5	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.17-amzn-5	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.17-amzn-5	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-10	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-10	Service providing HCatalog, a table and storage management layer for distributed applications.

Component	Version	Description
hcatalog-webhcat-server	3.1.3-amzn-10	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-10	Hive command line client.
hive-hbase	3.1.3-amzn-10	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-10	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-10	Service for accepting Hive queries as web requests.
hudi	0.14.1-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.14.1-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.14.1-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.14.1-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.4.3-amzn-0	Apache Iceberg is an open table format for huge analytic datasets

Component	Version	Description
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.8.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.8.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.1.3	The phoenix libraries for server and client
phoenix-connectors	5.1.3	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API

Component	Version	Description
presto-coordinator	0.284-amzn-0	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.284-amzn-0	Service for executing pieces of a query.
presto-client	0.284-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	435-amzn-0	Service for accepting queries and managing query execution among trino-workers.
trino-worker	435-amzn-0	Service for executing pieces of a query.
trino-client	435-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.0-amzn-1	Spark command-line clients.

Component	Version	Description
spark-history-server	3.5.0-amzn-1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.0-amzn-1	In-memory execution engine for YARN.
spark-yarn-slave	3.5.0-amzn-1	Apache Spark libraries needed by YARN slaves.
spark-rapids	23.10.0-amzn-1	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.11.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-8	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-8	The tez YARN application and libraries for worker nodes.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.

Component	Version	Description
zookeeper-server	3.9.1-amzn-0	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.9.1-amzn-0	ZooKeeper command line client.

7.1.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.1.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Ranger KMS, HiveServe r2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.

Classifications	Description	Reconfiguration Actions
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.

Classifications	Description	Reconfiguration Actions
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.

trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.

Classifications	Description	Reconfiguration Actions
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-logback	Change values in ZooKeeper's logback.xml file.	Restarts Zookeeper server.
emr-metrics	Change emr metric settings for this node.	Restarts the CloudWatc hAgent service.

7.1.0 change log

Change log for 7.1.0 release and release notes

Date	Event	Description
2025-09-03	Docs revision	Amazon EMR 7.1.0 release notes added known issue
2024-05-10	Docs publication	Amazon EMR 7.1.0 release notes first published
2024-05-10	Docs publication	Amazon EMR 7.1.0 release notes first published
2024-05-08	Deployment complete	Amazon EMR 7.1.0 fully deployed to all supported Regions
2024-04-23	Initial release	Amazon EMR 7.1.0 first deployed to initial commercia l Regions

Amazon EMR release 7.0.0

7.0.0 application versions

This release includes the following applications: AmazonCloudWatchAgent, Delta, Flink, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

7.0.0 release notes

The following release notes include information for Amazon EMR release 7.0.0. Changes are relative to 6.15.0.

New features

- **Application upgrades** – Amazon EMR 7.0.0 application upgrades include Python 3.9, Spark 3.5, Flink 1.18, and Delta 3.0. This release also adds support for the Amazon CloudWatch agent application and removes support for Ganglia.
- **Amazon Corretto 17** – Amazon EMR releases 7.0 and higher ship with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy. For more information about the supported JDK versions for applications in this release, see 7.0.0 default Java versions.
- **Amazon Linux 2023** – With the 7.0 release, Amazon EMR clusters now run on AL2023 by default. For information on how this affects the default AMI version, see Software update considerations in the *Amazon EMR Management Guide*. Also note that AL2023 removed Python 2.7, so any components that require Python should now be written with Python 3.

- **S3 on Outposts with s3a** – Amazon EMR now supports Amazon S3 on Outposts buckets with the `s3a` file system. For more information about S3 on Outposts, see What is S3 on Outposts? in the *Amazon Simple Storage Service User Guide*.

Known issues

- Note that you can't run more than one line at a time if you are using PySpark with Python versions 3.10 or later. You must run each line one at a time.
- An on-cluster instance-state script that monitors health of the instance can consume excessive CPU and memory resources when there are a large number of threads and/or open file handles on the node.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to `TRUE` (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- To maintain the state of all the instances in a cluster, Amazon EMR integrates with Apache YARN, Apache HDFS, and Kerberos. With 7.0, we enhanced these integrations to reliably remove the state of instances that are terminated due to scaling or other operations. This is particularly important for long-lived clusters that have managed scaling enabled, as they scale frequently and accumulate thousands of terminated instances over their lifetimes.
- This release improves the Kerberos configuration to only include support for AES-based ciphers. Kerberos KDC with non-AES based ciphers are no longer supported with EMR clusters that run on Amazon EMR releases 7.0.0 and higher. AES-based ciphers offer the strongest security for your clusters.

- As part of the AWS SDK 2.x migration, Amazon EMR 7.0 includes an update to the Spark Kinesis connector for compatibility. This update isn't available in the community version of Apache Spark. If you use the Spark Kinesis connector from an Amazon EMR release lower than 7.0, you must migrate your application codes to run on SDK 2.x before you can migrate your workloads to Amazon EMR 7.0. For more information, see Migrating Spark Kinesis connector to SDK 2.x for Amazon EMR 7.0.
- The `aws-sagemaker-spark-sdk` component is not available from Amazon EMR 7.x onwards.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

7.0.0 default Java versions

Amazon EMR release 7.0 and higher ships with Amazon Corretto 17 (built on OpenJDK) by default for applications that support Corretto 17 (JDK 17), with the exception of Apache Livy.

The following table shows the default Java versions for applications in Amazon EMR 7.0.0. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

Application	Java / Amazon Corretto version (default is bold)
Delta	**17**, 11, 8
Flink	11, **8**
HBase	11, **8**
HCatalog	**17**, 11, 8
Hadoop	**17**, 11, 8
Hive	**17**, 11, 8
Hudi	**17**, 11, 8
Iceberg	**17**, 11, 8
Livy	17, 11, **8**
Oozie	**17**, 11, 8
Phoenix	**8**
PrestoDB	**8**
Spark	**17**, 11, 8
Spark RAPIDS	**17**, 11, 8

Application	Java / Amazon Corretto version (default is bold)
Sqoop	**8**
Tez	**17**, 11, 8
Trino	**17**
Zeppelin	**8**
Pig	**8**
Zookeeper	**8**

7.0.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
adot-java-agent	1.31.0	A Java Agent that collects metrics from application daemons.
delta	3.0.0	Delta lake is an open table format for huge analytic datasets

Component	Version	Description
delta-standalone-connectors	0.6.0	Delta Connectors provide different runtimes to integrate Delta Lake with engines like Flink, Hive and Presto.
emr-amazon-cloudwatch-agent	1.300031.1-amzn-0	An application that collects internal system-level metrics and custom application metrics from Amazon EC2 instances.
emr-ddb	5.2.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.9.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.13.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.30.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.9.0	EMR S3Select Connector
emr-wal-cli	1.2.1	Cli used for emrwal list/dele tion.

Component	Version	Description
emrfs	2.61.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.18.0-amzn-0	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.18.0-amzn-0	Managing resources on EMR nodes for Apache Flink JobManager.
hadoop-client	3.3.6-amzn-2	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.6-amzn-2	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.6-amzn-2	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.6-amzn-2	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.3.6-amzn-2	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.3.6-amzn-2	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.6-amzn-2	Cryptographic key management server based on Hadoop's KeyProvider API.

Component	Version	Description
hadoop-mapred	3.3.6-amzn-2	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.6-amzn-2	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.3.6-amzn-2	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.6-amzn-2	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.17-amzn-4	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.17-amzn-4	Service for serving one or more HBase regions.
hbase-client	2.4.17-amzn-4	HBase command-line client.
hbase-rest-server	2.4.17-amzn-4	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.17-amzn-4	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.17-amzn-4	Repair tool for Apache HBase clusters.

Component	Version	Description
hcatalog-client	3.1.3-amzn-9	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-9	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-9	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-9	Hive command line client.
hive-hbase	3.1.3-amzn-9	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-9	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-9	Service for accepting Hive queries as web requests.
hudi	0.14.0-amzn-1	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.14.0-amzn-1	Bundle library for running Presto with Hudi.
hudi-trino	0.14.0-amzn-1	Bundle library for running Trino with Hudi.

Component	Version	Description
hudi-spark	0.14.0-amzn-1	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.4.2-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.8.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.

Component	Version	Description
phoenix-library	5.1.3	The phoenix libraries for server and client
phoenix-connectors	5.1.3	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.283-amzn-1	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.283-amzn-1	Service for executing pieces of a query.
presto-client	0.283-amzn-1	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	426-amzn-1	Service for accepting queries and managing query execution among trino-workers.
trino-worker	426-amzn-1	Service for executing pieces of a query.

Component	Version	Description
trino-client	426-amzn-1	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.3.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.5.0-amzn-0	Spark command-line clients.
spark-history-server	3.5.0-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.5.0-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.5.0-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	23.10.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.11.0	TensorFlow open source software library for high performance numerical computation.

Component	Version	Description
tez-on-yarn	0.10.2-amzn-7	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-7	The tez YARN application and libraries for worker nodes.
webserver	2.4.58	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.10	ZooKeeper command line client.

7.0.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-7.0.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN

Classifications	Description	Reconfiguration Actions
		services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-session.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli.properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts PhoenixQueryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.

Classifications	Description	Reconfiguration Actions
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.

Classifications	Description	Reconfiguration Actions
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.

Classifications	Description	Reconfiguration Actions
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.

Classifications	Description	Reconfiguration Actions
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.pro perties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.

Classifications	Description	Reconfiguration Actions
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

7.0.0 change log

Change log for 7.0.0 release and release notes

Date	Event	Description
2025-09-03	Docs revision	Amazon EMR 7.0.0 release notes added known issue
2023-12-29	Deployment complete	Amazon EMR 7.0.0 fully deployed to all supported Regions
2023-12-28	Docs publication	Amazon EMR 7.0.0 release notes first published

Date	Event	Description
2023-12-19	Initial release	Amazon EMR 7.0.0 first deployed to initial commercia l Regions

Amazon EMR 6.x release versions

This section contains application versions, release notes, component versions, and configuration classifications available in each Amazon EMR 6.x release version.

When you launch a cluster, you can choose from multiple releases of Amazon EMR. This allows you to test and use application versions that fit your compatibility requirements. You specify the release number with the *release label*. Release labels are in the form `emr-x.x.x`. For example, `emr-7.12.0`.

New Amazon EMR releases are made available in different Regions over a period of several days, beginning with the first Region on the initial release date. The latest release version may not be available in your Region during this period.

For a comprehensive table of application versions in every Amazon EMR 6.x release, see Application versions in Amazon EMR 6.x releases.

Topics

- Application versions in Amazon EMR 6.x releases
- Amazon EMR release 6.15.0
- Amazon EMR release 6.14.0
- Amazon EMR release 6.13.0
- Amazon EMR release 6.12.0
- Amazon EMR release 6.11.1
- Amazon EMR release 6.11.0
- Amazon EMR release 6.10.1
- Amazon EMR release 6.10.0
- Amazon EMR release 6.9.1

- Amazon EMR release 6.9.0
- Amazon EMR release 6.8.1
- Amazon EMR release 6.8.0
- Amazon EMR release 6.7.0
- Amazon EMR release 6.6.0
- Amazon EMR release 6.5.0
- Amazon EMR release 6.4.0
- Amazon EMR release 6.3.1
- Amazon EMR release 6.3.0
- Amazon EMR release 6.2.1
- Amazon EMR release 6.2.0
- Amazon EMR release 6.1.1
- Amazon EMR release 6.1.0
- Amazon EMR release 6.0.1
- Amazon EMR release 6.0.0

Application versions in Amazon EMR 6.x releases

For a comprehensive table that lists the application versions available in each Amazon EMR 6.x release, open Application versions in Amazon EMR 6.x releases in your browser.

Amazon EMR release 6.15.0

6.15.0 application versions

This release includes the following applications: Delta, Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.15.0 release notes

The following release notes include information for Amazon EMR release 6.15.0. Changes are relative to 6.14.0. For information on the release timeline, see the 6.15.0 change log.

New features

- **Application upgrades** – Amazon EMR 6.15.0 application upgrades include Apache Hadoop 3.3.6, Apache Hudi 0.14.0-amzn-0, Iceberg 1.4.0-amzn-0, and Trino 426.
- **Faster launches for EMR clusters that run on EC2** – It's now up to 35% faster to launch an Amazon EMR on EC2 cluster. With this improvement, most customers can launch their clusters in 5 minutes or less.
- **CodeWhisperer for EMR Studio** – You can now use Amazon CodeWhisperer with Amazon EMR Studio to get real-time recommendations as you write code in JupyterLab. CodeWhisperer can complete your comments, finish single lines of code, make line-by-line recommendations, and generate fully-formed functions.
- **Faster job restart times with Flink** – With Amazon EMR 6.15.0 and higher, several new mechanisms are available for Apache Flink to improve the job restart time during task recovery or scaling operations. This optimizes the speed of recovery and restart of execution graphs to improve job stability.
- **Table-level and fine-grained access control for open-table formats** – With Amazon EMR 6.15.0 and higher, when you run Spark jobs on Amazon EMR on EC2 clusters that access data in the AWS Glue Data Catalog, you can use AWS Lake Formation to apply table, row, column, and cell level permissions on Hudi, Iceberg, or Delta Lake based tables.
- **Hadoop upgrade** – Amazon EMR 6.15.0 includes an upgrade of Apache Hadoop to version 3.3.6. Hadoop 3.3.6 was the latest version at the time of the Amazon EMR 6.15 deployment, released by Apache in June 2023. Prior releases of Amazon EMR (6.9.0 to 6.14.x) used Hadoop 3.3.3.

  The upgrade includes hundreds of improvements and fixes, and features that include reconfigurable datanode parameters, `DFSAdmin` option to initiate bulk reconfiguration

operations on all live datanodes, and a vectored API that allows seek-heavy readers to specify multiple ranges to read. Hadoop 3.3.6 also adds support for HDFS APIs and semantics for its write-ahead log (WAL), so that HBase can run on other storage system implementations. For more information, see the changelogs for versions 3.3.4, 3.3.5, and 3.3.6 in the *Apache Hadoop documentation*.

- **Support for AWS SDK for Java, version 2** - Amazon EMR 6.15.0 applications can use AWS SDK for Java versions 1.12.569 or 2.20.160 if the application supports v2. The AWS SDK for Java 2.x is a major rewrite of the version 1.x code base. It's built on top of Java 8+ and adds several frequently requested features. These include support for non-blocking I/O, and the ability to plug in a different HTTP implementation at runtime. For more information, including a **Migration Guide from SDK for Java v1 to v2**, see the AWS SDK for Java, version 2 guide.

Known issues

- An on-cluster instance-state script that monitors health of the instance can consume excessive CPU and memory resources when there are a large number of threads and/or open file handles on the node.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to TRUE (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- To improve your high-availability EMR clusters, this release enables connectivity to Amazon EMR daemons on local host that use IPv6 endpoints.
- This release enables TLS 1.2 for communication with ZooKeeper provisioned on all the primary nodes of your high-availability cluster.

- This release improves the management of ZooKeeper transaction log files that are maintained on primary nodes to minimize scenarios where the log files grow out of bounds and interrupt cluster operations.
- This release makes intra-node communication more resilient for high-availability EMR clusters. This improvement reduces the chance of bootstrap action failures or cluster start failures.
- Tez in Amazon EMR 6.15.0 introduces configurations that you can specify to asynchronously open the input splits in a Tez grouped split. This results in faster performance of read queries when there are a large number of input splits in a single Tez grouped split. For more information, see Tez asynchronous split opening.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

6.15.0 default Java versions

Amazon EMR releases 6.12.0 and higher support all applications with Amazon Corretto 8 by default, except for Trino. For Trino, Amazon EMR supports Amazon Corretto 17 by default starting with Amazon EMR release 6.9.0. Amazon EMR also supports some applications with Amazon Corretto 11 and 17. Those applications are listed in the following table. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

While Amazon EMR supports both Amazon Corretto 11 and 17 on Apache Spark, Apache Hadoop, and Apache Hive, performance might regress for some workloads when you use these versions of Corretto. We recommend that you test your workloads before you change defaults.

The following table shows the default Java versions for applications in Amazon EMR 6.15.0:

Application	Java / Amazon Corretto version (default is bold)
Delta	17, 11, **8**
Flink	11, **8**
Ganglia	**8**
HBase	11, **8**
HCatalog	17, 11, **8**
Hadoop	17, 11, **8**
Hive	17, 11, **8**
Hudi	17, 11, **8**
Iceberg	17, 11, **8**
Livy	17, 11, **8**
Oozie	17, 11, **8**

Application	Java / Amazon Corretto version (default is bold)
Phoenix	**8**
PrestoDB	**8**
Spark	17, 11, **8**
Spark RAPIDS	17, 11, **8**
Sqoop	**8**
Tez	17, 11, **8**
Trino	**17**
Zeppelin	**8**
Pig	**8**
Zookeeper	**8**

6.15.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK
delta	2.4.0	Delta lake is an open table format for huge analytic datasets
delta-standalone-connectors	0.6.0	Delta Connectors provide different runtimes to integrate Delta Lake with engines like Flink, Hive and Presto.
emr-ddb	5.2.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.8.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.12.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.29.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.8.0	EMR S3Select Connector
emr-wal-cli	1.2.0	Cli used for emrwal list/dele tion.

Component	Version	Description
emrfs	2.60.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.17.1-amzn-1	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.17.1-amzn-1	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.3.6-amzn-1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.6-amzn-1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.6-amzn-1	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.6-amzn-1	HDFS service for tracking file names and block locations.

Component	Version	Description
hadoop-hdfs-journalnode	3.3.6-amzn-1	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.3.6-amzn-1	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.6-amzn-1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.6-amzn-1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.6-amzn-1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.3.6-amzn-1	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.6-amzn-1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.17-amzn-3	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.17-amzn-3	Service for serving one or more HBase regions.
hbase-client	2.4.17-amzn-3	HBase command-line client.

Component	Version	Description
hbase-rest-server	2.4.17-amzn-3	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.17-amzn-3	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.17-amzn-3	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-8	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-8	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-8	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-8	Hive command line client.
hive-hbase	3.1.3-amzn-8	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-8	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-8	Service for accepting Hive queries as web requests.

Component	Version	Description
hudi	0.14.0-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.14.0-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.14.0-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.14.0-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.4.0-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.

Component	Version	Description
nvidia-cuda	11.8.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.1.3	The phoenix libraries for server and client
phoenix-connectors	5.1.3	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.283-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.283-amzn-0	Service for executing pieces of a query.
presto-client	0.283-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.

Component	Version	Description
trino-coordinator	426-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	426-amzn-0	Service for executing pieces of a query.
trino-client	426-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.4.1-amzn-2	Spark command-line clients.
spark-history-server	3.4.1-amzn-2	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.4.1-amzn-2	In-memory execution engine for YARN.
spark-yarn-slave	3.4.1-amzn-2	Apache Spark libraries needed by YARN slaves.
spark-rapids	23.08.1-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.

Component	Version	Description
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.11.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-6	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-6	The tez YARN application and libraries for worker nodes.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.10	ZooKeeper command line client.

6.15.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.15.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.

Classifications	Description	Reconfiguration Actions
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.

Classifications	Description	Reconfiguration Actions
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.15.0 change log

Change log for 6.15.0 release and release notes

Date	Event	Description
2025-09-03	Docs revision	Amazon EMR 6.15.0 release notes added known issue
2023-11-17	Docs publication	Amazon EMR 6.15.0 release notes first published
2023-11-17	Deployment complete	Amazon EMR 6.15.0 fully deployed to all supported Regions
2023-11-13	Initial release	Amazon EMR 6.15.0 first deployed to initial commercia l Regions

Amazon EMR release 6.14.0

6.14.0 application versions

This release includes the following applications: Delta, Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.14.0 release notes

The following release notes include information for Amazon EMR release 6.14.0. Changes are relative to 6.13.0. For information on the release timeline, see the 6.14.0 change log.

New features

- Amazon EMR 6.14.0 supports Apache Spark 3.4.1, Apache Spark RAPIDS 23.06.0-amzn-2, Flink 1.17.1, Iceberg 1.3.1, and Trino 422.
- Amazon EMR managed scaling is now available in the `ap-southeast-3` Asia Pacific (Jakarta) Region for clusters that you create with Amazon EMR 6.14.0 and higher.

Known issues

- An on-cluster instance-state script that monitors health of the instance can consume excessive CPU and memory resources when there are a large number of threads and/or open file handles on the node.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to `TRUE` (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- The 6.14.0 release optimizes log management with Amazon EMR running on Amazon EC2. As a result, you might see a slight reduction in storage costs for your cluster logs.
- The 6.14.0 release improves the scaling workflow to account for different core instances that have a substantial variation in size for their Amazon EBS volumes. This improvement applies to core nodes only; scale-down operations for task nodes aren't affected.

- The 6.14.0 release improves the way that Amazon EMR interacts with open-source applications such as Apache Hadoop YARN ResourceManager and HDFS NameNode. This improvement reduces the risk of operational delays with cluster scaling, and mitigates startup failures that occur due to connectivity issues with the open-source applications.
- The 6.14.0 release optimizes application installation at cluster launch. This improves the cluster startup times for certain combinations of Amazon EMR applications.
- The 6.14.0 release fixes an issue where cluster scale-down operations might stall when a cluster that's running in a VPC with a custom domain encounters a core or task node restart.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

6.14.0 default Java versions

Amazon EMR releases 6.12.0 and higher support all applications with Amazon Corretto 8 by default, except for Trino. For Trino, Amazon EMR supports Amazon Corretto 17 by default starting

with Amazon EMR release 6.9.0. Amazon EMR also supports some applications with Amazon Corretto 11 and 17. Those applications are listed in the following table. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

While Amazon EMR supports both Amazon Corretto 11 and 17 on Apache Spark, Apache Hadoop, and Apache Hive, performance might regress for some workloads when you use these versions of Corretto. We recommend that you test your workloads before you change defaults.

The following table shows the default Java versions for applications in Amazon EMR 6.14.0:

Application	Java / Amazon Corretto version (default is bold)
Delta	17, 11, **8**
Flink	11, **8**
Ganglia	**8**
HBase	11, **8**
HCatalog	17, 11, **8**
Hadoop	17, 11, **8**
Hive	17, 11, **8**
Hudi	17, 11, **8**
Iceberg	17, 11, **8**
Livy	17, 11, **8**
Oozie	17, 11, **8**
Phoenix	**8**
PrestoDB	**8**

Application	Java / Amazon Corretto version (default is bold)
Spark	17, 11, **8**
Spark RAPIDS	17, 11, **8**
Sqoop	**8**
Tez	17, 11, **8**
Trino	**17**
Zeppelin	**8**
Pig	**8**
Zookeeper	**8**

6.14.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK

Component	Version	Description
delta	2.4.0	Delta lake is an open table format for huge analytic datasets
delta-standalone-connectors	0.6.0	Delta Connectors provide different runtimes to integrate Delta Lake with engines like Flink, Hive and Presto.
emr-ddb	5.1.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.7.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.11.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.28.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.7.0	EMR S3Select Connector
emr-wal-cli	1.1.0	Cli used for emrwal list/dele tion.
emrfs	2.59.0	Amazon S3 connector for Hadoop ecosystem applicati ons.

Component	Version	Description
flink-client	1.17.1-amzn-0	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.17.1-amzn-0	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.3.3-amzn-6	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.3-amzn-6	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.3-amzn-6	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.3-amzn-6	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.3.3-amzn-6	HDFS service for managing the Hadoop filesystem journal on HA clusters.

Component	Version	Description
hadoop-httpfs-server	3.3.3-amzn-6	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.3-amzn-6	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.3-amzn-6	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.3-amzn-6	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.3.3-amzn-6	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.3-amzn-6	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.17-amzn-2	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.17-amzn-2	Service for serving one or more HBase regions.
hbase-client	2.4.17-amzn-2	HBase command-line client.
hbase-rest-server	2.4.17-amzn-2	Service providing a RESTful HTTP endpoint for HBase.

Component	Version	Description
hbase-thrift-server	2.4.17-amzn-2	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.17-amzn-2	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-7	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-7	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-7	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-7	Hive command line client.
hive-hbase	3.1.3-amzn-7	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-7	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-7	Service for accepting Hive queries as web requests.
hudi	0.13.1-amzn-2	Incremental processing framework to power data pipeline at low latency and high efficiency.

Component	Version	Description
hudi-presto	0.13.1-amzn-2	Bundle library for running Presto with Hudi.
hudi-trino	0.13.1-amzn-2	Bundle library for running Trino with Hudi.
hudi-spark	0.13.1-amzn-2	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.3.1-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.8.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.

Component	Version	Description
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.1.3	The phoenix libraries for server and client
phoenix-connectors	5.1.3	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.281-amzn-2	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.281-amzn-2	Service for executing pieces of a query.
presto-client	0.281-amzn-2	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	422-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.

Component	Version	Description
trino-worker	422-amzn-0	Service for executing pieces of a query.
trino-client	422-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.4.1-amzn-1	Spark command-line clients.
spark-history-server	3.4.1-amzn-1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.4.1-amzn-1	In-memory execution engine for YARN.
spark-yarn-slave	3.4.1-amzn-1	Apache Spark libraries needed by YARN slaves.
spark-rapids	23.06.0-amzn-2	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.

Component	Version	Description
tensorflow	2.11.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-5	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-5	The tez YARN application and libraries for worker nodes.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.10	ZooKeeper command line client.

6.14.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.14.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN

Classifications	Description	Reconfiguration Actions
		services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-session.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli.properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts PhoenixQueryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.

Classifications	Description	Reconfiguration Actions
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.

Classifications	Description	Reconfiguration Actions
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.

Classifications	Description	Reconfiguration Actions
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.

Classifications	Description	Reconfiguration Actions
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.pro perties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.

Classifications	Description	Reconfiguration Actions
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.14.0 change log

Change log for 6.14.0 release and release notes

Date	Event	Description
2025-09-03	Docs revision	Amazon EMR 6.14.0 release notes added known issue
2023-11-02	Deployment complete	Amazon EMR 6.14.0 fully deployed to all supported Regions
2023-10-10	Docs publication	Amazon EMR 6.14.0 release notes first published

Date	Event	Description
2023-10-04	Initial release	Amazon EMR 6.14.0 first deployed to initial commercia l Regions

Amazon EMR release 6.13.0

6.13.0 application versions

This release includes the following applications: Delta, Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.13.0 release notes

The following release notes include information for Amazon EMR release 6.13.0. Changes are relative to 6.12.0. For information on the release timeline, see the 6.13.0 change log.

New features

- Amazon EMR 6.13.0 supports Apache Spark 3.4.1, Apache Spark RAPIDS 23.06.0-amzn-1, CUDA Toolkit 11.8.0, and JupyterHub 1.5.0.

Known issues

- An on-cluster instance-state script that monitors health of the instance can consume excessive CPU and memory resources when there are a large number of threads and/or open file handles on the node.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to TRUE (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- The 6.13.0 release improves the Amazon EMR log management daemon to ensure that all logs are uploaded at a regular cadence to Amazon S3 when a cluster termination command is issued. This facilitates faster cluster terminations.
- The 6.13.0 release enhances Amazon EMR log management capabilities to ensure consistent and timely upload of all log files to Amazon S3. This especially benefits long-running EMR clusters.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

6.13.0 default Java versions

Amazon EMR releases 6.12.0 and higher support all applications with Amazon Corretto 8 by default, except for Trino. For Trino, Amazon EMR supports Amazon Corretto 17 by default starting

with Amazon EMR release 6.9.0. Amazon EMR also supports some applications with Amazon Corretto 11 and 17. Those applications are listed in the following table. If you want to change the default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

While Amazon EMR supports both Amazon Corretto 11 and 17 on Apache Spark, Apache Hadoop, and Apache Hive, performance might regress for some workloads when you use these versions of Corretto. We recommend that you test your workloads before you change defaults.

The following table shows the default Java versions for applications in Amazon EMR 6.13.0:

Application	Java / Amazon Corretto version (default is bold)
Delta	17, 11, **8**
Flink	11, **8**
Ganglia	**8**
HBase	11, **8**
HCatalog	17, 11, **8**
Hadoop	17, 11, **8**
Hive	17, 11, **8**
Hudi	17, 11, **8**
Iceberg	17, 11, **8**
Livy	17, 11, **8**
Oozie	17, 11, **8**
Phoenix	**8**
PrestoDB	**8**

Application	Java / Amazon Corretto version (default is bold)
Spark	17, 11, **8**
Spark RAPIDS	17, 11, **8**
Sqoop	**8**
Tez	17, 11, **8**
Trino	**17**
Zeppelin	**8**
Pig	**8**
Zookeeper	**8**

6.13.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK

Component	Version	Description
delta	2.4.0	Delta lake is an open table format for huge analytic datasets
delta-standalone-connectors	0.6.0	Delta Connectors provide different runtimes to integrate Delta Lake with engines like Flink, Hive and Presto.
emr-ddb	5.1.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.6.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.10.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.27.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.6.0	EMR S3Select Connector
emr-wal-cli	1.1.0	Cli used for emrwal list/dele tion.
emrfs	2.58.0	Amazon S3 connector for Hadoop ecosystem applicati ons.

Component	Version	Description
flink-client	1.17.0	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.17.0	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.3.3-amzn-5	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.3-amzn-5	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.3-amzn-5	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.3-amzn-5	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.3.3-amzn-5	HDFS service for managing the Hadoop filesystem journal on HA clusters.

Component	Version	Description
hadoop-httpfs-server	3.3.3-amzn-5	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.3-amzn-5	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.3-amzn-5	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.3-amzn-5	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.3.3-amzn-5	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.3-amzn-5	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.17-amzn-1	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.17-amzn-1	Service for serving one or more HBase regions.
hbase-client	2.4.17-amzn-1	HBase command-line client.
hbase-rest-server	2.4.17-amzn-1	Service providing a RESTful HTTP endpoint for HBase.

Component	Version	Description
hbase-thrift-server	2.4.17-amzn-1	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.17-amzn-1	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-6	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-6	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-6	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-6	Hive command line client.
hive-hbase	3.1.3-amzn-6	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-6	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-6	Service for accepting Hive queries as web requests.
hudi	0.13.1-amzn-1	Incremental processing framework to power data pipeline at low latency and high efficiency.

Component	Version	Description
hudi-presto	0.13.1-amzn-1	Bundle library for running Presto with Hudi.
hudi-trino	0.13.1-amzn-1	Bundle library for running Trino with Hudi.
hudi-spark	0.13.1-amzn-1	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.3.0-amzn-1	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.8.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.

Component	Version	Description
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.1.3	The phoenix libraries for server and client
phoenix-connectors	5.1.3	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.281-amzn-1	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.281-amzn-1	Service for executing pieces of a query.
presto-client	0.281-amzn-1	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	414-amzn-1	Service for accepting queries and managing query execution among trino-wor kers.

Component	Version	Description
trino-worker	414-amzn-1	Service for executing pieces of a query.
trino-client	414-amzn-1	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.4.1-amzn-0	Spark command-line clients.
spark-history-server	3.4.1-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.4.1-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.4.1-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	23.06.0-amzn-1	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.

Component	Version	Description
tensorflow	2.11.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-4	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-4	The tez YARN application and libraries for worker nodes.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.10	ZooKeeper command line client.

6.13.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.13.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN

Classifications	Description	Reconfiguration Actions
		services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-session.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli.properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts PhoenixQueryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.

Classifications	Description	Reconfiguration Actions
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.

Classifications	Description	Reconfiguration Actions
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.

Classifications	Description	Reconfiguration Actions
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.

Classifications	Description	Reconfiguration Actions
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.pro perties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.

Classifications	Description	Reconfiguration Actions
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.13.0 change log

Change log for 6.13.0 release and release notes

Date	Event	Description
2025-09-03	Docs revision	Amazon EMR 6.13.0 release notes added known issue
2023-09-23	Deployment complete	Amazon EMR 6.13.0 fully deployed to all supported Regions
2023-09-12	Docs publication	Amazon EMR 6.13.0 release notes first published

Date	Event	Description
2023-09-01	Initial release	Amazon EMR 6.13.0 first deployed to initial commercia l Regions

Amazon EMR release 6.12.0

6.12.0 application versions

This release includes the following applications: Delta, Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.12.0 release notes

The following release notes include information for Amazon EMR release 6.12.0. Changes are relative to 6.11.0. For information on the release timeline, see the 6.12.0 change log.

New features

- Amazon EMR 6.12.0 supports Apache Spark 3.4.0, Apache Spark RAPIDS 23.06.0-amzn-0, CUDA 11.8.0, Apache Hudi 0.13.1-amzn-0, Apache Iceberg 1.3.0-amzn-0, Trino 414, and PrestoDB 0.281.
- Amazon EMR releases 6.12.0 and higher support LDAP integration with Apache Livy, Apache Hive through HiveServer2 (HS2), Trino, Presto, and Hue. You can also install Apache Spark and Apache

Hadoop on an EMR cluster that uses 6.12.0 or higher and configure them to use LDAP. For more information, see Use Active Directory or LDAP servers for authentication with Amazon EMR.

Known issues

- An on-cluster instance-state script that monitors health of the instance can consume excessive CPU and memory resources when there are a large number of threads and/or open file handles on the node.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to TRUE (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- Amazon EMR releases 6.12.0 and higher provide Java 11 runtime support for Flink. For more information, see Configure Flink to run with Java 11.
- The 6.12.0 release adds a new retry mechanism to the cluster scaling workflow for EMR clusters that run Presto or Trino. This improvement reduces the risk that cluster resizing will indefinitely stall due to a single failed resize operation. It also improves cluster utilization, because your cluster scales up and down faster.
- The 6.12.0 release fixes an issue where cluster scale-down operations might stall when a core node that is undergoing graceful decommissioning turns unhealthy for any reason before it fully decommissions.
- The 6.12.0 release improves cluster scale-down logic so that your cluster doesn't attempt a scale-down of core nodes below the HDFS replication factor setting for the cluster. This aligns with your data redundancy requirements, and reduces the chance that a scaling operation might stall.

- The 6.12.0 release enhances the performance and efficiency of the health monitoring service for Amazon EMR by increasing the speed at which it logs state changes for instances. This improvement reduces the chance of degraded performance for cluster nodes that are running multiple custom client tools or third-party applications.
- The 6.12.0 release improves the performance of the on-cluster log management daemon for Amazon EMR. As a result, there is less chance for degraded performance with EMR clusters that run steps with high concurrency.
- With Amazon EMR release 6.12.0, the log management daemon has been upgraded to identify all logs that are in active use with open file handles on the local instance storage, and the associated processes. This upgrade ensures that Amazon EMR properly deletes the files and reclaims storage space after the logs are archived to Amazon S3.
- The 6.12.0 release includes a log-management daemon enhancement that deletes empty, unused steps directories in the local cluster file system. An excessively large number of empty directories can degrade the performance of Amazon EMR daemons and result in disk over-utilization.
- The 6.12.0 release enables log rotation for YARN Timeline Server logs. This minimizes disk over-utilization scenarios, especially for long-running clusters.
- The default root volume size has increased to 15 GB in Amazon EMR 6.10.0 and higher. Earlier releases have default root volume size of 10 GB.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

6.12.0 default Java versions

Amazon EMR releases 6.12.0 and higher support all applications with Amazon Corretto 8 by default, except for Trino. For Trino, Amazon EMR supports Amazon Corretto 17 by default starting with Amazon EMR release 6.9.0. Amazon EMR also supports some applications with Amazon Corretto 11 and 17. Those applications are listed in the following table. If you want to change the

default JVM on your cluster, follow the instructions in Configure applications to use a specific Java Virtual Machine for each application that runs on the cluster. You can only use one Java runtime version for a cluster. Amazon EMR doesn't support running different nodes or applications on different runtime versions on the same cluster.

While Amazon EMR supports both Amazon Corretto 11 and 17 on Apache Spark, Apache Hadoop, and Apache Hive, performance might regress for some workloads when you use these versions of Corretto. We recommend that you test your workloads before you change defaults.

The following table shows the default Java versions for applications in Amazon EMR 6.12.0:

Application	Java / Amazon Corretto version (default is bold)
Delta	17, 11, **8**
Flink	11, **8**
Ganglia	**8**
HBase	11, **8**
HCatalog	17, 11, **8**
Hadoop	17, 11, **8**
Hive	17, 11, **8**
Hudi	17, 11, **8**
Iceberg	17, 11, **8**
Livy	17, 11, **8**
Oozie	17, 11, **8**
Phoenix	**8**
PrestoDB	**8**
Spark	17, 11, **8**

Application	Java / Amazon Corretto version (default is bold)
Spark RAPIDS	17, 11, **8**
Sqoop	**8**
Tez	17, 11, **8**
Trino	**17**
Zeppelin	**8**
Pig	**8**
Zookeeper	**8**

6.12.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK

Component	Version	Description
delta	2.4.0	Delta lake is an open table format for huge analytic datasets
delta-standalone-connectors	0.6.0	Delta Connectors provide different runtimes to integrate Delta Lake with engines like Flink, Hive and Presto.
emr-ddb	5.1.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.5.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.9.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.26.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.5.0	EMR S3Select Connector
emr-wal-cli	1.1.0	Cli used for emrwal list/dele tion.
emrfs	2.57.0	Amazon S3 connector for Hadoop ecosystem applicati ons.

Component	Version	Description
flink-client	1.17.0	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.17.0	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.3.3-amzn-4	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.3-amzn-4	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.3-amzn-4	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.3-amzn-4	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.3.3-amzn-4	HDFS service for managing the Hadoop filesystem journal on HA clusters.

Component	Version	Description
hadoop-httpfs-server	3.3.3-amzn-4	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.3-amzn-4	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.3-amzn-4	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.3-amzn-4	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.3.3-amzn-4	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.3-amzn-4	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.17-amzn-0	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.17-amzn-0	Service for serving one or more HBase regions.
hbase-client	2.4.17-amzn-0	HBase command-line client.
hbase-rest-server	2.4.17-amzn-0	Service providing a RESTful HTTP endpoint for HBase.

Component	Version	Description
hbase-thrift-server	2.4.17-amzn-0	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.17-amzn-0	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-5	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-5	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-5	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-5	Hive command line client.
hive-hbase	3.1.3-amzn-5	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-5	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-5	Service for accepting Hive queries as web requests.
hudi	0.13.1-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.

Component	Version	Description
hudi-presto	0.13.1-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.13.1-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.13.1-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.3.0-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.8.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.

Component	Version	Description
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.7.0	Open Source Computer Vision Library.
phoenix-library	5.1.3	The phoenix libraries for server and client
phoenix-connectors	5.1.3	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.281-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.281-amzn-0	Service for executing pieces of a query.
presto-client	0.281-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	414-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.

Component	Version	Description
trino-worker	414-amzn-0	Service for executing pieces of a query.
trino-client	414-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.4.0-amzn-0	Spark command-line clients.
spark-history-server	3.4.0-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.4.0-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.4.0-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	23.06.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.

Component	Version	Description
tensorflow	2.11.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-3	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-3	The tez YARN application and libraries for worker nodes.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.10	ZooKeeper command line client.

6.12.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.12.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN

Classifications	Description	Reconfiguration Actions
		services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-session.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli.properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts PhoenixQueryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.

Classifications	Description	Reconfiguration Actions
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.

Classifications	Description	Reconfiguration Actions
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.

Classifications	Description	Reconfiguration Actions
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-java-home	Change Hadoop's KMS java home	Not available.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.

Classifications	Description	Reconfiguration Actions
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.pro perties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.

Classifications	Description	Reconfiguration Actions
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.12.0 change log

Change log for 6.12.0 release and release notes

Date	Event	Description
2025-09-03	Docs revision	Amazon EMR 6.12.0 release notes added known issue
2023-07-27	Update documentation	Update the Java options for 6.12 and add Oozie tutorial to update JVM
2023-07-21	Deployment complete	Amazon EMR 6.12.0 fully deployed to all supported Regions

Date	Event	Description
2023-07-21	Docs publication	Amazon EMR 6.12.0 release notes first published
2023-07-12	Initial release	Amazon EMR 6.12.0 first deployed to initial commercia l Regions

Amazon EMR release 6.11.1

6.11.1 application versions

This release includes the following applications: Delta, Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.11.1 release notes

The following release notes include information for Amazon EMR release 6.11.1. Changes are relative to 6.11.0. For information on the release timeline, see the 6.11.1 change log.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it

will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to `TRUE` (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.

- Due to lock contention, a node can enter into a deadlock if it's added or removed at the same time that it attempts to decommission. As a result, the Hadoop Resource Manager (YARN) becomes unresponsive, and affects all the incoming and currently-running containers.
- This release includes a change that allows high-availability clusters to recover from failed state after restart.
- This release includes security fixes for Hue and HBase.
- This release fixes an issue where clusters that are running workloads on Spark with Amazon EMR might silently receive incorrect results with `contains`, `startsWith`, `endsWith`, and `like`. This issue occurs when you use the expressions on partitioned fields that have metadata in the Amazon EMR Hive3 Metastore Server (HMS).
- This release fixes an issue with throttling on the Glue side when there are no user-defined functions (UDF).
- This release fixes an issue that deletes container logs by the node log aggregation service before log pusher can push them to S3 in case of YARN decommissioning.
- This release fixes an issue with FairShare Scheduler metrics when Node Label is enabled for Hadoop.
- This release fixes an issue that impacted Spark performance when you set a default `true` value for the `spark.yarn.heterogeneousExecutors.enabled` config in `spark-defaults.conf`.
- This release fixes an issue with Reduce Task failing to read shuffle data. The issue caused Hive query failures with a corrupted memory error.
- This release adds a new retry mechanism to the cluster scaling workflow for EMR clusters that run Presto or Trino. This improvement reduces the risk that cluster resizing will indefinitely stall due to a single failed resize operation. It also improves cluster utilization, because your cluster scales up and down faster.

- This release improves cluster scale-down logic so that your cluster doesn't attempt a scale-down of core nodes below the HDFS replication factor setting for the cluster. This aligns with your data redundancy requirements, and reduces the chance that a scaling operation might stall.
- The log management daemon has been upgraded to identify all logs that are in active use with open file handles on the local instance storage, and the associated processes. This upgrade ensures that Amazon EMR properly deletes the files and reclaims storage space after the logs are archived to Amazon S3.
- This release includes a log-management daemon enhancement that deletes empty, unused steps directories in the local cluster file system. An excessively large number of empty directories can degrade the performance of Amazon EMR daemons and result in disk over-utilization.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

6.11.1 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *CommunityVersion*-amzn-*EmrVersion*. The *EmrVersion* starts at 0. For example, if open source community component named myapp-component with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as 2.2-amzn-2.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK
delta	2.2.0	Delta lake is an open table format for huge analytic datasets
delta-standalone-connectors	0.6.0	Delta Connectors provide different runtimes to integrate Delta Lake with engines like Flink, Hive and Presto.
emr-ddb	5.1.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.4.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.8.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.25.0	Distributed copy application optimized for Amazon S3.

Component	Version	Description
emr-s3-select	2.4.0	EMR S3Select Connector
emr-wal-cli	1.1.0	Cli used for emrwal list/deletion.
emrfs	2.56.0	Amazon S3 connector for Hadoop ecosystem applications.
flink-client	1.16.0	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.16.0	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applications along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.3.3-amzn-3.1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.3-amzn-3.1	HDFS node-level service for storing blocks.

Component	Version	Description
hadoop-hdfs-library	3.3.3-amzn-3.1	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.3-amzn-3.1	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.3.3-amzn-3.1	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.3.3-amzn-3.1	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.3-amzn-3.1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.3-amzn-3.1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.3-amzn-3.1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.3.3-amzn-3.1	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.3-amzn-3.1	Service for retrieving current and historical information for YARN applications.

Component	Version	Description
hbase-hmaster	2.4.15-amzn-1.1	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.15-amzn-1.1	Service for serving one or more HBase regions.
hbase-client	2.4.15-amzn-1.1	HBase command-line client.
hbase-rest-server	2.4.15-amzn-1.1	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.15-amzn-1.1	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.15-amzn-1.1	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-4.1	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-4.1	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-4.1	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-4.1	Hive command line client.
hive-hbase	3.1.3-amzn-4.1	Hive-hbase client.

Component	Version	Description
hive-metastore-server	3.1.3-amzn-4.1	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-4.1	Service for accepting Hive queries as web requests.
hudi	0.13.0-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.13.0-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.13.0-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.13.0-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.2.0-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark

Component	Version	Description
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.8.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client
phoenix-connectors	5.1.2	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.279-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.

Component	Version	Description
presto-worker	0.279-amzn-0	Service for executing pieces of a query.
presto-client	0.279-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	410-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	410-amzn-0	Service for executing pieces of a query.
trino-client	410-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.3.2-amzn-0.1	Spark command-line clients.
spark-history-server	3.3.2-amzn-0.1	Web UI for viewing logged events for the lifetime of a completed Spark application.

Component	Version	Description
spark-on-yarn	3.3.2-amzn-0.1	In-memory execution engine for YARN.
spark-yarn-slave	3.3.2-amzn-0.1	Apache Spark libraries needed by YARN slaves.
spark-rapids	23.02.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.11.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-2.1	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-2.1	The tez YARN application and libraries for worker nodes.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.

Component	Version	Description
zookeeper-client	3.5.10	ZooKeeper command line client.

6.11.1 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.11.1 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad

Classifications	Description	Reconfiguration Actions
		ditionally restarts Hadoop KMS, Ranger KMS, HiveServe r2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.

Classifications	Description	Reconfiguration Actions
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.

Classifications	Description	Reconfiguration Actions
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.

Classifications	Description	Reconfiguration Actions
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.

Classifications	Description	Reconfiguration Actions
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.11.1 change log

Change log for 6.11.1 release and release notes

Date	Event	Description
2023-08-30	Update release notes	Added several control-plane related fixes to the release notes
2023-08-21	Docs publication	Amazon EMR 6.11.1 release notes first published
2023-08-16	Deployment complete	Amazon EMR 6.11.1 fully deployed to all supported Regions
2023-08-04	Initial release	Amazon EMR 6.11.1 first deployed to limited commercial Regions

Amazon EMR release 6.11.0

6.11.0 application versions

This release includes the following applications: Delta, Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.11.0 release notes

The following release notes include information for Amazon EMR release 6.11.0. Changes are relative to 6.10.0. For information on the release timeline, see the change log.

New features

- Amazon EMR 6.11.0 supports Apache Spark 3.3.2-amzn-0, Apache Spark RAPIDS 23.02.0-amzn-0, CUDA 11.8.0, Apache Hudi 0.13.0-amzn-0, Apache Iceberg 1.2.0-amzn-0, Trino 410-amzn-0, and PrestoDB 0.279-amzn-0.

Changes, enhancements, and resolved issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to TRUE (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.
- With Amazon EMR 6.11.0, the DynamoDB connector has been upgraded to version 5.0.0. Version 5.0.0 uses AWS SDK for Java 2.x. Previous releases used AWS SDK for Java 1.x. As a result of this upgrade, we strongly advise you to test your code before you use the DynamoDB connector with Amazon EMR 6.11.
- When the DynamoDB connector for Amazon EMR 6.11.0 calls the DynamoDB service, it uses the Region value that you provide for the `dynamodb.endpoint` property. We recommend that you also configure `dynamodb.region` when you use `dynamodb.endpoint`, and that both properties target the same AWS Region. If you use `dynamodb.endpoint` and you don't configure `dynamodb.region`, the DynamoDB connector for Amazon EMR 6.11.0 will return an invalid Region exception and attempt to reconcile your AWS Region information from the Amazon EC2 instance metadata service (IMDS). If the connector can't retrieve the Region from IMDS, it defaults to US East (N. Virginia) (`us-`

`east-1`). The following error is an example of the invalid Region exception that you might get if you don't properly configure the `dynamodb.region` property: `error software.amazon.awssdk.services.dynamodb.model.DynamoDbException: Credential should be scoped to a valid region.` For more information on the classes that are affected by the AWS SDK for Java upgrade to 2.x, see the Upgrade AWS SDK for Java from 1.x to 2.x (#175) commit in the GitHub repo for the Amazon EMR - DynamoDB connector.

- This release fixes an issue where column data becomes `NULL` when you use Delta Lake to store Delta table data in Amazon S3 after column rename operation. For more information about this experimental feature in Delta Lake, see Column rename operation in the Delta Lake User Guide.
- The 6.11.0 release fixes an issue that might occur when you create an edge node by replicating one of the primary nodes from a cluster with multiple primary nodes. The replicated edge node could cause delays with scale-down operations, or result in high memory-utilization on the primary nodes. For more information on how to create an edge node to communicate with your EMR cluster, see Edge Node Creator in the `aws-samples` repo on GitHub.
- The 6.11.0 release improves the automation process that Amazon EMR uses to re-mount Amazon EBS volumes to an instance after a reboot.
- The 6.11.0 release fixes an issue that resulted in intermittent gaps in the Hadoop metrics that Amazon EMR publishes to Amazon CloudWatch.
- The 6.11.0 release fixes an issue with EMR clusters where an update to the YARN configuration file that contains the exclusion list of nodes for the cluster is interrupted due to disk over-utilization. The incomplete update hinders future cluster scale-down operations. This release ensures that your cluster remains healthy, and that scaling operations work as expected.
- The default root volume size has increased to 15 GB in Amazon EMR 6.10.0 and higher. Earlier releases have default root volume size of 10 GB.
- Hadoop 3.3.3 introduced a change in YARN (YARN-9608) that keeps nodes where containers ran in a decommissioning state until the application completes. This change ensures that local data such as shuffle data doesn't get lost, and you don' need to re-run the job. This approach might also lead to underutilization of resources on clusters with or without managed scaling enabled.

  With Amazon EMR releases 6.11.0 and higher as well as 6.8.1, 6.9.1, and 6.10.1, the value of `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-applications` is set to `false` in `yarn-site.xml` to resolve this issue.

  While the fix addresses the issues that were introduced by YARN-9608, it might cause Hive jobs to fail due to shuffle data loss on clusters that have managed scaling enabled. We've mitigated

that risk in this release by also setting `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-shuffle-data` for Hive workloads. This config is only available with Amazon EMR releases 6.11.0 and higher.

- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

> **Note**
>
> This release no longer gets automatic AMI updates since it has been succeeded by 1 more more patch releases. The patch release is denoted by the number after the second decimal point (`6.8.1`). To see if you're using the latest patch release, check the available releases in the *Release Guide*, or check the **Amazon EMR release** dropdown when you create a cluster in the console, or use the `ListReleaseLabels` API or `list-release-labels` CLI action. To get updates about new releases, subscribe to the RSS feed on the What's new? page.

6.11.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the

most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *CommunityVersion*-amzn-*EmrVersion*. The *EmrVersion* starts at 0. For example, if open source community component named myapp-component with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as 2.2-amzn-2.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK
delta	2.2.0	Delta lake is an open table format for huge analytic datasets
delta-standalone-connectors	0.6.0	Delta Connectors provide different runtimes to integrate Delta Lake with engines like Flink, Hive and Presto.
emr-ddb	5.1.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.4.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.8.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway

Component	Version	Description
emr-s3-dist-cp	2.25.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.4.0	EMR S3Select Connector
emr-wal-cli	1.1.0	Cli used for emrwal list/deletion.
emrfs	2.56.0	Amazon S3 connector for Hadoop ecosystem applications.
flink-client	1.16.0	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.16.0	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applications along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.3.3-amzn-3	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.

Component	Version	Description
hadoop-hdfs-datanode	3.3.3-amzn-3	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.3-amzn-3	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.3-amzn-3	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.3.3-amzn-3	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.3.3-amzn-3	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.3-amzn-3	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.3-amzn-3	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.3-amzn-3	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.3.3-amzn-3	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.3-amzn-3	Service for retrieving current and historical information for YARN applications.

Component	Version	Description
hbase-hmaster	2.4.15-amzn-1	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.15-amzn-1	Service for serving one or more HBase regions.
hbase-client	2.4.15-amzn-1	HBase command-line client.
hbase-rest-server	2.4.15-amzn-1	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.15-amzn-1	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.15-amzn-1	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-4	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-4	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-4	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-4	Hive command line client.
hive-hbase	3.1.3-amzn-4	Hive-hbase client.

Component	Version	Description
hive-metastore-server	3.1.3-amzn-4	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-4	Service for accepting Hive queries as web requests.
hudi	0.13.0-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.13.0-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.13.0-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.13.0-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.11.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.2.0-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark

Component	Version	Description
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.8.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client
phoenix-connectors	5.1.2	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.279-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.

Component	Version	Description
presto-worker	0.279-amzn-0	Service for executing pieces of a query.
presto-client	0.279-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	410-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	410-amzn-0	Service for executing pieces of a query.
trino-client	410-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.3.2-amzn-0	Spark command-line clients.
spark-history-server	3.3.2-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.

Component	Version	Description
spark-on-yarn	3.3.2-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.3.2-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	23.02.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.11.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-2	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-2	The tez YARN application and libraries for worker nodes.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.

Component	Version	Description
zookeeper-client	3.5.10	ZooKeeper command line client.

6.11.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.11.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad

Classifications	Description	Reconfiguration Actions
		ditionally restarts Hadoop KMS, Ranger KMS, HiveServe r2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.

Classifications	Description	Reconfiguration Actions
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.

Classifications	Description	Reconfiguration Actions
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.

Classifications	Description	Reconfiguration Actions
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.

Classifications	Description	Reconfiguration Actions
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.11.0 change log

Change log for 6.11.0 release and release notes

Date	Event	Description
2023-08-21	Update	Fixed issue introduced with Hadoop 3.3.3.
2023-07-26	Update	New OS release labels `2.0.20230612.0` and `2.0.20230628.0` .
2023-06-09	Deployment complete	Amazon EMR 6.11.0 fully deployed to all supported Regions
2023-06-09	Docs publication	Amazon EMR 6.11.0 release notes first published
2023-06-08	Initial release	Amazon EMR 6.11.0 first deployed to initial commercia l Regions

Amazon EMR release 6.10.1

6.10.1 application versions

This release includes the following applications: Delta, Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases

- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.10.1 release notes

The following release notes include information for Amazon EMR release 6.10.1. Changes are relative to 6.10.0. For information on the release timeline, see the 6.10.1 change log.

Known Issues

- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to `TRUE` (which is the default) when you are using the above combination of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.

Changes, enhancements, and resolved issues

- Due to lock contention, a node can enter into a deadlock if it's added or removed at the same time that it attempts to decommission. As a result, the Hadoop Resource Manager (YARN) becomes unresponsive, and affects all the incoming and currently-running containers.
- Hadoop 3.3.3 introduced a change in YARN (YARN-9608) that keeps nodes where containers ran in a decommissioning state until the application completes. This change ensures that local data such as shuffle data doesn't get lost, and you don' need to re-run the job. This approach might also lead to underutilization of resources on clusters with or without managed scaling enabled.

  With Amazon EMR releases 6.11.0 and higher as well as 6.8.1, 6.9.1, and 6.10.1, the value of `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-applications` is set to `false` in `yarn-site.xml` to resolve this issue.

While the fix addresses the issues that were introduced by YARN-9608, it might cause Hive jobs to fail due to shuffle data loss on clusters that have managed scaling enabled. We've mitigated that risk in this release by also setting `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-shuffle-data` for Hive workloads. This config is only available with Amazon EMR releases 6.11.0 and higher.

- Metrics collector will not send any metrics to the control plane after failover of primary node in clusters with the instance groups configuration.
- This release includes a change that allows high-availability clusters to recover from failed state after restart.
- This release includes security fixes for Hue and HBase.
- This release fixes an issue where clusters that are running workloads on Spark with Amazon EMR might silently receive incorrect results with `contains`, `startsWith`, `endsWith`, and `like`. This issue occurs when you use the expressions on partitioned fields that have metadata in the Amazon EMR Hive3 Metastore Server (HMS).
- This release fixes an issue with throttling on the Glue side when there are no user-defined functions (UDF).
- This release fixes an issue that deletes container logs by the node log aggregation service before log pusher can push them to S3 in case of YARN decommissioning.
- This release fixes an issue with FairShare Scheduler metrics when Node Label is enabled for Hadoop.
- This release fixes an issue that impacted Spark performance when you set a default `true` value for the `spark.yarn.heterogeneousExecutors.enabled` config in `spark-defaults.conf`.
- This release fixes an issue with Reduce Task failing to read shuffle data. The issue caused Hive query failures with a corrupted memory error.
- This release adds a new retry mechanism to the cluster scaling workflow for EMR clusters that run Presto or Trino. This improvement reduces the risk that cluster resizing will indefinitely stall due to a single failed resize operation. It also improves cluster utilization, because your cluster scales up and down faster.
- This release improves cluster scale-down logic so that your cluster doesn't attempt a scale-down of core nodes below the HDFS replication factor setting for the cluster. This aligns with your data redundancy requirements, and reduces the chance that a scaling operation might stall.

- The log management daemon has been upgraded to identify all logs that are in active use with open file handles on the local instance storage, and the associated processes. This upgrade ensures that Amazon EMR properly deletes the files and reclaims storage space after the logs are archived to Amazon S3.
- This release includes a log-management daemon enhancement that deletes empty, unused steps directories in the local cluster file system. An excessively large number of empty directories can degrade the performance of Amazon EMR daemons and result in disk over-utilization.
- This release fixes an issue that might occur when you create an edge node by replicating one of the primary nodes from a cluster with multiple primary nodes. The replicated edge node could cause delays with scale-down operations, or result in high memory-utilization on the primary nodes. For more information on how to create an edge node to communicate with your EMR cluster, see Edge Node Creator in the `aws-samples` repo on GitHub.
- This release improves the automation process that Amazon EMR uses to re-mount Amazon EBS volumes to an instance after a reboot.
- This release fixes an issue that resulted in intermittent gaps in the Hadoop metrics that Amazon EMR publishes to Amazon CloudWatch.
- This release fixes an issue with EMR clusters where an update to the YARN configuration file that contains the exclusion list of nodes for the cluster is interrupted due to disk over-utilization. The incomplete update hinders future cluster scale-down operations. This release ensures that your cluster remains healthy, and that scaling operations work as expected.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

6.10.1 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *CommunityVersion*-amzn-*EmrVersion*. The *EmrVersion* starts at 0. For example, if open source community component named myapp-component with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as 2.2-amzn-2.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK
delta	2.2.0	Delta lake is an open table format for huge analytic datasets
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.3.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.7.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.24.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.3.0	EMR S3Select Connector
emr-wal-cli	1.0.0	Cli used for emrwal list/dele tion.

Component	Version	Description
emrfs	2.55.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.16.0	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.16.0	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.3.3-amzn-2.1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.3-amzn-2.1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.3-amzn-2.1	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.3-amzn-2.1	HDFS service for tracking file names and block locations.

Component	Version	Description
hadoop-hdfs-journalnode	3.3.3-amzn-2.1	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.3.3-amzn-2.1	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.3-amzn-2.1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.3-amzn-2.1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.3-amzn-2.1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.3.3-amzn-2.1	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.3-amzn-2.1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.15-amzn-0.1	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.15-amzn-0.1	Service for serving one or more HBase regions.
hbase-client	2.4.15-amzn-0.1	HBase command-line client.

Component	Version	Description
hbase-rest-server	2.4.15-amzn-0.1	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.15-amzn-0.1	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.15-amzn-0.1	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-3.1	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-3.1	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-3.1	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-3.1	Hive command line client.
hive-hbase	3.1.3-amzn-3.1	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-3.1	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-3.1	Service for accepting Hive queries as web requests.

Component	Version	Description
hudi	0.12.2-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.12.2-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.12.2-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.12.2-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.10.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.1.0-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.

Component	Version	Description
nvidia-cuda	11.8.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client
phoenix-connectors	6.0.0-SNAPSHOT	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.278.1-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.278.1-amzn-0	Service for executing pieces of a query.
presto-client	0.278.1-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.

Component	Version	Description
trino-coordinator	403-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	403-amzn-0	Service for executing pieces of a query.
trino-client	403-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.3.1-amzn-0.1	Spark command-line clients.
spark-history-server	3.3.1-amzn-0.1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.3.1-amzn-0.1	In-memory execution engine for YARN.
spark-yarn-slave	3.3.1-amzn-0.1	Apache Spark libraries needed by YARN slaves.
spark-rapids	22.12.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.

Component	Version	Description
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.11.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-1.1	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-1.1	The tez YARN application and libraries for worker nodes.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.10	ZooKeeper command line client.

6.10.1 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.10.1 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.

Classifications	Description	Reconfiguration Actions
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.

Classifications	Description	Reconfiguration Actions
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.

Classifications	Description	Reconfiguration Actions
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.

Classifications	Description	Reconfiguration Actions
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.10.1 change log

Change log for 6.10.1 release and release notes

Date	Event	Description
2023-08-30	Update release notes	Added several control-plane related fixes to the release notes
2023-08-21	Docs publication	Amazon EMR 6.10.1 release notes first published
2023-08-16	Deployment complete	Amazon EMR 6.10.1 fully deployed to all supported Regions
2023-08-04	Initial release	Amazon EMR 6.10.1 first deployed to limited commercial Regions

Amazon EMR release 6.10.0

6.10.0 application versions

This release includes the following applications: Delta, Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.10.0 release notes

The following release notes include information for Amazon EMR release 6.10.0. Changes are relative to 6.9.0. For information on the release timeline, see the change log.

New features

- Amazon EMR 6.10.0 supports Apache Spark 3.3.1, Apache Spark RAPIDS 22.12.0, CUDA 11.8.0, Apache Hudi 0.12.2-amzn-0, Apache Iceberg 1.1.0-amzn-0, Trino 403, and PrestoDB 0.278.1.
- Amazon EMR 6.10.0 includes a native Trino-Hudi connector that provides read access to data in Hudi tables. You can activate the connector with `trino-cli --catalog hudi`, and configure the connector for your requirements with `trino-connector-hudi`. The native integration with Amazon EMR means that you no longer need to use `trino-connector-hive` to query Hudi tables. For a list of supported configurations with the new connector, see the Hudi connector page of the Trino documentation.
- Amazon EMR releases 6.10.0 and higher support Apache Zeppelin integration with Apache Flink. See Working with Flink jobs from Zeppelin in Amazon EMR for more information.

Known Issues

- Hadoop 3.3.3 introduced a change in YARN (YARN-9608) that keeps nodes where containers ran in a decommissioning state until the application completes. This change ensures that local data such as shuffle data doesn't get lost, and you don' need to re-run the job. This approach might also lead to underutilization of resources on clusters with or without managed scaling enabled.

  To work around this issue in Amazon EMR 6.10.0, you can set the value of `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-applications` to `false` in `yarn-site.xml`. In Amazon EMR releases 6.11.0 and higher as well as 6.8.1, 6.9.1, and 6.10.1, the config is set to `false` by default to resolve this issue.
- Starting with Spark 3.3.1 (supported in EMR versions 6.10 and above), all executors in a decommissioning host are set to a new `ExecutorState`, called *DECOMMISSIONING* state. The executors being decommissioned cannot be used by Yarn to allocate tasks and thus it will request for new executors, if needed, for the tasks being executed. Thus, if you disable Spark DRA while using EMR Managed Scaling, EMR Auto Scaling, or any custom scaling mechanism on EMR-EC2 clusters, then Yarn may request maximum permissible executors for each job. In order to avoid this issue, leave the `spark.dynamicAllocation.enabled` property set to TRUE (which is the default) when you are using the above combination

of features. In addition, you can also set minimum and maximum executor constraints by setting values for `spark.dynamicAllocation.maxExecutors` and `spark.dynamicAllocation.minExecutors` properties for your Spark jobs, to restrict the number of executors allocated during the job's execution.

Changes, enhancements, and resolved issues

- Amazon EMR 6.10.0 removes the dependency on `minimal-json.jar` for the Amazon Redshift integration for Apache Spark, and automatically adds the required Spark-Redshift related jars to the executor class path for Spark: `spark-redshift.jar`, `spark-avro.jar`, and `RedshiftJDBC.jar`.
- The 6.10.0 release improves the on-cluster log management daemon to monitor additional log folders in your EMR cluster. This improvement minimizes disk over-utilization scenarios.
- The 6.10.0 release automatically restarts the on-cluster log management daemon when it stops. This improvement reduces the risk for nodes to appear unhealthy due to disk over-utilization.
- Amazon EMR 6.10.0 supports regional endpoints for EMRFS user mapping.
- The default root volume size has increased to 15 GB in Amazon EMR 6.10.0 and higher. Earlier releases have default root volume size of 10 GB.
- The 6.10.0 release fixes an issue that caused Spark jobs to stall when all remaining Spark executors are on a decommissioning host with the YARN resource manager.
- With Amazon EMR 6.6.0 through 6.9.x, INSERT queries with dynamic partition and an ORDER BY or SORT BY clause will always have two reducers. This issue is caused by OSS change HIVE-20703, which puts dynamic sort partition optimization under cost-based decision. If your workload doesn't require sorting of dynamic partitions, we recommend that you set the `hive.optimize.sort.dynamic.partition.threshold` property to `-1` to disable the new feature and get the correctly calculated number of reducers. This issue is fixed in OSS Hive as part of HIVE-22269 and is fixed in Amazon EMR 6.10.0.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

Note

This release no longer gets automatic AMI updates since it has been succeeded by 1 more more patch releases. The patch release is denoted by the number after the second decimal point (`6.8.1`). To see if you're using the latest patch release, check the available releases in the *Release Guide*, or check the **Amazon EMR release** dropdown when you create a cluster in the console, or use the `ListReleaseLabels` API or `list-release-labels` CLI action. To get updates about new releases, subscribe to the RSS feed on the What's new? page.

6.10.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *CommunityVersion*-amzn-*EmrVersion*. The *EmrVersion* starts at 0. For example, if open source community component named myapp-component with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as 2.2-amzn-2.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK
delta	2.2.0	Delta lake is an open table format for huge analytic datasets
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.3.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.7.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.24.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.3.0	EMR S3Select Connector
emr-wal-cli	1.0.0	Cli used for emrwal list/dele tion.

Component	Version	Description
emrfs	2.55.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.16.0	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.16.0	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.3.3-amzn-2	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.3-amzn-2	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.3-amzn-2	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.3-amzn-2	HDFS service for tracking file names and block locations.

Component	Version	Description
hadoop-hdfs-journalnode	3.3.3-amzn-2	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.3.3-amzn-2	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.3-amzn-2	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.3-amzn-2	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.3-amzn-2	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.3.3-amzn-2	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.3-amzn-2	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.15-amzn-0	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.15-amzn-0	Service for serving one or more HBase regions.
hbase-client	2.4.15-amzn-0	HBase command-line client.

Component	Version	Description
hbase-rest-server	2.4.15-amzn-0	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.15-amzn-0	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.15-amzn-0	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-3	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-3	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-3	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-3	Hive command line client.
hive-hbase	3.1.3-amzn-3	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-3	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-3	Service for accepting Hive queries as web requests.

Component	Version	Description
hudi	0.12.2-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.12.2-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.12.2-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.12.2-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.10.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	1.1.0-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.5.0	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.

Component	Version	Description
nvidia-cuda	11.8.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client
phoenix-connectors	6.0.0-SNAPSHOT	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.278.1-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.278.1-amzn-0	Service for executing pieces of a query.
presto-client	0.278.1-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.

Component	Version	Description
trino-coordinator	403-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	403-amzn-0	Service for executing pieces of a query.
trino-client	403-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.3.1-amzn-0	Spark command-line clients.
spark-history-server	3.3.1-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.3.1-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.3.1-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	22.12.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.

Component	Version	Description
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.11.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-1	The tez YARN application and libraries.
tez-on-worker	0.10.2-amzn-1	The tez YARN application and libraries for worker nodes.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.10	ZooKeeper command line client.

6.10.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.10.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.

Classifications	Description	Reconfiguration Actions
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.

Classifications	Description	Reconfiguration Actions
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hudi	Change values in Trino's hudi.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.

trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.

Classifications	Description	Reconfiguration Actions
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-logback	Change values in kms-logback.xml file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.

Classifications	Description	Reconfiguration Actions
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.10.0 change log

Change log for 6.10.0 release and release notes

Date	Event	Description
2023-08-21	Update	Added a known issue introduced with Hadoop 3.3.3.
2023-07-26	Update	New OS release labels `2.0.20230612.0` and `2.0.20230628.0` .
2023-03-02	Deployment complete	Amazon EMR 6.10 fully deployed to all supported Regions
2023-03-02	Docs publication	Amazon EMR 6.10 release notes first published
2023-02-27	Initial release	Amazon EMR 6.10 deployed to limited commercial Regions

Amazon EMR release 6.9.1

6.9.1 application versions

This release includes the following applications: Delta, Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases

- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.9.1 release notes

The following release notes include information for Amazon EMR release 6.9.1. Changes are relative to 6.9.0. For information on the release timeline, see the 6.9.1 change log.

Changes, enhancements, and resolved issues

- Hadoop 3.3.3 introduced a change in YARN (YARN-9608) that keeps nodes where containers ran in a decommissioning state until the application completes. This change ensures that local data such as shuffle data doesn't get lost, and you don' need to re-run the job. This approach might also lead to underutilization of resources on clusters with or without managed scaling enabled.

  With Amazon EMR releases 6.11.0 and higher as well as 6.8.1, 6.9.1, and 6.10.1, the value of `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-applications` is set to `false` in `yarn-site.xml` to resolve this issue.

  While the fix addresses the issues that were introduced by YARN-9608, it might cause Hive jobs to fail due to shuffle data loss on clusters that have managed scaling enabled. We've mitigated that risk in this release by also setting `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-shuffle-data` for Hive workloads. This config is only available with Amazon EMR releases 6.11.0 and higher.
- Metrics collector won't send any metrics to the control plane after failover of primary node in clusters with the instance groups configuration.
- This release eliminates retries on failed HTTP requests to metrics collector endpoints.
- This release includes a change that allows high-availability clusters to recover from failed state after restart.
- This release fixes an issue where large user-created UIDs caused overflow exceptions.
- This release fixes timeout issues with the Amazon EMR reconfiguration process.
- This release includes security fixes.
- This release fixes an issue where clusters that are running workloads on Spark with Amazon EMR might silently receive incorrect results with `contains`, `startsWith`, `endsWith`, and `like`.

This issue occurs when you use the expressions on partitioned fields that have metadata in the Amazon EMR Hive3 Metastore Server (HMS).

- With Amazon EMR 6.6.0 through 6.9.x, INSERT queries with dynamic partition and an ORDER BY or SORT BY clause will always have two reducers. This issue is caused by OSS change HIVE-20703, which puts dynamic sort partition optimization under cost-based decision. If your workload doesn't require sorting of dynamic partitions, we recommend that you set the `hive.optimize.sort.dynamic.partition.threshold` property to `-1` to disable the new feature and get the correctly calculated number of reducers. This issue is fixed in OSS Hive as part of HIVE-22269 and is fixed in Amazon EMR 6.10.0.
- Hive might experience data loss when you use HDFS as a scratch directory and you have enabled merge small files, and the table contains static partition paths.
- This release fixes a performance issue with Hive if merge small files (disabled by default) is enabled at the end of ETL job.
- This release fixes an issue with throttling on the Glue side when there are no user-defined functions (UDF).
- This release fixes an issue that deletes container logs by the node log aggregation service before log pusher can push them to S3 in case of YARN decommissioning.
- This release fixes handling of compacted/archived files with persistent storefile tracking for HBase.
- This release fixes an issue that impacted Spark performance when you set a default `true` value for the `spark.yarn.heterogeneousExecutors.enabled` config in `spark-defaults.conf`.
- This release fixes an issue with Reduce Task failing to read shuffle data. The issue caused Hive query failures with a corrupted memory error.
- This release fixes an issue that caused the node provisioner to fail if the HDFS NameNode (NN) service was stuck in safemode during node replacement.
- This release adds a new retry mechanism to the cluster scaling workflow for EMR clusters that run Presto or Trino. This improvement reduces the risk that cluster resizing will indefinitely stall due to a single failed resize operation. It also improves cluster utilization, because your cluster scales up and down faster.
- This release improves cluster scale-down logic so that your cluster doesn't attempt a scale-down of core nodes below the HDFS replication factor setting for the cluster. This aligns with your data redundancy requirements, and reduces the chance that a scaling operation might stall.

- The log management daemon has been upgraded to identify all logs that are in active use with open file handles on the local instance storage, and the associated processes. This upgrade ensures that Amazon EMR properly deletes the files and reclaims storage space after the logs are archived to Amazon S3.
- This release includes a log-management daemon enhancement that deletes empty, unused steps directories in the local cluster file system. An excessively large number of empty directories can degrade the performance of Amazon EMR daemons and result in disk over-utilization.
- This release fixes an issue that might occur when you create an edge node by replicating one of the primary nodes from a cluster with multiple primary nodes. The replicated edge node could cause delays with scale-down operations, or result in high memory-utilization on the primary nodes. For more information on how to create an edge node to communicate with your EMR cluster, see Edge Node Creator in the `aws-samples` repo on GitHub.
- This release improves the automation process that Amazon EMR uses to re-mount Amazon EBS volumes to an instance after a reboot.
- This release fixes an issue that resulted in intermittent gaps in the Hadoop metrics that Amazon EMR publishes to Amazon CloudWatch.
- This release fixes an issue with EMR clusters where an update to the YARN configuration file that contains the exclusion list of nodes for the cluster is interrupted due to disk over-utilization. The incomplete update hinders future cluster scale-down operations. This release ensures that your cluster remains healthy, and that scaling operations work as expected.
- This release improves the on-cluster log management daemon to monitor additional log folders in your EMR cluster. This improvement minimizes disk over-utilization scenarios.
- This release automatically restarts the on-cluster log management daemon when it stops. This improvement reduces the risk for nodes to appear unhealthy due to disk over-utilization.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

6.9.1 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *CommunityVersion*-amzn-*EmrVersion*. The *EmrVersion* starts at 0. For example, if open source community component named myapp-component with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as 2.2-amzn-2.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK
delta	2.1.0	Delta lake is an open table format for huge analytic datasets
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.3.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.6.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.23.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.2.0	EMR S3Select Connector
emrfs	2.54.0	Amazon S3 connector for Hadoop ecosystem applicati ons.

Component	Version	Description
flink-client	1.15.2	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.15.2	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.3.3-amzn-1.1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.3-amzn-1.1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.3-amzn-1.1	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.3-amzn-1.1	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.3.3-amzn-1.1	HDFS service for managing the Hadoop filesystem journal on HA clusters.

Component	Version	Description
hadoop-httpfs-server	3.3.3-amzn-1.1	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.3-amzn-1.1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.3-amzn-1.1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.3-amzn-1.1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.3.3-amzn-1.1	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.3-amzn-1.1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.13-amzn-0.1	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.13-amzn-0.1	Service for serving one or more HBase regions.
hbase-client	2.4.13-amzn-0.1	HBase command-line client.
hbase-rest-server	2.4.13-amzn-0.1	Service providing a RESTful HTTP endpoint for HBase.

Component	Version	Description
hbase-thrift-server	2.4.13-amzn-0.1	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.13-amzn-0.1	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-2.1	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-2.1	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-2.1	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-2.1	Hive command line client.
hive-hbase	3.1.3-amzn-2.1	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-2.1	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-2.1	Service for accepting Hive queries as web requests.
hudi	0.12.1-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.

Component	Version	Description
hudi-presto	0.12.1-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.12.1-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.12.1-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.10.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	0.14.1-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.7.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.

Component	Version	Description
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client
phoenix-connectors	6.0.0-SNAPSHOT	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.276-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.276-amzn-0	Service for executing pieces of a query.
presto-client	0.276-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	398-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.

Component	Version	Description
trino-worker	398-amzn-0	Service for executing pieces of a query.
trino-client	398-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.3.0-amzn-1.1	Spark command-line clients.
spark-history-server	3.3.0-amzn-1.1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.3.0-amzn-1.1	In-memory execution engine for YARN.
spark-yarn-slave	3.3.0-amzn-1.1	Apache Spark libraries needed by YARN slaves.
spark-rapids	22.08.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.

Component	Version	Description
tensorflow	2.10.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-0.1	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.10	ZooKeeper command line client.

6.9.1 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.9.1 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN

Classifications	Description	Reconfiguration Actions
		services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-session.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli.properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts PhoenixQueryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.

Classifications	Description	Reconfiguration Actions
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.

Classifications	Description	Reconfiguration Actions
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.

Classifications	Description	Reconfiguration Actions
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.

Classifications	Description	Reconfiguration Actions
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-delta	Change values in Trino's delta.properties file.	Restarts Trino-Server (for Trino)
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-exchange-manager	Change values in Trino's exchange-manager.properties file.	Restarts Trino-Server (for Trino)

trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-log4j	Change values in kms-log4j .properties file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.

Classifications	Description	Reconfiguration Actions
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.9.1 change log

Change log for 6.9.1 release and release notes

Date	Event	Description
2023-08-30	Update release notes	Added several control-plane related fixes to the release notes
2023-08-21	Docs publication	Amazon EMR 6.9.1 release notes first published
2023-08-16	Deployment complete	Amazon EMR 6.9.1 fully deployed to all supported Regions

Date	Event	Description
2023-08-04	Initial release	Amazon EMR 6.9.1 first deployed to limited commercial Regions

Amazon EMR release 6.9.0

6.9.0 application versions

This release includes the following applications: Delta, Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.9.0 release notes

The following release notes include information for Amazon EMR release 6.9.0. Changes are relative to Amazon EMR release 6.8.0. For information on the release timeline, see the change log.

New Features

- Amazon EMR release 6.9.0 supports Apache Spark RAPIDS 22.08.0, Apache Hudi 0.12.1, Apache Iceberg 0.14.1, Trino 398, and Tez 0.10.2.
- Amazon EMR release 6.9.0 includes a new open-source application, Delta Lake 2.1.0.
- The Amazon Redshift integration for Apache Spark is included in Amazon EMR releases 6.9.0 and later. Previously an open-source tool, the native integration is a Spark connector that you can

use to build Apache Spark applications that read from and write to data in Amazon Redshift and Amazon Redshift Serverless. For more information, see Using Amazon Redshift integration for Apache Spark with Amazon EMR .

- Amazon EMR release 6.9.0 adds support for archiving logs to Amazon S3 during cluster scale-down. Previously, you could only archive log files to Amazon S3 during cluster termination. The new capability ensures that log files generated on the cluster persist on Amazon S3 even after the node is terminated. For more information, see Configure cluster logging and debugging.
- To support long running queries, Trino now includes a fault-tolerant execution mechanism. Fault-tolerant execution mitigates query failures by retrying failed queries or their component tasks.
- You can use Apache Flink on Amazon EMR for unified `BATCH` and `STREAM` processing of Apache Hive Tables or metadata of any Flink tablesource such as Iceberg, Kinesis or Kafka. You can specify the AWS Glue Data Catalog as the metastore for Flink using the AWS Management Console, AWS CLI, or Amazon EMR API. For more information, see Configuring Flink in Amazon EMR.
- You can now specify AWS Identity and Access Management (IAM) runtime roles and AWS Lake Formation-based access control for Apache Spark, Apache Hive, and Presto queries on Amazon EMR on EC2 clusters with Amazon SageMaker AI Studio. For more information, see Configure runtime roles for Amazon EMR steps.

Known Issues

- For Amazon EMR release 6.9.0, Trino does not work on clusters enabled for Apache Ranger. If you need to use Trino with Ranger, contact Support.
- If you use the Amazon Redshift integration for Apache Spark and have a time, timetz, timestamp, or timestamptz with microsecond precision in Parquet format, the connector rounds the time values to the nearest millisecond value. As a workaround, use the text unload format `unload_s3_format` parameter.
- When you use Spark with Hive partition location formatting to read data in Amazon S3, and you run Spark on Amazon EMR releases 5.30.0 to 5.36.0, and 6.2.0 to 6.9.0, you might encounter an issue that prevents your cluster from reading data correctly. This can happen if your partitions have all of the following characteristics:
  - Two or more partitions are scanned from the same table.
  - At least one partition directory path is a prefix of at least one other partition directory path, for example, `s3://bucket/table/p=a` is a prefix of `s3://bucket/table/p=a b`.

- The first character that follows the prefix in the other partition directory has a UTF-8 value that's less than than the / character (U+002F). For example, the space character (U+0020) that occurs between a and b in `s3://bucket/table/p=a b` falls into this category. Note that there are 14 other non-control characters: `!"#$%&'()*+,-`. For more information, see UTF-8 encoding table and Unicode characters.

  As a workaround to this issue, set the `spark.sql.sources.fastS3PartitionDiscovery.enabled` configuration to `false` in the `spark-defaults` classification.

- Connections to Amazon EMR clusters from Amazon SageMaker AI Studio may intermittently fail with a **403 Forbidden** response code. This error happens when setup of the IAM role on the cluster takes longer than 60 seconds. As a workaround, you can install an Amazon EMR patch to enable retries and increase the timeout to a minimum of 300 seconds. Use the following steps to apply the bootstrap action when you launch your cluster.

  1. Download the bootstrap script and RPM files from the following Amazon S3 URIs.

     ```
     s3://emr-data-access-control-us-east-1/customer-bootstrap-actions/gcsc/replace-rpms.sh
     s3://emr-data-access-control-us-east-1/customer-bootstrap-actions/gcsc/emr-secret-agent-1.18.0-SNAPSHOT20221121212949.noarch.rpm
     ```

  2. Upload the files from the previous step to an Amazon S3 bucket that you own. The bucket must be in the same AWS Region where you plan to launch the cluster.

  3. Include the following bootstrap action when you launch your EMR cluster. Replace *bootstrap_URI* and *RPM_URI* with the corresponding URIs from Amazon S3.

     ```
     --bootstrap-actions "Path=bootstrap_URI,Args=[RPM_URI]"
     ```

- With Amazon EMR releases 5.36.0 and 6.6.0 through 6.9.0, `SecretAgent` and `RecordServer` service components may experience log data loss due to an incorrect file name pattern configuration in Log4j2 properties. The incorrect configuration causes the components to generate only one log file per day. When the rotation strategy occurs, it overwrites the existing file instead of generating a new log file as expected. As a workaround, use a bootstrap action to generate log files each hour and append an auto-increment integer in the file name to handle the rotation.

For Amazon EMR 6.6.0 through 6.9.0 releases, use the following bootstrap action when you launch a cluster.

```
--bootstrap-actions "Path=s3://emr-data-access-control-us-east-1/customer-bootstrap-actions/log-rotation-emr-6x/replace-puppet.sh,Args=[]"
```

For Amazon EMR 5.36.0, use the following bootstrap action when you launch a cluster.

```
--bootstrap-actions "Path=s3://emr-data-access-control-us-east-1/customer-bootstrap-actions/log-rotation-emr-5x/replace-puppet.sh,Args=[]"
```

- Apache Flink provides Native S3 FileSystem and Hadoop FileSystem Connectors, which let applications create a FileSink and write the data into Amazon S3. This FileSink fails with one of the following two exceptions.

```
java.lang.UnsupportedOperationException: Recoverable writers on Hadoop are only
 supported for HDFS
```

```
Caused by: java.lang.NoSuchMethodError:
 org.apache.hadoop.io.retry.RetryPolicies.retryOtherThanRemoteAndSaslException(Lorg/
apache/hadoop/io/retry/RetryPolicy;Ljava/util/Map;)Lorg/apache/hadoop/io/retry/
RetryPolicy;
                                        at
 org.apache.hadoop.yarn.client.RMProxy.createRetryPolicy(RMProxy.java:302) ~[hadoop-
yarn-common-3.3.3-amzn-0.jar:?]
```

As a workaround, you can install an Amazon EMR patch, which fixes the above issue in Flink. To apply the bootstrap action when you launch your cluster, complete the following steps.

1. Download the flink-rpm to your Amazon S3 bucket. Your RPM path is `s3://DOC-EXAMPLE-BUCKET/rpms/flink/`.
2. Download the bootstrap script and RPM files from Amazon S3 using the following URI. Replace *regionName* with the AWS Region where you plan to launch the cluster.

   ```
   s3://emr-data-access-control-regionName/customer-bootstrap-actions/gcsc/replace-rpms.sh
   ```

3. Hadoop 3.3.3 introduced a change in YARN (YARN-9608) that keeps nodes where containers ran in a decommissioning state until the application completes. This change ensures that local

data such as shuffle data doesn't get lost, and you don' need to re-run the job. In Amazon EMR 6.8.0 and 6.9.0, this approach might also lead to underutilization of resources on clusters with or without managed scaling enabled.

With Amazon EMR 6.10.0, there's a workaround for this issue to set the value of `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-applications` to `false` in `yarn-site.xml`. In Amazon EMR releases 6.11.0 and higher as well as 6.8.1, 6.9.1, and 6.10.1, the config is set to `false` by default to resolve this issue.

Changes, Enhancements, and Resolved Issues

- For Amazon EMR release 6.9.0 and later, all components installed by Amazon EMR that use Log4j libraries use Log4j version 2.17.1 or later.
- When you use the DynamoDB connector with Spark on Amazon EMR versions 6.6.0, 6.7.0, and 6.8.0, all reads from your table return an empty result, even though the input split references non-empty data. Amazon EMR release 6.9.0 fixes this issue.
- Amazon EMR 6.9.0 adds limited support for Lake Formation-based access control with Apache Hudi when reading data using Spark SQL. The support is for SELECT queries using Spark SQL and is limited to column-level access control. For more information, see Hudi and Lake Formation.
- When you use Amazon EMR 6.9.0 to create a Hadoop cluster with Node Labels enabled, the YARN metrics API returns aggregated information across all partitions, instead of the default partition. For more information, see YARN-11414.
- With Amazon EMR release 6.9.0, we've updated Trino to version 398, which uses Java 17. The previous supported version of Trino for Amazon EMR 6.8.0 was Trino 388 running on Java 11. For more information about this change, see Trino updates to Java 17 on the Trino blog.
- This releases fixes a timing sequence mismatch issue between Apache BigTop and the Amazon EMR on EC2 cluster startup sequence. This timing sequence mismatch occurs when a system attempts to perform two or more operations at the same time instead of doing them in the proper sequence. As a result, certain cluster configurations experienced instance startup timeouts and slower cluster startup times.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

Note

This release no longer gets automatic AMI updates since it has been succeeded by 1 more more patch releases. The patch release is denoted by the number after the second decimal point (`6.8.1`). To see if you're using the latest patch release, check the available releases in the *Release Guide*, or check the **Amazon EMR release** dropdown when you create a cluster in the console, or use the `ListReleaseLabels` API or `list-release-labels` CLI action. To get updates about new releases, subscribe to the RSS feed on the What's new? page.

6.9.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *CommunityVersion*-amzn-*EmrVersion*. The *EmrVersion* starts at 0. For example, if open source community component named myapp-component with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as 2.2-amzn-2.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK
delta	2.1.0	Delta lake is an open table format for huge analytic datasets
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.3.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.6.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.23.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.2.0	EMR S3Select Connector
emrfs	2.54.0	Amazon S3 connector for Hadoop ecosystem applicati ons.

Component	Version	Description
flink-client	1.15.2	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.15.2	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.3.3-amzn-1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.3.3-amzn-1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.3.3-amzn-1	HDFS command-line client and library
hadoop-hdfs-namenode	3.3.3-amzn-1	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.3.3-amzn-1	HDFS service for managing the Hadoop filesystem journal on HA clusters.

Component	Version	Description
hadoop-httpfs-server	3.3.3-amzn-1	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.3.3-amzn-1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.3.3-amzn-1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.3.3-amzn-1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.3.3-amzn-1	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.3.3-amzn-1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.13-amzn-0	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.13-amzn-0	Service for serving one or more HBase regions.
hbase-client	2.4.13-amzn-0	HBase command-line client.
hbase-rest-server	2.4.13-amzn-0	Service providing a RESTful HTTP endpoint for HBase.

Component	Version	Description
hbase-thrift-server	2.4.13-amzn-0	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.13-amzn-0	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-2	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-2	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-2	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-2	Hive command line client.
hive-hbase	3.1.3-amzn-2	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-2	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-2	Service for accepting Hive queries as web requests.
hudi	0.12.1-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.

Component	Version	Description
hudi-presto	0.12.1-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.12.1-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.12.1-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.10.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	0.14.1-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.7.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.

Component	Version	Description
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client
phoenix-connectors	6.0.0-SNAPSHOT	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	6.0.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.276-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.276-amzn-0	Service for executing pieces of a query.
presto-client	0.276-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	398-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.

Component	Version	Description
trino-worker	398-amzn-0	Service for executing pieces of a query.
trino-client	398-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.3.0-amzn-1	Spark command-line clients.
spark-history-server	3.3.0-amzn-1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.3.0-amzn-1	In-memory execution engine for YARN.
spark-yarn-slave	3.3.0-amzn-1	Apache Spark libraries needed by YARN slaves.
spark-rapids	22.08.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.

Component	Version	Description
tensorflow	2.10.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.10.2-amzn-0	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.10	ZooKeeper command line client.

6.9.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.9.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN

Classifications	Description	Reconfiguration Actions
		services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-session.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli.properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts PhoenixQueryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.

Classifications	Description	Reconfiguration Actions
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.

Classifications	Description	Reconfiguration Actions
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.

Classifications	Description	Reconfiguration Actions
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.

Classifications	Description	Reconfiguration Actions
delta-defaults	Change values in Delta's delta-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j2	Change Livy log4j2.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)

Classifications	Description	Reconfiguration Actions
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-lakeformation	Change values in Presto's lakeformation.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.

sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.9.0 change log

Change log for 6.9.0 release and release notes

Date	Event	Description
2023-08-30	Update release notes	Added fix for timing sequence mismatch issue
2023-08-21	Update release notes	Added a known issue with Hadoop 3.3.3.
2023-07-26	Update	New OS release labels `2.0.20230612.0` and `2.0.20230628.0` .

Date	Event	Description
2022-12-13	Release notes updated	Added feature and known issue for runtime with SageMaker AI
2022-11-29	Release notes and documentation updated	Added feature for Amazon Redshift integration for Apache Spark
2022-11-23	Release notes updated	Removed Log4j entry
2022-11-18	Deployment complete	Amazon EMR 6.9 fully deployed to all supported Regions
2022-11-18	Docs publication	Amazon EMR 6.9 release notes first published
2022-11-14	Initial release	Amazon EMR 6.9 deployed to limited commercial Regions

Amazon EMR release 6.8.1

6.8.1 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases

- Application versions in Amazon EMR 4.x releases

6.8.1 release notes

The following release notes include information for Amazon EMR release 6.8.1. Changes are relative to 6.8.0. For information on the release timeline, see the 6.8.1 change log.

Changes, enhancements, and resolved issues

- Hadoop 3.3.3 introduced a change in YARN (YARN-9608) that keeps nodes where containers ran in a decommissioning state until the application completes. This change ensures that local data such as shuffle data doesn't get lost, and you don' need to re-run the job. This approach might also lead to underutilization of resources on clusters with or without managed scaling enabled.

  With Amazon EMR releases 6.11.0 and higher as well as 6.8.1, 6.9.1, and 6.10.1, the value of `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-applications` is set to `false` in `yarn-site.xml` to resolve this issue.

  While the fix addresses the issues that were introduced by YARN-9608, it might cause Hive jobs to fail due to shuffle data loss on clusters that have managed scaling enabled. We've mitigated that risk in this release by also setting `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-shuffle-data` for Hive workloads. This config is only available with Amazon EMR releases 6.11.0 and higher.
- Metrics collector won't send any metrics to the control plane after failover of primary node in clusters with the instance groups configuration.
- This release eliminates retries on failed HTTP requests to metrics collector endpoints.
- This release includes a change that allows high-availability clusters to recover from failed state after restart.
- This release fixes an issue where large user-created UIDs caused overflow exceptions.
- This release fixes timeout issues with the Amazon EMR reconfiguration process.
- This release prevents an issue where failed reconfiguration might break other, unrelated processes.
- This release includes security fixes.
- This release fixes an issue where clusters that are running workloads on Spark with Amazon EMR might silently receive incorrect results with `contains`, `startsWith`, `endsWith`, and `like`.

This issue occurs when you use the expressions on partitioned fields that have metadata in the Amazon EMR Hive3 Metastore Server (HMS).

- With Amazon EMR 6.6.0 through 6.9.x, INSERT queries with dynamic partition and an ORDER BY or SORT BY clause will always have two reducers. This issue is caused by OSS change HIVE-20703, which puts dynamic sort partition optimization under cost-based decision. If your workload doesn't require sorting of dynamic partitions, we recommend that you set the `hive.optimize.sort.dynamic.partition.threshold` property to `-1` to disable the new feature and get the correctly calculated number of reducers. This issue is fixed in OSS Hive as part of HIVE-22269 and is fixed in Amazon EMR 6.10.0.
- Hive might experience data loss when you use HDFS as a scratch directory and you have enabled merge small files, and the table contains static partition paths.
- This release fixes a performance issue with Hive if merge small files (disabled by default) is enabled at the end of ETL job.
- This release fixes an issue with throttling on the Glue side when there are no user-defined functions (UDF).
- This release fixes an issue that deletes container logs by the node log aggregation service before log pusher can push them to S3 in case of YARN decommissioning.
- This release fixes handling of compacted/archived files with persistent storefile tracking for HBase.
- This release fixes an issue that impacted Spark performance when you set a default `true` value for the `spark.yarn.heterogeneousExecutors.enabled` config in `spark-defaults.conf`.
- This release fixes an issue with Reduce Task failing to read shuffle data. The issue caused Hive query failures with a corrupted memory error.
- This release fixes an issue that caused the node provisioner to fail if the HDFS NameNode (NN) service was stuck in safemode during node replacement.
- This release adds a new retry mechanism to the cluster scaling workflow for EMR clusters that run Presto or Trino. This improvement reduces the risk that cluster resizing will indefinitely stall due to a single failed resize operation. It also improves cluster utilization, because your cluster scales up and down faster.
- This release improves cluster scale-down logic so that your cluster doesn't attempt a scale-down of core nodes below the HDFS replication factor setting for the cluster. This aligns with your data redundancy requirements, and reduces the chance that a scaling operation might stall.

- The log management daemon has been upgraded to identify all logs that are in active use with open file handles on the local instance storage, and the associated processes. This upgrade ensures that Amazon EMR properly deletes the files and reclaims storage space after the logs are archived to Amazon S3.
- This release includes a log-management daemon enhancement that deletes empty, unused steps directories in the local cluster file system. An excessively large number of empty directories can degrade the performance of Amazon EMR daemons and result in disk over-utilization.
- This release fixes an issue that might occur when you create an edge node by replicating one of the primary nodes from a cluster with multiple primary nodes. The replicated edge node could cause delays with scale-down operations, or result in high memory-utilization on the primary nodes. For more information on how to create an edge node to communicate with your EMR cluster, see Edge Node Creator in the `aws-samples` repo on GitHub.
- This release improves the automation process that Amazon EMR uses to re-mount Amazon EBS volumes to an instance after a reboot.
- This release fixes an issue that resulted in intermittent gaps in the Hadoop metrics that Amazon EMR publishes to Amazon CloudWatch.
- This release fixes an issue with EMR clusters where an update to the YARN configuration file that contains the exclusion list of nodes for the cluster is interrupted due to disk over-utilization. The incomplete update hinders future cluster scale-down operations. This release ensures that your cluster remains healthy, and that scaling operations work as expected.
- This release improves the on-cluster log management daemon to monitor additional log folders in your EMR cluster. This improvement minimizes disk over-utilization scenarios.
- This release automatically restarts the on-cluster log management daemon when it stops. This improvement reduces the risk for nodes to appear unhealthy due to disk over-utilization.
- This release adds support for archiving logs to Amazon S3 during cluster scale-down. Previously, you could only archive log files to Amazon S3 during cluster termination. The new capability ensures that log files generated on the cluster persist on Amazon S3 even after the node is terminated. For more information, see Configure cluster logging and debugging.
- This release fixes an issue that occurred when the Amazon S3 URI for a bootstrap action ended with a port number, for example: `a.b.c.d:4345`. Amazon EMR was incorrectly parsing these URIs, so any associated bootstrap actions would fail.
- This releases fixes a timing sequence mismatch issue between Apache BigTop and the Amazon EMR on EC2 cluster startup sequence. This timing sequence mismatch occurs when a system attempts to perform two or more operations at the same time instead of doing them in the

proper sequence. As a result, certain cluster configurations experienced instance startup timeouts and slower cluster startup times.

- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

6.8.1 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *CommunityVersion*-amzn-*EmrVersion*. The *EmrVersion* starts at 0. For example, if open source community component named myapp-component with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as 2.2-amzn-2.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.2.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.22.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.1.0	EMR S3Select Connector
emrfs	2.53.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.15.1	Apache Flink command line client scripts and applications.

Component	Version	Description
flink-jobmanager-config	1.15.1	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.2.1-amzn-8.1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-8.1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-8.1	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-8.1	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.2.1-amzn-8.1	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-8.1	HTTP endpoint for HDFS operations.

Component	Version	Description
hadoop-kms-server	3.2.1-amzn-8.1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-8.1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-8.1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-8.1	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.2.1-amzn-8.1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.12-amzn-0.1	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.12-amzn-0.1	Service for serving one or more HBase regions.
hbase-client	2.4.12-amzn-0.1	HBase command-line client.
hbase-rest-server	2.4.12-amzn-0.1	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.12-amzn-0.1	Service providing a Thrift endpoint to HBase.

Component	Version	Description
hbase-operator-tools	2.4.12-amzn-0.1	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-1.1	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-1.1	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-1.1	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-1.1	Hive command line client.
hive-hbase	3.1.3-amzn-1.1	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-1.1	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-1.1	Service for accepting Hive queries as web requests.
hudi	0.11.1-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.11.1-amzn-0	Bundle library for running Presto with Hudi.

Component	Version	Description
hudi-trino	0.11.1-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.11.1-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.10.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	0.14.0-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.7.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.

Component	Version	Description
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client
phoenix-connectors	5.1.2	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	5.1.2	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.273.3-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.273.3-amzn-0	Service for executing pieces of a query.
presto-client	0.273.3-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	388-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	388-amzn-0	Service for executing pieces of a query.

Component	Version	Description
trino-client	388-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.3.0-amzn-0.1	Spark command-line clients.
spark-history-server	3.3.0-amzn-0.1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.3.0-amzn-0.1	In-memory execution engine for YARN.
spark-yarn-slave	3.3.0-amzn-0.1	Apache Spark libraries needed by YARN slaves.
spark-rapids	22.06.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.9.1	TensorFlow open source software library for high performance numerical computation.

Component	Version	Description
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.10	ZooKeeper command line client.

6.8.1 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.8.1 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.

Classifications	Description	Reconfiguration Actions
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.

Classifications	Description	Reconfiguration Actions
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.

Classifications	Description	Reconfiguration Actions
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j	Change Livy log4j.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.pro perties file.	Not available.

Classifications	Description	Reconfiguration Actions
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions

spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.8.1 change log

Change log for 6.8.1 release and release notes

Date	Event	Description
2023-08-30	Update release notes	Added several control-plane related fixes to the release notes
2023-08-21	Docs publication	Amazon EMR 6.8.1 release notes first published
2023-08-16	Deployment complete	Amazon EMR 6.8.1 fully deployed to all supported Regions

Date	Event	Description
2023-08-04	Initial release	Amazon EMR 6.8.1 first deployed to limited commercial Regions

Amazon EMR release 6.8.0

6.8.0 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.8.0 release notes

The following release notes include information for Amazon EMR release 6.8.0. Changes are relative to 6.7.0.

New Features

- Amazon EMR steps feature now supports Apache Livy endpoint and JDBC/ODBC clients. For more information, see Configure runtime roles for Amazon EMR steps.
- Amazon EMR release 6.8.0 comes with Apache HBase release 2.4.12. With this HBase release, you can both archive and delete your HBase tables. The Amazon S3 archive process renames all table files to the archive directory. This can be a costly and lengthy process. Now, you can skip

the archive process and quickly drop and delete large tables. For more information, see Using the HBase shell.

Known Issues

- Hadoop 3.3.3 introduced a change in YARN (YARN-9608) that keeps nodes where containers ran in a decommissioning state until the application completes. This change ensures that local data such as shuffle data doesn't get lost, and you don' need to re-run the job. In Amazon EMR 6.8.0 and 6.9.0, this approach might also lead to underutilization of resources on clusters with or without managed scaling enabled.

  With Amazon EMR 6.10.0, there's a workaround for this issue to set the value of `yarn.resourcemanager.decommissioning-nodes-watcher.wait-for-applications` to `false` in `yarn-site.xml`. In Amazon EMR releases 6.11.0 and higher as well as 6.8.1, 6.9.1, and 6.10.1, the config is set to `false` by default to resolve this issue.

Changes, Enhancements, and Resolved Issues

- When Amazon EMR release 6.5.0, 6.6.0, or 6.7.0 read Apache Phoenix tables through the Apache Spark shell, Amazon EMR produced a `NoSuchMethodError`. Amazon EMR release 6.8.0 fixes this issue.
- Amazon EMR release 6.8.0 comes with Apache Hudi 0.11.1; however, Amazon EMR 6.8.0 clusters are also compatible with the open-source `hudi-spark3.3-bundle_2.12` from Hudi 0.12.0.
- Amazon EMR release 6.8.0 comes with Apache Spark 3.3.0. This Spark release uses Apache Log4j 2 and the `log4j2.properties` file to configure Log4j in Spark processes. If you use Spark in the cluster or create EMR clusters with custom configuration parameters, and you want to upgrade to Amazon EMR release 6.8.0, you must migrate to the new `spark-log4j2` configuration classification and key format for Apache Log4j 2. For more information, see Migrating from Apache Log4j 1.x to Log4j 2.x.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

Note

This release no longer gets automatic AMI updates since it has been succeeded by 1 more more patch releases. The patch release is denoted by the number after the second decimal point (`6.8.1`). To see if you're using the latest patch release, check the available releases in the *Release Guide*, or check the **Amazon EMR release** dropdown when you create a cluster in the console, or use the `ListReleaseLabels` API or `list-release-labels` CLI action. To get updates about new releases, subscribe to the RSS feed on the What's new? page.

Known Issues

- When you use the DynamoDB connector with Spark on Amazon EMR versions 6.6.0, 6.7.0, and 6.8.0, all reads from your table return an empty result, even though the input split references non-empty data. This is because Spark 3.2.0 sets `spark.hadoopRDD.ignoreEmptySplits` to `true` by default. As a workaround, explicitly set `spark.hadoopRDD.ignoreEmptySplits` to `false`. Amazon EMR release 6.9.0 fixes this issue.

- When you use Spark with Hive partition location formatting to read data in Amazon S3, and you run Spark on Amazon EMR releases 5.30.0 to 5.36.0, and 6.2.0 to 6.9.0, you might encounter an issue that prevents your cluster from reading data correctly. This can happen if your partitions have all of the following characteristics:
  - Two or more partitions are scanned from the same table.
  - At least one partition directory path is a prefix of at least one other partition directory path, for example, `s3://bucket/table/p=a` is a prefix of `s3://bucket/table/p=a b`.
  - The first character that follows the prefix in the other partition directory has a UTF-8 value that's less than than the `/` character (U+002F). For example, the space character (U+0020) that occurs between a and b in `s3://bucket/table/p=a b` falls into this category. Note that there are 14 other non-control characters: `!"#$%&'()*+,-`. For more information, see UTF-8 encoding table and Unicode characters.

  As a workaround to this issue, set the `spark.sql.sources.fastS3PartitionDiscovery.enabled` configuration to `false` in the `spark-defaults` classification.
- With Amazon EMR releases 5.36.0 and 6.6.0 through 6.9.0, `SecretAgent` and `RecordServer` service components may experience log data loss due to an incorrect file name pattern configuration in Log4j2 properties. The incorrect configuration causes the components to generate only one log file per day. When the rotation strategy occurs, it overwrites the existing file instead of generating a new log file as expected. As a workaround, use a bootstrap action to generate log files each hour and append an auto-increment integer in the file name to handle the rotation.

  For Amazon EMR 6.6.0 through 6.9.0 releases, use the following bootstrap action when you launch a cluster.

  ```
  --bootstrap-actions "Path=s3://emr-data-access-control-us-east-1/customer-bootstrap-actions/log-rotation-emr-6x/replace-puppet.sh,Args=[]"
  ```

  For Amazon EMR 5.36.0, use the following bootstrap action when you launch a cluster.

  ```
  --bootstrap-actions "Path=s3://emr-data-access-control-us-east-1/customer-bootstrap-actions/log-rotation-emr-5x/replace-puppet.sh,Args=[]"
  ```

For more information on the release timeline, see the change log.

6.8.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.2	Amazon SageMaker Spark SDK
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.2.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.7.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.22.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.1.0	EMR S3Select Connector

Component	Version	Description
emrfs	2.53.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.15.1	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.15.1	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.2.1-amzn-8	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-8	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-8	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-8	HDFS service for tracking file names and block locations.

Component	Version	Description
hadoop-hdfs-journalnode	3.2.1-amzn-8	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-8	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.2.1-amzn-8	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-8	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-8	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-8	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.2.1-amzn-8	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.12-amzn-0	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.12-amzn-0	Service for serving one or more HBase regions.
hbase-client	2.4.12-amzn-0	HBase command-line client.

Component	Version	Description
hbase-rest-server	2.4.12-amzn-0	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.12-amzn-0	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.12-amzn-0	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-1	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-1	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-1	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-1	Hive command line client.
hive-hbase	3.1.3-amzn-1	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-1	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-1	Service for accepting Hive queries as web requests.

Component	Version	Description
hudi	0.11.1-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.11.1-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.11.1-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.11.1-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.10.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	0.14.0-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.9.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.

Component	Version	Description
nvidia-cuda	11.7.0	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client
phoenix-connectors	5.1.2	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	5.1.2	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.273.3-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.273.3-amzn-0	Service for executing pieces of a query.
presto-client	0.273.3-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.

Component	Version	Description
trino-coordinator	388-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	388-amzn-0	Service for executing pieces of a query.
trino-client	388-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.3.0-amzn-0	Spark command-line clients.
spark-history-server	3.3.0-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.3.0-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.3.0-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	22.06.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.

Component	Version	Description
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.9.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.10	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.10	ZooKeeper command line client.

6.8.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.8.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN

Classifications	Description	Reconfiguration Actions
		services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-session.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli.properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts PhoenixQueryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.

Classifications	Description	Reconfiguration Actions
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.

Classifications	Description	Reconfiguration Actions
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.

Classifications	Description	Reconfiguration Actions
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j	Change Livy log4j.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-log4j	Change values in kms-log4j .properties file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j2	Change values in Spark's log4j2.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.

Classifications	Description	Reconfiguration Actions
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

6.8.0 change log

Change log for 6.8.0 release and release notes

Date	Event	Description
2023-08-21	Update	Added a known issue with Hadoop 3.3.3.
2023-07-26	Update	New OS release labels `2.0.20230612.0` and `2.0.20230628.0` .
2022-09-06	Deployment complete	Amazon EMR 6.8 fully deployed to all supported Regions
2022-09-06	Initial publication	Amazon EMR 6.8 release notes first published
2022-08-31	Initial release	Amazon EMR 6.8 released to limited commercial Regions

Amazon EMR release 6.7.0

6.7.0 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases

- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.7.0 release notes

The following release notes include information for Amazon EMR release 6.7.0. Changes are relative to 6.6.0.

Initial release date: July 15, 2022

New Features

- Amazon EMR now supports Apache Spark 3.2.1, Apache Hive 3.1.3, HUDI 0.11, PrestoDB 0.272, and Trino 0.378.
- Supports IAM Role and Lake Formation-based access controls with EMR steps (Spark, Hive) for Amazon EMR on EC2 clusters.
- Supports Apache Spark data definition statements on Apache Ranger enabled clusters. This now includes support for Trino applications reading and writing Apache Hive metadata on Apache Ranger enabled clusters. For more information, see Enable federated governance using Trino and Apache Ranger on Amazon EMR.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

Known Issues

- When Amazon EMR release 6.5.0, 6.6.0, or 6.7.0 read Apache Phoenix tables through the Apache Spark shell, a `NoSuchMethodError` occurs because Amazon EMR uses an incorrect `Hbase.compat.version`. Amazon EMR release 6.8.0 fixes this issue.
- When you use the DynamoDB connector with Spark on Amazon EMR versions 6.6.0, 6.7.0, and 6.8.0, all reads from your table return an empty result, even though the input split references non-empty data. This is because Spark 3.2.0 sets `spark.hadoopRDD.ignoreEmptySplits` to

`true` by default. As a workaround, explicitly set `spark.hadoopRDD.ignoreEmptySplits` to `false`. Amazon EMR release 6.9.0 fixes this issue.

- When you use Spark with Hive partition location formatting to read data in Amazon S3, and you run Spark on Amazon EMR releases 5.30.0 to 5.36.0, and 6.2.0 to 6.9.0, you might encounter an issue that prevents your cluster from reading data correctly. This can happen if your partitions have all of the following characteristics:
  - Two or more partitions are scanned from the same table.
  - At least one partition directory path is a prefix of at least one other partition directory path, for example, `s3://bucket/table/p=a` is a prefix of `s3://bucket/table/p=a b`.
  - The first character that follows the prefix in the other partition directory has a UTF-8 value that's less than than the `/` character (U+002F). For example, the space character (U+0020) that occurs between a and b in `s3://bucket/table/p=a b` falls into this category. Note that there are 14 other non-control characters: `!"#$%&'()*+,-`. For more information, see UTF-8 encoding table and Unicode characters.

  As a workaround to this issue, set the `spark.sql.sources.fastS3PartitionDiscovery.enabled` configuration to `false` in the `spark-defaults` classification.
- With Amazon EMR releases 5.36.0 and 6.6.0 through 6.9.0, `SecretAgent` and `RecordServer` service components may experience log data loss due to an incorrect file name pattern configuration in Log4j2 properties. The incorrect configuration causes the components to generate only one log file per day. When the rotation strategy occurs, it overwrites the existing file instead of generating a new log file as expected. As a workaround, use a bootstrap action to generate log files each hour and append an auto-increment integer in the file name to handle the rotation.

  For Amazon EMR 6.6.0 through 6.9.0 releases, use the following bootstrap action when you launch a cluster.

  ```
  --bootstrap-actions "Path=s3://emr-data-access-control-us-east-1/customer-bootstrap-actions/log-rotation-emr-6x/replace-puppet.sh,Args=[]"
  ```

  For Amazon EMR 5.36.0, use the following bootstrap action when you launch a cluster.

  ```
  --bootstrap-actions "Path=s3://emr-data-access-control-us-east-1/customer-bootstrap-actions/log-rotation-emr-5x/replace-puppet.sh,Args=[]"
  ```

- The `GetClusterSessionCredentials` API isn't supported with clusters that run on Amazon EMR 6.7 or lower.
- The following Hadoop commits were backported.

  - [HADOOP-16080] Fix issue where `hadoop-aws` not working with `hadoop-client-api`.

  - [HADOOP-18237] Upgrade Apache Xerces Java to 2.12.2.

  - [YARN-11092] Upgrade jquery to ui to 1.13.1.

  - [YARN-10720] YARN WebAppProxyServlet should support connection timeout to prevent proxy server from hanging.

6.7.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.1	Amazon SageMaker Spark SDK
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.2.0	Extra convenience libraries for the Hadoop ecosystem.

Component	Version	Description
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applications.
emr-notebook-env	1.6.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.22.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.1.0	EMR S3Select Connector
emrfs	2.52.0	Amazon S3 connector for Hadoop ecosystem applications.
flink-client	1.14.2	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.14.2	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applications along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.

Component	Version	Description
hadoop-client	3.2.1-amzn-7	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-7	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-7	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-7	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.2.1-amzn-7	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-7	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.2.1-amzn-7	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-7	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-7	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-7	YARN service for allocatin g and managing cluster resources and distributed applications.

Component	Version	Description
hadoop-yarn-timeline-server	3.2.1-amzn-7	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.4-amzn-3	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.4-amzn-3	Service for serving one or more HBase regions.
hbase-client	2.4.4-amzn-3	HBase command-line client.
hbase-rest-server	2.4.4-amzn-3	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.4-amzn-3	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.4-amzn-3	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.3-amzn-0	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.3-amzn-0	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.3-amzn-0	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.3-amzn-0	Hive command line client.

Component	Version	Description
hive-hbase	3.1.3-amzn-0	Hive-hbase client.
hive-metastore-server	3.1.3-amzn-0	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.3-amzn-0	Service for accepting Hive queries as web requests.
hudi	0.11.0-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.11.0-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.11.0-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.11.0-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.10.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	0.13.1-amzn-0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks

Component	Version	Description
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.8.0	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	11.0.194	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client
phoenix-connectors	5.1.2	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	5.1.2	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API

Component	Version	Description
presto-coordinator	0.272-amzn-0	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.272-amzn-0	Service for executing pieces of a query.
presto-client	0.272-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	378-amzn-0	Service for accepting queries and managing query execution among trino-workers.
trino-worker	378-amzn-0	Service for executing pieces of a query.
trino-client	378-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.2.1-amzn-0	Spark command-line clients.

Component	Version	Description
spark-history-server	3.2.1-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.2.1-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.2.1-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	22.02.0-amzn-1	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.4.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.0	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.7	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.

Component	Version	Description
zookeeper-client	3.5.7	ZooKeeper command line client.

6.7.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.7.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.pr operties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad

Classifications	Description	Reconfiguration Actions
		ditionally restarts Hadoop KMS, Ranger KMS, HiveServe r2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.

Classifications	Description	Reconfiguration Actions
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j	Change Livy log4j.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-log4j	Change values in kms-log4j .properties file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.

Classifications	Description	Reconfiguration Actions
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j	Change values in Spark's log4j.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

Amazon EMR release 6.6.0

6.6.0 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases

- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.6.0 release notes

The following release notes include information for Amazon EMR release 6.6.0. Changes are relative to 6.5.0.

Initial release date: May 9, 2022

Updated documentation date: June 15, 2022

New Features

- Amazon EMR 6.6 now supports Apache Spark 3.2, Apache Spark RAPIDS 22.02, CUDA 11, Apache Hudi 0.10.1, Apache Iceberg 0.13, Trino 0.367 and PrestoDB 0.267.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

- With Amazon EMR 6.6 and later, applications that use Log4j 1.x and Log4j 2.x are upgraded to use Log4j 1.2.17 (or higher) and Log4j 2.17.1 (or higher) respectively, and do not require using the bootstrap actions provided to mitigate the CVE issues.
- **[Managed scaling] Spark shuffle data managed scaling optimization** - For Amazon EMR versions 5.34.0 and later, and EMR versions 6.4.0 and later, managed scaling is now Spark shuffle data aware (data that Spark redistributes across partitions to perform specific operations). For more information on shuffle operations, see Using EMR managed scaling in Amazon EMR in the *Amazon EMR Management Guide* and Spark Programming Guide.

- Starting with Amazon EMR 5.32.0 and 6.5.0, dynamic executor sizing for Apache Spark is enabled by default. To turn this feature on or off, you can use the `spark.yarn.heterogeneousExecutors.enabled` configuration parameter.

Changes, Enhancements, and Resolved Issues

- Amazon EMR reduces cluster startup time by up to 80 seconds on average for clusters that use the EMR default AMI option and only install common applications, such as Apache Hadoop, Apache Spark and Apache Hive.

Known Issues

- When Amazon EMR release 6.5.0, 6.6.0, or 6.7.0 read Apache Phoenix tables through the Apache Spark shell, a `NoSuchMethodError` occurs because Amazon EMR uses an incorrect `Hbase.compat.version`. Amazon EMR release 6.8.0 fixes this issue.
- When you use the DynamoDB connector with Spark on Amazon EMR versions 6.6.0, 6.7.0, and 6.8.0, all reads from your table return an empty result, even though the input split references non-empty data. This is because Spark 3.2.0 sets `spark.hadoopRDD.ignoreEmptySplits` to `true` by default. As a workaround, explicitly set `spark.hadoopRDD.ignoreEmptySplits` to `false`. Amazon EMR release 6.9.0 fixes this issue.
- On Trino long-running clusters, Amazon EMR 6.6.0 enables Garbage Collection logging parameters in the Trino jvm.config to get better insights from the Garbage Collection logs. This change appends many Garbage Collection logs to the launcher.log (/var/log/trino/launcher.log) file. If you are running Trino clusters in Amazon EMR 6.6.0, you may encounter nodes running out of disk space after the cluster has been running for a couple of days due to the appended logs.

  The workaround for this issue is to run the script below as a Bootstrap Action to disable the Garbage Collection logging parameters in jvm.config while creating or cloning the cluster for Amazon EMR 6.6.0.

```
#!/bin/bash
  set -ex
  PRESTO_PUPPET_DIR='/var/aws/emr/bigtop-deploy/puppet/modules/trino'
  sudo bash -c "sed -i '/-Xlog/d' ${PRESTO_PUPPET_DIR}/templates/jvm.config"
```

- When you use Spark with Hive partition location formatting to read data in Amazon S3, and you run Spark on Amazon EMR releases 5.30.0 to 5.36.0, and 6.2.0 to 6.9.0, you might encounter an

issue that prevents your cluster from reading data correctly. This can happen if your partitions have all of the following characteristics:

- Two or more partitions are scanned from the same table.
- At least one partition directory path is a prefix of at least one other partition directory path, for example, `s3://bucket/table/p=a` is a prefix of `s3://bucket/table/p=a b`.
- The first character that follows the prefix in the other partition directory has a UTF-8 value that's less than than the `/` character (U+002F). For example, the space character (U+0020) that occurs between a and b in `s3://bucket/table/p=a b` falls into this category. Note that there are 14 other non-control characters: `!"#$%&'()*+,-`. For more information, see UTF-8 encoding table and Unicode characters.

As a workaround to this issue, set the `spark.sql.sources.fastS3PartitionDiscovery.enabled` configuration to `false` in the `spark-defaults` classification.

- With Amazon EMR releases 5.36.0 and 6.6.0 through 6.9.0, `SecretAgent` and `RecordServer` service components may experience log data loss due to an incorrect file name pattern configuration in Log4j2 properties. The incorrect configuration causes the components to generate only one log file per day. When the rotation strategy occurs, it overwrites the existing file instead of generating a new log file as expected. As a workaround, use a bootstrap action to generate log files each hour and append an auto-increment integer in the file name to handle the rotation.

  For Amazon EMR 6.6.0 through 6.9.0 releases, use the following bootstrap action when you launch a cluster.

  ```
  --bootstrap-actions "Path=s3://emr-data-access-control-us-east-1/customer-bootstrap-actions/log-rotation-emr-6x/replace-puppet.sh,Args=[]"
  ```

  For Amazon EMR 5.36.0, use the following bootstrap action when you launch a cluster.

  ```
  --bootstrap-actions "Path=s3://emr-data-access-control-us-east-1/customer-bootstrap-actions/log-rotation-emr-5x/replace-puppet.sh,Args=[]"
  ```

6.6.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.1	Amazon SageMaker Spark SDK
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.2.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.5.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.20.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.1.0	EMR S3Select Connector

Component	Version	Description
emrfs	2.50.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.14.2	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.14.2	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.2.1-amzn-6	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-6	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-6	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-6	HDFS service for tracking file names and block locations.

Component	Version	Description
hadoop-hdfs-journalnode	3.2.1-amzn-6	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-6	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.2.1-amzn-6	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-6	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-6	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-6	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.2.1-amzn-6	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.4-amzn-2	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.4-amzn-2	Service for serving one or more HBase regions.
hbase-client	2.4.4-amzn-2	HBase command-line client.

Component	Version	Description
hbase-rest-server	2.4.4-amzn-2	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.4-amzn-2	Service providing a Thrift endpoint to HBase.
hbase-operator-tools	2.4.4-amzn-2	Repair tool for Apache HBase clusters.
hcatalog-client	3.1.2-amzn-7	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.2-amzn-7	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.2-amzn-7	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.2-amzn-7	Hive command line client.
hive-hbase	3.1.2-amzn-7	Hive-hbase client.
hive-metastore-server	3.1.2-amzn-7	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.2-amzn-7	Service for accepting Hive queries as web requests.

Component	Version	Description
hudi	0.10.1-amzn-0	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.10.1-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.10.1-amzn-0	Bundle library for running Trino with Hudi.
hudi-spark	0.10.1-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.10.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	0.13.1	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.8.0	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.

Component	Version	Description
nvidia-cuda	11.0.194	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client
phoenix-connectors	5.1.2	Apache Phoenix-Connectors for Spark-3
phoenix-query-server	5.1.2	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.267-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.267-amzn-0	Service for executing pieces of a query.
presto-client	0.267-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.

Component	Version	Description
trino-coordinator	367-amzn-0	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	367-amzn-0	Service for executing pieces of a query.
trino-client	367-amzn-0	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.2.0-amzn-0	Spark command-line clients.
spark-history-server	3.2.0-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.2.0-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.2.0-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	22.02.0-amzn-0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.

Component	Version	Description
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.4.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.0	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.7	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.7	ZooKeeper command line client.

6.6.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.6.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN

Classifications	Description	Reconfiguration Actions
		services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-session.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli.properties settings.	Restarts Flink history server.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts PhoenixQueryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.

Classifications	Description	Reconfiguration Actions
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.

Classifications	Description	Reconfiguration Actions
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.

Classifications	Description	Reconfiguration Actions
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j	Change Livy log4j.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-connector-iceberg	Change values in Trino's iceberg.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-log4j	Change values in kms-log4j .properties file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j	Change values in Spark's log4j.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.

Classifications	Description	Reconfiguration Actions
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

Amazon EMR release 6.5.0

6.5.0 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, Iceberg, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.5.0 release notes

The following release notes include information for Amazon EMR release 6.5.0. Changes are relative to 6.4.0.

Initial release date: January 20, 2022

Updated release date: March 21, 2022

New Features

- **[Managed scaling] Spark shuffle data managed scaling optimization** - For Amazon EMR versions 5.34.0 and later, and EMR versions 6.4.0 and later, managed scaling is now Spark shuffle data aware (data that Spark redistributes across partitions to perform specific operations). For more information on shuffle operations, see Using EMR managed scaling in Amazon EMR in the *Amazon EMR Management Guide* and Spark Programming Guide.
- Starting with Amazon EMR 5.32.0 and 6.5.0, dynamic executor sizing for Apache Spark is enabled by default. To turn this feature on or off, you can use the `spark.yarn.heterogeneousExecutors.enabled` configuration parameter.
- Support for Apache Iceberg open table format for huge analytic datasets.

- Support for ranger-trino-plugin 2.0.1-amzn-1
- Support for toree 0.5.0

Changes, Enhancements, and Resolved Issues

- Amazon EMR 6.5 release version now supports Apache Iceberg 0.12.0, and provides runtime improvements with Amazon EMR Runtime for Apache Spark, Amazon EMR Runtime for Presto, and Amazon EMR Runtime for Apache Hive.
- Apache Iceberg is an open table format for large data sets in Amazon S3 and provides fast query performance over large tables, atomic commits, concurrent writes, and SQL-compatible table evolution. With EMR 6.5, you can use Apache Spark 3.1.2 with the Iceberg table format.
- Apache Hudi 0.9 adds Spark SQL DDL and DML support. This allows you to create, upsert Hudi tables using just SQL statements. Apache Hudi 0.9 also includes query side and writer side performance improvements.
- Amazon EMR Runtime for Apache Hive improves Apache Hive performance on Amazon S3 by removing rename operations during staging operations, and improves performance for metastore check (MSCK) commands used for repairing tables.

Known Issues

- When Amazon EMR release 6.5.0, 6.6.0, or 6.7.0 read Apache Phoenix tables through the Apache Spark shell, a `NoSuchMethodError` occurs because Amazon EMR uses an incorrect `Hbase.compat.version`. Amazon EMR release 6.8.0 fixes this issue.
- Hbase bundle clusters in high availability (HA) fail to provision with the default volume size and instance type. The workaround for this issue is to increase the root volume size.
- To use Spark actions with Apache Oozie, you must add the following configuration to your Oozie `workflow.xml` file. Otherwise, several critical libraries such as Hadoop and EMRFS will be missing from the classpath of the Spark executors that Oozie launches.

```
<spark-opts>--conf spark.yarn.populateHadoopClasspath=true</spark-opts>
```

- When you use Spark with Hive partition location formatting to read data in Amazon S3, and you run Spark on Amazon EMR releases 5.30.0 to 5.36.0, and 6.2.0 to 6.9.0, you might encounter an issue that prevents your cluster from reading data correctly. This can happen if your partitions have all of the following characteristics:
  - Two or more partitions are scanned from the same table.

- At least one partition directory path is a prefix of at least one other partition directory path, for example, `s3://bucket/table/p=a` is a prefix of `s3://bucket/table/p=a b`.
- The first character that follows the prefix in the other partition directory has a UTF-8 value that's less than than the `/` character (U+002F). For example, the space character (U+0020) that occurs between a and b in `s3://bucket/table/p=a b` falls into this category. Note that there are 14 other non-control characters: `!"#$%&'()*+,-`. For more information, see UTF-8 encoding table and Unicode characters.

As a workaround to this issue, set the `spark.sql.sources.fastS3PartitionDiscovery.enabled` configuration to `false` in the `spark-defaults` classification.

6.5.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.1	Amazon SageMaker Spark SDK
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.2.0	Extra convenience libraries for the Hadoop ecosystem.

Component	Version	Description
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applications.
emr-notebook-env	1.4.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.19.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.1.0	EMR S3Select Connector
emrfs	2.48.0	Amazon S3 connector for Hadoop ecosystem applications.
flink-client	1.14.0	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.14.0	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applications along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.

Component	Version	Description
hadoop-client	3.2.1-amzn-5	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-5	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-5	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-5	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.2.1-amzn-5	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-5	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.2.1-amzn-5	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-5	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-5	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-5	YARN service for allocatin g and managing cluster resources and distributed applications.

Component	Version	Description
hadoop-yarn-timeline-server	3.2.1-amzn-5	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.4-amzn-1	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.4-amzn-1	Service for serving one or more HBase regions.
hbase-client	2.4.4-amzn-1	HBase command-line client.
hbase-rest-server	2.4.4-amzn-1	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.4-amzn-1	Service providing a Thrift endpoint to HBase.
hcatalog-client	3.1.2-amzn-6	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.2-amzn-6	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.2-amzn-6	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.2-amzn-6	Hive command line client.
hive-hbase	3.1.2-amzn-6	Hive-hbase client.

Component	Version	Description
hive-metastore-server	3.1.2-amzn-6	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.2-amzn-6	Service for accepting Hive queries as web requests.
hudi	0.9.0-amzn-1	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-presto	0.9.0-amzn-1	Bundle library for running Presto with Hudi.
hudi-trino	0.9.0-amzn-1	Bundle library for running Trino with Hudi.
hudi-spark	0.9.0-amzn-1	Bundle library for running Spark with Hudi.
hue-server	4.9.0	Web application for analyzing data using Hadoop ecosystem applications
iceberg	0.12.0	Apache Iceberg is an open table format for huge analytic datasets
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark

Component	Version	Description
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.8.0	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	10.1.243	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client
phoenix-query-server	5.1.2	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.261-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.261-amzn-0	Service for executing pieces of a query.

Component	Version	Description
presto-client	0.261-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	360	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	360	Service for executing pieces of a query.
trino-client	360	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.1.2-amzn-1	Spark command-line clients.
spark-history-server	3.1.2-amzn-1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.1.2-amzn-1	In-memory execution engine for YARN.

Component	Version	Description
spark-yarn-slave	3.1.2-amzn-1	Apache Spark libraries needed by YARN slaves.
spark-rapids	0.4.1	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.4.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.10.0	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.7	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.7	ZooKeeper command line client.

6.5.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.5.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
iceberg-defaults	Change values in Iceberg's iceberg-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.

Classifications	Description	Reconfiguration Actions
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j	Change Livy log4j.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-log4j	Change values in kms-log4j .properties file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.

Classifications	Description	Reconfiguration Actions
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j	Change values in Spark's log4j.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

Amazon EMR release 6.4.0

6.4.0 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Trino (PrestoSQL), Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases

- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.4.0 release notes

The following release notes include information for Amazon EMR release 6.4.0. Changes are relative to 6.3.0.

Initial release date: Sept 20, 2021

Updated release date: March 21, 2022

Supported applications

- AWS SDK for Java version 1.12.31
- CloudWatch Sink version 2.2.0
- DynamoDB Connector version 4.16.0
- EMRFS version 2.47.0
- Amazon EMR Goodies version 3.2.0
- Amazon EMR Kinesis Connector version 3.5.0
- Amazon EMR Record Server version 2.1.0
- Amazon EMR Scripts version 2.5.0
- Flink version 1.13.1
- Ganglia version 3.7.2
- AWS Glue Hive Metastore Client version 3.3.0
- Hadoop version 3.2.1-amzn-4
- HBase version 2.4.4-amzn-0
- HBase-operator-tools 1.1.0
- HCatalog version 3.1.2-amzn-5
- Hive version 3.1.2-amzn-5
- Hudi version 0.8.0-amzn-0
- Hue version 4.9.0
- Java JDK version Corretto-8.302.08.1 (build 1.8.0_302-b08)

- JupyterHub version 1.4.1
- Livy version 0.7.1-incubating
- MXNet version 1.8.0
- Oozie version 5.2.1
- Phoenix version 5.1.2
- Pig version 0.17.0
- Presto version 0.254.1-amzn-0
- Trino version 359
- Apache Ranger KMS (multi-master transparent encryption) version 2.0.0
- ranger-plugins 2.0.1-amzn-0
- ranger-s3-plugin 1.2.0
- SageMaker Spark SDK version 1.4.1
- Scala version 2.12.10 (OpenJDK 64-Bit Server VM, Java 1.8.0_282)
- Spark version 3.1.2-amzn-0
- spark-rapids 0.4.1
- Sqoop version 1.4.7
- TensorFlow version 2.4.1
- tez version 0.9.2
- Zeppelin version 0.9.0
- Zookeeper version 3.5.7
- Connectors and drivers: DynamoDB Connector 4.16.0

New features

- **[Managed scaling] Spark shuffle data managed scaling optimization** - For Amazon EMR versions 5.34.0 and later, and EMR versions 6.4.0 and later, managed scaling is now Spark shuffle data aware (data that Spark redistributes across partitions to perform specific operations). For more information on shuffle operations, see Using EMR managed scaling in Amazon EMR in the *Amazon EMR Management Guide* and Spark Programming Guide.
- On Apache Ranger-enabled Amazon EMR clusters, you can use Apache Spark SQL to insert data into or update the Apache Hive metastore tables using `INSERT INTO`, `INSERT OVERWRITE`, and `ALTER TABLE`. When using ALTER TABLE with Spark SQL, a partition location must be the

child directory of a table location. Amazon EMR does not currently support inserting data into a partition where the partition location is different from the table location.

- PrestoSQL has been renamed to Trino.
- Hive: Execution of simple SELECT queries with LIMIT clause are accelerated by stopping the query execution as soon as the number of records mentioned in LIMIT clause is fetched. Simple SELECT queries are queries that do not have GROUP BY / ORDER by clause or queries that do not have a reducer stage. For example, `SELECT * from <TABLE> WHERE <Condition> LIMIT <Number>`.

Hudi Concurrency Control

- Hudi now supports Optimistic Concurrency Control (OCC), which can be leveraged with write operations like UPSERT and INSERT to allow changes from multiple writers to the same Hudi table. This is file-level OCC, so any two commits (or writers) can write to the same table, if their changes do not conflict. For more information, see the Hudi concurrency control.
- Amazon EMR clusters have Zookeeper installed, which can be leveraged as the lock provider for OCC. To make it easier to use this feature, Amazon EMR clusters have the following properties pre-configured:

```
hoodie.write.lock.provider=org.apache.hudi.client.transaction.lock.ZookeeperBasedLockProvider
hoodie.write.lock.zookeeper.url=<EMR Zookeeper URL>
hoodie.write.lock.zookeeper.port=<EMR Zookeeper Port>
hoodie.write.lock.zookeeper.base_path=/hudi
```

To enable OCC, you need to configure the following properties either with their Hudi job options or at the cluster-level using the Amazon EMR configurations API:

```
hoodie.write.concurrency.mode=optimistic_concurrency_control
hoodie.cleaner.policy.failed.writes=LAZY (Performs cleaning of failed writes lazily
 instead of inline with every write)
hoodie.write.lock.zookeeper.lock_key=<Key to uniquely identify the Hudi table> (Table
 Name is a good option)
```

Hudi Monitoring: Amazon CloudWatch integration to report Hudi Metrics

- Amazon EMR supports publishing Hudi Metrics to Amazon CloudWatch. It is enabled by setting the following required configurations:

```
hoodie.metrics.on=true
hoodie.metrics.reporter.type=CLOUDWATCH
```

- The following are optional Hudi configurations that you can change:

Setting	Description	Value
hoodie.metrics.cloudwatch.report.period.seconds	Frequency (in seconds) at which to report metrics to Amazon CloudWatch	Default value is 60s, which is fine for the default one minute resolution offered by Amazon CloudWatch
hoodie.metrics.cloudwatch.metric.prefix	Prefix to be added to each metric name	Default value is empty (no prefix)
hoodie.metrics.cloudwatch.namespace	Amazon CloudWatch namespace under which metrics are published	Default value is Hudi
hoodie.metrics.cloudwatch.maxDatumsPerRequest	Maximum number of datums to be included in one request to Amazon CloudWatch	Default value is 20, which is same as Amazon CloudWatch default

Amazon EMR Hudi configurations support and improvements

- Customers can now leverage EMR Configurations API and Reconfiguration feature to configure Hudi configurations at cluster level. A new file based configuration support has been introduced via /etc/hudi/conf/hudi-defaults.conf along the lines of other applications like Spark, Hive etc. EMR configures few defaults to improve user experience:

  — `hoodie.datasource.hive_sync.jdbcurl` is configured to the cluster Hive server URL and no longer needs to be specified. This is particularly useful when running a job in Spark cluster mode, where you previously had to specify the Amazon EMR master IP.

  — HBase specific configurations, which are useful for using HBase index with Hudi.

  — Zookeeper lock provider specific configuration, as discussed under concurrency control, which makes it easier to use Optimistic Concurrency Control (OCC).

- Additional changes have been introduced to reduce the number of configurations that you need to pass, and to infer automatically where possible:

  — The `partitionBy` keyword can be used to specify the partition column.

  — When enabling Hive Sync, it is no longer mandatory to pass `HIVE_TABLE_OPT_KEY`, `HIVE_PARTITION_FIELDS_OPT_KEY`, `HIVE_PARTITION_EXTRACTOR_CLASS_OPT_KEY`. Those values can be inferred from the Hudi table name and partition field.

  — `KEYGENERATOR_CLASS_OPT_KEY` is not mandatory to pass, and can be inferred from simpler cases of `SimpleKeyGenerator` and `ComplexKeyGenerator`.

Hudi Caveats

- Hudi does not support vectorized execution in Hive for Merge on Read (MoR) and Bootstrap tables. For example, `count(*)` fails with Hudi realtime table when `hive.vectorized.execution.enabled` is set to true. As a workaround, you can disable vectorized reading by setting `hive.vectorized.execution.enabled` to `false`.
- Multi-writer support is not compatible with the Hudi bootstrap feature.
- Flink Streamer and Flink SQL are experimental features in this release. These features are not recommended for use in production deployments.

Changes, enhancements, and resolved issues

This is a release to fix issues with Amazon EMR Scaling when it fails to scale up/scale down a cluster successfully or causes application failures.

- Previously, manual restart of the resource manager on a multi-master cluster caused Amazon EMR on-cluster daemons, like Zookeeper, to reload all previously decommissioned or lost nodes in the Zookeeper znode file. This caused default limits to be exceeded in certain situations. Amazon EMR now removes the decommissioned or lost node records older than one hour from the Zookeeper file and the internal limits have been increased.
- Fixed an issue where scaling requests failed for a large, highly utilized cluster when Amazon EMR on-cluster daemons were running health checking activities, such as gathering YARN node state and HDFS node state. This was happening because on-cluster daemons were not able to communicate the health status data of a node to internal Amazon EMR components.

- Improved EMR on-cluster daemons to correctly track the node states when IP addresses are reused to improve reliability during scaling operations.
- SPARK-29683. Fixed an issue where job failures occurred during cluster scale-down as Spark was assuming all available nodes were deny-listed.
- YARN-9011. Fixed an issue where job failures occurred due to a race condition in YARN decommissioning when cluster tried to scale up or down.
- Fixed issue with step or job failures during cluster scaling by ensuring that the node states are always consistent between the Amazon EMR on-cluster daemons and YARN/HDFS.
- Fixed an issue where cluster operations such as scale down and step submission failed for Amazon EMR clusters enabled with Kerberos authentication. This was because the Amazon EMR on-cluster daemon did not renew the Kerberos ticket, which is required to securely communicate with HDFS/YARN running on the primary node.
- **Configuring a cluster to fix Apache YARN Timeline Server version 1 and 1.5 performance issues**

  Apache YARN Timeline Server version 1 and 1.5 can cause performance issues with very active, large EMR clusters, particularly with `yarn.resourcemanager.system-metrics-publisher.enabled=true`, which is the default setting in Amazon EMR. An open source YARN Timeline Server v2 solves the performance issue related to YARN Timeline Server scalability.

  Other workarounds for this issue include:

  - Configuring yarn.resourcemanager.system-metrics-publisher.enabled=false in yarn-site.xml.
  - Enabling the fix for this issue when creating a cluster, as described below.

  The following Amazon EMR releases contain a fix for this YARN Timeline Server performance issue.

  EMR 5.30.2, 5.31.1, 5.32.1, 5.33.1, 5.34.x, 6.0.1, 6.1.1, 6.2.1, 6.3.1, 6.4.x

  To enable the fix on any of the above specified Amazon EMR releases, set these properties to `true` in a configurations JSON file that is passed in using the `aws emr create-cluster` command parameter: `--configurations file://./configurations.json`. Or enable the fix using the reconfiguration console UI.

  Example of the configurations.json file contents:

```
[
```

```
{
"Classification": "yarn-site",
"Properties": {
"yarn.resourcemanager.system-metrics-publisher.timeline-server-v1.enable-batch":
 "true",
"yarn.resourcemanager.system-metrics-publisher.enabled": "true"
},
"Configurations": []
}
]
```

- WebHDFS and HttpFS server are disabled by default. You can re-enable WebHDFS using the Hadoop configuration, `dfs.webhdfs.enabled`. HttpFS server can be started by using `sudo systemctl start hadoop-httpfs`.
- HTTPS is now enabled by default for Amazon Linux repositories. If you are using an Amazon S3 VPCE policy to restrict access to specific buckets, you must add the new Amazon Linux bucket ARN `arn:aws:s3:::amazonlinux-2-repos-$region/*` to your policy (replace `$region` with the region where the endpoint is). For more information, see this topic in the AWS discussion forums. Announcement: Amazon Linux 2 now supports the ability to use HTTPS while connecting to package repositories .
- Hive: Write query performance is improved by enabling the use of a scratch directory on HDFS for the last job. The temporary data for final job is written to HDFS instead of Amazon S3 and performance is improved because the data is moved from HDFS to the final table location (Amazon S3) instead of between Amazon S3 devices.
- Hive: Query compilation time improvement up to 2.5x with Glue metastore Partition Pruning.
- By default, when built-in UDFs are passed by Hive to the Hive Metastore Server, only a subset of those built-in UDFs are passed to the Glue Metastore since Glue supports only limited expression operators. If you set `hive.glue.partition.pruning.client=true`, then all partition pruning happens on the client side. If the you set `hive.glue.partition.pruning.server=true`, then all partition pruning happens on the server side.

Known issues

- Hue queries do not work in Amazon EMR 6.4.0 because Apache Hadoop HttpFS server is disabled by default. To use Hue on Amazon EMR 6.4.0, either manually start HttpFS server on the Amazon EMR primary node using `sudo systemctl start hadoop-httpfs`, or use an Amazon EMR step.

- The Amazon EMR Notebooks feature used with Livy user impersonation does not work because HttpFS is disabled by default. In this case, the EMR notebook cannot connect to the cluster that has Livy impersonation enabled. The workaround is to start HttpFS server before connecting the EMR notebook to the cluster using `sudo systemctl start hadoop-httpfs`.
- In Amazon EMR version 6.4.0, Phoenix does not support the Phoenix connectors component.
- To use Spark actions with Apache Oozie, you must add the following configuration to your Oozie `workflow.xml` file. Otherwise, several critical libraries such as Hadoop and EMRFS will be missing from the classpath of the Spark executors that Oozie launches.

  ```
  <spark-opts>--conf spark.yarn.populateHadoopClasspath=true</spark-opts>
  ```

- When you use Spark with Hive partition location formatting to read data in Amazon S3, and you run Spark on Amazon EMR releases 5.30.0 to 5.36.0, and 6.2.0 to 6.9.0, you might encounter an issue that prevents your cluster from reading data correctly. This can happen if your partitions have all of the following characteristics:
  - Two or more partitions are scanned from the same table.
  - At least one partition directory path is a prefix of at least one other partition directory path, for example, `s3://bucket/table/p=a` is a prefix of `s3://bucket/table/p=a b`.
  - The first character that follows the prefix in the other partition directory has a UTF-8 value that's less than than the `/` character (U+002F). For example, the space character (U+0020) that occurs between a and b in `s3://bucket/table/p=a b` falls into this category. Note that there are 14 other non-control characters: `!"#$%&'()*+,-`. For more information, see UTF-8 encoding table and Unicode characters.

  As a workaround to this issue, set the `spark.sql.sources.fastS3PartitionDiscovery.enabled` configuration to `false` in the `spark-defaults` classification.

6.4.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *CommunityVersion*-amzn-*EmrVersion*. The *EmrVersion* starts at 0. For example, if open source community component named myapp-component with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as 2.2-amzn-2.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.1	Amazon SageMaker Spark SDK
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.2.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.3.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.18.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.1.0	EMR S3Select Connector
emrfs	2.47.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.13.1	Apache Flink command line client scripts and applications.

Component	Version	Description
flink-jobmanager-config	1.13.1	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.2.1-amzn-4	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-4	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-4	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-4	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.2.1-amzn-4	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-4	HTTP endpoint for HDFS operations.

Component	Version	Description
hadoop-kms-server	3.2.1-amzn-4	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-4	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-4	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-4	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.2.1-amzn-4	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.4.4-amzn-0	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.4.4-amzn-0	Service for serving one or more HBase regions.
hbase-client	2.4.4-amzn-0	HBase command-line client.
hbase-rest-server	2.4.4-amzn-0	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.4.4-amzn-0	Service providing a Thrift endpoint to HBase.

Component	Version	Description
hcatalog-client	3.1.2-amzn-5	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.2-amzn-5	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.2-amzn-5	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.2-amzn-5	Hive command line client.
hive-hbase	3.1.2-amzn-5	Hive-hbase client.
hive-metastore-server	3.1.2-amzn-5	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.2-amzn-5	Service for accepting Hive queries as web requests.
hudi	0.8.0-amzn-0	Incremental processing framework to power data pipline at low latency and high efficiency.
hudi-presto	0.8.0-amzn-0	Bundle library for running Presto with Hudi.
hudi-trino	0.8.0-amzn-0	Bundle library for running Trino with Hudi.

Component	Version	Description
hudi-spark	0.8.0-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.9.0	Web application for analyzing data using Hadoop ecosystem applications
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.8.0	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	10.1.243	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.1.2	The phoenix libraries for server and client

Component	Version	Description
phoenix-query-server	5.1.2	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.254.1-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.254.1-amzn-0	Service for executing pieces of a query.
presto-client	0.254.1-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
trino-coordinator	359	Service for accepting queries and managing query execution among trino-wor kers.
trino-worker	359	Service for executing pieces of a query.
trino-client	359	Trino command-line client which is installed on an HA cluster's stand-by masters where Trino server is not started.
pig-client	0.17.0	Pig command-line client.

Component	Version	Description
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.1.2-amzn-0	Spark command-line clients.
spark-history-server	3.1.2-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.1.2-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.1.2-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	0.4.1	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.4.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.

Component	Version	Description
zeppelin-server	0.9.0	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.5.7	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.5.7	ZooKeeper command line client.

6.4.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.4.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.

Classifications	Description	Reconfiguration Actions
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.

Classifications	Description	Reconfiguration Actions
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.

Classifications	Description	Reconfiguration Actions
livy-log4j	Change Livy log4j.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.pro perties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.

Classifications	Description	Reconfiguration Actions
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
trino-log	Change values in Trino's log.properties file.	Restarts Trino-Server (for Trino)
trino-config	Change values in Trino's config.properties file.	Restarts Trino-Server (for Trino)

Classifications	Description	Reconfiguration Actions
trino-password-authenticator	Change values in Trino's password-authenticator.properties file.	Restarts Trino-Server (for Trino)
trino-env	Change values in Trino's trino-env.sh file.	Restarts Trino-Server (for Trino)
trino-node	Change values in Trino's node.properties file.	Not available.
trino-connector-blackhole	Change values in Trino's blackhole.properties file.	Not available.
trino-connector-cassandra	Change values in Trino's cassandra.properties file.	Not available.
trino-connector-hive	Change values in Trino's hive.properties file.	Restarts Trino-Server (for Trino)
trino-connector-jmx	Change values in Trino's jmx.properties file.	Not available.
trino-connector-kafka	Change values in Trino's kafka.properties file.	Not available.
trino-connector-localfile	Change values in Trino's localfile.properties file.	Not available.
trino-connector-memory	Change values in Trino's memory.properties file.	Not available.
trino-connector-mongodb	Change values in Trino's mongodb.properties file.	Not available.
trino-connector-mysql	Change values in Trino's mysql.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
trino-connector-postgresql	Change values in Trino's postgresql.properties file.	Not available.
trino-connector-raptor	Change values in Trino's raptor.properties file.	Not available.
trino-connector-redis	Change values in Trino's redis.properties file.	Not available.
trino-connector-redshift	Change values in Trino's redshift.properties file.	Not available.
trino-connector-tpch	Change values in Trino's tpch.properties file.	Not available.
trino-connector-tpcds	Change values in Trino's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-log4j	Change values in kms-log4j .properties file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.

Classifications	Description	Reconfiguration Actions
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j	Change values in Spark's log4j.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

Amazon EMR release 6.3.1

6.3.1 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Trino (PrestoSQL), Spark, Sqoop, TensorFlow, Tez, Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases

- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.3.1 release notes

This is a release to fix issues with Amazon EMR Scaling when it fails to scale up/scale down a cluster successfully or causes application failures.

Changes, Enhancements, and Resolved Issues

- Fixed an issue where scaling requests failed for a large, highly utilized cluster when Amazon EMR on-cluster daemons were running health checking activities, such as gathering YARN node state and HDFS node state. This was happening because on-cluster daemons were not able to communicate the health status data of a node to internal Amazon EMR components.
- Improved EMR on-cluster daemons to correctly track the node states when IP addresses are reused to improve reliability during scaling operations.
- SPARK-29683. Fixed an issue where job failures occurred during cluster scale-down as Spark was assuming all available nodes were deny-listed.
- YARN-9011. Fixed an issue where job failures occurred due to a race condition in YARN decommissioning when cluster tried to scale up or down.
- Fixed issue with step or job failures during cluster scaling by ensuring that the node states are always consistent between the Amazon EMR on-cluster daemons and YARN/HDFS.
- Fixed an issue where cluster operations such as scale down and step submission failed for Amazon EMR clusters enabled with Kerberos authentication. This was because the Amazon EMR on-cluster daemon did not renew the Kerberos ticket, which is required to securely communicate with HDFS/YARN running on the primary node.
- HTTPS is now enabled by default for Amazon Linux repositories. If you are using an Amazon S3 VPCE policy to restrict access to specific buckets, you must add the new Amazon Linux bucket ARN `arn:aws:s3:::amazonlinux-2-repos-$region/*` to your policy (replace `$region` with the region where the endpoint is). For more information, see this topic in the AWS discussion forums. Announcement: Amazon Linux 2 now supports the ability to use HTTPS while connecting to package repositories .

Known issues

- When you use Spark with Hive partition location formatting to read data in Amazon S3, and you run Spark on Amazon EMR releases 5.30.0 to 5.36.0, and 6.2.0 to 6.9.0, you might encounter an issue that prevents your cluster from reading data correctly. This can happen if your partitions have all of the following characteristics:
  - Two or more partitions are scanned from the same table.
  - At least one partition directory path is a prefix of at least one other partition directory path, for example, `s3://bucket/table/p=a` is a prefix of `s3://bucket/table/p=a b`.
  - The first character that follows the prefix in the other partition directory has a UTF-8 value that's less than than the `/` character (U+002F). For example, the space character (U+0020) that occurs between a and b in `s3://bucket/table/p=a b` falls into this category. Note that there are 14 other non-control characters: `!"#$%&'()*+,-`. For more information, see UTF-8 encoding table and Unicode characters.

  As a workaround to this issue, set the `spark.sql.sources.fastS3PartitionDiscovery.enabled` configuration to `false` in the `spark-defaults` classification.

6.3.1 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.1	Amazon SageMaker Spark SDK

Component	Version	Description
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.2.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.2.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.18.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.1.0	EMR S3Select Connector
emrfs	2.46.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.12.1	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.12.1	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.

Component	Version	Description
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.2.1-amzn-3.1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-3.1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-3.1	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-3.1	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.2.1-amzn-3.1	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-3.1	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.2.1-amzn-3.1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-3.1	MapReduce execution engine libraries for running a MapReduce application.

Component	Version	Description
hadoop-yarn-nodemanager	3.2.1-amzn-3.1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-3.1	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.2.1-amzn-3.1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.2.6-amzn-1	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.2.6-amzn-1	Service for serving one or more HBase regions.
hbase-client	2.2.6-amzn-1	HBase command-line client.
hbase-rest-server	2.2.6-amzn-1	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.2.6-amzn-1	Service providing a Thrift endpoint to HBase.
hcatalog-client	3.1.2-amzn-4	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.2-amzn-4	Service providing HCatalog, a table and storage management layer for distributed applications.

Component	Version	Description
hcatalog-webhcat-server	3.1.2-amzn-4	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.2-amzn-4	Hive command line client.
hive-hbase	3.1.2-amzn-4	Hive-hbase client.
hive-metastore-server	3.1.2-amzn-4	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.2-amzn-4	Service for accepting Hive queries as web requests.
hudi	0.7.0-amzn-0	Incremental processing framework to power data pipline at low latency and high efficiency.
hudi-presto	0.7.0-amzn-0	Bundle library for running Presto with Hudi.
hudi-prestosql	0.7.0-amzn-0	Bundle library for running PrestoSQL with Hudi.
hudi-spark	0.7.0-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.9.0	Web application for analyzing data using Hadoop ecosystem applications
jupyterhub	1.2.2	Multi-user server for Jupyter notebooks

Component	Version	Description
livy-server	0.7.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.7.0	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	10.1.243	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	5.0.0-HBase-2.0	The phoenix libraries for server and client
phoenix-query-server	5.0.0-HBase-2.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.245.1-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.

Component	Version	Description
presto-worker	0.245.1-amzn-0	Service for executing pieces of a query.
presto-client	0.245.1-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
prestosql-coordinator	350	Service for accepting queries and managing query execution among prestosql-workers.
prestosql-worker	350	Service for executing pieces of a query.
prestosql-client	350	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.1.1-amzn-0.1	Spark command-line clients.
spark-history-server	3.1.1-amzn-0.1	Web UI for viewing logged events for the lifetime of a completed Spark application.

Component	Version	Description
spark-on-yarn	3.1.1-amzn-0.1	In-memory execution engine for YARN.
spark-yarn-slave	3.1.1-amzn-0.1	Apache Spark libraries needed by YARN slaves.
spark-rapids	0.4.1	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.4.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.9.0	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.4.14	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.4.14	ZooKeeper command line client.

6.3.1 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.3.1 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j	Change Livy log4j.properties settings.	Restarts Livy Server.

Classifications	Description	Reconfiguration Actions
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.pro perties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
prestosql-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-password-authenticator	Change values in Presto's password-authenticator.properties file.	Restarts Presto-Server (for PrestoSQL)

Classifications	Description	Reconfiguration Actions
prestosql-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoSQL)
prestosql-node	Change values in PrestoSQL's node.properties file.	Not available.
prestosql-connector-blackhole	Change values in PrestoSQL's blackhole.properties file.	Not available.
prestosql-connector-cassandra	Change values in PrestoSQL's cassandra.properties file.	Not available.
prestosql-connector-hive	Change values in PrestoSQL's hive.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-connector-jmx	Change values in PrestoSQL's jmx.properties file.	Not available.
prestosql-connector-kafka	Change values in PrestoSQL's kafka.properties file.	Not available.
prestosql-connector-localfile	Change values in PrestoSQL's localfile.properties file.	Not available.
prestosql-connector-memory	Change values in PrestoSQL's memory.properties file.	Not available.
prestosql-connector-mongodb	Change values in PrestoSQL's mongodb.properties file.	Not available.
prestosql-connector-mysql	Change values in PrestoSQL's mysql.properties file.	Not available.
prestosql-connector-postgresql	Change values in PrestoSQL's postgresql.properties file.	Not available.
prestosql-connector-raptor	Change values in PrestoSQL's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
prestosql-connector-redis	Change values in PrestoSQL's redis.properties file.	Not available.
prestosql-connector-redshift	Change values in PrestoSQL's redshift.properties file.	Not available.
prestosql-connector-tpch	Change values in PrestoSQL's tpch.properties file.	Not available.
prestosql-connector-tpcds	Change values in PrestoSQL's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-log4j	Change values in kms-log4j .properties file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.

Classifications	Description	Reconfiguration Actions
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j	Change values in Spark's log4j.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

Amazon EMR release 6.3.0

6.3.0 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Trino (PrestoSQL), Spark, Sqoop, TensorFlow, Tez, Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.3.0 release notes

The following release notes include information for Amazon EMR release 6.3.0. Changes are relative to 6.2.0.

Initial release date: May 12, 2021

Last updated date: August 9, 2021

Supported applications

- AWS SDK for Java version 1.11.977
- CloudWatch Sink version 2.1.0
- DynamoDB Connector version 4.16.0
- EMRFS version 2.46.0
- Amazon EMR Goodies version 3.2.0
- Amazon EMR Kinesis Connector version 3.5.0
- Amazon EMR Record Server version 2.0.0
- Amazon EMR Scripts version 2.5.0
- Flink version 1.12.1
- Ganglia version 3.7.2
- AWS Glue Hive Metastore Client version 3.2.0
- Hadoop version 3.2.1-amzn-3
- HBase version 2.2.6-amzn-1
- HBase-operator-tools 1.0.0
- HCatalog version 3.1.2-amzn-0
- Hive version 3.1.2-amzn-4
- Hudi version 0.7.0-amzn-0
- Hue version 4.9.0
- Java JDK version Corretto-8.282.08.1 (build 1.8.0_282-b08)
- JupyterHub version 1.2.0
- Livy version 0.7.0-incubating
- MXNet version 1.7.0
- Oozie version 5.2.1
- Phoenix version 5.0.0
- Pig version 0.17.0
- Presto version 0.245.1-amzn-0

- PrestoSQL version 350
- Apache Ranger KMS (multi-master transparent encryption) version 2.0.0
- ranger-plugins 2.0.1-amzn-0
- ranger-s3-plugin 1.1.0
- SageMaker Spark SDK version 1.4.1
- Scala version 2.12.10 (OpenJDK 64-Bit Server VM, Java 1.8.0_282)
- Spark version 3.1.1-amzn-0
- spark-rapids 0.4.1
- Sqoop version 1.4.7
- TensorFlow version 2.4.1
- tez version 0.9.2
- Zeppelin version 0.9.0
- Zookeeper version 3.4.14
- Connectors and drivers: DynamoDB Connector 4.16.0

New features

- Amazon EMR supports Amazon S3 Access Points, a feature of Amazon S3 that allows you to easily manage access for shared data lakes. Using your Amazon S3 Access Point alias, you can simplify your data access at scale on Amazon EMR. You can use Amazon S3 Access Points with all versions of Amazon EMR at no additional cost in all AWS regions where Amazon EMR is available. To learn more about Amazon S3 Access Points and Access Point aliases, see Using a bucket-style alias for your access point in the *Amazon S3 User Guide*.
- New `DescribeReleaseLabel` and `ListReleaseLabel` API parameters provide Amazon EMR release label details. You can programmatically list releases available in the region where the API request is run, and list the available applications for a specific Amazon EMR release label. The release label parameters also list Amazon EMR releases that support a specified application, such as Spark. This information can be used to programmatically launch Amazon EMR clusters. For example, you can launch a cluster using the latest release version from the `ListReleaseLabel` results. For more information, see DescribeReleaseLabel and ListReleaseLabels in the *Amazon EMR API Reference*.
- With Amazon EMR 6.3.0, you can launch a cluster that natively integrates with Apache Ranger. Apache Ranger is an open-source framework to enable, monitor, and manage comprehensive

data security across the Hadoop platform. For more information, see Apache Ranger. With native integration, you can bring your own Apache Ranger to enforce fine-grained data access control on Amazon EMR. See Integrate Amazon EMR with Apache Ranger in the Amazon EMR Management Guide.

- Scoped managed policies: To align with AWS best practices, Amazon EMR has introduced v2 EMR-scoped default managed policies as replacements for policies that will be deprecated. See Amazon EMR Managed Policies.
- Instance Metadata Service (IMDS) V2 support status: For Amazon EMR 6.2 or later, Amazon EMR components use IMDSv2 for all IMDS calls. For IMDS calls in your application code, you can use both IMDSv1 and IMDSv2, or configure the IMDS to use only IMDSv2 for added security. If you disable IMDSv1 in earlier Amazon EMR 6.x releases, it causes cluster startup failure.

Changes, enhancements, and resolved issues

- This is a release to fix issues with Amazon EMR Scaling when it fails to scale up/scale down a cluster successfully or causes application failures.
- Fixed an issue where scaling requests failed for a large, highly utilized cluster when Amazon EMR on-cluster daemons were running health checking activities, such as gathering YARN node state and HDFS node state. This was happening because on-cluster daemons were not able to communicate the health status data of a node to internal Amazon EMR components.
- Improved EMR on-cluster daemons to correctly track the node states when IP addresses are reused to improve reliability during scaling operations.
- SPARK-29683. Fixed an issue where job failures occurred during cluster scale-down as Spark was assuming all available nodes were deny-listed.
- YARN-9011. Fixed an issue where job failures occurred due to a race condition in YARN decommissioning when cluster tried to scale up or down.
- Fixed issue with step or job failures during cluster scaling by ensuring that the node states are always consistent between the Amazon EMR on-cluster daemons and YARN/HDFS.
- Fixed an issue where cluster operations such as scale down and step submission failed for Amazon EMR clusters enabled with Kerberos authentication. This was because the Amazon EMR on-cluster daemon did not renew the Kerberos ticket, which is required to securely communicate with HDFS/YARN running on the primary node.
- Newer Amazon EMR releases fix the issue with a lower "Max open files" limit on older AL2 in Amazon EMR. Amazon EMR releases 5.30.1, 5.30.2, 5.31.1, 5.32.1, 6.0.1, 6.1.1, 6.2.1, 5.33.0, 6.3.0 and later now include a permanent fix with a higher "Max open files" setting.

- Spark SQL UI explain mode default changed from `extended` to `formatted` in Spark 3.1. Amazon EMR reverted it back to `extended` to include logical plan information in the Spark SQL UI. This can be reverted by setting `spark.sql.ui.explainMode` to `formatted`.
- The following commits were backported from the Spark master branch.

  - [SPARK-34752][BUILD] Bump Jetty to 9.4.37 to address CVE-2020-27223.

  - [SPARK-34534] Fix blockIds order when use FetchShuffleBlocks to fetch blocks.

  - [SPARK-34681] [SQL] Fix bug for full outer shuffled hash join when building left side with non-equal condition.

  - [SPARK-34497] [SQL] Fix built-in JDBC connection providers to restore JVM security context changes.
- To improve interoperability with Nvidia Spark RAPIDs plugin, Added workaround to address an issue preventing dynamic partition pruning from triggering when using Nvidia Spark RAPIDs with adaptive query execution disabled, see RAPIDS issue #1378 and RAPIDS issue ##1386. For details of the new configuration `spark.sql.optimizer.dynamicPartitionPruning.enforceBroadcastReuse`, see RAPIDS issue ##1386.
- The file output committer default algorithm has been changed from the v2 algorithm to the v1 algorithm in open source Spark 3.1. For more information, see this Amazon EMR optimizing Spark performance - dynamic partition pruning.
- Amazon EMR reverted to the v2 algorithm, the default used in prior Amazon EMR 6.x releases, to prevent performance regression. To restore the open source Spark 3.1 behavior, set `spark.hadoop.mapreduce.fileoutputcommitter.algorithm.version` to 1. Open source Spark made this change because task commit in file output committer algorithm v2 is not atomic, which can cause an output data correctness issue in some cases. However, task commit in algorithm v1 is also not atomic. In some scenarios task commit includes a delete performed before a rename. This can result in a silent data correctness issue.
- Fixed Managed Scaling issues in earlier Amazon EMR releases and made improvements so application failure rates are significantly reduced.
- Installed the AWS Java SDK Bundle on each new cluster. This is a single jar containing all service SDKs and their dependencies, instead of individual component jars. For more information, see Java SDK Bundled Dependency.

Known issues

- For Amazon EMR 6.3.0 and 6.2.0 private subnet clusters, you cannot access the Ganglia web UI. You will get an "access denied (403)" error. Other web UIs, such as Spark, Hue, JupyterHub, Zeppelin, Livy, and Tez are working normally. Ganglia web UI access on public subnet clusters are also working normally. To resolve this issue, restart httpd service on the primary node with `sudo systemctl restart httpd`. This issue is fixed in Amazon EMR 6.4.0.
- When AWS Glue Data Catalog is enabled, using Spark to access a AWS Glue DB with null string location URI may fail. This happens to earlier Amazon EMR releases, but SPARK-31709 (https://issues.apache.org/jira/browse/SPARK-31709) makes it apply to more cases. For example, when creating a table within the default AWS Glue DB whose location URI is a null string, `spark.sql("CREATE TABLE mytest (key string) location '/table_path';")` fails with the message, "Cannot create a Path from an empty string." To work around this, manually set a location URI of your AWS Glue databases, then create tables within these databases using Spark.
- In Amazon EMR 6.3.0, PrestoSQL has upgraded from version 343 to version 350. There are two security related changes from the open source that relate to this version change. File-based catalog access control is changed from `deny` to `allow` when table, schema, or session property rules are not defined. Also, file-based system access control is changed to support files without catalog rules defined. In this case, all access to catalogs is allowed.

  For more information, see Release 344 (9 Oct 2020).
- Note that the Hadoop user directory (/home/hadoop) is readable by everyone. It has Unix 755 (drwxr-xr-x) directory permissions to allow read access by frameworks like Hive. You can put files in /home/hadoop and its subdirectories, but be aware of the permissions on those directories to protect sensitive information.
- **Lower "Max open files" limit on older AL2 [fixed in newer releases].** Amazon EMR releases: emr-5.30.x, emr-5.31.0, emr-5.32.0, emr-6.0.0, emr-6.1.0, and emr-6.2.0 are based on older versions ofAmazon Linux 2 (AL2), which have a lower ulimit setting for "Max open files" when Amazon EMR clusters are created with the default AMI. Amazon EMR releases 5.30.1, 5.30.2, 5.31.1, 5.32.1, 6.0.1, 6.1.1, 6.2.1, 5.33.0, 6.3.0 and later include a permanent fix with a higher "Max open files" setting. Releases with the lower open file limit causes a "Too many open files" error when submitting Spark job. In the impacted releases, the Amazon EMR default AMI has a default ulimit setting of 4096 for "Max open files," which is lower than the 65536 file limit in the latestAmazon Linux 2 AMI. The lower ulimit setting for "Max open files" causes Spark job failure

when the Spark driver and executor try to open more than 4096 files. To fix the issue, Amazon EMR has a bootstrap action (BA) script that adjusts the ulimit setting at cluster creation.

If you are using an older Amazon EMR version that doesn't have the permanent fix for this issue, the following workaround lets you to explicitly set the instance-controller ulimit to a maximum of 65536 files.

Explicitly set a ulimit from the command line

1. Edit `/etc/systemd/system/instance-controller.service` to add the following parameters to Service section.

   ```
   LimitNOFILE=65536

   LimitNPROC=65536
   ```

2. Restart InstanceController

   ```
   $ sudo systemctl daemon-reload

   $ sudo systemctl restart instance-controller
   ```

Set a ulimit using bootstrap action (BA)

You can also use a bootstrap action (BA) script to configure the instance-controller ulimit to 65536 files at cluster creation.

```
#!/bin/bash
for user in hadoop spark hive; do
sudo tee /etc/security/limits.d/$user.conf << EOF
$user - nofile 65536
$user - nproc 65536
EOF
done
for proc in instancecontroller logpusher; do
sudo mkdir -p /etc/systemd/system/$proc.service.d/
sudo tee /etc/systemd/system/$proc.service.d/override.conf << EOF
[Service]
LimitNOFILE=65536
LimitNPROC=65536
EOF
pid=$(pgrep -f aws157.$proc.Main)
```

```
sudo prlimit --pid $pid --nofile=65535:65535 --nproc=65535:65535
done
sudo systemctl daemon-reload
```

- **Important**

  EMR clusters that run Amazon Linux or Amazon Linux 2 Amazon Machine Images (AMIs) use default Amazon Linux behavior, and do not automatically download and install important and critical kernel updates that require a reboot. This is the same behavior as other Amazon EC2 instances that run the default Amazon Linux AMI. If new Amazon Linux software updates that require a reboot (such as kernel, NVIDIA, and CUDA updates) become available after an Amazon EMR release becomes available, EMR cluster instances that run the default AMI do not automatically download and install those updates. To get kernel updates, you can customize your Amazon EMR AMI to use the latest Amazon Linux AMI.

- To use Spark actions with Apache Oozie, you must add the following configuration to your Oozie `workflow.xml` file. Otherwise, several critical libraries such as Hadoop and EMRFS will be missing from the classpath of the Spark executors that Oozie launches.

  ```
  <spark-opts>--conf spark.yarn.populateHadoopClasspath=true</spark-opts>
  ```

- When you use Spark with Hive partition location formatting to read data in Amazon S3, and you run Spark on Amazon EMR releases 5.30.0 to 5.36.0, and 6.2.0 to 6.9.0, you might encounter an issue that prevents your cluster from reading data correctly. This can happen if your partitions have all of the following characteristics:
  - Two or more partitions are scanned from the same table.
  - At least one partition directory path is a prefix of at least one other partition directory path, for example, `s3://bucket/table/p=a` is a prefix of `s3://bucket/table/p=a b`.
  - The first character that follows the prefix in the other partition directory has a UTF-8 value that's less than than the `/` character (U+002F). For example, the space character (U+0020) that occurs between a and b in `s3://bucket/table/p=a b` falls into this category. Note that there are 14 other non-control characters: `!"#$%&'()*+,-`. For more information, see UTF-8 encoding table and Unicode characters.

  As a workaround to this issue, set the `spark.sql.sources.fastS3PartitionDiscovery.enabled` configuration to `false` in the `spark-defaults` classification.

6.3.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.1	Amazon SageMaker Spark SDK
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.2.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.2.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.18.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.1.0	EMR S3Select Connector

Component	Version	Description
emrfs	2.46.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.12.1	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.12.1	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.2.1-amzn-3	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-3	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-3	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-3	HDFS service for tracking file names and block locations.

Component	Version	Description
hadoop-hdfs-journalnode	3.2.1-amzn-3	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-3	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.2.1-amzn-3	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-3	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-3	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-3	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.2.1-amzn-3	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.2.6-amzn-1	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.2.6-amzn-1	Service for serving one or more HBase regions.
hbase-client	2.2.6-amzn-1	HBase command-line client.

Component	Version	Description
hbase-rest-server	2.2.6-amzn-1	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.2.6-amzn-1	Service providing a Thrift endpoint to HBase.
hcatalog-client	3.1.2-amzn-4	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.2-amzn-4	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.2-amzn-4	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.2-amzn-4	Hive command line client.
hive-hbase	3.1.2-amzn-4	Hive-hbase client.
hive-metastore-server	3.1.2-amzn-4	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.2-amzn-4	Service for accepting Hive queries as web requests.
hudi	0.7.0-amzn-0	Incremental processing framework to power data pipline at low latency and high efficiency.

Component	Version	Description
hudi-presto	0.7.0-amzn-0	Bundle library for running Presto with Hudi.
hudi-prestosql	0.7.0-amzn-0	Bundle library for running PrestoSQL with Hudi.
hudi-spark	0.7.0-amzn-0	Bundle library for running Spark with Hudi.
hue-server	4.9.0	Web application for analyzing data using Hadoop ecosystem applications
jupyterhub	1.2.2	Multi-user server for Jupyter notebooks
livy-server	0.7.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.7.0	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68+	MariaDB database server.
nvidia-cuda	10.1.243	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.

Component	Version	Description
phoenix-library	5.0.0-HBase-2.0	The phoenix libraries for server and client
phoenix-query-server	5.0.0-HBase-2.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.245.1-amzn-0	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.245.1-amzn-0	Service for executing pieces of a query.
presto-client	0.245.1-amzn-0	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
prestosql-coordinator	350	Service for accepting queries and managing query execution among prestosql-workers.
prestosql-worker	350	Service for executing pieces of a query.
prestosql-client	350	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.

Component	Version	Description
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.1.1-amzn-0	Spark command-line clients.
spark-history-server	3.1.1-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.1.1-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.1.1-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	0.4.1	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.4.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.

Component	Version	Description
zeppelin-server	0.9.0	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.4.14	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.4.14	ZooKeeper command line client.

6.3.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.3.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceM anager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.

Classifications	Description	Reconfiguration Actions
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.

Classifications	Description	Reconfiguration Actions
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Restarts Flink history server.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS services Namenode, Datanode, and ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j	Change Livy log4j.properties settings.	Restarts Livy Server.

Classifications	Description	Reconfiguration Actions
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.pro perties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
prestosql-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-password-authenticator	Change values in Presto's password-authenticator.properties file.	Restarts Presto-Server (for PrestoSQL)

Classifications	Description	Reconfiguration Actions
prestosql-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoSQL)
prestosql-node	Change values in PrestoSQL's node.properties file.	Not available.
prestosql-connector-blackhole	Change values in PrestoSQL's blackhole.properties file.	Not available.
prestosql-connector-cassandra	Change values in PrestoSQL's cassandra.properties file.	Not available.
prestosql-connector-hive	Change values in PrestoSQL's hive.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-connector-jmx	Change values in PrestoSQL's jmx.properties file.	Not available.
prestosql-connector-kafka	Change values in PrestoSQL's kafka.properties file.	Not available.
prestosql-connector-localfile	Change values in PrestoSQL's localfile.properties file.	Not available.
prestosql-connector-memory	Change values in PrestoSQL's memory.properties file.	Not available.
prestosql-connector-mongodb	Change values in PrestoSQL's mongodb.properties file.	Not available.
prestosql-connector-mysql	Change values in PrestoSQL's mysql.properties file.	Not available.
prestosql-connector-postgresql	Change values in PrestoSQL's postgresql.properties file.	Not available.
prestosql-connector-raptor	Change values in PrestoSQL's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
prestosql-connector-redis	Change values in PrestoSQL's redis.properties file.	Not available.
prestosql-connector-redshift	Change values in PrestoSQL's redshift.properties file.	Not available.
prestosql-connector-tpch	Change values in PrestoSQL's tpch.properties file.	Not available.
prestosql-connector-tpcds	Change values in PrestoSQL's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-log4j	Change values in kms-log4j .properties file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.

Classifications	Description	Reconfiguration Actions
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j	Change values in Spark's log4j.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie and HiveServer2.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

Amazon EMR release 6.2.1

6.2.1 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Trino (PrestoSQL), Spark, Sqoop, TensorFlow, Tez, Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.2.1 release notes

This is a release to fix issues with Amazon EMR Scaling when it fails to scale up/scale down a cluster successfully or causes application failures.

Changes, Enhancements, and Resolved Issues

- Fixed an issue where scaling requests failed for a large, highly utilized cluster when Amazon EMR on-cluster daemons were running health checking activities, such as gathering YARN node state and HDFS node state. This was happening because on-cluster daemons were not able to communicate the health status data of a node to internal Amazon EMR components.
- Improved EMR on-cluster daemons to correctly track the node states when IP addresses are reused to improve reliability during scaling operations.
- SPARK-29683. Fixed an issue where job failures occurred during cluster scale-down as Spark was assuming all available nodes were deny-listed.
- YARN-9011. Fixed an issue where job failures occurred due to a race condition in YARN decommissioning when cluster tried to scale up or down.
- Fixed issue with step or job failures during cluster scaling by ensuring that the node states are always consistent between the Amazon EMR on-cluster daemons and YARN/HDFS.
- Fixed an issue where cluster operations such as scale down and step submission failed for Amazon EMR clusters enabled with Kerberos authentication. This was because the Amazon EMR on-cluster daemon did not renew the Kerberos ticket, which is required to securely communicate with HDFS/YARN running on the primary node.
- Newer Amazon EMR releases fix the issue with a lower "Max open files" limit on older AL2 in Amazon EMR. Amazon EMR releases 5.30.1, 5.30.2, 5.31.1, 5.32.1, 6.0.1, 6.1.1, 6.2.1, 5.33.0, 6.3.0 and later now include a permanent fix with a higher "Max open files" setting.
- HTTPS is now enabled by default for Amazon Linux repositories. If you are using an Amazon S3 VPCE policy to restrict access to specific buckets, you must add the new Amazon Linux bucket ARN `arn:aws:s3:::amazonlinux-2-repos-$region/*` to your policy (replace `$region` with the region where the endpoint is). For more information, see this topic in the AWS discussion forums. Announcement: Amazon Linux 2 now supports the ability to use HTTPS while connecting to package repositories .

Known issues

- When you use Spark with Hive partition location formatting to read data in Amazon S3, and you run Spark on Amazon EMR releases 5.30.0 to 5.36.0, and 6.2.0 to 6.9.0, you might encounter an issue that prevents your cluster from reading data correctly. This can happen if your partitions have all of the following characteristics:
  - Two or more partitions are scanned from the same table.

- At least one partition directory path is a prefix of at least one other partition directory path, for example, `s3://bucket/table/p=a` is a prefix of `s3://bucket/table/p=a b`.
- The first character that follows the prefix in the other partition directory has a UTF-8 value that's less than than the `/` character (U+002F). For example, the space character (U+0020) that occurs between a and b in `s3://bucket/table/p=a b` falls into this category. Note that there are 14 other non-control characters: `!"#$%&'()*+,-`. For more information, see UTF-8 encoding table and Unicode characters.

As a workaround to this issue, set the `spark.sql.sources.fastS3PartitionDiscovery.enabled` configuration to `false` in the `spark-defaults` classification.

6.2.1 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.1	Amazon SageMaker Spark SDK
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.1.0	Extra convenience libraries for the Hadoop ecosystem.

Component	Version	Description
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applications.
emr-notebook-env	1.0.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.16.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.0.0	EMR S3Select Connector
emrfs	2.44.0	Amazon S3 connector for Hadoop ecosystem applications.
flink-client	1.11.2	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.11.2	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applications along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.

Component	Version	Description
hadoop-client	3.2.1-amzn-2.1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-2.1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-2.1	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-2.1	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.2.1-amzn-2.1	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-2.1	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.2.1-amzn-2.1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-2.1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-2.1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-2.1	YARN service for allocatin g and managing cluster resources and distributed applications.

Component	Version	Description
hadoop-yarn-timeline-server	3.2.1-amzn-2.1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.2.6-amzn-0	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.2.6-amzn-0	Service for serving one or more HBase regions.
hbase-client	2.2.6-amzn-0	HBase command-line client.
hbase-rest-server	2.2.6-amzn-0	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.2.6-amzn-0	Service providing a Thrift endpoint to HBase.
hcatalog-client	3.1.2-amzn-3	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.2-amzn-3	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.2-amzn-3	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.2-amzn-3	Hive command line client.
hive-hbase	3.1.2-amzn-3	Hive-hbase client.

Component	Version	Description
hive-metastore-server	3.1.2-amzn-3	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.2-amzn-3	Service for accepting Hive queries as web requests.
hudi	0.6.0-amzn-1	Incremental processing framework to power data pipline at low latency and high efficiency.
hudi-presto	0.6.0-amzn-1	Bundle library for running Presto with Hudi.
hudi-prestosql	0.6.0-amzn-1	Bundle library for running PrestoSQL with Hudi.
hudi-spark	0.6.0-amzn-1	Bundle library for running Spark with Hudi.
hue-server	4.8.0	Web application for analyzing data using Hadoop ecosystem applications
jupyterhub	1.1.0	Multi-user server for Jupyter notebooks
livy-server	0.7.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server

Component	Version	Description
mxnet	1.7.0	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.64+	MariaDB database server.
nvidia-cuda	10.1.243	Nvidia drivers and Cuda toolkit
oozie-client	5.2.0	Oozie command-line client.
oozie-server	5.2.0	Service for accepting Oozie workflow requests.
opencv	4.4.0	Open Source Computer Vision Library.
phoenix-library	5.0.0-HBase-2.0	The phoenix libraries for server and client
phoenix-query-server	5.0.0-HBase-2.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.238.3-amzn-1	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.238.3-amzn-1	Service for executing pieces of a query.

Component	Version	Description
presto-client	0.238.3-amzn-1	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
prestosql-coordinator	343	Service for accepting queries and managing query execution among prestosql-workers.
prestosql-worker	343	Service for executing pieces of a query.
prestosql-client	343	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
pig-client	0.17.0	Pig command-line client.
r	3.4.3	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.0.1-amzn-0.1	Spark command-line clients.
spark-history-server	3.0.1-amzn-0.1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.0.1-amzn-0.1	In-memory execution engine for YARN.

Component	Version	Description
spark-yarn-slave	3.0.1-amzn-0.1	Apache Spark libraries needed by YARN slaves.
spark-rapids	0.2.0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.3.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.9.0-preview1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.4.14	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.4.14	ZooKeeper command line client.

6.2.1 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.2.1 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Not available.
flink-log4j	Change Flink log4j.properties settings.	Not available.
flink-log4j-yarn-session	Change Flink log4j-yarn-session.properties settings.	Not available.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Not available.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS ZKFC.

Classifications	Description	Reconfiguration Actions
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.

Classifications	Description	Reconfiguration Actions
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j	Change Livy log4j.properties settings.	Restarts Livy Server.

Classifications	Description	Reconfiguration Actions
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hb ase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServe r.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.pro perties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
prestosql-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-password-authenticator	Change values in Presto's password-authenticator.properties file.	Restarts Presto-Server (for PrestoSQL)

Classifications	Description	Reconfiguration Actions
prestosql-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoSQL)
prestosql-node	Change values in PrestoSQL's node.properties file.	Not available.
prestosql-connector-blackhole	Change values in PrestoSQL's blackhole.properties file.	Not available.
prestosql-connector-cassandra	Change values in PrestoSQL's cassandra.properties file.	Not available.
prestosql-connector-hive	Change values in PrestoSQL's hive.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-connector-jmx	Change values in PrestoSQL's jmx.properties file.	Not available.
prestosql-connector-kafka	Change values in PrestoSQL's kafka.properties file.	Not available.
prestosql-connector-localfile	Change values in PrestoSQL's localfile.properties file.	Not available.
prestosql-connector-memory	Change values in PrestoSQL's memory.properties file.	Not available.
prestosql-connector-mongodb	Change values in PrestoSQL's mongodb.properties file.	Not available.
prestosql-connector-mysql	Change values in PrestoSQL's mysql.properties file.	Not available.
prestosql-connector-postgresql	Change values in PrestoSQL's postgresql.properties file.	Not available.
prestosql-connector-raptor	Change values in PrestoSQL's raptor.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
prestosql-connector-redis	Change values in PrestoSQL's redis.properties file.	Not available.
prestosql-connector-redshift	Change values in PrestoSQL's redshift.properties file.	Not available.
prestosql-connector-tpch	Change values in PrestoSQL's tpch.properties file.	Not available.
prestosql-connector-tpcds	Change values in PrestoSQL's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-log4j	Change values in kms-log4j .properties file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.

Classifications	Description	Reconfiguration Actions
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j	Change values in Spark's log4j.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie.
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts MapReduce -HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Livy Server and MapReduce-HistoryS erver.

Classifications	Description	Reconfiguration Actions
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

Amazon EMR release 6.2.0

6.2.0 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Trino (PrestoSQL), Spark, Sqoop, TensorFlow, Tez, Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.2.0 release notes

The following release notes include information for Amazon EMR release 6.2.0. Changes are relative to 6.1.0.

Initial release date: Dec 09, 2020

Last updated date: Oct 04, 2021

Supported applications

- AWS SDK for Java version 1.11.828
- emr-record-server version 1.7.0
- Flink version 1.11.2
- Ganglia version 3.7.2
- Hadoop version 3.2.1-amzn-1
- HBase version 2.2.6-amzn-0
- HBase-operator-tools 1.0.0
- HCatalog version 3.1.2-amzn-0
- Hive version 3.1.2-amzn-3
- Hudi version 0.6.0-amzn-1
- Hue version 4.8.0
- JupyterHub version 1.1.0
- Livy version 0.7.0
- MXNet version 1.7.0
- Oozie version 5.2.0
- Phoenix version 5.0.0
- Pig version 0.17.0
- Presto version 0.238.3-amzn-1
- PrestoSQL version 343
- Spark version 3.0.1-amzn-0
- spark-rapids 0.2.0
- TensorFlow version 2.3.1
- Zeppelin version 0.9.0-preview1
- Zookeeper version 3.4.14
- Connectors and drivers: DynamoDB Connector 4.16.0

New features

- HBase: Removed rename in commit phase and added persistent HFile tracking. See Persistent HFile Tracking in the *Amazon EMR Release Guide*.

- HBase: Backported Create a config that forces to cache blocks on compaction.
- PrestoDB: Improvements to Dynamic Partition Pruning. Rule-based Join Reorder works on non-partitioned data.
- Scoped managed policies: To align with AWS best practices, Amazon EMR has introduced v2 EMR-scoped default managed policies as replacements for policies that will be deprecated. See Amazon EMR Managed Policies.
- Instance Metadata Service (IMDS) V2 support status: For Amazon EMR 6.2 or later, Amazon EMR components use IMDSv2 for all IMDS calls. For IMDS calls in your application code, you can use both IMDSv1 and IMDSv2, or configure the IMDS to use only IMDSv2 for added security. If you disable IMDSv1 in earlier Amazon EMR 6.x releases, it causes cluster startup failure.

Changes, enhancements, and resolved issues

- This is a release to fix issues with Amazon EMR Scaling when it fails to scale up/scale down a cluster successfully or causes application failures.
- Fixed an issue where scaling requests failed for a large, highly utilized cluster when Amazon EMR on-cluster daemons were running health checking activities, such as gathering YARN node state and HDFS node state. This was happening because on-cluster daemons were not able to communicate the health status data of a node to internal Amazon EMR components.
- Improved EMR on-cluster daemons to correctly track the node states when IP addresses are reused to improve reliability during scaling operations.
- SPARK-29683. Fixed an issue where job failures occurred during cluster scale-down as Spark was assuming all available nodes were deny-listed.
- YARN-9011. Fixed an issue where job failures occurred due to a race condition in YARN decommissioning when cluster tried to scale up or down.
- Fixed issue with step or job failures during cluster scaling by ensuring that the node states are always consistent between the Amazon EMR on-cluster daemons and YARN/HDFS.
- Fixed an issue where cluster operations such as scale down and step submission failed for Amazon EMR clusters enabled with Kerberos authentication. This was because the Amazon EMR on-cluster daemon did not renew the Kerberos ticket, which is required to securely communicate with HDFS/YARN running on the primary node.
- Newer Amazon EMR releases fix the issue with a lower "Max open files" limit on older AL2 in Amazon EMR. Amazon EMR releases 5.30.1, 5.30.2, 5.31.1, 5.32.1, 6.0.1, 6.1.1, 6.2.1, 5.33.0, 6.3.0 and later now include a permanent fix with a higher "Max open files" setting.

- Spark: Performance improvements in Spark runtime.

Known issues

- Amazon EMR 6.2 has incorrect permissions set on the /etc/cron.d/libinstance-controller-java file in EMR 6.2.0. Permissions on the file are 645 (-rw-r--r-x), when they should be 644 (-rw-r--r--). As a result, Amazon EMR version 6.2 does not log instance-state logs, and the /emr/instance-logs directory is empty. This issue is fixed in Amazon EMR 6.3.0 and later.

  To work around this issue, run the following script as a bootstrap action at cluster launch.

  ```
  #!/bin/bash
  sudo chmod 644 /etc/cron.d/libinstance-controller-java
  ```

- For Amazon EMR 6.2.0 and 6.3.0 private subnet clusters, you cannot access the Ganglia web UI. You will get an "access denied (403)" error. Other web UIs, such as Spark, Hue, JupyterHub, Zeppelin, Livy, and Tez are working normally. Ganglia web UI access on public subnet clusters are also working normally. To resolve this issue, restart httpd service on the primary node with `sudo systemctl restart httpd`. This issue is fixed in Amazon EMR 6.4.0.
- There is an issue in Amazon EMR 6.2.0 where httpd continuously fails, causing Ganglia to be unavailable. You get a "cannot connect to the server" error. To fix a cluster that is already running with this issue, SSH to the cluster primary node and add the line `Listen 80` to the file `httpd.conf` located at `/etc/httpd/conf/httpd.conf`. This issue is fixed in Amazon EMR 6.3.0.
- HTTPD fails on EMR 6.2.0 clusters when you use a security configuration. This makes the Ganglia web application user interface unavailable. To access the Ganglia web application user interface, add `Listen 80` to the `/etc/httpd/conf/httpd.conf` file on the primary node of your cluster. For information about connecting to your cluster, see Connect to the Primary Node Using SSH.

  EMR Notebooks also fail to establish a connection with EMR 6.2.0 clusters when you use a security configuration. The notebook will fail to list kernels and submit Spark jobs. We recommend that you use EMR Notebooks with another version of Amazon EMR instead.
- **Lower "Max open files" limit on older AL2 [fixed in newer releases].** Amazon EMR releases: emr-5.30.x, emr-5.31.0, emr-5.32.0, emr-6.0.0, emr-6.1.0, and emr-6.2.0 are based on older versions ofAmazon Linux 2 (AL2), which have a lower ulimit setting for "Max open files" when

Amazon EMR clusters are created with the default AMI. Amazon EMR releases 5.30.1, 5.30.2, 5.31.1, 5.32.1, 6.0.1, 6.1.1, 6.2.1, 5.33.0, 6.3.0 and later include a permanent fix with a higher "Max open files" setting. Releases with the lower open file limit causes a "Too many open files" error when submitting Spark job. In the impacted releases, the Amazon EMR default AMI has a default ulimit setting of 4096 for "Max open files," which is lower than the 65536 file limit in the latestAmazon Linux 2 AMI. The lower ulimit setting for "Max open files" causes Spark job failure when the Spark driver and executor try to open more than 4096 files. To fix the issue, Amazon EMR has a bootstrap action (BA) script that adjusts the ulimit setting at cluster creation.

If you are using an older Amazon EMR version that doesn't have the permanent fix for this issue, the following workaround lets you to explicitly set the instance-controller ulimit to a maximum of 65536 files.

Explicitly set a ulimit from the command line

1. Edit `/etc/systemd/system/instance-controller.service` to add the following parameters to Service section.

   ```
   LimitNOFILE=65536

   LimitNPROC=65536
   ```

2. Restart InstanceController

   ```
   $ sudo systemctl daemon-reload

   $ sudo systemctl restart instance-controller
   ```

Set a ulimit using bootstrap action (BA)

You can also use a bootstrap action (BA) script to configure the instance-controller ulimit to 65536 files at cluster creation.

```
#!/bin/bash
for user in hadoop spark hive; do
sudo tee /etc/security/limits.d/$user.conf << EOF
$user - nofile 65536
$user - nproc 65536
EOF
done
for proc in instancecontroller logpusher; do
```

```
sudo mkdir -p /etc/systemd/system/$proc.service.d/
sudo tee /etc/systemd/system/$proc.service.d/override.conf << EOF
[Service]
LimitNOFILE=65536
LimitNPROC=65536
EOF
pid=$(pgrep -f aws157.$proc.Main)
sudo prlimit --pid $pid --nofile=65535:65535 --nproc=65535:65535
done
sudo systemctl daemon-reload
```

- **Important**

  Amazon EMR 6.1.0 and 6.2.0 include a performance issue that can critically affect all Hudi insert, upsert, and delete operations. If you plan to use Hudi with Amazon EMR 6.1.0 or 6.2.0, you should contact AWS support to obtain a patched Hudi RPM.

- **Important**

  EMR clusters that run Amazon Linux or Amazon Linux 2 Amazon Machine Images (AMIs) use default Amazon Linux behavior, and do not automatically download and install important and critical kernel updates that require a reboot. This is the same behavior as other Amazon EC2 instances that run the default Amazon Linux AMI. If new Amazon Linux software updates that require a reboot (such as kernel, NVIDIA, and CUDA updates) become available after an Amazon EMR release becomes available, EMR cluster instances that run the default AMI do not automatically download and install those updates. To get kernel updates, you can customize your Amazon EMR AMI to use the latest Amazon Linux AMI.

- Amazon EMR 6.2.0 Maven artifacts are not published. They will be published with a future release of Amazon EMR.
- Persistent HFile tracking using the HBase storefile system table does not support the HBase region replication feature. For more information about HBase region replication, see Timeline-consistent High Available Reads.
- Amazon EMR 6.x and EMR 5.x Hive bucketing version differences

  EMR 5.x uses OOS Apache Hive 2, while in EMR 6.x uses OOS Apache Hive 3. The open source Hive2 uses Bucketing version 1, while open source Hive3 uses Bucketing version 2. This bucketing

version difference between Hive 2 (EMR 5.x) and Hive 3 (EMR 6.x) means Hive bucketing hashing functions differently. See the example below.

The following table is an example created in EMR 6.x and EMR 5.x, respectively.

```
-- Using following LOCATION in EMR 6.x
CREATE TABLE test_bucketing (id INT, desc STRING)
PARTITIONED BY (day STRING)
CLUSTERED BY(id) INTO 128 BUCKETS
LOCATION 's3://your-own-s3-bucket/emr-6-bucketing/';

-- Using following LOCATION in EMR 5.x
LOCATION 's3://your-own-s3-bucket/emr-5-bucketing/';
```

Inserting the same data in both EMR 6.x and EMR 5.x.

```
INSERT INTO test_bucketing PARTITION (day='01') VALUES(66, 'some_data');
INSERT INTO test_bucketing PARTITION (day='01') VALUES(200, 'some_data');
```

Checking the S3 location, shows the bucketing file name is different, because the hashing function is different between EMR 6.x (Hive 3) and EMR 5.x (Hive 2).

```
[hadoop@ip-10-0-0-122 ~]$ aws s3 ls s3://your-own-s3-bucket/emr-6-bucketing/day=01/
2020-10-21 20:35:16         13 000025_0
2020-10-21 20:35:22         14 000121_0
[hadoop@ip-10-0-0-122 ~]$ aws s3 ls s3://your-own-s3-bucket/emr-5-bucketing/day=01/
2020-10-21 20:32:07         13 000066_0
2020-10-21 20:32:51         14 000072_0
```

You can also see the version difference by running the following command in Hive CLI in EMR 6.x. Note that it returns bucketing version 2.

```
hive> DESCRIBE FORMATTED test_bucketing;
...
Table Parameters:
    bucketing_version       2
...
```

- Known issue in clusters with multiple primary nodes and Kerberos authentication

If you run clusters with multiple primary nodes and Kerberos authentication in Amazon EMR releases 5.20.0 and later, you may encounter problems with cluster operations such as scale down or step submission, after the cluster has been running for some time. The time period depends on the Kerberos ticket validity period that you defined. The scale-down problem impacts both automatic scale-down and explicit scale down requests that you submitted. Additional cluster operations can also be impacted.

Workaround:

- SSH as hadoop user to the lead primary node of the EMR cluster with multiple primary nodes.
- Run the following command to renew Kerberos ticket for hadoop user.

```
kinit -kt <keytab_file> <principal>
```

Typically, the keytab file is located at `/etc/hadoop.keytab` and the principal is in the form of `hadoop/<hostname>@<REALM>`.

> **Note**
>
> This workaround will be effective for the time period the Kerberos ticket is valid. This duration is 10 hours by default, but can configured by your Kerberos settings. You must re-run the above command once the Kerberos ticket expires.

- When you use Spark with Hive partition location formatting to read data in Amazon S3, and you run Spark on Amazon EMR releases 5.30.0 to 5.36.0, and 6.2.0 to 6.9.0, you might encounter an issue that prevents your cluster from reading data correctly. This can happen if your partitions have all of the following characteristics:
  - Two or more partitions are scanned from the same table.
  - At least one partition directory path is a prefix of at least one other partition directory path, for example, `s3://bucket/table/p=a` is a prefix of `s3://bucket/table/p=a b`.
  - The first character that follows the prefix in the other partition directory has a UTF-8 value that's less than than the / character (U+002F). For example, the space character (U+0020) that occurs between a and b in `s3://bucket/table/p=a b` falls into this category. Note that there are 14 other non-control characters: `!"#$%&'()*+,-`. For more information, see UTF-8 encoding table and Unicode characters.

As a workaround to this issue, set the `spark.sql.sources.fastS3PartitionDiscovery.enabled` configuration to `false` in the `spark-defaults` classification.

6.2.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.1	Amazon SageMaker Spark SDK
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.1.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.0.0	Conda env for emr notebook which includes jupyter enterprise gateway

Component	Version	Description
emr-s3-dist-cp	2.16.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.0.0	EMR S3Select Connector
emrfs	2.44.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.11.2	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.11.2	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.2.1-amzn-2	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-2	HDFS node-level service for storing blocks.

Component	Version	Description
hadoop-hdfs-library	3.2.1-amzn-2	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-2	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.2.1-amzn-2	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-2	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.2.1-amzn-2	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-2	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-2	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-2	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.2.1-amzn-2	Service for retrieving current and historical information for YARN applications.

Component	Version	Description
hbase-hmaster	2.2.6-amzn-0	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.2.6-amzn-0	Service for serving one or more HBase regions.
hbase-client	2.2.6-amzn-0	HBase command-line client.
hbase-rest-server	2.2.6-amzn-0	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.2.6-amzn-0	Service providing a Thrift endpoint to HBase.
hcatalog-client	3.1.2-amzn-3	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.2-amzn-3	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.2-amzn-3	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.2-amzn-3	Hive command line client.
hive-hbase	3.1.2-amzn-3	Hive-hbase client.
hive-metastore-server	3.1.2-amzn-3	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.

Component	Version	Description
hive-server2	3.1.2-amzn-3	Service for accepting Hive queries as web requests.
hudi	0.6.0-amzn-1	Incremental processing framework to power data pipline at low latency and high efficiency.
hudi-presto	0.6.0-amzn-1	Bundle library for running Presto with Hudi.
hudi-prestosql	0.6.0-amzn-1	Bundle library for running PrestoSQL with Hudi.
hudi-spark	0.6.0-amzn-1	Bundle library for running Spark with Hudi.
hue-server	4.8.0	Web application for analyzing data using Hadoop ecosystem applications
jupyterhub	1.1.0	Multi-user server for Jupyter notebooks
livy-server	0.7.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.7.0	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.64+	MariaDB database server.

Component	Version	Description
nvidia-cuda	10.1.243	Nvidia drivers and Cuda toolkit
oozie-client	5.2.0	Oozie command-line client.
oozie-server	5.2.0	Service for accepting Oozie workflow requests.
opencv	4.4.0	Open Source Computer Vision Library.
phoenix-library	5.0.0-HBase-2.0	The phoenix libraries for server and client
phoenix-query-server	5.0.0-HBase-2.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.238.3-amzn-1	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.238.3-amzn-1	Service for executing pieces of a query.
presto-client	0.238.3-amzn-1	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.

Component	Version	Description
prestosql-coordinator	343	Service for accepting queries and managing query execution among prestosql-workers.
prestosql-worker	343	Service for executing pieces of a query.
prestosql-client	343	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
pig-client	0.17.0	Pig command-line client.
r	3.4.3	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.0.1-amzn-0	Spark command-line clients.
spark-history-server	3.0.1-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.0.1-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.0.1-amzn-0	Apache Spark libraries needed by YARN slaves.
spark-rapids	0.2.0	Nvidia Spark RAPIDS plugin that accelerates Apache Spark with GPUs.

Component	Version	Description
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.3.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.9.0-preview1	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.4.14	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.4.14	ZooKeeper command line client.

6.2.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-6.2.0 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN

Classifications	Description	Reconfiguration Actions
		services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts HBaseRegionserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Not available.
flink-log4j	Change Flink log4j.properties settings.	Not available.
flink-log4j-yarn-session	Change Flink log4j-yarn-session.properties settings.	Not available.
flink-log4j-cli	Change Flink log4j-cli.properties settings.	Not available.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts PhoenixQueryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Secondary Namenode, Datanode, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.

Classifications	Description	Reconfiguration Actions
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	This classification should not be reconfigured.
hdfs-env	Change values in the HDFS environment.	Restarts Hadoop HDFS ZKFC.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat server.

Classifications	Description	Reconfiguration Actions
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat server.
hive	Amazon EMR-curated settings for Apache Hive.	Sets configurations to launch Hive LLAP service.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Not available.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2, HiveMetastore, and Hive HCatalog-Server. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.

Classifications	Description	Reconfiguration Actions
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.
hudi-env	Change values in the Hudi environment.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.

Classifications	Description	Reconfiguration Actions
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j	Change Livy log4j.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoDB)
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoDB)
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoDB)
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server (for PrestoDB)
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
prestosql-log	Change values in Presto's log.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-config	Change values in Presto's config.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-password-authenticator	Change values in Presto's password-authenticator.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server (for PrestoSQL)
prestosql-node	Change values in PrestoSQL's node.properties file.	Not available.
prestosql-connector-blackhole	Change values in PrestoSQL's blackhole.properties file.	Not available.
prestosql-connector-cassandra	Change values in PrestoSQL's cassandra.properties file.	Not available.
prestosql-connector-hive	Change values in PrestoSQL's hive.properties file.	Restarts Presto-Server (for PrestoSQL)
prestosql-connector-jmx	Change values in PrestoSQL's jmx.properties file.	Not available.
prestosql-connector-kafka	Change values in PrestoSQL's kafka.properties file.	Not available.
prestosql-connector-localfile	Change values in PrestoSQL's localfile.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
prestosql-connector-memory	Change values in PrestoSQL's memory.properties file.	Not available.
prestosql-connector-mongodb	Change values in PrestoSQL's mongodb.properties file.	Not available.
prestosql-connector-mysql	Change values in PrestoSQL's mysql.properties file.	Not available.
prestosql-connector-postgresql	Change values in PrestoSQL's postgresql.properties file.	Not available.
prestosql-connector-raptor	Change values in PrestoSQL's raptor.properties file.	Not available.
prestosql-connector-redis	Change values in PrestoSQL's redis.properties file.	Not available.
prestosql-connector-redshift	Change values in PrestoSQL's redshift.properties file.	Not available.
prestosql-connector-tpch	Change values in PrestoSQL's tpch.properties file.	Not available.
prestosql-connector-tpcds	Change values in PrestoSQL's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.

Classifications	Description	Reconfiguration Actions
ranger-kms-log4j	Change values in kms-log4j .properties file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j	Change values in Spark's log4j.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restart Oozie.

Classifications	Description	Reconfiguration Actions
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

Amazon EMR release 6.1.1

6.1.1 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Trino (PrestoSQL), Spark, Sqoop, TensorFlow, Tez, Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.1.1 release notes

This is a release to fix issues with Amazon EMR Scaling when it fails to scale up/scale down a cluster successfully or causes application failures.

Changes, Enhancements, and Resolved Issues

- Fixed an issue where scaling requests failed for a large, highly utilized cluster when Amazon EMR on-cluster daemons were running health checking activities, such as gathering YARN node state and HDFS node state. This was happening because on-cluster daemons were not able to communicate the health status data of a node to internal Amazon EMR components.
- Improved EMR on-cluster daemons to correctly track the node states when IP addresses are reused to improve reliability during scaling operations.
- SPARK-29683. Fixed an issue where job failures occurred during cluster scale-down as Spark was assuming all available nodes were deny-listed.
- YARN-9011. Fixed an issue where job failures occurred due to a race condition in YARN decommissioning when cluster tried to scale up or down.
- Fixed issue with step or job failures during cluster scaling by ensuring that the node states are always consistent between the Amazon EMR on-cluster daemons and YARN/HDFS.
- Fixed an issue where cluster operations such as scale down and step submission failed for Amazon EMR clusters enabled with Kerberos authentication. This was because the Amazon EMR on-cluster daemon did not renew the Kerberos ticket, which is required to securely communicate with HDFS/YARN running on the primary node.
- Newer Amazon EMR releases fix the issue with a lower "Max open files" limit on older AL2 in Amazon EMR. Amazon EMR releases 5.30.1, 5.30.2, 5.31.1, 5.32.1, 6.0.1, 6.1.1, 6.2.1, 5.33.0, 6.3.0 and later now include a permanent fix with a higher "Max open files" setting.
- HTTPS is now enabled by default for Amazon Linux repositories. If you are using an Amazon S3 VPCE policy to restrict access to specific buckets, you must add the new Amazon Linux

bucket ARN `arn:aws:s3:::amazonlinux-2-repos-$region/*` to your policy (replace `$region` with the region where the endpoint is). For more information, see this topic in the AWS discussion forums. Announcement: Amazon Linux 2 now supports the ability to use HTTPS while connecting to package repositories .

6.1.1 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.3.0	Amazon SageMaker Spark SDK
emr-ddb	4.14.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.1.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-s3-dist-cp	2.14.0	Distributed copy application optimized for Amazon S3.

Component	Version	Description
emr-s3-select	2.0.0	EMR S3Select Connector
emrfs	2.42.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.11.0	Apache Flink command line client scripts and applications.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.2.1-amzn-1.1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-1.1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-1.1	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-1.1	HDFS service for tracking file names and block locations.

Component	Version	Description
hadoop-hdfs-journalnode	3.2.1-amzn-1.1	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-1.1	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.2.1-amzn-1.1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-1.1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-1.1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-1.1	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.2.1-amzn-1.1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.2.5	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.2.5	Service for serving one or more HBase regions.
hbase-client	2.2.5	HBase command-line client.

Component	Version	Description
hbase-rest-server	2.2.5	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.2.5	Service providing a Thrift endpoint to HBase.
hcatalog-client	3.1.2-amzn-2	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.2-amzn-2	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.2-amzn-2	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.2-amzn-2	Hive command line client.
hive-hbase	3.1.2-amzn-2	Hive-hbase client.
hive-metastore-server	3.1.2-amzn-2	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.2-amzn-2	Service for accepting Hive queries as web requests.
hudi	0.5.2-incubating-amzn-2	Incremental processing framework to power data pipline at low latency and high efficiency.

Component	Version	Description
hudi-presto	0.5.2-incubating-amzn-2	Bundle library for running Presto with Hudi.
hudi-prestosql	0.5.2-incubating-amzn-2	Bundle library for running PrestoSQL with Hudi.
hudi-spark	0.5.2-incubating-amzn-2	Bundle library for running Spark with Hudi.
hue-server	4.7.1	Web application for analyzing data using Hadoop ecosystem applications
jupyterhub	1.1.0	Multi-user server for Jupyter notebooks
livy-server	0.7.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.6.0	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.64+	MariaDB database server.
nvidia-cuda	9.2.88	Nvidia drivers and Cuda toolkit
oozie-client	5.2.0	Oozie command-line client.
oozie-server	5.2.0	Service for accepting Oozie workflow requests.
opencv	4.3.0	Open Source Computer Vision Library.

Component	Version	Description
phoenix-library	5.0.0-HBase-2.0	The phoenix libraries for server and client
phoenix-query-server	5.0.0-HBase-2.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.232	Service for accepting queries and managing query execution among presto-wo rkers.
presto-worker	0.232	Service for executing pieces of a query.
presto-client	0.232	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
prestosql-coordinator	338	Service for accepting queries and managing query execution among prestosql-workers.
prestosql-worker	338	Service for executing pieces of a query.
prestosql-client	338	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.

Component	Version	Description
pig-client	0.17.0	Pig command-line client.
r	3.4.3	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.0.0-amzn-0.1	Spark command-line clients.
spark-history-server	3.0.0-amzn-0.1	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.0.0-amzn-0.1	In-memory execution engine for YARN.
spark-yarn-slave	3.0.0-amzn-0.1	Apache Spark libraries needed by YARN slaves.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.1.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.9.0-preview1	Web-based notebook that enables interactive data analytics.

Component	Version	Description
zookeeper-server	3.4.14	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.4.14	ZooKeeper command line client.

6.1.1 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

emr-6.1.1 classifications

Classifications	Description
capacity-scheduler	Change values in Hadoop's capacity-scheduler .xml file.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.
core-site	Change values in Hadoop's core-site.xml file.
emrfs-site	Change EMRFS settings.
flink-conf	Change flink-conf.yaml settings.
flink-log4j	Change Flink log4j.properties settings.

Classifications	Description
flink-log4j-yarn-session	Change Flink log4j-yarn-session.properties settings.
flink-log4j-cli	Change Flink log4j-cli.properties settings.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.
hadoop-log4j	Change values in Hadoop's log4j.properties file.
hadoop-ssl-server	Change hadoop ssl server configuration
hadoop-ssl-client	Change hadoop ssl client configuration
hbase	Amazon EMR-curated settings for Apache HBase.
hbase-env	Change values in HBase's environment.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.
hbase-metrics	Change values in HBase's hadoop-metrics2-hbase.properties file.
hbase-policy	Change values in HBase's hbase-policy.xml file.
hbase-site	Change values in HBase's hbase-site.xml file.
hdfs-encryption-zones	Configure HDFS encryption zones.
hdfs-env	Change values in the HDFS environment.
hdfs-site	Change values in HDFS's hdfs-site.xml.
hcatalog-env	Change values in HCatalog's environment.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.

Classifications	Description
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.
hive	Amazon EMR-curated settings for Apache Hive.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.
hive-env	Change values in the Hive environment.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.
hive-site	Change values in Hive's hive-site.xml file
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file
hue-ini	Change values in Hue's ini file

Classifications	Description
httpfs-env	Change values in the HTTPFS environment.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.
hadoop-kms-env	Change values in the Hadoop KMS environment.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.
hudi-env	Change values in the Hudi environment.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.
livy-conf	Change values in Livy's livy.conf file.
livy-env	Change values in the Livy environment.
livy-log4j	Change Livy log4j.properties settings.
mapred-env	Change values in the MapReduce application's environment.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.
oozie-env	Change values in Oozie's environment.

Classifications	Description
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.
oozie-site	Change values in Oozie's oozie-site.xml file.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.
phoenix-log4j	Change values in Phoenix's log4j.properties file.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.
pig-env	Change values in the Pig environment.
pig-properties	Change values in Pig's pig.properties file.
pig-log4j	Change values in Pig's log4j.properties file.
presto-log	Change values in Presto's log.properties file.
presto-config	Change values in Presto's config.properties file.
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.
presto-env	Change values in Presto's presto-env.sh file.
presto-node	Change values in Presto's node.properties file.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.

Classifications	Description
presto-connector-hive	Change values in Presto's hive.properties file.
presto-connector-jmx	Change values in Presto's jmx.properties file.
presto-connector-kafka	Change values in Presto's kafka.properties file.
presto-connector-localfile	Change values in Presto's localfile.properties file.
presto-connector-memory	Change values in Presto's memory.properties file.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.
presto-connector-mysql	Change values in Presto's mysql.properties file.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.
presto-connector-raptor	Change values in Presto's raptor.properties file.
presto-connector-redis	Change values in Presto's redis.properties file.
presto-connector-redshift	Change values in Presto's redshift.properties file.
presto-connector-tpch	Change values in Presto's tpch.properties file.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.
prestosql-log	Change values in Presto's log.properties file.
prestosql-config	Change values in Presto's config.properties file.
prestosql-password-authenticator	Change values in Presto's password-authenticator.properties file.

Classifications	Description
prestosql-env	Change values in Presto's presto-env.sh file.
prestosql-node	Change values in PrestoSQL's node.properties file.
prestosql-connector-blackhole	Change values in PrestoSQL's blackhole .properties file.
prestosql-connector-cassandra	Change values in PrestoSQL's cassandra .properties file.
prestosql-connector-hive	Change values in PrestoSQL's hive.properties file.
prestosql-connector-jmx	Change values in PrestoSQL's jmx.properties file.
prestosql-connector-kafka	Change values in PrestoSQL's kafka.properties file.
prestosql-connector-localfile	Change values in PrestoSQL's localfile.properti es file.
prestosql-connector-memory	Change values in PrestoSQL's memory.pr operties file.
prestosql-connector-mongodb	Change values in PrestoSQL's mongodb.p roperties file.
prestosql-connector-mysql	Change values in PrestoSQL's mysql.properties file.
prestosql-connector-postgresql	Change values in PrestoSQL's postgresq l.properties file.
prestosql-connector-raptor	Change values in PrestoSQL's raptor.pr operties file.

Classifications	Description
prestosql-connector-redis	Change values in PrestoSQL's redis.properties file.
prestosql-connector-redshift	Change values in PrestoSQL's redshift. properties file.
prestosql-connector-tpch	Change values in PrestoSQL's tpch.properties file.
prestosql-connector-tpcds	Change values in PrestoSQL's tpcds.properties file.
ranger-kms-dbks-site	Change values in dbks-site.xml file of Ranger KMS.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.
ranger-kms-env	Change values in the Ranger KMS environme nt.
ranger-kms-log4j	Change values in kms-log4j.properties file of Ranger KMS.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.
spark	Amazon EMR-curated settings for Apache Spark.
spark-defaults	Change values in Spark's spark-defaults.conf file.
spark-env	Change values in the Spark environment.
spark-hive-site	Change values in Spark's hive-site.xml file
spark-log4j	Change values in Spark's log4j.properties file.

Classifications	Description
spark-metrics	Change values in Spark's metrics.properties file.
sqoop-env	Change values in Sqoop's environment.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.
tez-site	Change values in Tez's tez-site.xml file.
yarn-env	Change values in the YARN environment.
yarn-site	Change values in YARN's yarn-site.xml file.
zeppelin-env	Change values in the Zeppelin environment.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.

Amazon EMR release 6.1.0

6.1.0 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, JupyterHub, Livy, MXNet, Oozie, Phoenix, Pig, Presto, Trino (PrestoSQL), Spark, Sqoop, TensorFlow, Tez, Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases

- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.1.0 release notes

The following release notes include information for Amazon EMR release 6.1.0. Changes are relative to 6.0.0.

Initial release date: Sept 04, 2020

Last updated date: Oct 15, 2020

Supported applications

- AWS SDK for Java version 1.11.828
- Flink version 1.11.0
- Ganglia version 3.7.2
- Hadoop version 3.2.1-amzn-1
- HBase version 2.2.5
- HBase-operator-tools 1.0.0
- HCatalog version 3.1.2-amzn-0
- Hive version 3.1.2-amzn-1
- Hudi version 0.5.2-incubating
- Hue version 4.7.1
- JupyterHub version 1.1.0
- Livy version 0.7.0
- MXNet version 1.6.0
- Oozie version 5.2.0
- Phoenix version 5.0.0
- Presto version 0.232
- PrestoSQL version 338
- Spark version 3.0.0-amzn-0
- TensorFlow version 2.1.0

- Zeppelin version 0.9.0-preview1
- Zookeeper version 3.4.14
- Connectors and drivers: DynamoDB Connector 4.14.0

New features

- ARM instance types are supported starting with Amazon EMR version 5.30.0 and Amazon EMR version 6.1.0.
- M6g general purpose instance types are supported starting with Amazon EMR versions 6.1.0 and 5.30.0. For more information, see Supported Instance Types in the *Amazon EMR Management Guide*.
- The EC2 placement group feature is supported starting with Amazon EMR version 5.23.0 as an option for multiple primary node clusters. Currently, only primary node types are supported by the placement group feature, and the SPREAD strategy is applied to those primary nodes. The SPREAD strategy places a small group of instances across separate underlying hardware to guard against the loss of multiple primary nodes in the event of a hardware failure. For more information, see EMR Integration with EC2 Placement Group in the *Amazon EMR Management Guide*.
- Managed Scaling – With Amazon EMR version 6.1.0, you can enable Amazon EMR managed scaling to automatically increase or decrease the number of instances or units in your cluster based on workload. Amazon EMR continuously evaluates cluster metrics to make scaling decisions that optimize your clusters for cost and speed. Managed Scaling is also available on Amazon EMR version 5.30.0 and later, except 6.0.0. For more information, see Scaling Cluster Resources in the *Amazon EMR Management Guide*.
- PrestoSQL version 338 is supported with EMR 6.1.0. For more information, see Presto.
  - PrestoSQL is supported on EMR 6.1.0 and later versions only, not on EMR 6.0.0 or EMR 5.x.
  - The application name, `Presto` continues to be used to install PrestoDB on clusters. To install PrestoSQL on clusters, use the application name `PrestoSQL`.
  - You can install either PrestoDB or PrestoSQL, but you cannot install both on a single cluster. If both PrestoDB and PrestoSQL are specified when attempting to create a cluster, a validation error occurs and the cluster creation request fails.
  - PrestoSQL is supported on both single-master and muti-master clusters. On multi-master clusters, an external Hive metastore is required to run PrestoSQL or PrestoDB. See Supported applications in an EMR cluster with multiple primary nodes.

- ECR auto authentication support on Apache Hadoop and Apache Spark with Docker: Spark users can use Docker images from Docker Hub and Amazon Elastic Container Registry (Amazon ECR) to define environment and library dependencies.

  Configure Docker and Run Spark Applications with Docker Using Amazon EMR 6.x.

- EMR supports Apache Hive ACID transactions: Amazon EMR 6.1.0 adds support for Hive ACID transactions so it complies with the ACID properties of a database. With this feature, you can run `INSERT, UPDATE, DELETE,` and `MERGE` operations in Hive managed tables with data in Amazon Simple Storage Service (Amazon S3). This is a key feature for use cases like streaming ingestion, data restatement, bulk updates using MERGE, and slowly changing dimensions. For more information, including configuration examples and use cases, see Amazon EMR supports Apache Hive ACID transactions.

Changes, enhancements, and resolved issues

- This is a release to fix issues with Amazon EMR Scaling when it fails to scale up/scale down a cluster successfully or causes application failures.
- Fixed an issue where scaling requests failed for a large, highly utilized cluster when Amazon EMR on-cluster daemons were running health checking activities, such as gathering YARN node state and HDFS node state. This was happening because on-cluster daemons were not able to communicate the health status data of a node to internal Amazon EMR components.
- Improved EMR on-cluster daemons to correctly track the node states when IP addresses are reused to improve reliability during scaling operations.
- SPARK-29683. Fixed an issue where job failures occurred during cluster scale-down as Spark was assuming all available nodes were deny-listed.
- YARN-9011. Fixed an issue where job failures occurred due to a race condition in YARN decommissioning when cluster tried to scale up or down.
- Fixed issue with step or job failures during cluster scaling by ensuring that the node states are always consistent between the Amazon EMR on-cluster daemons and YARN/HDFS.
- Fixed an issue where cluster operations such as scale down and step submission failed for Amazon EMR clusters enabled with Kerberos authentication. This was because the Amazon EMR on-cluster daemon did not renew the Kerberos ticket, which is required to securely communicate with HDFS/YARN running on the primary node.

- Newer Amazon EMR releases fix the issue with a lower "Max open files" limit on older AL2 in Amazon EMR. Amazon EMR releases 5.30.1, 5.30.2, 5.31.1, 5.32.1, 6.0.1, 6.1.1, 6.2.1, 5.33.0, 6.3.0 and later now include a permanent fix with a higher "Max open files" setting.
- Apache Flink is not supported on EMR 6.0.0, but it is supported on EMR 6.1.0 with Flink 1.11.0. This is the first version of Flink to officially support Hadoop 3. See Apache Flink 1.11.0 Release Announcement.
- Ganglia has been removed from default EMR 6.1.0 package bundles.

Known issues

- **Lower "Max open files" limit on older AL2 [fixed in newer releases].** Amazon EMR releases: emr-5.30.x, emr-5.31.0, emr-5.32.0, emr-6.0.0, emr-6.1.0, and emr-6.2.0 are based on older versions ofAmazon Linux 2 (AL2), which have a lower ulimit setting for "Max open files" when Amazon EMR clusters are created with the default AMI. Amazon EMR releases 5.30.1, 5.30.2, 5.31.1, 5.32.1, 6.0.1, 6.1.1, 6.2.1, 5.33.0, 6.3.0 and later include a permanent fix with a higher "Max open files" setting. Releases with the lower open file limit causes a "Too many open files" error when submitting Spark job. In the impacted releases, the Amazon EMR default AMI has a default ulimit setting of 4096 for "Max open files," which is lower than the 65536 file limit in the latestAmazon Linux 2 AMI. The lower ulimit setting for "Max open files" causes Spark job failure when the Spark driver and executor try to open more than 4096 files. To fix the issue, Amazon EMR has a bootstrap action (BA) script that adjusts the ulimit setting at cluster creation.

  If you are using an older Amazon EMR version that doesn't have the permanent fix for this issue, the following workaround lets you to explicitly set the instance-controller ulimit to a maximum of 65536 files.

  Explicitly set a ulimit from the command line

  1. Edit `/etc/systemd/system/instance-controller.service` to add the following parameters to Service section.

     ```
     LimitNOFILE=65536

     LimitNPROC=65536
     ```

  2. Restart InstanceController

     ```
     $ sudo systemctl daemon-reload
     ```

```
$ sudo systemctl restart instance-controller
```

Set a ulimit using bootstrap action (BA)

You can also use a bootstrap action (BA) script to configure the instance-controller ulimit to 65536 files at cluster creation.

```
#!/bin/bash
for user in hadoop spark hive; do
sudo tee /etc/security/limits.d/$user.conf << EOF
$user - nofile 65536
$user - nproc 65536
EOF
done
for proc in instancecontroller logpusher; do
sudo mkdir -p /etc/systemd/system/$proc.service.d/
sudo tee /etc/systemd/system/$proc.service.d/override.conf << EOF
[Service]
LimitNOFILE=65536
LimitNPROC=65536
EOF
pid=$(pgrep -f aws157.$proc.Main)
sudo prlimit --pid $pid --nofile=65535:65535 --nproc=65535:65535
done
sudo systemctl daemon-reload
```

- **Important**

  Amazon EMR 6.1.0 and 6.2.0 include a performance issue that can critically affect all Hudi insert, upsert, and delete operations. If you plan to use Hudi with Amazon EMR 6.1.0 or 6.2.0, you should contact AWS support to obtain a patched Hudi RPM.

- If you set custom garbage collection configuration with `spark.driver.extraJavaOptions` and `spark.executor.extraJavaOptions`, this will result in driver/executor launch failure with EMR 6.1 due to conflicting garbage collection configuration. With EMR Release 6.1.0, you should specify custom Spark garbage collection configuration for drivers and executors with the properties `spark.driver.defaultJavaOptions` and `spark.executor.defaultJavaOptions` instead. Read more in Apache Spark Runtime Environment and Configuring Spark Garbage Collection on Amazon EMR 6.1.0.

- Using Pig with Oozie (and within Hue, since Hue uses Oozie actions to run Pig scripts), generates an error that a native-lzo library cannot be loaded. This error message is informational and does not block Pig from running.
- Hudi Concurrency Support: Currently Hudi doesn't support concurrent writes to a single Hudi table. In addition, Hudi rolls back any changes being done by in-progress writers before allowing a new writer to start. Concurrent writes can interfere with this mechanism and introduce race conditions, which can lead to data corruption. You should ensure that as part of your data processing workflow, there is only a single Hudi writer operating against a Hudi table at any time. Hudi does support multiple concurrent readers operating against the same Hudi table.
- Known issue in clusters with multiple primary nodes and Kerberos authentication

  If you run clusters with multiple primary nodes and Kerberos authentication in Amazon EMR releases 5.20.0 and later, you may encounter problems with cluster operations such as scale down or step submission, after the cluster has been running for some time. The time period depends on the Kerberos ticket validity period that you defined. The scale-down problem impacts both automatic scale-down and explicit scale down requests that you submitted. Additional cluster operations can also be impacted.

  Workaround:

  - SSH as hadoop user to the lead primary node of the EMR cluster with multiple primary nodes.
  - Run the following command to renew Kerberos ticket for hadoop user.

    ```
    kinit -kt <keytab_file> <principal>
    ```

    Typically, the keytab file is located at `/etc/hadoop.keytab` and the principal is in the form of `hadoop/<hostname>@<REALM>`.

  > **Note**
  >
  > This workaround will be effective for the time period the Kerberos ticket is valid. This duration is 10 hours by default, but can configured by your Kerberos settings. You must re-run the above command once the Kerberos ticket expires.

- There is an issue in Amazon EMR 6.1.0 that affects clusters running Presto. After an extended period of time (days), the cluster may throw errors such as, "su: failed to execute /bin/bash: Resource temporarily unavailable" or "shell request failed on channel 0". This issue is caused by an internal Amazon EMR process (InstanceController) that is spawning too many Light Weight

Processes (LWP), which eventually causes the Hadoop user to exceed their nproc limit. This prevents the user from opening additional processes. The solution for this issue is to upgrade to EMR 6.2.0.

6.1.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.3.0	Amazon SageMaker Spark SDK
emr-ddb	4.14.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.1.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-s3-dist-cp	2.14.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	2.0.0	EMR S3Select Connector

Component	Version	Description
emrfs	2.42.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
flink-client	1.11.0	Apache Flink command line client scripts and applications.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.2.1-amzn-1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-1	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-1	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.2.1-amzn-1	HDFS service for managing the Hadoop filesystem journal on HA clusters.

Component	Version	Description
hadoop-httpfs-server	3.2.1-amzn-1	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.2.1-amzn-1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-1	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.2.1-amzn-1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.2.5	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.2.5	Service for serving one or more HBase regions.
hbase-client	2.2.5	HBase command-line client.
hbase-rest-server	2.2.5	Service providing a RESTful HTTP endpoint for HBase.

Component	Version	Description
hbase-thrift-server	2.2.5	Service providing a Thrift endpoint to HBase.
hcatalog-client	3.1.2-amzn-2	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.2-amzn-2	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.2-amzn-2	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.2-amzn-2	Hive command line client.
hive-hbase	3.1.2-amzn-2	Hive-hbase client.
hive-metastore-server	3.1.2-amzn-2	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.2-amzn-2	Service for accepting Hive queries as web requests.
hudi	0.5.2-incubating-amzn-2	Incremental processing framework to power data pipline at low latency and high efficiency.
hudi-presto	0.5.2-incubating-amzn-2	Bundle library for running Presto with Hudi.

Component	Version	Description
hudi-prestosql	0.5.2-incubating-amzn-2	Bundle library for running PrestoSQL with Hudi.
hudi-spark	0.5.2-incubating-amzn-2	Bundle library for running Spark with Hudi.
hue-server	4.7.1	Web application for analyzing data using Hadoop ecosystem applications
jupyterhub	1.1.0	Multi-user server for Jupyter notebooks
livy-server	0.7.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.6.0	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.64+	MariaDB database server.
nvidia-cuda	9.2.88	Nvidia drivers and Cuda toolkit
oozie-client	5.2.0	Oozie command-line client.
oozie-server	5.2.0	Service for accepting Oozie workflow requests.
opencv	4.3.0	Open Source Computer Vision Library.
phoenix-library	5.0.0-HBase-2.0	The phoenix libraries for server and client

Component	Version	Description
phoenix-query-server	5.0.0-HBase-2.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.232	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.232	Service for executing pieces of a query.
presto-client	0.232	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
prestosql-coordinator	338	Service for accepting queries and managing query execution among prestosql-workers.
prestosql-worker	338	Service for executing pieces of a query.
prestosql-client	338	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
pig-client	0.17.0	Pig command-line client.

Component	Version	Description
r	3.4.3	The R Project for Statistical Computing
ranger-kms-server	2.0.0	Apache Ranger Key Management System
spark-client	3.0.0-amzn-0	Spark command-line clients.
spark-history-server	3.0.0-amzn-0	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	3.0.0-amzn-0	In-memory execution engine for YARN.
spark-yarn-slave	3.0.0-amzn-0	Apache Spark libraries needed by YARN slaves.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.1.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.9.0-preview1	Web-based notebook that enables interactive data analytics.

Component	Version	Description
zookeeper-server	3.4.14	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.4.14	ZooKeeper command line client.

6.1.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

emr-6.1.0 classifications

Classifications	Description
capacity-scheduler	Change values in Hadoop's capacity-scheduler .xml file.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.
core-site	Change values in Hadoop's core-site.xml file.
emrfs-site	Change EMRFS settings.
flink-conf	Change flink-conf.yaml settings.
flink-log4j	Change Flink log4j.properties settings.

Classifications	Description
flink-log4j-yarn-session	Change Flink log4j-yarn-session.properties settings.
flink-log4j-cli	Change Flink log4j-cli.properties settings.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.
hadoop-log4j	Change values in Hadoop's log4j.properties file.
hadoop-ssl-server	Change hadoop ssl server configuration
hadoop-ssl-client	Change hadoop ssl client configuration
hbase	Amazon EMR-curated settings for Apache HBase.
hbase-env	Change values in HBase's environment.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.
hbase-metrics	Change values in HBase's hadoop-metrics2-hbase.properties file.
hbase-policy	Change values in HBase's hbase-policy.xml file.
hbase-site	Change values in HBase's hbase-site.xml file.
hdfs-encryption-zones	Configure HDFS encryption zones.
hdfs-env	Change values in the HDFS environment.
hdfs-site	Change values in HDFS's hdfs-site.xml.
hcatalog-env	Change values in HCatalog's environment.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.

Classifications	Description
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.
hive	Amazon EMR-curated settings for Apache Hive.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.
hive-env	Change values in the Hive environment.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.
hive-site	Change values in Hive's hive-site.xml file
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file
hue-ini	Change values in Hue's ini file

Classifications	Description
httpfs-env	Change values in the HTTPFS environment.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.
hadoop-kms-env	Change values in the Hadoop KMS environment.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.
hudi-env	Change values in the Hudi environment.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.
livy-conf	Change values in Livy's livy.conf file.
livy-env	Change values in the Livy environment.
livy-log4j	Change Livy log4j.properties settings.
mapred-env	Change values in the MapReduce application's environment.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.
oozie-env	Change values in Oozie's environment.

Classifications	Description
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.
oozie-site	Change values in Oozie's oozie-site.xml file.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.
phoenix-log4j	Change values in Phoenix's log4j.properties file.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.
pig-env	Change values in the Pig environment.
pig-properties	Change values in Pig's pig.properties file.
pig-log4j	Change values in Pig's log4j.properties file.
presto-log	Change values in Presto's log.properties file.
presto-config	Change values in Presto's config.properties file.
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.
presto-env	Change values in Presto's presto-env.sh file.
presto-node	Change values in Presto's node.properties file.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.

Classifications	Description
presto-connector-hive	Change values in Presto's hive.properties file.
presto-connector-jmx	Change values in Presto's jmx.properties file.
presto-connector-kafka	Change values in Presto's kafka.properties file.
presto-connector-localfile	Change values in Presto's localfile.properties file.
presto-connector-memory	Change values in Presto's memory.properties file.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.
presto-connector-mysql	Change values in Presto's mysql.properties file.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.
presto-connector-raptor	Change values in Presto's raptor.properties file.
presto-connector-redis	Change values in Presto's redis.properties file.
presto-connector-redshift	Change values in Presto's redshift.properties file.
presto-connector-tpch	Change values in Presto's tpch.properties file.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.
prestosql-log	Change values in Presto's log.properties file.
prestosql-config	Change values in Presto's config.properties file.
prestosql-password-authenticator	Change values in Presto's password-authenticator.properties file.

Classifications	Description
prestosql-env	Change values in Presto's presto-env.sh file.
prestosql-node	Change values in PrestoSQL's node.properties file.
prestosql-connector-blackhole	Change values in PrestoSQL's blackhole .properties file.
prestosql-connector-cassandra	Change values in PrestoSQL's cassandra .properties file.
prestosql-connector-hive	Change values in PrestoSQL's hive.properties file.
prestosql-connector-jmx	Change values in PrestoSQL's jmx.properties file.
prestosql-connector-kafka	Change values in PrestoSQL's kafka.properties file.
prestosql-connector-localfile	Change values in PrestoSQL's localfile.properti es file.
prestosql-connector-memory	Change values in PrestoSQL's memory.pr operties file.
prestosql-connector-mongodb	Change values in PrestoSQL's mongodb.p roperties file.
prestosql-connector-mysql	Change values in PrestoSQL's mysql.properties file.
prestosql-connector-postgresql	Change values in PrestoSQL's postgresq l.properties file.
prestosql-connector-raptor	Change values in PrestoSQL's raptor.pr operties file.

Classifications	Description
prestosql-connector-redis	Change values in PrestoSQL's redis.properties file.
prestosql-connector-redshift	Change values in PrestoSQL's redshift. properties file.
prestosql-connector-tpch	Change values in PrestoSQL's tpch.properties file.
prestosql-connector-tpcds	Change values in PrestoSQL's tpcds.properties file.
ranger-kms-dbks-site	Change values in dbks-site.xml file of Ranger KMS.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.
ranger-kms-env	Change values in the Ranger KMS environme nt.
ranger-kms-log4j	Change values in kms-log4j.properties file of Ranger KMS.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.
spark	Amazon EMR-curated settings for Apache Spark.
spark-defaults	Change values in Spark's spark-defaults.conf file.
spark-env	Change values in the Spark environment.
spark-hive-site	Change values in Spark's hive-site.xml file
spark-log4j	Change values in Spark's log4j.properties file.

Classifications	Description
spark-metrics	Change values in Spark's metrics.properties file.
sqoop-env	Change values in Sqoop's environment.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.
tez-site	Change values in Tez's tez-site.xml file.
yarn-env	Change values in the YARN environment.
yarn-site	Change values in YARN's yarn-site.xml file.
zeppelin-env	Change values in the Zeppelin environment.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.

Amazon EMR release 6.0.1

6.0.1 application versions

This release includes the following applications: Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, JupyterHub, Livy, MXNet, Oozie, Phoenix, Presto, Spark, TensorFlow, Tez, Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases

- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.0.1 release notes

This is a release to fix issues with Amazon EMR Scaling when it fails to scale up/scale down a cluster successfully or causes application failures.

Changes, Enhancements, and Resolved Issues

- Fixed an issue where scaling requests failed for a large, highly utilized cluster when Amazon EMR on-cluster daemons were running health checking activities, such as gathering YARN node state and HDFS node state. This was happening because on-cluster daemons were not able to communicate the health status data of a node to internal Amazon EMR components.
- Improved EMR on-cluster daemons to correctly track the node states when IP addresses are reused to improve reliability during scaling operations.
- SPARK-29683. Fixed an issue where job failures occurred during cluster scale-down as Spark was assuming all available nodes were deny-listed.
- YARN-9011. Fixed an issue where job failures occurred due to a race condition in YARN decommissioning when cluster tried to scale up or down.
- Fixed issue with step or job failures during cluster scaling by ensuring that the node states are always consistent between the Amazon EMR on-cluster daemons and YARN/HDFS.
- Fixed an issue where cluster operations such as scale down and step submission failed for Amazon EMR clusters enabled with Kerberos authentication. This was because the Amazon EMR on-cluster daemon did not renew the Kerberos ticket, which is required to securely communicate with HDFS/YARN running on the primary node.
- Newer Amazon EMR releases fix the issue with a lower "Max open files" limit on older AL2 in Amazon EMR. Amazon EMR releases 5.30.1, 5.30.2, 5.31.1, 5.32.1, 6.0.1, 6.1.1, 6.2.1, 5.33.0, 6.3.0 and later now include a permanent fix with a higher "Max open files" setting.
- HTTPS is now enabled by default for Amazon Linux repositories. If you are using an Amazon S3 VPCE policy to restrict access to specific buckets, you must add the new Amazon Linux bucket ARN `arn:aws:s3:::amazonlinux-2-repos-$region/*` to your policy (replace `$region` with the region where the endpoint is). For more information, see this topic in the AWS

discussion forums. Announcement: Amazon Linux 2 now supports the ability to use HTTPS while connecting to package repositories .

6.0.1 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.2.6	Amazon SageMaker Spark SDK
emr-ddb	4.14.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	3.0.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-s3-dist-cp	2.14.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	1.5.0	EMR S3Select Connector

Component	Version	Description
emrfs	2.39.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.2.1-amzn-0.1	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-0.1	HDFS node-level service for storing blocks.
hadoop-hdfs-library	3.2.1-amzn-0.1	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-0.1	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.2.1-amzn-0.1	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-0.1	HTTP endpoint for HDFS operations.

Component	Version	Description
hadoop-kms-server	3.2.1-amzn-0.1	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-0.1	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-0.1	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-0.1	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.2.1-amzn-0.1	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	2.2.3	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.2.3	Service for serving one or more HBase regions.
hbase-client	2.2.3	HBase command-line client.
hbase-rest-server	2.2.3	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.2.3	Service providing a Thrift endpoint to HBase.

Component	Version	Description
hcatalog-client	3.1.2-amzn-0	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.2-amzn-0	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.2-amzn-0	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.2-amzn-0	Hive command line client.
hive-hbase	3.1.2-amzn-0	Hive-hbase client.
hive-metastore-server	3.1.2-amzn-0	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	3.1.2-amzn-0	Service for accepting Hive queries as web requests.
hudi	0.5.0-incubating-amzn-1	Incremental processing framework to power data pipline at low latency and high efficiency.
hudi-presto	0.5.0-incubating-amzn-1	Bundle library for running Presto with Hudi.
hue-server	4.4.0	Web application for analyzing data using Hadoop ecosystem applications

Component	Version	Description
jupyterhub	1.0.0	Multi-user server for Jupyter notebooks
livy-server	0.6.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.5.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.64+	MariaDB database server.
nvidia-cuda	9.2.88	Nvidia drivers and Cuda toolkit
oozie-client	5.1.0	Oozie command-line client.
oozie-server	5.1.0	Service for accepting Oozie workflow requests.
opencv	3.4.0	Open Source Computer Vision Library.
phoenix-library	5.0.0-HBase-2.0	The phoenix libraries for server and client
phoenix-query-server	5.0.0-HBase-2.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API

Component	Version	Description
presto-coordinator	0.230	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.230	Service for executing pieces of a query.
presto-client	0.230	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
r	3.4.3	The R Project for Statistical Computing
spark-client	2.4.4	Spark command-line clients.
spark-history-server	2.4.4	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	2.4.4	In-memory execution engine for YARN.
spark-yarn-slave	2.4.4	Apache Spark libraries needed by YARN slaves.
tensorflow	1.14.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.

Component	Version	Description
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.9.0-SNAPSHOT	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.4.14	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.4.14	ZooKeeper command line client.

6.0.1 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

emr-6.0.1 classifications

Classifications	Description
capacity-scheduler	Change values in Hadoop's capacity-scheduler .xml file.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.
core-site	Change values in Hadoop's core-site.xml file.

Classifications	Description
emrfs-site	Change EMRFS settings.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.
hadoop-log4j	Change values in Hadoop's log4j.properties file.
hadoop-ssl-server	Change hadoop ssl server configuration
hadoop-ssl-client	Change hadoop ssl client configuration
hbase	Amazon EMR-curated settings for Apache HBase.
hbase-env	Change values in HBase's environment.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.
hbase-metrics	Change values in HBase's hadoop-metrics2-hbase.properties file.
hbase-policy	Change values in HBase's hbase-policy.xml file.
hbase-site	Change values in HBase's hbase-site.xml file.
hdfs-encryption-zones	Configure HDFS encryption zones.
hdfs-env	Change values in the HDFS environment.
hdfs-site	Change values in HDFS's hdfs-site.xml.
hcatalog-env	Change values in HCatalog's environment.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.

Classifications	Description
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.
hive	Amazon EMR-curated settings for Apache Hive.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.
hive-env	Change values in the Hive environment.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.
hive-log4j2	Change values in Hive's hive-log4j2.properties file.
hive-site	Change values in Hive's hive-site.xml file
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file
hue-ini	Change values in Hue's ini file
httpfs-env	Change values in the HTTPFS environment.

Classifications	Description
httpfs-site	Change values in Hadoop's httpfs-site.xml file.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.
hadoop-kms-env	Change values in the Hadoop KMS environment.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.
livy-conf	Change values in Livy's livy.conf file.
livy-env	Change values in the Livy environment.
livy-log4j	Change Livy log4j.properties settings.
mapred-env	Change values in the MapReduce application's environment.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.
oozie-env	Change values in Oozie's environment.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.

Classifications	Description
oozie-site	Change values in Oozie's oozie-site.xml file.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.
phoenix-log4j	Change values in Phoenix's log4j.properties file.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.
presto-log	Change values in Presto's log.properties file.
presto-config	Change values in Presto's config.properties file.
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.
presto-env	Change values in Presto's presto-env.sh file.
presto-node	Change values in Presto's node.properties file.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.
presto-connector-hive	Change values in Presto's hive.properties file.
presto-connector-jmx	Change values in Presto's jmx.properties file.
presto-connector-kafka	Change values in Presto's kafka.properties file.
presto-connector-localfile	Change values in Presto's localfile.properties file.

Classifications	Description
presto-connector-memory	Change values in Presto's memory.properties file.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.
presto-connector-mysql	Change values in Presto's mysql.properties file.
presto-connector-postgresql	Change values in Presto's postgresql.properties file.
presto-connector-raptor	Change values in Presto's raptor.properties file.
presto-connector-redis	Change values in Presto's redis.properties file.
presto-connector-redshift	Change values in Presto's redshift.properties file.
presto-connector-tpch	Change values in Presto's tpch.properties file.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.
ranger-kms-dbks-site	Change values in dbks-site.xml file of Ranger KMS.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.
ranger-kms-env	Change values in the Ranger KMS environment.
ranger-kms-log4j	Change values in kms-log4j.properties file of Ranger KMS.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.

Classifications	Description
recordserver-env	Change values in the EMR RecordServer environment.
recordserver-conf	Change values in EMR RecordServer's erver.properties file.
recordserver-log4j	Change values in EMR RecordServer's log4j.properties file.
spark	Amazon EMR-curated settings for Apache Spark.
spark-defaults	Change values in Spark's spark-defaults.conf file.
spark-env	Change values in the Spark environment.
spark-hive-site	Change values in Spark's hive-site.xml file
spark-log4j	Change values in Spark's log4j.properties file.
spark-metrics	Change values in Spark's metrics.properties file.
tez-site	Change values in Tez's tez-site.xml file.
yarn-env	Change values in the YARN environment.
yarn-site	Change values in YARN's yarn-site.xml file.
zeppelin-env	Change values in the Zeppelin environment.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.

Amazon EMR release 6.0.0

6.0.0 application versions

This release includes the following applications: Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, JupyterHub, Livy, MXNet, Oozie, Phoenix, Presto, Spark, TensorFlow, Tez, Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

6.0.0 release notes

The following release notes include information for Amazon EMR release 6.0.0.

Initial release date: March 10, 2020

Supported applications

- AWS SDK for Java version 1.11.711
- Ganglia version 3.7.2
- Hadoop version 3.2.1
- HBase version 2.2.3
- HCatalog version 3.1.2
- Hive version 3.1.2
- Hudi version 0.5.0-incubating
- Hue version 4.4.0
- JupyterHub version 1.0.0

- Livy version 0.6.0
- MXNet version 1.5.1
- Oozie version 5.1.0
- Phoenix version 5.0.0
- Presto version 0.230
- Spark version 2.4.4
- TensorFlow version 1.14.0
- Zeppelin version 0.9.0-SNAPSHOT
- Zookeeper version 3.4.14
- Connectors and drivers: DynamoDB Connector 4.14.0

> **Note**
>
> Flink, Sqoop, Pig, and Mahout are not available in Amazon EMR version 6.0.0.

New features

- YARN Docker Runtime Support - YARN applications, such as Spark jobs, can now run in the context of a Docker container. This allows you to easily define dependencies in a Docker image without the need to install custom libraries on your Amazon EMR cluster. For more information, see Configure Docker Integration and Run Spark applications with Docker using Amazon EMR 6.0.0.
- Hive LLAP Support - Hive now supports the LLAP execution mode for improved query performance. For more information, see Using Hive LLAP.

Changes, enhancements, and resolved issues

- This is a release to fix issues with Amazon EMR Scaling when it fails to scale up/scale down a cluster successfully or causes application failures.
- Fixed an issue where scaling requests failed for a large, highly utilized cluster when Amazon EMR on-cluster daemons were running health checking activities, such as gathering YARN node state and HDFS node state. This was happening because on-cluster daemons were not able to communicate the health status data of a node to internal Amazon EMR components.

- Improved EMR on-cluster daemons to correctly track the node states when IP addresses are reused to improve reliability during scaling operations.
- SPARK-29683. Fixed an issue where job failures occurred during cluster scale-down as Spark was assuming all available nodes were deny-listed.
- YARN-9011. Fixed an issue where job failures occurred due to a race condition in YARN decommissioning when cluster tried to scale up or down.
- Fixed issue with step or job failures during cluster scaling by ensuring that the node states are always consistent between the Amazon EMR on-cluster daemons and YARN/HDFS.
- Fixed an issue where cluster operations such as scale down and step submission failed for Amazon EMR clusters enabled with Kerberos authentication. This was because the Amazon EMR on-cluster daemon did not renew the Kerberos ticket, which is required to securely communicate with HDFS/YARN running on the primary node.
- Newer Amazon EMR releases fix the issue with a lower "Max open files" limit on older AL2 in Amazon EMR. Amazon EMR releases 5.30.1, 5.30.2, 5.31.1, 5.32.1, 6.0.1, 6.1.1, 6.2.1, 5.33.0, 6.3.0 and later now include a permanent fix with a higher "Max open files" setting.
- Amazon Linux
  - Amazon Linux 2 is the operating system for the EMR 6.x release series.
  - `systemd` is used for service management instead of `upstart` used inAmazon Linux 1.
- Java Development Kit (JDK)
  - Corretto JDK 8 is the default JDK for the EMR 6.x release series.
- Scala
  - Scala 2.12 is used with Apache Spark and Apache Livy.
- Python 3
  - Python 3 is now the default version of Python in EMR.
- YARN node labels
  - Beginning with Amazon EMR 6.x release series, the YARN node labels feature is disabled by default. The application master processes can run on both core and task nodes by default. You can enable the YARN node labels feature by configuring following properties: `yarn.node-labels.enabled` and `yarn.node-labels.am.default-node-label-expression`. For more information, see Understanding Primary, Core, and Task Nodes.

Known issues

- **Lower "Max open files" limit on older AL2 [fixed in newer releases].** Amazon EMR releases: emr-5.30.x, emr-5.31.0, emr-5.32.0, emr-6.0.0, emr-6.1.0, and emr-6.2.0 are based on older versions ofAmazon Linux 2 (AL2), which have a lower ulimit setting for "Max open files" when Amazon EMR clusters are created with the default AMI. Amazon EMR releases 5.30.1, 5.30.2, 5.31.1, 5.32.1, 6.0.1, 6.1.1, 6.2.1, 5.33.0, 6.3.0 and later include a permanent fix with a higher "Max open files" setting. Releases with the lower open file limit causes a "Too many open files" error when submitting Spark job. In the impacted releases, the Amazon EMR default AMI has a default ulimit setting of 4096 for "Max open files," which is lower than the 65536 file limit in the latestAmazon Linux 2 AMI. The lower ulimit setting for "Max open files" causes Spark job failure when the Spark driver and executor try to open more than 4096 files. To fix the issue, Amazon EMR has a bootstrap action (BA) script that adjusts the ulimit setting at cluster creation.

  If you are using an older Amazon EMR version that doesn't have the permanent fix for this issue, the following workaround lets you to explicitly set the instance-controller ulimit to a maximum of 65536 files.

  Explicitly set a ulimit from the command line

  1. Edit `/etc/systemd/system/instance-controller.service` to add the following parameters to Service section.

     ```
     LimitNOFILE=65536

     LimitNPROC=65536
     ```

  2. Restart InstanceController

     ```
     $ sudo systemctl daemon-reload

     $ sudo systemctl restart instance-controller
     ```

  Set a ulimit using bootstrap action (BA)

  You can also use a bootstrap action (BA) script to configure the instance-controller ulimit to 65536 files at cluster creation.

  ```
  #!/bin/bash
  for user in hadoop spark hive; do
  ```

```
sudo tee /etc/security/limits.d/$user.conf << EOF
$user - nofile 65536
$user - nproc 65536
EOF
done
for proc in instancecontroller logpusher; do
sudo mkdir -p /etc/systemd/system/$proc.service.d/
sudo tee /etc/systemd/system/$proc.service.d/override.conf << EOF
[Service]
LimitNOFILE=65536
LimitNPROC=65536
EOF
pid=$(pgrep -f aws157.$proc.Main)
sudo prlimit --pid $pid --nofile=65535:65535 --nproc=65535:65535
done
sudo systemctl daemon-reload
```

- Spark interactive shell, including PySpark, SparkR, and spark-shell, does not support using Docker with additional libraries.
- To use Python 3 with Amazon EMR version 6.0.0, you must add PATH to `yarn.nodemanager.env-whitelist`.
- The Live Long and Process (LLAP) functionality is not supported when you use the AWS Glue Data Catalog as the metastore for Hive.
- When using Amazon EMR 6.0.0 with Spark and Docker integration, you need to configure the instances in your cluster with the same instance type and the same amount of EBS volumes to avoid failure when submitting a Spark job with Docker runtime.
- In Amazon EMR 6.0.0, HBase on Amazon S3 storage mode is impacted by the HBASE-24286. issue. HBase master cannot initialize when the cluster is created using existing S3 data.
- Known issue in clusters with multiple primary nodes and Kerberos authentication

  If you run clusters with multiple primary nodes and Kerberos authentication in Amazon EMR releases 5.20.0 and later, you may encounter problems with cluster operations such as scale down or step submission, after the cluster has been running for some time. The time period depends on the Kerberos ticket validity period that you defined. The scale-down problem impacts both automatic scale-down and explicit scale down requests that you submitted. Additional cluster operations can also be impacted.

  Workaround:

  - SSH as hadoop user to the lead primary node of the EMR cluster with multiple primary nodes.

- Run the following command to renew Kerberos ticket for hadoop user.

```
kinit -kt <keytab_file> <principal>
```

Typically, the keytab file is located at `/etc/hadoop.keytab` and the principal is in the form of `hadoop/<hostname>@<REALM>`.

> **Note**
>
> This workaround will be effective for the time period the Kerberos ticket is valid. This duration is 10 hours by default, but can configured by your Kerberos settings. You must re-run the above command once the Kerberos ticket expires.

6.0.0 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *`CommunityVersion`*`-amzn-`*`EmrVersion`*. The *`EmrVersion`* starts at 0. For example, if open source community component named `myapp-component` with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as `2.2-amzn-2`.

Component	Version	Description
aws-sagemaker-spark-sdk	1.2.6	Amazon SageMaker Spark SDK
emr-ddb	4.14.0	Amazon DynamoDB connector for Hadoop ecosystem applications.

Component	Version	Description
emr-goodies	3.0.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-s3-dist-cp	2.14.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	1.5.0	EMR S3Select Connector
emrfs	2.39.0	Amazon S3 connector for Hadoop ecosystem applicati ons.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	3.2.1-amzn-0	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	3.2.1-amzn-0	HDFS node-level service for storing blocks.

Component	Version	Description
hadoop-hdfs-library	3.2.1-amzn-0	HDFS command-line client and library
hadoop-hdfs-namenode	3.2.1-amzn-0	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	3.2.1-amzn-0	HDFS service for managing the Hadoop filesystem journal on HA clusters.
hadoop-httpfs-server	3.2.1-amzn-0	HTTP endpoint for HDFS operations.
hadoop-kms-server	3.2.1-amzn-0	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	3.2.1-amzn-0	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	3.2.1-amzn-0	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	3.2.1-amzn-0	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	3.2.1-amzn-0	Service for retrieving current and historical information for YARN applications.

Component	Version	Description
hbase-hmaster	2.2.3	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	2.2.3	Service for serving one or more HBase regions.
hbase-client	2.2.3	HBase command-line client.
hbase-rest-server	2.2.3	Service providing a RESTful HTTP endpoint for HBase.
hbase-thrift-server	2.2.3	Service providing a Thrift endpoint to HBase.
hcatalog-client	3.1.2-amzn-0	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	3.1.2-amzn-0	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	3.1.2-amzn-0	HTTP endpoint providing a REST interface to HCatalog.
hive-client	3.1.2-amzn-0	Hive command line client.
hive-hbase	3.1.2-amzn-0	Hive-hbase client.
hive-metastore-server	3.1.2-amzn-0	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.

Component	Version	Description
hive-server2	3.1.2-amzn-0	Service for accepting Hive queries as web requests.
hudi	0.5.0-incubating-amzn-1	Incremental processing framework to power data pipline at low latency and high efficiency.
hudi-presto	0.5.0-incubating-amzn-1	Bundle library for running Presto with Hudi.
hue-server	4.4.0	Web application for analyzing data using Hadoop ecosystem applications
jupyterhub	1.0.0	Multi-user server for Jupyter notebooks
livy-server	0.6.0-incubating	REST interface for interacting with Apache Spark
nginx	1.12.1	nginx [engine x] is an HTTP and reverse proxy server
mxnet	1.5.1	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.64+	MariaDB database server.
nvidia-cuda	9.2.88	Nvidia drivers and Cuda toolkit
oozie-client	5.1.0	Oozie command-line client.
oozie-server	5.1.0	Service for accepting Oozie workflow requests.

Component	Version	Description
opencv	3.4.0	Open Source Computer Vision Library.
phoenix-library	5.0.0-HBase-2.0	The phoenix libraries for server and client
phoenix-query-server	5.0.0-HBase-2.0	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.230	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.230	Service for executing pieces of a query.
presto-client	0.230	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
r	3.4.3	The R Project for Statistical Computing
spark-client	2.4.4	Spark command-line clients.
spark-history-server	2.4.4	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	2.4.4	In-memory execution engine for YARN.

Component	Version	Description
spark-yarn-slave	2.4.4	Apache Spark libraries needed by YARN slaves.
tensorflow	1.14.0	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.41+	Apache HTTP server.
zeppelin-server	0.9.0-SNAPSHOT	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.4.14	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.4.14	ZooKeeper command line client.

6.0.0 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

emr-6.0.0 classifications

Classifications	Description
capacity-scheduler	Change values in Hadoop's capacity-scheduler .xml file.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.
core-site	Change values in Hadoop's core-site.xml file.
emrfs-site	Change EMRFS settings.
hadoop-env	Change values in the Hadoop environment for all Hadoop components.
hadoop-log4j	Change values in Hadoop's log4j.properties file.
hadoop-ssl-server	Change hadoop ssl server configuration
hadoop-ssl-client	Change hadoop ssl client configuration
hbase	Amazon EMR-curated settings for Apache HBase.
hbase-env	Change values in HBase's environment.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.
hbase-metrics	Change values in HBase's hadoop-metrics2-hbase.properties file.
hbase-policy	Change values in HBase's hbase-policy.xml file.
hbase-site	Change values in HBase's hbase-site.xml file.

Classifications	Description
hdfs-encryption-zones	Configure HDFS encryption zones.
hdfs-env	Change values in the HDFS environment.
hdfs-site	Change values in HDFS's hdfs-site.xml.
hcatalog-env	Change values in HCatalog's environment.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.
hive	Amazon EMR-curated settings for Apache Hive.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.
hive-env	Change values in the Hive environment.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.

Classifications	Description
hive-log4j2	Change values in Hive's hive-log4j2.properties file.
hive-site	Change values in Hive's hive-site.xml file
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file
hue-ini	Change values in Hue's ini file
httpfs-env	Change values in the HTTPFS environment.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.
hadoop-kms-env	Change values in the Hadoop KMS environment.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.
livy-conf	Change values in Livy's livy.conf file.
livy-env	Change values in the Livy environment.
livy-log4j	Change Livy log4j.properties settings.

Classifications	Description
mapred-env	Change values in the MapReduce application's environment.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.
oozie-env	Change values in Oozie's environment.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.
oozie-site	Change values in Oozie's oozie-site.xml file.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.
phoenix-log4j	Change values in Phoenix's log4j.properties file.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.
presto-log	Change values in Presto's log.properties file.
presto-config	Change values in Presto's config.properties file.
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.
presto-env	Change values in Presto's presto-env.sh file.
presto-node	Change values in Presto's node.properties file.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.

Classifications	Description
presto-connector-cassandra	Change values in Presto's cassandra.properties file.
presto-connector-hive	Change values in Presto's hive.properties file.
presto-connector-jmx	Change values in Presto's jmx.properties file.
presto-connector-kafka	Change values in Presto's kafka.properties file.
presto-connector-localfile	Change values in Presto's localfile.properties file.
presto-connector-memory	Change values in Presto's memory.properties file.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.
presto-connector-mysql	Change values in Presto's mysql.properties file.
presto-connector-postgresql	Change values in Presto's postgresql.propert ies file.
presto-connector-raptor	Change values in Presto's raptor.properties file.
presto-connector-redis	Change values in Presto's redis.properties file.
presto-connector-redshift	Change values in Presto's redshift.properties file.
presto-connector-tpch	Change values in Presto's tpch.properties file.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.
ranger-kms-dbks-site	Change values in dbks-site.xml file of Ranger KMS.

Classifications	Description
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.
ranger-kms-env	Change values in the Ranger KMS environme nt.
ranger-kms-log4j	Change values in kms-log4j.properties file of Ranger KMS.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.
recordserver-env	Change values in the EMR RecordServer environment.
recordserver-conf	Change values in EMR RecordServer's erver.pro perties file.
recordserver-log4j	Change values in EMR RecordServer's log4j.pro perties file.
spark	Amazon EMR-curated settings for Apache Spark.
spark-defaults	Change values in Spark's spark-defaults.conf file.
spark-env	Change values in the Spark environment.
spark-hive-site	Change values in Spark's hive-site.xml file
spark-log4j	Change values in Spark's log4j.properties file.
spark-metrics	Change values in Spark's metrics.properties file.
tez-site	Change values in Tez's tez-site.xml file.

Classifications	Description
yarn-env	Change values in the YARN environment.
yarn-site	Change values in YARN's yarn-site.xml file.
zeppelin-env	Change values in the Zeppelin environment.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.

Amazon EMR 5.x release versions

This section contains application versions, release notes, component versions, and configuration classifications available in each Amazon EMR 5.x release version.

When you launch a cluster, you can choose from multiple releases of Amazon EMR. This allows you to test and use application versions that fit your compatibility requirements. You specify the release number with the *release label*. Release labels are in the form `emr-x.x.x`. For example, `emr-7.12.0`.

New Amazon EMR releases are made available in different Regions over a period of several days, beginning with the first Region on the initial release date. The latest release version may not be available in your Region during this period.

For a comprehensive table of application versions in every Amazon EMR 5.x release, see Application versions in Amazon EMR 5.x releases.

Topics

- Application versions in Amazon EMR 5.x releases
- Amazon EMR release 5.36.2
- Amazon EMR release 5.36.1
- Amazon EMR release 5.36.0
- Amazon EMR release 5.35.0
- Amazon EMR release 5.34.0

- Amazon EMR release 5.33.1
- Amazon EMR release 5.33.0
- Amazon EMR release 5.32.1
- Amazon EMR release 5.32.0
- Amazon EMR release 5.31.1
- Amazon EMR release 5.31.0
- Amazon EMR release 5.30.2
- Amazon EMR release 5.30.1
- Amazon EMR release 5.30.0
- Amazon EMR release 5.29.0
- Amazon EMR release 5.28.1
- Amazon EMR release 5.28.0
- Amazon EMR release 5.27.1
- Amazon EMR release 5.27.0
- Amazon EMR release 5.26.0
- Amazon EMR release 5.25.0
- Amazon EMR release 5.24.1
- Amazon EMR release 5.24.0
- Amazon EMR release 5.23.1
- Amazon EMR release 5.23.0
- Amazon EMR release 5.22.0
- Amazon EMR release 5.21.2
- Amazon EMR release 5.21.1
- Amazon EMR release 5.21.0
- Amazon EMR release 5.20.1
- Amazon EMR release 5.20.0
- Amazon EMR release 5.19.1
- Amazon EMR release 5.19.0
- Amazon EMR release 5.18.1

- Amazon EMR release 5.18.0
- Amazon EMR release 5.17.2
- Amazon EMR release 5.17.1
- Amazon EMR release 5.17.0
- Amazon EMR release 5.16.1
- Amazon EMR release 5.16.0
- Amazon EMR release 5.15.1
- Amazon EMR release 5.15.0
- Amazon EMR release 5.14.2
- Amazon EMR release 5.14.1
- Amazon EMR release 5.14.0
- Amazon EMR release 5.13.1
- Amazon EMR release 5.13.0
- Amazon EMR release 5.12.3
- Amazon EMR release 5.12.2
- Amazon EMR release 5.12.1
- Amazon EMR release 5.12.0
- Amazon EMR release 5.11.4
- Amazon EMR release 5.11.3
- Amazon EMR release 5.11.2
- Amazon EMR release 5.11.1
- Amazon EMR release 5.11.0
- Amazon EMR release 5.10.1
- Amazon EMR release 5.10.0
- Amazon EMR release 5.9.1
- Amazon EMR release 5.9.0
- Amazon EMR release 5.8.3
- Amazon EMR release 5.8.2
- Amazon EMR release 5.8.1

- Amazon EMR release 5.8.0
- Amazon EMR release 5.7.1
- Amazon EMR release 5.7.0
- Amazon EMR release 5.6.1
- Amazon EMR release 5.6.0
- Amazon EMR release 5.5.4
- Amazon EMR release 5.5.3
- Amazon EMR release 5.5.2
- Amazon EMR release 5.5.1
- Amazon EMR release 5.5.0
- Amazon EMR release 5.4.1
- Amazon EMR release 5.4.0
- Amazon EMR release 5.3.2
- Amazon EMR release 5.3.1
- Amazon EMR release 5.3.0
- Amazon EMR release 5.2.3
- Amazon EMR release 5.2.2
- Amazon EMR release 5.2.1
- Amazon EMR release 5.2.0
- Amazon EMR release 5.1.1
- Amazon EMR release 5.1.0
- Amazon EMR release 5.0.3
- Amazon EMR release 5.0.2
- Amazon EMR release 5.0.1
- Amazon EMR release 5.0.0

Application versions in Amazon EMR 5.x releases

For a comprehensive table that lists the application versions available in each Amazon EMR 5.x release, open Application versions in Amazon EMR 5.x releases in your browser.

Amazon EMR release 5.36.2

5.36.2 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Mahout, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

5.36.2 release notes

The following release notes include information for Amazon EMR release 5.36.2. Changes are relative to 5.36.1. For information on the release timeline, see the change log.

Changes, enhancements, and resolved issues

- This releases improves cluster scale-down logic so that Amazon EMR doesn't scale-down core nodes below the HDFS replication factor setting for the cluster. This improvement fulfills data redundancy requirements, and reduces the chance that a scaling operation might stall.
- This release adds a new retry mechanism to the cluster scaling workflow for EMR clusters that run Presto or Trino. This improvement reduces the risk that cluster resize runs indefinitely due to a single failed resize operation. It also improves cluster utilization, because your cluster scales up and down faster.
- Fixes an issue where cluster scale-down operations might stall while Amazon EMR gracefully decommissions a core node and it turns unhealthy before it is fully decommissioned.
- Improves the stability of a node in a high-availability cluster with multiple primary nodes when Amazon EMR restarts a single node.

- Optimizes log management with Amazon EMR running on Amazon EC2. As a result, you might see a slight reduction in storage costs for your cluster logs.
- Improves the management of ZooKeeper transaction log files that are maintained on primary nodes to minimize scenarios where the log files grow out of bounds and interrupt cluster operations.
- Fixes a rare bug which can cause a high-availability cluster with multiple primary nodes to fail due to not being able to communicate with the Yarn ResourceManager.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.

5.36.2 component versions

The components that Amazon EMR installs with this release are listed below. Some are installed as part of big-data application packages. Others are unique to Amazon EMR and installed for system processes and features. These typically start with `emr` or `aws`. Big-data application packages in the

most recent Amazon EMR release are usually the latest version found in the community. We make community releases available in Amazon EMR as quickly as possible.

Some components in Amazon EMR differ from community versions. These components have a version label in the form *CommunityVersion*-amzn-*EmrVersion*. The *EmrVersion* starts at 0. For example, if open source community component named myapp-component with version 2.2 has been modified three times for inclusion in different Amazon EMR releases, its release version is listed as 2.2-amzn-2.

Component	Version	Description
aws-sagemaker-spark-sdk	1.4.1	Amazon SageMaker Spark SDK
emr-ddb	4.16.0	Amazon DynamoDB connector for Hadoop ecosystem applications.
emr-goodies	2.16.0	Extra convenience libraries for the Hadoop ecosystem.
emr-kinesis	3.5.0	Amazon Kinesis connector for Hadoop ecosystem applicati ons.
emr-notebook-env	1.5.0	Conda env for emr notebook which includes jupyter enterprise gateway
emr-s3-dist-cp	2.21.0	Distributed copy application optimized for Amazon S3.
emr-s3-select	1.7.0	EMR S3Select Connector
emrfs	2.51.0	Amazon S3 connector for Hadoop ecosystem applicati ons.

Component	Version	Description
flink-client	1.14.2	Apache Flink command line client scripts and applications.
flink-jobmanager-config	1.14.2	Managing resources on EMR nodes for Apache Flink JobManager.
ganglia-monitor	3.7.2	Embedded Ganglia agent for Hadoop ecosystem applicati ons along with the Ganglia monitoring agent.
ganglia-metadata-collector	3.7.2	Ganglia metadata collector for aggregating metrics from Ganglia monitoring agents.
ganglia-web	3.7.1	Web application for viewing metrics collected by the Ganglia metadata collector.
hadoop-client	2.10.1-amzn-4	Hadoop command-line clients such as 'hdfs', 'hadoop', or 'yarn'.
hadoop-hdfs-datanode	2.10.1-amzn-4	HDFS node-level service for storing blocks.
hadoop-hdfs-library	2.10.1-amzn-4	HDFS command-line client and library
hadoop-hdfs-namenode	2.10.1-amzn-4	HDFS service for tracking file names and block locations.
hadoop-hdfs-journalnode	2.10.1-amzn-4	HDFS service for managing the Hadoop filesystem journal on HA clusters.

Component	Version	Description
hadoop-httpfs-server	2.10.1-amzn-4	HTTP endpoint for HDFS operations.
hadoop-kms-server	2.10.1-amzn-4	Cryptographic key management server based on Hadoop's KeyProvider API.
hadoop-mapred	2.10.1-amzn-4	MapReduce execution engine libraries for running a MapReduce application.
hadoop-yarn-nodemanager	2.10.1-amzn-4	YARN service for managing containers on an individual node.
hadoop-yarn-resour cemanager	2.10.1-amzn-4	YARN service for allocatin g and managing cluster resources and distributed applications.
hadoop-yarn-timeline-server	2.10.1-amzn-4	Service for retrieving current and historical information for YARN applications.
hbase-hmaster	1.4.13	Service for an HBase cluster responsible for coordination of Regions and execution of administrative commands.
hbase-region-server	1.4.13	Service for serving one or more HBase regions.
hbase-client	1.4.13	HBase command-line client.
hbase-rest-server	1.4.13	Service providing a RESTful HTTP endpoint for HBase.

Component	Version	Description
hbase-thrift-server	1.4.13	Service providing a Thrift endpoint to HBase.
hcatalog-client	2.3.9-amzn-2	The 'hcat' command line client for manipulating hcatalog-server.
hcatalog-server	2.3.9-amzn-2	Service providing HCatalog, a table and storage management layer for distributed applications.
hcatalog-webhcat-server	2.3.9-amzn-2	HTTP endpoint providing a REST interface to HCatalog.
hive-client	2.3.9-amzn-2	Hive command line client.
hive-hbase	2.3.9-amzn-2	Hive-hbase client.
hive-metastore-server	2.3.9-amzn-2	Service for accessing the Hive metastore, a semantic repository storing metadata for SQL on Hadoop operation s.
hive-server2	2.3.9-amzn-2	Service for accepting Hive queries as web requests.
hudi	0.10.1-amzn-1	Incremental processing framework to power data pipeline at low latency and high efficiency.
hudi-spark	0.10.1-amzn-1	Bundle library for running Spark with Hudi.

Component	Version	Description
hudi-presto	0.10.1-amzn-1	Bundle library for running Presto with Hudi.
hue-server	4.10.0	Web application for analyzing data using Hadoop ecosystem applications
jupyterhub	1.4.1	Multi-user server for Jupyter notebooks
livy-server	0.7.1-incubating	REST interface for interacting with Apache Spark
nginx	1.13.1	nginx [engine x] is an HTTP and reverse proxy server
mahout-client	0.13.0	Library for machine learning.
mxnet	1.8.0	A flexible, scalable, and efficient library for deep learning.
mariadb-server	5.5.68	MySQL database server.
nvidia-cuda	11.0.194	Nvidia drivers and Cuda toolkit
oozie-client	5.2.1	Oozie command-line client.
oozie-server	5.2.1	Service for accepting Oozie workflow requests.
opencv	4.5.0	Open Source Computer Vision Library.
phoenix-library	4.14.3-HBase-1.4	The phoenix libraries for server and client

Component	Version	Description
phoenix-query-server	4.14.3-HBase-1.4	A light weight server providing JDBC access as well as Protocol Buffers and JSON format access to the Avatica API
presto-coordinator	0.267-amzn-1	Service for accepting queries and managing query execution among presto-workers.
presto-worker	0.267-amzn-1	Service for executing pieces of a query.
presto-client	0.267-amzn-1	Presto command-line client which is installed on an HA cluster's stand-by masters where Presto server is not started.
pig-client	0.17.0	Pig command-line client.
r	4.0.2	The R Project for Statistical Computing
ranger-kms-server	1.2.0	Apache Ranger Key Management System
spark-client	2.4.8-amzn-2	Spark command-line clients.
spark-history-server	2.4.8-amzn-2	Web UI for viewing logged events for the lifetime of a completed Spark application.
spark-on-yarn	2.4.8-amzn-2	In-memory execution engine for YARN.

Component	Version	Description
spark-yarn-slave	2.4.8-amzn-2	Apache Spark libraries needed by YARN slaves.
sqoop-client	1.4.7	Apache Sqoop command-line client.
tensorflow	2.4.1	TensorFlow open source software library for high performance numerical computation.
tez-on-yarn	0.9.2	The tez YARN application and libraries.
webserver	2.4.25+	Apache HTTP server.
zeppelin-server	0.10.0	Web-based notebook that enables interactive data analytics.
zookeeper-server	3.4.14	Centralized service for maintaining configura tion information, naming, providing distributed synchronization, and providing group services.
zookeeper-client	3.4.14	ZooKeeper command line client.

5.36.2 configuration classifications

Configuration classifications allow you to customize applications. These often correspond to a configuration XML file for the application, such as `hive-site.xml`. For more information, see Configure applications.

Reconfiguration actions occur when you specify a configuration for instance groups in a running cluster. Amazon EMR only initiates reconfiguration actions for the classifications that you modify. For more information, see Reconfigure an instance group in a running cluster.

emr-5.36.2 classifications

Classifications	Description	Reconfiguration Actions
capacity-scheduler	Change values in Hadoop's capacity-scheduler.xml file.	Restarts the ResourceManager service.
container-executor	Change values in Hadoop YARN's container-executor.cfg file.	Not available.
container-log4j	Change values in Hadoop YARN's container-log4j.properties file.	Not available.
core-site	Change values in Hadoop's core-site.xml file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Hadoop KMS, Ranger KMS, HiveServer2, Hive MetaStore, Hadoop Httpfs, and MapReduce-HistoryServer.
docker-conf	Change docker related settings.	Not available.
emrfs-site	Change EMRFS settings.	Restarts the Hadoop HDFS services Namenode,

Classifications	Description	Reconfiguration Actions
		SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts HBaseRegi onserver, HBaseMaster, HBaseThrift, HBaseRest, HiveServer2, Hive MetaStore , Hadoop Httpfs, and MapReduce-HistoryServer.
flink-conf	Change flink-conf.yaml settings.	Restarts Flink history server.
flink-log4j	Change Flink log4j.properties settings.	Restarts Flink history server.
flink-log4j-session	Change Flink log4j-ses sion.properties settings for Kubernetes/Yarn session.	Not available.
flink-log4j-cli	Change Flink log4j-cli .properties settings.	Restarts Flink history server.

Classifications	Description	Reconfiguration Actions
hadoop-env	Change values in the Hadoop environment for all Hadoop components.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts PhoenixQu eryserver, HiveServer2, Hive MetaStore, and MapReduce-HistoryServer.
hadoop-log4j	Change values in Hadoop's log4j.properties file.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Resta rts the Hadoop YARN services ResourceManager, NodeManager, ProxyServ er, and TimelineServer. Ad ditionally restarts Hadoop KMS, Hadoop Httpfs, and MapReduce-HistoryServer.
hadoop-ssl-server	Change hadoop ssl server configuration	Not available.
hadoop-ssl-client	Change hadoop ssl client configuration	Not available.

Classifications	Description	Reconfiguration Actions
hbase	Amazon EMR-curated settings for Apache HBase.	Custom EMR specific property. Sets emrfs-site and hbase-site configs. See those for their associated restarts.
hbase-env	Change values in HBase's environment.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-log4j	Change values in HBase's hbase-log4j.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-metrics	Change values in HBase's hadoop-metrics2-hb ase.properties file.	Restarts the HBase services RegionServer, HBaseMaster, ThriftServer, RestServer.
hbase-policy	Change values in HBase's hbase-policy.xml file.	Not available.
hbase-site	Change values in HBase's hbase-site.xml file.	Restarts the HBase services RegionServer, HBaseMast er, ThriftServer, RestServer. Additionally restarts Phoenix QueryServer.
hdfs-encryption-zones	Configure HDFS encryption zones.	Should not be reconfigured.
hdfs-site	Change values in HDFS's hdfs-site.xml.	Restarts the Hadoop HDFS services Namenode, SecondaryNamenode, Datanode, ZKFC, and Journalnode. Additionally restarts Hadoop Httpfs.

Classifications	Description	Reconfiguration Actions
hcatalog-env	Change values in HCatalog's environment.	Restarts Hive HCatalog Server.
hcatalog-server-jndi	Change values in HCatalog's jndi.properties.	Restarts Hive HCatalog Server.
hcatalog-server-proto-hive-site	Change values in HCatalog's proto-hive-site.xml.	Restarts Hive HCatalog Server.
hcatalog-webhcat-env	Change values in HCatalog WebHCat's environment.	Restarts Hive WebHCat Server.
hcatalog-webhcat-log4j2	Change values in HCatalog WebHCat's log4j2.properties.	Restarts Hive WebHCat Server.
hcatalog-webhcat-site	Change values in HCatalog WebHCat's webhcat-site.xml file.	Restarts Hive WebHCat Server.
hive-beeline-log4j2	Change values in Hive's beeline-log4j2.properties file.	Not available.
hive-parquet-logging	Change values in Hive's parquet-logging.properties file.	Not available.
hive-env	Change values in the Hive environment.	Restarts HiveServer2 and HiveMetastore. Runs Hive schemaTool CLI commands to verify hive-metastore.
hive-exec-log4j2	Change values in Hive's hive-exec-log4j2.properties file.	Restarts HiveServer2 and HiveMetastore.
hive-llap-daemon-log4j2	Change values in Hive's llap-daemon-log4j2.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
hive-log4j2	Change values in Hive's hive-log4j2.properties file.	Not available.
hive-site	Change values in Hive's hive-site.xml file	Restarts HiveServer2 and HiveMetastore. Runs Hive schemaTool CLI commands to verify hive-metastore. Also restarts Oozie and Zeppelin.
hiveserver2-site	Change values in Hive Server2's hiveserver2-site.xml file	Not available.
hue-ini	Change values in Hue's ini file	Restarts Hue. Also activates Hue config override CLI commands to pick up new configurations.
httpfs-env	Change values in the HTTPFS environment.	Restarts Hadoop Httpfs service.
httpfs-site	Change values in Hadoop's httpfs-site.xml file.	Restarts Hadoop Httpfs service.
hadoop-kms-acls	Change values in Hadoop's kms-acls.xml file.	Not available.
hadoop-kms-env	Change values in the Hadoop KMS environment.	Restarts Hadoop-KMS service.
hadoop-kms-log4j	Change values in Hadoop's kms-log4j.properties file.	Not available.
hadoop-kms-site	Change values in Hadoop's kms-site.xml file.	Restarts Hadoop-KMS and Ranger-KMS service.

Classifications	Description	Reconfiguration Actions
hudi-env	Change values in the Hudi environment.	Not available.
hudi-defaults	Change values in Hudi's hudi-defaults.conf file.	Not available.
jupyter-notebook-conf	Change values in Jupyter Notebook's jupyter_notebook_config.py file.	Not available.
jupyter-hub-conf	Change values in JupyterHubs's jupyterhub_config.py file.	Not available.
jupyter-s3-conf	Configure Jupyter Notebook S3 persistence.	Not available.
jupyter-sparkmagic-conf	Change values in Sparkmagic's config.json file.	Not available.
livy-conf	Change values in Livy's livy.conf file.	Restarts Livy Server.
livy-env	Change values in the Livy environment.	Restarts Livy Server.
livy-log4j	Change Livy log4j.properties settings.	Restarts Livy Server.
mapred-env	Change values in the MapReduce application's environment.	Restarts Hadoop MapReduce-HistoryServer.
mapred-site	Change values in the MapReduce application's mapred-site.xml file.	Restarts Hadoop MapReduce-HistoryServer.

Classifications	Description	Reconfiguration Actions
oozie-env	Change values in Oozie's environment.	Restarts Oozie.
oozie-log4j	Change values in Oozie's oozie-log4j.properties file.	Restarts Oozie.
oozie-site	Change values in Oozie's oozie-site.xml file.	Restarts Oozie.
phoenix-hbase-metrics	Change values in Phoenix's hadoop-metrics2-hbase.properties file.	Not available.
phoenix-hbase-site	Change values in Phoenix's hbase-site.xml file.	Not available.
phoenix-log4j	Change values in Phoenix's log4j.properties file.	Restarts Phoenix-QueryServer.
phoenix-metrics	Change values in Phoenix's hadoop-metrics2-phoenix.properties file.	Not available.
pig-env	Change values in the Pig environment.	Not available.
pig-properties	Change values in Pig's pig.properties file.	Restarts Oozie.
pig-log4j	Change values in Pig's log4j.properties file.	Not available.
presto-log	Change values in Presto's log.properties file.	Restarts Presto-Server.
presto-config	Change values in Presto's config.properties file.	Restarts Presto-Server.

Classifications	Description	Reconfiguration Actions
presto-password-authenticator	Change values in Presto's password-authenticator.properties file.	Not available.
presto-env	Change values in Presto's presto-env.sh file.	Restarts Presto-Server.
presto-node	Change values in Presto's node.properties file.	Not available.
presto-connector-blackhole	Change values in Presto's blackhole.properties file.	Not available.
presto-connector-cassandra	Change values in Presto's cassandra.properties file.	Not available.
presto-connector-hive	Change values in Presto's hive.properties file.	Restarts Presto-Server.
presto-connector-jmx	Change values in Presto's jmx.properties file.	Not available.
presto-connector-kafka	Change values in Presto's kafka.properties file.	Not available.
presto-connector-localfile	Change values in Presto's localfile.properties file.	Not available.
presto-connector-memory	Change values in Presto's memory.properties file.	Not available.
presto-connector-mongodb	Change values in Presto's mongodb.properties file.	Not available.
presto-connector-mysql	Change values in Presto's mysql.properties file.	Not available.

Classifications	Description	Reconfiguration Actions
presto-connector-postgresql	Change values in Presto's postgresql.properties file.	Not available.
presto-connector-raptor	Change values in Presto's raptor.properties file.	Not available.
presto-connector-redis	Change values in Presto's redis.properties file.	Not available.
presto-connector-redshift	Change values in Presto's redshift.properties file.	Not available.
presto-connector-tpch	Change values in Presto's tpch.properties file.	Not available.
presto-connector-tpcds	Change values in Presto's tpcds.properties file.	Not available.
ranger-kms-dbks-site	Change values in dbks-site .xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-site	Change values in ranger-kms-site.xml file of Ranger KMS.	Restarts Ranger KMS Server.
ranger-kms-env	Change values in the Ranger KMS environment.	Restarts Ranger KMS Server.
ranger-kms-log4j	Change values in kms-log4j .properties file of Ranger KMS.	Not available.
ranger-kms-db-ca	Change values for CA file on S3 for MySQL SSL connection with Ranger KMS.	Not available.
recordserver-env	Change values in the EMR RecordServer environment.	Restarts EMR record server.

Classifications	Description	Reconfiguration Actions
recordserver-conf	Change values in EMR RecordServer's erver.properties file.	Restarts EMR record server.
recordserver-log4j	Change values in EMR RecordServer's log4j.properties file.	Restarts EMR record server.
spark	Amazon EMR-curated settings for Apache Spark.	This property modifies spark-defaults. See actions there.
spark-defaults	Change values in Spark's spark-defaults.conf file.	Restarts Spark history server and Spark thrift server.
spark-env	Change values in the Spark environment.	Restarts Spark history server and Spark thrift server.
spark-hive-site	Change values in Spark's hive-site.xml file	Not available.
spark-log4j	Change values in Spark's log4j.properties file.	Restarts Spark history server and Spark thrift server.
spark-metrics	Change values in Spark's metrics.properties file.	Restarts Spark history server and Spark thrift server.
sqoop-env	Change values in Sqoop's environment.	Not available.
sqoop-oraoop-site	Change values in Sqoop OraOop's oraoop-site.xml file.	Not available.
sqoop-site	Change values in Sqoop's sqoop-site.xml file.	Not available.
tez-site	Change values in Tez's tez-site.xml file.	Restarts Oozie.

Classifications	Description	Reconfiguration Actions
yarn-env	Change values in the YARN environment.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts MapReduce-HistoryServer.
yarn-site	Change values in YARN's yarn-site.xml file.	Restarts the Hadoop YARN services ResourceManager, NodeManager, ProxyServer, and TimelineServer. Additionally restarts Livy Server and MapReduce-HistoryServer.
zeppelin-env	Change values in the Zeppelin environment.	Restarts Zeppelin.
zeppelin-site	Change configuration settings in zeppelin-site.xml.	Restarts Zeppelin.
zookeeper-config	Change values in ZooKeeper's zoo.cfg file.	Restarts Zookeeper server.
zookeeper-log4j	Change values in ZooKeeper's log4j.properties file.	Restarts Zookeeper server.

5.36.2 change log

Change log for 5.36.2 release and release notes

Date	Event	Description
2024-05-28	Deployment complete	Amazon EMR 5.36.2 fully deployed to all supported Regions

Date	Event	Description
2024-05-28	Docs publication	Amazon EMR 5.36.2 release notes first published
2024-05-20	Initial release	Amazon EMR 5.36.2 first deployed to limited commercial Regions

Amazon EMR release 5.36.1

5.36.1 application versions

This release includes the following applications: Flink, Ganglia, HBase, HCatalog, Hadoop, Hive, Hudi, Hue, JupyterEnterpriseGateway, JupyterHub, Livy, MXNet, Mahout, Oozie, Phoenix, Pig, Presto, Spark, Sqoop, TensorFlow, Tez, Zeppelin, and ZooKeeper.

The table below lists the application versions available in this release of Amazon EMR and the application versions in the preceding three Amazon EMR releases (when applicable).

For a comprehensive history of application versions for each release of Amazon EMR, see the following topics:

- Application versions in Amazon EMR 7.x releases
- Application versions in Amazon EMR 6.x releases
- Application versions in Amazon EMR 5.x releases
- Application versions in Amazon EMR 4.x releases

5.36.1 release notes

The following release notes include information for Amazon EMR release 5.36.1. Changes are relative to 5.36.0. For information on the release timeline, see the change log.

Changes, enhancements, and resolved issues

- Amazon EMR release 5.36.1 adds support for archiving logs to Amazon S3 during cluster scale-down. In previous 5.x releases, you could only archive log files to Amazon S3 during cluster termination. This improvement ensures that log files generated on the cluster persist on Amazon

S3 even after the node is terminated. For more information, see Configure cluster logging and debugging.

- The 5.36.1 release improves the on-cluster log management daemon to monitor additional log folders in your EMR cluster. This improvement minimizes disk over-utilization scenarios.
- The 5.36.1 release automatically restarts the on-cluster log management daemon when it stops. This improvement reduces the risk for nodes to appear unhealthy due to disk over-utilization.
- The 5.36.1 release fixes an issue where Amazon EMR daemons on the primary node would maintain stale metadata for terminated instances in the cluster. Maintaining stale data might cause on-cluster CPU and memory usage to grow without bounds, and ultimately cause cluster failures.
- For clusters that are launched with multiple primary nodes, the 5.36.1 release fixes an issue where an Amazon EC2 hardware failure on one of the primary nodes could cause a second primary node to fail and render your cluster unstable.
- For clusters that are configured with in-transit encryption, Managed Scaling is now *Spark shuffle data* aware. Spark shuffle data is data that Spark redistributes across partitions to perform specific operations. During scale down, Managed Scaling ignores the instances with shuffle data. This prevents job re-attempts and re-computations, which are costly for price and performance. For more information on shuffle operations, see the Spark Programming Guide.
- When you launch a cluster with *the latest patch release* of Amazon EMR 5.36 or higher, 6.6 or higher, or 7.0 or higher, Amazon EMR uses the latest Amazon Linux 2023 or Amazon Linux 2 release for the default Amazon EMR AMI. For more information, see Using the default Amazon Linux AMI for Amazon EMR.
